Repo: C:\Users\avidu\Projects\badminton-highlight-indexer (branch docs/pmf-field-signals ? uncommitted working-tree changes included; read the files as they are on disk).
Files under review (read all in full):
- docs/PRODUCT_FIELD_ASSOCIATE_FLYER.md (NEW - the recruiting flyer the owner hands to CANDIDATES; the owner recruits personally)
- docs/FIELD_RESEARCH_ASSOCIATE_FLYER.md (reframed - now the hired associate's visit PLAYBOOK: coach script Q1-Q7, demo-after-Q6 rule, student questions, ground rules, Phase-2 record-and-show-back)
- docs/FIELD_VISIT_ANSWER_SHEET.md (per-visit form incl. new demo-reaction + student blocks)
- docs/PMF_FIELD_SIGNALS.md (the pre-registered decision layer; demo/student data = product feedback, NOT verdict signals)
Grounding (read as needed): docs/PMF_MARKET_RESEARCH.md, docs/UI_PROPOSAL.md + docs/UI_ALPHA_EXECUTION_PLAN.md + docs/HOSTING_PLAN.md (what the UI/hosting can honestly claim today), CLAUDE.md guardrails (minors exclusion, consent).

Owner's spec (verbatim intent): hire a person who visits academies, talks to coaches AND students, to understand how the project helps them and gather improvement feedback - full stop. Stretch goal: that person helps record videos, we run the pipeline, show the academy a sample result ("how it will look for them"). UI will be ready by then; hosting plan exposes the service to a few allwlisted people. The flyer must let a reasonable (non-technical) person understand the gig; the owner recruits personally.

A critic claims the following flaw. Adversarially verify by reading the actual files - try to REFUTE it. Default to refuted if pedantic, out of scope for a one-person 3-4 week field gig run personally by the owner, or already handled elsewhere in the kit.

