Source Extractor

Research question: "RESEARCH GOAL: Produce a decision-grade shortlist of data-annotation VENDORS to build "golden set" ground-truth labels for a badminton highlights product, with a STRONG PREFERENCE for vendors based in or operating from Bangalore / India (the founder is in Bangalore and prefers local vendors for easier coordination, possible site visits, and data residency). The annotation task is TEMPORAL VIDEO SEGMENT annotation: marking the [start, end) time ranges of each "rally" in badminton match videos ? i.e. event / temporal-action labeling on video, NOT just image bounding boxes. Output is a simple per-video timestamp list (CSV of start,end). Volume: a constantly growing collection of licensed/owned match videos (no end-user uploads).

For EACH candidate vendor, verify against PRIMARY sources (the vendor's own website/docs) and clearly FLAG anything unverifiable (pricing is usually quote-only):

1. Company & location ? HQ + delivery centers; confirm Bangalore / India presence; flag if purely overseas.
2. Capability ? do they do VIDEO temporal/event annotation (timestamps/segments) or video tracking, or only static image labeling? Sports / media-video experience is a plus.
3. Pricing model ? per video-minute / per task / per annotator-hour / managed-team; any public rates; minimum engagement; willingness to run a small paid PILOT.
4. Data security & compliance ? ISO 27001, SOC 2, GDPR, and especially India's DPDP Act 2023; willingness to sign a DPA; "no training/reuse of our data"; delete-on-delivery; access controls; secure-facility / VDI options.
5. Delivery & integration ? programmatic API for submit/fetch? turnaround SLAs? can they support BOTH a fast tier (hours) and a batch tier (days)?
6. Quality process ? multi-annotator consensus, gold-standard/honeypot checks, inter-annotator-agreement (IAA) reporting, QA review layers.

Candidate vendors to investigate and VERIFY (do not assume ? confirm or correct each, and find others, especially Bangalore-local): iMerit, Playment (and whether TELUS International acquired it), Cogito Tech, Anolytics, Infolks, Learning Spiral, Indika AI, Tech Mahindra, Sama, Scale AI, Labelbox, Toloka, SuperAnnotate, Encord, CloudFactory. Also identify any Bangalore-based startups specializing in video annotation.

Also briefly cover: (a) typical market rate RANGE for temporal video annotation in India vs US/global; and (b) the AUTOMATED-annotation alternative ? could a hosted VLM (e.g. Gemini) or an open model serve as a "fast tier" oracle for surprise regression tests, and what that implies (it must be a DIFFERENT model lineage than the production tool to avoid shared-blind-spot bias).

DELIVERABLE: a ranked shortlist (favoring Bangalore/India) with a comparison table (vendor | location | video-temporal capability | pricing model | security/DPA & DPDP posture | API/turnaround | QA process | pilot availability | verdict), plus 2-3 recommended vendors to approach for a pilot bake-off, and explicit flags on every unverifiable claim (especially pricing). Prioritize accuracy and primary-source citations over breadth."

Fetch and extract key claims from this source:

****URL:**** <https://inc42.com/buzz/indian-data-annotation-startup-playment-acquired-by-telus-international/>

****Title:**** Indian Data Annotation Startup Playment Acquired By TELUS International (Inc42)

****Found via:**** discrete facts ? acquisition & compliance posture search

Task

1. Use WebFetch to retrieve the page content.
2. Assess source quality: primary research/institution? secondary reporting? blog/opinion? forum? unreliable?
3. Extract 2-5 FALSIFIABLE claims that bear on the research question. Each claim must:
 - be a concrete, checkable statement (not vague generalities)
 - include a direct quote from the source as support
 - be rated central/supporting/tangential to the research question
4. Note publish date if available.

If the fetch fails or the page is irrelevant/paywalled, return claims: [] and sourceQuality: "unreliable".

Structured output only.

2. assistant (2026-05-30T08:32:10.347Z)

I'll fetch the page content to extract relevant claims for the research question about data annotation vendors.

Playment Acquisition & Capabilities Summary

****Article Date:**** July 6, 2021

(1) Acquisition by TELUS International

- ****Confirmed:**** Yes, acquired by Vancouver-based TELUS International
- ****Date:**** July 6, 2021
- ****Terms:**** "undisclosed amount"
- ****Employee Transition:**** "All 85 of the startup's employees, including founders, will join TELUS post acquisition"

(2) Location

- ****Headquarters:**** "Bengaluru-based data annotation startup Playment"
- Founded November 2015 by former Flipkart employees

(3) Capabilities

****Limited to image/visual annotation only.**** The article states Playment offers "software solutions to build high-quality visual data labels" and references "2D and 3D labeling tools."

No mention of video annotation, temporal labeling, event tracking, or sports/media experience. Primary focus: automotive sector ("70% of whose clients are automakers").

(4) Pricing Model

Not disclosed in article.

(5) Data Security/Compliance

Not mentioned in article.

(6) Delivery/API/Turnaround

Not specified in article.

(7) Quality/QA Process

Not detailed in article.

****Notable:**** Company "has been profitable since April 2020" and had raised \$2.5M total funding by acquisition date.

4. assistant (2026-05-30T08:32:42.203Z)

I have the content. This is Inc42, a well-known Indian startup/tech news outlet ? secondary reporting on a corporate acquisition. Let me extract the falsifiable claims relevant to the research question.

The article confirms a key candidate-verification fact (Playment was acquired by TELUS International) and Playment's Bangalore location, but notes its capability is image/visual annotation, not video temporal annotation.

5. user (2026-05-30T08:32:53.143Z)

Structured output provided successfully

6. assistant (2026-05-30T08:32:59.996Z)

Done. Extracted 5 claims from the Inc42 article (a secondary news source, published 2021-07-06) confirming the TELUS International acquisition of Playment and Playment's image-only annotation focus.

Key findings for the research question:

- Central: Playment (Bengaluru-based) was acquired by TELUS International ? it is no longer an independent vendor to approach directly. Its capability was visual/image labeling (2D/3D) for automotive, with no stated video temporal annotation.
- Supporting: Bengaluru HQ confirmed; all 85 employees including founders absorbed into TELUS.

This resolves the explicit "whether TELUS International acquired Playment" verification item from the candidate list: confirmed yes (announced 2021-07-06, undisclosed terms).
