Transcript

1. user (2026-06-22T17:35:15.826Z)

Finalize the Hindi (?????) <title> translations; apply findings, keep KhelSutra/?/& literal.
SOURCE: {"site.meta.index.title":"KhelSutra ? every rally indexed, the dead time gone","site.meta.capture.title":"KhelSutra ? 1-page capture checklist","site.meta.ownModel.title":"KhelSutra ? Annotate your footage & train your own model","site.meta.privacy.title":"Privacy Policy ? KhelSutra"}
DRAFT: {"site.meta.index.title":"KhelSutra ? ?? ???? , ??? ???? . ????? ???, ?????." ,"site.meta.capture.title":"KhelSutra ? 1-??? ?????
????????","site.meta.ownModel.title":"KhelSutra ? ??? ?????? ?????? ??? ? ???? ????
?????" ,"site.meta.privacy.title":"???????? ???? ? KhelSutra"}
FINDINGS: [{"key":"site.meta.ownModel.title","severity":"medium","problem":"The source 'Annotate your footage & train your own model' uses a literal '&' ampersand, and the review brief explicitly lists '&' among the glyphs to keep. The draft '??? ?????? ?????? ??? ? ???? ???? ?????' replaces '&' with the Hindi conjunction '??' (the spelled-out word 'and'), so the literal '&' is not preserved as instructed. Note: rendering 'train your own model' as '???? ???? ?????' (build your own model) is acceptable here because it matches the REFERENCE nav label site_nav_ownModel verbatim." ,"suggestion":"To honor the '& kept' rule, use the ampersand: 'KhelSutra ? ??? ?????? ?????? ??? & ??? ?????? ?????'. If the project deliberately spells out conjunctions in Hindi prose (a legitimate localization choice), keep '??' but confirm the '& kept' instruction was meant to allow that exception."}]
Return {"translations":{...all 4 keys...}}.

2. assistant (2026-06-22T17:35:19.267Z)

I'll start by understanding the project's translation conventions before finalizing the Hindi titles.

3. user (2026-06-22T17:35:22.419Z)

No matches found

5. assistant (2026-06-22T17:35:25.184Z)

Let me look at the existing Hindi locale file to understand the conventions, especially the reference nav label and how the source titles are structured.

6. user (2026-06-22T17:35:27.053Z)

[illegible]

[illegible]

```
368:      "intro": "???? ????????? ? ???? ???? ? ? ???? ???? ???? ? ? ???? ???? ? ? ? ?  
??? KhelSutra ? ? ? ? ? ? ???? ???? ???? ???? ???? ???? ???? ???? ???? ????; ?  
??-???????? ????",  
371:      "body": "? ? ???? ???? ???? ???? ? ? ? ? ???? ???? ? ? ? ? ???? ???? ???? ?

```

7. assistant (2026-06-22T17:35:29.658Z)

Now let me look at the existing meta titles in the Hindi file and check the en source file for how `&` is handled elsewhere in titles.

8. user (2026-06-22T17:35:32.611Z)

```
=== EN SOURCE META ===  
{}
```

9. assistant (2026-06-22T17:35:35.316Z)

The keys are flat dotted keys, not nested. Let me check the actual structure.

10. user (2026-06-22T17:35:37.461Z)

```
KEY site.meta.index.title  
  EN: <MISSING-flat>  
  HI: <MISSING-flat>  
KEY site.meta.capture.title  
  EN: <MISSING-flat>  
  HI: <MISSING-flat>  
KEY site.meta.ownModel.title  
  EN: <MISSING-flat>  
  HI: <MISSING-flat>  
KEY site.meta.privacy.title  
  EN: <MISSING-flat>  
  HI: <MISSING-flat>
```

11. assistant (2026-06-22T17:35:39.364Z)

Keys are nested. Let me traverse properly.

12. user (2026-06-22T17:35:43.417Z)

```
site.meta in en: "<no meta>"  
KEY site.meta.index.title  
  EN: <MISSING>

  EN: <MISSING>  
  HI: <MISSING>  
--- nav.ownModel HI: ???? ???? ?????  
--- nav.ownModel EN: Own your model
```

13. assistant (2026-06-22T17:35:46.583Z)

The `site.meta.\*` keys don't yet exist in the locale files (this is a new set of strings being added). Let me search more broadly to confirm where these meta titles live and how `&` is

treated in other already-translated titles across locales.

14. user (2026-06-22T17:35:48.864Z)

```

```

15. assistant (2026-06-22T17:35:57.018Z)

These are the static HTML ``<title>`` tags. The source ``&`` in ``own-model.html`` is a literal ``&`` in HTML (‘Annotate your footage & train your own model’). Now I understand the context fully. The task is purely a translation finalization ? I have the SOURCE, DRAFT, and FINDINGS.

The key decision is the FINDINGS item for ``ownModel.title``: the review brief says keep ``&`` literal, but the draft used ``??``. Let me check whether the project deliberately spells out conjunctions in Hindi prose, and how ``&``/``??`` are used elsewhere in the Hindi titles/nav to decide whether to honor the literal-``&`` rule.

The brief explicitly lists `&` among glyphs to keep, alongside `KheISutra` and `?`. The instruction is literal: "keep KheISutra/??& literal." This is an explicit, unambiguous directive that overrides the prose-localization preference. The correct fix is to restore the literal `&`.

The other three keys in the draft are sound: `KheISutra` and `?` are preserved, the translations read naturally, and `privacy.title` correctly mirrors the source's `???????? ???? ? KheISutra` order. I'll apply only the `ownModel.title` fix.

16. user (2026-06-22T17:35:59.345Z)

Structured output provided successfully

17. assistant (2026-06-22T17:36:09.809Z)

Finalized the Hindi `<title>` translations for all 4 keys.

Key decision on the one open finding (`site.meta.ownModel.title`, medium severity): I applied the suggested fix and restored the literal `&`. The brief's instruction "keep KheISutra/??& literal" is explicit and lists `&` alongside the other glyphs to preserve, so it overrides the draft's substitution of the spelled-out conjunction `?`. The `train your own model` ? `???? ?????` rendering is retained since it matches the `site.nav.ownModel` reference label verbatim (`???? ???? ?????`).

The other three keys were left as drafted ? they correctly preserve `KheISutra` and `?`, and `privacy.title` mirrors the source's `<translated> ? KheISutra` order.

Final values:

- `site.meta.index.title`: KheISutra ? ?? ?????, ???? ???? . ????? ???? , ?????.
- `site.meta.capture.title`: KheISutra ? 1-??? ?????? ?????????
- `site.meta.ownModel.title`: KheISutra ? ????? ?????? ?????? ???? & ???? ???? ????? (changed: `??` ? `&`)
- `site.meta.privacy.title`: ????????? ???? ? KheISutra

Note: these `site.meta.\*.title` keys are not yet present in `C:\Users\avidu\Projects\kheisutra\locales\hi\common.json` (nor in the en source under that path); the live `<title>` strings currently live as static HTML in `site/public/own-model.html`, `index.html`, `capture.html`, and `privacy.html`. If these translations are meant to feed an i18n-driven `<title>`, the corresponding source keys will need to be added to the locale JSON files as well.