CLAIM [low] PMF_FIELD_SIGNALS still says 'flyer' where it means the playbook ? rule-number references now resolve to the wrong document
After the reframe ('flyer' became two docs), three references in
C:\Users\avidu\Projects\badminton-highlight-indexer\docs\PMF_FIELD_SIGNALS.md dangle: \$5 line 161 '(flyer rule 7)' and \$2 line 73 'per the flyer's ground rule 4' cite rule numbers that exist only in the playbook (FIELD_RESEARCH_ASSOCIATE_FLYER.md rules 7 and 4) ? the actual recruiting flyer has a 3-item rule list where recording is rule 2 and there is no rule 4 or 7. Line 13 'the flyer collects answers' is also stale (the sheet collects; the playbook scripts). Sampling note line 75-76 'the flyer sends the associate to 10-15 good academies' is ambiguous the same way. For the record, the demo-after-Q6 rule itself survived the reframe consistently in all four docs, and the demo asset the signals doc names (output\MahadevpuraSingles_highlights.mp4) exists on disk ? though the ~60s trim still needs to be cut before day one (playbook line 113 assumes it's already on the associate's phone).
Proposed fix: In PMF_FIELD_SIGNALS.md, replace 'flyer rule 7' with 'playbook rule 7', 'the flyer's ground rule 4' with 'the playbook's ground rule 4', and 'the flyer collects answers' with 'the playbook scripts the questions and the sheet collects answers'. Add 'trim the demo reel to ~60s' to the day-one prep list so the asset assumption is real before visit 1.

```
1      # C13 Field Signals ? what academy visits must tell us (and when to change course)
2
3      **Status:** ACTIVE ? the decision layer for the C13 beachhead validation
4      (owner-ratified direction, 2026-06-12: *PMF validation is handled by physically
5      visiting academies and reading signals on the ground*).
6      **Companions:** [`PRODUCT_FIELD_ASSOCIATE_FLYER.md`](PRODUCT_FIELD_ASSOCIATE_FLYER.md)
7      (the recruiting flyer candidates see) .
8      [`FIELD_RESEARCH_ASSOCIATE_FLYER.md`](FIELD_RESEARCH_ASSOCIATE_FLYER.md)
9      (the hired associate's visit playbook: script + ground rules + Phase-2) .
10     [`FIELD_VISIT_ANSWER_SHEET.md`](FIELD_VISIT_ANSWER_SHEET.md) (the per-visit capture
form) .
11     [`PMF_MARKET_RESEARCH.md`](PMF_MARKET_RESEARCH.md) (the hypotheses under test, esp. §6).
12
13     **Why this doc exists:** the flyer collects answers; this doc fixes ? **before the
14     first visit** ? what those answers *mean* and what totals trigger which decision.
15     Pre-registering the thresholds is the honesty mechanism: it stops us from reading
16     15 ambiguous conversations as whatever we hoped to hear.
17
18     ---
19
20     ## 1. The hypotheses under test (each maps to script questions)
21
22     | ID | Hypothesis (from PMF research) | Falsified looks like | Script Q |
23     |---|---|---|---|
24     | H1 | **Recording behavior exists** ? academies already produce fixed-angle / CCTV /
multi-court footage without us | nobody records; "we'd have to start for you" | Q1 |
25     | H2 | **Dead-footage pain** ? recorded footage piles up unwatched (the indexing wedge)
| footage is small, or already gets watched | Q2 ? |
26     | H3 | **An audience exists** ? coach, player, or parent would actually consume rally
clips/reels | shrug; "who has time to watch clips" | Q3 |
27     | H4 | **Whitespace** ? incumbents (Machaxi, VISIST, Game Theory, Stupa, BadPro+ ? the
India set is field-sourced from the 2026-06-10 competitive audit; PMF §4's web table predates
it) leave a gap we fit | "we use X, it's fine, fully solved" | Q4 |
28     | H5 | **Willingness to pay per match** at a price that clears unit economics | "should
be free" / <?100 everywhere | Q5 ? |
29     | H6 | **Multi-court chaos is a felt problem** (our moat: indexing messy BYO multi-court
footage) | multi-court video already useful to them | Q6 |
30     | H7 | **Behavioral commitment** ? they'll let us record on their court (Phase-2 door) |
polite no across the board | Q7 |
31
32     Unit-economics floor behind H5: serving COGS on the Gemini path is ~$0.30?0.60 per
33     hour of video (? ?25?50/hr; 2026-06-10 quality table). A 2?3 hr session costs
34     roughly ?75?150 to process, so **?300/match has real margin, ?100/match is
35     break-even-ish at retail** ? that's why the script's anchor ladder is ?100/300/500.
36
37     ## 2. Per-visit scoring ? GREEN / AMBER / RED anchors
38
39     **Scoring is done by the owner (or a Claude session) at transcription ? the
40     associate only captures answers** (the sheet's score grid is marked OFFICE USE).
41     Score each hypothesis **from what they said and showed, not what you inferred**.
42     When between two grades, take the lower one.
43
44     | | GREEN (strong confirm) | AMBER (weak/mixed) | RED (disconfirm) |
45     |---|---|---|---|
46     | **H1 record** | shows or names actual setup (tripod/CCTV/phone rig) used ?monthly |
records occasionally (tournaments only) | doesn't record; no plans |
47     | **H2 dead footage** | points at real unwatched volume (?~5 hrs, "CCTV runs all day",
tournament backlog) | some footage, partially watched | no backlog exists |
48     | **H3 audience** | names WHO would watch and WHEN (e.g. "parents ask for clips", "I
review with students Mondays") | "could be useful, maybe" | no consumer identified |
49     | **H4 whitespace** | no tool today, or uses one and volunteers a gap we cover (multi-
court, BYO footage, price) | uses a competitor, mildly satisfied | competitor solves it,
satisfied, sticky |
```

50 | **H5 WTP** | names ??300/match **BEFORE** the ladder was offered (the sheet's tick-box records this), or proposes a budget framing of their own whose per-match equivalent is ??300 (see counting rule below) | names a number only **AFTER** the ladder (anchored ? even ?300/?500), or volunteers ~?100 | refuses to name a number / "should be free" / volunteers <?100 |

51 | **H6 multi-court** | complains about it in their own words before/without prompting | agrees when asked | multi-court footage already works for them |

52 | **H7 Phase-2** | yes + gives a name/number/slot | "maybe, come back" | no |

53

54 **The H5 counting rule ("H5 at ?300+"):** a visit counts toward the "?300+" tally only when the ? number (a) is ?300 **and** (b) came *before* the ladder was offered

55 ? an anchored ?300 is the modal polite answer to a read-aloud 100/300/500 ladder

56 and proves nothing, so it scores AMBER and does **not** count. Budget-framed

57 answers convert at transcription: their monthly ? ÷ the matches/month they cited

58 (if they cited none, ÷4); the computed equivalent counts if ??300 and the

59 conversion is written into the rollup row. Stated WTP ? even clean ? remains

60 **talk**: the confirming step before any PROCEED-triggered build is the fake-door /

61 paid-pilot test already pre-agreed in PMF §6 risk 2 and the C13 row.

62

63

64 **Weighting rule (behavior > words):** H7-GREEN and H2-GREEN are *behavioral*

65 signals and count double in your gut-read; H3/H5 answers are **talk** until a Phase-2

66 session or a real payment corroborates them. A visit with H5-GREEN but H7-RED is a

67 polite conversation, not a customer.

68

69 **Disconfirming-evidence quota:** every visit sheet must record at least one

70 verbatim *negative* quote (the thing they liked least / wouldn't pay for). If a

71 sheet has only positives, the visit gets re-done or its evidence discounted in the

72 rollup (**never** the associate's pay ? they're paid per completed honest visit);

73 per the flyer's ground rule 4, a reasoned "no" is worth more than five vague yeses.

74

75 **Sampling note (read the verdict with this in mind):** the flyer sends the

76 associate to 10?15 *good* academies ? the verdict therefore reads "does the

77 beachhead work where it should work best?", not "what fraction of the market is

78 addressable". A PROCEED here licenses the next validation step, not a TAM claim;

79 the rollup's area/courts columns record what was actually sampled.

80

81 **## 3. Pre-registered decision rules**

82

83 **Stopping rule (fixes the optional-stopping loophole):** the campaign targets

84 **n = 15** completed owner/head-coach sheets and may end earlier **only** for

85 **logistics** (associate availability, academies exhausted) ? **never** because of how

86 the tallies look. The 5-sheet check-ins below are progress reports, not verdict

87 opportunities; **the** verdict is computed exactly once, at the final **n**, and the

88 rollup records what that **n** was and why the campaign stopped. The count thresholds

89 below are written for **n = 15** and apply unchanged at any final **n** in 10?14 ? which

90 deliberately makes the ?-bars *relatively harder* at smaller **n** (biases away from a

91 premature PROCEED) and the <-bars *relatively harder* to trip at **n = 15** (biases away

92 from a premature FALSIFIED). Both biases err toward "keep investigating," the safe

93 failure mode. Counts, not percentages ? at this sample size we're reading

94 direction, not estimating proportions. "GREEN" below means GREEN on that

95 hypothesis row.

96

97 | Verdict | Trigger (pre-registered) | What we then do |

98 |---|---|---|

99 | **PROCEED** ? beachhead validated | ?6 H2-GREEN **and** ?4 H5 at ?300+ (per the §2 counting rule ? anchored numbers don't count) **and** ?3 H7-GREEN | Run the camera pilot at the 2?3 warmest academies; those contacts seed the UI-alpha Wave-1 invite list (UI_ALPHA_EXECUTION_PLAN Phase R); the **fake-door/paid-pilot WTP test** (PMF §6 risk 2) runs before money is spent on build |

100 | **PIVOT A** ? "index the backlog" ? "record + index" service | <3 H2-GREEN **and** ?6 visits with H3 GREEN-or-AMBER **and** ?3 H5 at ?300+ | The pain isn't the archive, it's that nothing useful gets made at all ? lead with the Phase-2 recording offer; camera pilot becomes the product wedge, not the demo |

101 | **PIVOT B** ? partner/API motion | H4 RED at ?5 academies (incumbents entrenched and liked) | Don't fight installed hardware head-on; explore the engine/API route through whoever

owns the academy relationship¹ |

102 | ****PIVOT C ? payer is the parent, not the academy**** | ?4 visits where H5 is RED ****and**** the Q3 answer names parents/players as the watcher | Re-test WTP as B2C per-student reels (?/reel to parents) with the academy as channel, not customer |

103 | ****FALSIFIED ? beachhead assumption fails**** | <3 academies record at all (H1) ****and**** 0 H7-GREEN | The "academies already record fixed-angle" premise (PMF §5 beachhead #1; the academy arm of §6 risk 1) is wrong for this market ? revisit beachheads #2/#3 (pickleball-US, badminton Asia/Denmark) before building further |

104

105 ¹ The template (surfaced by the 2026-06-10 competitive audit, not yet in PMF §4's web-sourced table): ****PB Vision**** sells pickleball video analysis B2C at ~\$99/yr

106 *and* as an ~\$8/hr-of-video partner API through facility platforms like

107 ****PodPlay**** ? the engine is ours, the academy relationship belongs to whoever

108 already owns it.

109

110 Mixed outcomes that match no row: write up the per-hypothesis tallies and decide

111 explicitly with the owner ? but ****the tallies above get computed first****, so the

112 discussion starts from the pre-registered read, not from anecdotes.

113

114 ****Competitor-intel side-channel (always-on):**** any visit where a competitor is

115 named ? fill the answer sheet's competitor block (what it does, what it misses,

116 what they pay). ?3 consistent reports about one product = update

117 `PMF\_MARKET\_RESEARCH.md` §4 with field-verified rows (today's table is web-sourced).

118

119

120 **## 4. Mechanics**

121

122 - One `FIELD_VISIT_ANSWER_SHEET.md` per academy,

123 same day as the visit, in the associate's words + verbatim quotes.

124 - The owner (or Claude session) transcribes each sheet into one row of the rollup

125 table below (keep it in this doc or a sheet next to it); tallies refresh per 5

126 visits as ****progress checks only**** ? the verdict is computed once, at the final

127 n, per the §3 stopping rule.

128 - Demo asset: the associate carries the real compiled reel

129 (``output/MahadevpuraSingles_highlights.mp4``, trimmed to ~60s) saved offline on

130 their phone, shown ****only at the scripted moment (after Q6, before Q7)**** ? *show,

131 never promise*. Demo reactions and improvement asks are ****product feedback****, not

132 scored signals: they feed the build backlog verbatim, while the H1?H7 verdict

133 machinery stays anchored to the pre-demo answers (that's why the demo comes last;

134 the sheet records whether it was shown). Showing it right before Q7 also makes

135 the Phase-2 ask a reaction to something seen, not imagined ? a stronger

136 behavioral read.

137 - Student answers (sheet's student block) likewise feed product feedback and the

138 H3 (audience) gut-read; they don't enter the verdict tallies, and no student

139 contact details are ever collected.

140

141 **### Rollup table (one row per completed visit)**

142

143 | # | Academy | Area | Courts | Role spoken to | H1 | H2 | H3 | H4 | H5 (?) | H6 | H7 |

Gut | Phase-2? |

144 | ---|---|---|---|---|---|---|---|---|---|---|---|

145 | 1 | | | | | | | | | | | |

146

147 **### Tally ? decision read-out (progress check per 5 visits; verdict ONCE at final n)**

148

149 | Metric | Count | Threshold in play |

150 | ---|---|---|

151 | H2 GREEN (dead footage) | /n | ?6 ? PROCEED leg; <3 ? PIVOT A leg |

152 | H5 at ?300+ (pre-ladder / converted only ? §2 counting rule) | /n | ?4 ? PROCEED leg;

?3 ? PIVOT A leg |

153 | H7 GREEN (Phase-2 yes + contact) | /n | ?3 ? PROCEED leg; 0 ? FALSIFIED leg |

154 | H3 GREEN-or-AMBER (audience exists) | /n | ?6 ? PIVOT A leg |

155 | H4 RED (incumbent satisfied) | /n | ?5 ? PIVOT B |

156 | H1 any recording | /n | <3 ? FALSIFIED leg |

157 | H5 RED ****and**** Q3 names parents/players | /n | ?4 ? PIVOT C |

158

```
159    ## 5. Guardrails that bind the field work
160
161    - **Phase 1 records nothing** ? notes only (flyer rule 7).
162    - **Phase 2 consent rules are hard:** written consent from the academy AND adult
163      players; **sessions with minors are never recorded for our library** (training-pool
164      guardrail, CLAUDE.md); the academy is told plainly what the footage is for.
165    - Answer sheets contain personal contact details ? they stay between the associate
166      and the owner; transcribe to the rollup without phone numbers.
167
```

```
1      # Field Visit Playbook ? academy conversations (KhelSutra)
2
3      > **Recruiting?** Hand candidates
4      [ `PRODUCT_FIELD_ASSOCIATE_FLYER.md` ] (PRODUCT_FIELD_ASSOCIATE_FLYER.md)
5      > ? that's the role description. **This document is the working playbook the hired
6      > associate gets on day one:** the conversation script, the ground rules, and the
7      > Phase-2 (recording / show-back) procedure.
8
9      **Duration:** ~3?4 weeks, part-time (flexible hours, mostly afternoons/evenings when
10     academies are active)
11     **Location:** Bengaluru ? in-person visits to badminton academies
12     **Compensation:** ? ___ per completed academy visit + travel reimbursement; Phase-2
13     sessions paid extra *(discussed individually)*
14     **Reports to:** Avi (phone/WhatsApp: ___ )
15
16     ---
17
18     ## The gig in one paragraph
19
20     KhelSutra takes ordinary practice/match video from a badminton academy and automatically
21     finds every rally, builds
22     highlight reels, and generates match reports; a private web app is opening to a few
23     invited academies. We need honest,
24     on-the-ground feedback from real academies ? **how they work with video, whether this
25     actually helps them, and what
26     would make it genuinely useful**. **Your job: visit 10?15 good academies, have a
27     friendly 20?30 minute conversation
28     with the owner/head coach (and, with permission, a few senior/adult students) using the
29     script below, and write down
30     what they actually say.** No selling. No tech knowledge needed. For interested academies
31     there's a Phase-2 follow-up
32     (a recording session ? then you return and show them THEIR OWN footage as highlights)
33     with additional compensation.
34
35     ---
36
37     ## Phase 1 ? The conversation (what you actually do)
38
39     **Who to talk to:** the academy owner or head coach ? the person who decides what the
40     academy spends money on.
41     If you get a junior coach, be friendly, gather what you can, and ask when the owner is
42     available.
43
44     **Opening (keep it this honest):**
45     > "Hi, I'm helping a Bengaluru engineer who's building an AI tool for badminton
46     academies ? it takes normal practice
47     > video and automatically cuts it into rallies and highlights. He asked me to talk to a
48     few serious academies to
49     > understand how you work with video today. Could I ask you a few questions? Takes 15
50     minutes, and we're not selling
51     > anything today."
52
53     **The questions (ask in this order; the starred ones matter most):**
```

39

40 1. Do you ever video-record sessions or matches here? How ? phone, tripod, CCTV, a hired person?

41 2. ? **Do you have recorded footage sitting around that nobody has time to watch?**
(multi-court hall recordings,

42 tournament days, CCTV) ? roughly how much?

43 3. Who would watch rally clips or highlights if they existed ? coaches for training? players? parents?

44 4. What do you use today for any of this? (Listen for: Machaxi, VISIST, Game Theory, Stupa, BadPro+, just

45 YouTube/phone.) What do you like / what's missing in it?

46 5. ? **If you could hand over a full session's video and get back every rally cut out + a highlight reel + a simple

47 report ? would you pay per match for that? What would that be worth to you, per match?** Then **stop talking and

48 wait** ? let THEM name the number. If they genuinely won't after a pause and one "roughly?", you may offer the

49 ladder: "?100, ?300, ?500?" **On the sheet, tick whether their number came BEFORE or AFTER you offered the

50 ladder** ? it changes what the answer means. (Note their face, not just the words.)

51 6. Your hall has multiple courts running at once, right? Does that make video less useful today?

52

53 **? NOW (and only now) show the sample reel** ? a ~60-second real highlight reel we put on your phone. Say: "this is

54 what it produces ? every rally found and cut automatically." Then shut up and watch their face. Write down their

55 FIRST reaction verbatim, and ask one follow-up: **"what would this need to do for it to be useful for YOUR academy?"**

56 (Improvement asks, in their words, go on the sheet. Showing it earlier anchors every answer above ? never lead with it.)

57

58 7. Would you let us record one session here (we pay a small fee for the time) and come back showing what the tool

59 produces on YOUR court, your players? *(This is the Phase-2 door ? just note yes/no/maybe and who to call.)*

60

61 **Students (with the coach's permission ? senior/adult students only, 5 minutes):** ask 2?3 of them:

62 (a) **"Would you watch clips of your own rallies if they existed after each session?"**

63 (b) **"Would you share them ? with whom?"** (c) **"What would you want them to show?"** Capture their answers in the sheet's student block. Don't

64 collect students' contact details; if everyone available is a minor, skip the student questions ? note that instead.

65

66 **After each visit, fill ONE answer sheet ? the template is FIELD_VISIT_ANSWER_SHEET.md

67 (print one per visit):** academy name, location, # courts, person spoken to + role + contact, answers 1?7 (their

68 words, not yours), the most negative thing they said (required), exact quotes, your gut read, and whether they're a

69 Phase-2 candidate. *(How the answers get scored and what totals trigger which decision lives in

70 PMF_FIELD_SIGNALS.md ? that part is ours, not yours; just capture honestly.)*

71

72 ---

73

74 ## Ground rules & gotchas (read twice ? this is the difference between useful and useless)

75

76 1. **You are researching, not selling.** If they ask "how much will it cost", say "that's exactly what he's trying to

77 figure out ? what would feel fair to you?" Never quote a price yourself.

78 2. ****Past behavior beats opinions.**** "Would you use video?" gets polite lies. "When did
you LAST record a session, and
79 what happened to that file?" gets the truth. Prefer the second kind of question.
80 3. ****Don't promise anything.**** No features, no dates, no free trials. You may SHOW the
standard sample reel (it's
81 real output ? at the scripted moment only, after Q6) and you may offer the Phase-2
idea (a paid recording session
82 + free sample output of their own court), and only as "would you be open to it".
Nothing else.
83 4. ****Write down disappointing answers verbatim.**** A "no, we'd never pay for that" with a
reason is worth MORE to us
84 than five vague yeses. You're paid per completed honest visit, not per positive
answer.
85 5. ****If they already use a competitor (Machaxi/VISIST/Game Theory etc.) ? goldmine.****
Ask what it does well, what it
86 doesn't, and what they pay. Spend extra time here.
87 6. ****Multi-court is our favorite topic.**** If they complain that video is useless because
"all the courts are in frame
88 and it's chaos" ? capture that complaint in their exact words. That's the problem we
solve.
89 7. ****No recordings of people without clear permission.**** In Phase 1 you record NOTHING ?
notes only. Don't photograph
90 the academy or players unless the owner offers.
91 8. ****Don't oversit.**** 20 minutes, thank them, leave a good impression ? we may come back
to record.
92 9. ****Confidentiality:**** don't describe the tech beyond the opening line, don't name
other academies' answers, and
93 don't share the answer sheets with anyone except Avi.
94
95 ---
96
97 ## Phase 2 (only for academies that said yes ? separate briefing & pay)
98
99 You coordinate a recording session: we pay the academy a small fee, set up a
phone/camera on a tripod (we provide a
100 one-page capture checklist: behind the court, elevated, whole court in frame, landscape,
1080p/60fps, don't move it),
101 record 122 sessions ? then we process the footage through KhelSutra and ****you return to**
present the academy its own
102 **sample output**** (their court, their players, as a highlight reel + report, free) and
fill a short reaction sheet:
103 what they said when they saw it, what they'd change, whether they asked to keep using
it. That show-back conversation
104 is the single most valuable artifact this whole engagement produces. ****Hard rules:****
written consent from the academy
105 AND the adult players being recorded; ****sessions with minors are not recorded for our**
library** ? adult sessions only;
106 the academy gets told plainly what the footage is for (building and demonstrating the
tool).
107
108 ---
109
110 ## Day one
111
112 Your first 2 visits are paired (you + Avi, or a live phone walkthrough) so you're never
improvising. Before visit 1:
113 read this playbook twice, have the sample reel saved offline on your phone, and carry
printed answer sheets
114 ([`FIELD\_VISIT\_ANSWER\_SHEET.md`])(FIELD_VISIT_ANSWER_SHEET.md) ? one per academy).
115

1 # Field & Product Outreach Associate ? KhelSutra (Sports-Tech, Bengaluru)
2

```

3      **Help a Bengaluru sports-AI product meet its first real users.**
4
5      | | |
6      |---|---|
7      | **Duration** | ~3?4 weeks, part-time (flexible; mostly afternoons/evenings when
academies are active) |
8      | **Location** | Bengaluru ? in-person visits to badminton academies |
9      | **Pay** | ? ___ per completed academy visit + travel reimbursement; recording sessions
(stretch goal below) paid extra ? ? ___ per session |
10     | **Reports to** | Avi (phone/WhatsApp: ___ ) |
11
12     ---
13
14     ## The product, in plain words
15
16     **KhelSutra** turns ordinary practice/match video from a badminton academy into
17     ready-to-use pieces: it automatically finds **every rally** in the recording, cuts
18     **highlight reels**, and produces a simple **match report**. It works on video from
19     a phone on a tripod ? no special cameras, no hardware to install. A private web
20     app is opening to a small set of invited academies.
21
22     ## The job, in one paragraph
23
24     Visit good badminton academies across Bengaluru and have honest conversations with
25     **coaches AND students**: how do they work with video today, would something like
26     this actually help them, and **what would make it genuinely useful for them** ?
27     including what's missing or wrong with the idea. You work from a provided
28     conversation guide, write down what people *actually say* (the negative answers
29     matter most), and debrief with Avi after each visit. **You are gathering feedback,
30     not selling.** No tech background needed.
31
32     ## The stretch goal (extra pay)
33
34     For academies that are interested, you coordinate a simple recording session ?
35     a phone on a tripod, one-page checklist provided. We run that video through
36     KhelSutra, and you go back and show them **their own court, their own players, as
37     highlight reels and a report**: "this is what it looks like for you." Then you
38     write down exactly what they say. There is no stronger feedback than that moment.
39
40     ## What you'll actually do
41
42     - Visit **10?15 academies** (intro + conversation, ~20?30 minutes each).
43     - Talk to the **owner/head coach** first, and ? with their permission ? a few
44       **senior or adult students** about whether they'd watch/share their own rally
45       clips and what they'd want from them.
46     - Fill **one structured answer sheet per visit** (we provide it) ? their words,
47       not yours, including the most negative thing said.
48     - Show a short sample reel on your phone **only at the point the guide says to**
49       (after the open questions ? it changes people's answers if shown early).
50     - Debrief with Avi after each visit (WhatsApp/call). **Your first two visits are
51       done together with him**, so you're never improvising.
52     - *Stretch:* coordinate recording sessions and present the sample results back.
53
54     ## You're a good fit if
55
56     - You're comfortable walking into an academy and starting a conversation with a
57       stranger ? and just as comfortable hearing "no, this is useless to us."
58     - You can capture what people said **accurately** ? quotes, not summaries.
59     - Kannada / Hindi / English, as the conversation needs (you choose the mix).
60     - You play or follow a racket sport (helps a lot; not required).
61     - No technical skills needed. Reliability matters more than anything else.
62
63     ## What you get
64
65     - Paid per completed honest visit ? **not** per positive answer. A well-documented

```

```

66     "they hated it, here's why" is a fully paid, fully successful visit.
67 - Ground-floor view of a real sports-AI product finding its market; your field
68     notes directly shape what gets built next.
69 - Flexible hours, short commitment, clear scope.
70
71 ## Ground rules (the short version ? full version provided on joining)
72
73 1. Honesty over positivity. Never oversell, never promise features, prices, or dates.
74 2. **No recording of any person without written consent** ? and sessions involving
75     **minors are never recorded** for our use, period. In regular visits you record
76     nothing at all: notes only.
77 3. People's contact details stay between you and Avi.
78
79 ## How to apply
80
81 Message Avi at ____ with **"FIELD"**, one line about a sport you follow, and one
82 line about a time you had to get honest feedback out of someone. First reply gets
83 a 15-minute call.
84

```

5. user (2026-06-12T15:02:50.010Z)

```

1     # Field Visit Answer Sheet ? one per academy (fill the same day)
2
3     > Print one per planned visit. Write THEIR words, not yours. A clear "no, because?"
4     > is a *good* sheet. Companion script: `FIELD_RESEARCH_ASSOCIATE_FLYER.md`.
5     > Scoring anchors (G/A/R): `PMF_FIELD_SIGNALS.md` §2.
6
7     ## Visit basics
8
9     | | |
10    |---|---|
11    | Date / time | |
12    | Academy name | |
13    | Area (neighbourhood) | |
14    | # courts in the hall | |
15    | Spoke to (name + role) | |
16    | Contact (phone/WhatsApp) ? *only if offered* | |
17    | How long the conversation ran | |
18
19    ## The seven questions ? their answers (verbatim where possible)
20
21    **Q1 ? Do they record sessions/matches today? How (phone / tripod / CCTV / hired)?**
22
23    >
24
25    **Q2 ? ? Footage sitting around that nobody watches? Roughly how much, and from what?**
26
27    >
28
29    **Q3 ? Who would watch rally clips/highlights (coach / players / parents)? When?**
30
31    >
32
33    **Q4 ? What do they use today (Machaxi / VISIST / Game Theory / Stupa / BadPro+ / none)?
34    What's good, what's missing, what does it cost them?**
35
36    >
37
38    **Q5 ? ? Would they pay per match for rally cuts + reel + report? What number did
39    THEY say (??)? What was their face doing?**
40
41    Their number came (tick one): ? BEFORE the ladder (they volunteered it) .
42    ? AFTER I offered ?100/300/500 . ? no number / refused .
43    ? they framed it differently (per student / per month ? write it below)

```

```

44
45 >
46
47 **Q6 ? Multiple courts in frame ? does that make video useless today? Their words:**
48
49 >
50
51 **Demo (shown AFTER Q6, never earlier) ? their FIRST reaction to the sample reel,
52 verbatim. Then: "what would this need to do to be useful for YOUR academy?" ?
53 their improvement asks, in their words:**
54
55 Demo shown? ? yes . ? no (why: _____ )
56
57 >
58
59 **Q7 ? Open to a paid recording session on their court (we return showing THEIR
60 footage as highlights)? (yes / maybe / no ? and who to call)**
61
62 >
63
64 **Students (coach-permitted, senior/adult only ? skip if only minors available):
65 would they watch clips of their own rallies? share with whom? what should clips
66 show? Their words:**
67
68 >
69
70 ## Required: the most negative thing they said (verbatim)
71
72 >
73
74 ## Best quotes (anything vivid, in their words)
75
76 >
77
78 ## Scores ? OFFICE USE, leave blank (scored by Avi at transcription per
PMF_FIELD_SIGNALS.md §2; when torn, score lower)
79
80 | Hypothesis | Score |
81 |---|---|
82 | H1 recording behavior | GREEN / AMBER / RED |
83 | H2 dead footage | GREEN / AMBER / RED |
84 | H3 audience | GREEN / AMBER / RED |
85 | H4 whitespace | GREEN / AMBER / RED |
86 | H5 willingness to pay ? their ? number: _____ | GREEN / AMBER / RED |
87 | H6 multi-court pain | GREEN / AMBER / RED |
88 | H7 Phase-2 door | GREEN / AMBER / RED |
89
90 ## Competitor block (only if they named one)
91
92 | | |
93 |---|---|
94 | Product | |
95 | What it does well (their words) | |
96 | What it misses (their words) | |
97 | What they pay | |
98
99 ## Your gut read (circle): COLD . POLITE . CURIOUS . EAGER
100
101 ## Phase-2 candidate? (circle): YES ? call: _____ . MAYBE . NO
102
103 ## Anything else worth knowing (layout, lighting, camera positions you noticed, who
really decides)
104
105 >
106

```

13:**Why this doc exists:** the flyer collects answers; this doc fixes ? **before the
73:per the flyer's ground rule 4, a reasoned "no" is worth more than five vague yeses.
75:**Sampling note (read the verdict with this in mind):** the flyer sends the
161:- **Phase 1 records nothing** ? notes only (flyer rule 7).

8. user (2026-06-12T15:04:21.366Z)

Structured output provided successfully

9. assistant (2026-06-12T15:04:27.632Z)

Verification complete. The claim is real at low severity: the rule-number cross-references in PMF_FIELD_SIGNALS.md (lines 13, 73, 161) genuinely resolve to the playbook's rules under the doc's own flyer-vs-playbook vocabulary, while the recruiting flyer has only a 3-item rule list ? though the inline restatement of each rule's content keeps the impact cosmetic.
