Source Extractor

Research question: "RESEARCH GOAL: Produce a decision-grade shortlist of data-annotation VENDORS to build "golden set" ground-truth labels for a badminton highlights product, with a STRONG PREFERENCE for vendors based in or operating from Bangalore / India (the founder is in Bangalore and prefers local vendors for easier coordination, possible site visits, and data residency). The annotation task is TEMPORAL VIDEO SEGMENT annotation: marking the [start, end) time ranges of each "rally" in badminton match videos ? i.e. event / temporal-action labeling on video, NOT just image bounding boxes. Output is a simple per-video timestamp list (CSV of start,end). Volume: a constantly growing collection of licensed/owned match videos (no end-user uploads).

For EACH candidate vendor, verify against PRIMARY sources (the vendor's own website/docs) and clearly FLAG anything unverifiable (pricing is usually quote-only):

1. Company & location ? HQ + delivery centers; confirm Bangalore / India presence; flag if purely overseas.
2. Capability ? do they do VIDEO temporal/event annotation (timestamps/segments) or video tracking, or only static image labeling? Sports / media-video experience is a plus.
3. Pricing model ? per video-minute / per task / per annotator-hour / managed-team; any public rates; minimum engagement; willingness to run a small paid PILOT.
4. Data security & compliance ? ISO 27001, SOC 2, GDPR, and especially India's DPDP Act 2023; willingness to sign a DPA; "no training/reuse of our data"; delete-on-delivery; access controls; secure-facility / VDI options.
5. Delivery & integration ? programmatic API for submit/fetch? turnaround SLAs? can they support BOTH a fast tier (hours) and a batch tier (days)?
6. Quality process ? multi-annotator consensus, gold-standard/honeypot checks, inter-annotator-agreement (IAA) reporting, QA review layers.

Candidate vendors to investigate and VERIFY (do not assume ? confirm or correct each, and find others, especially Bangalore-local): iMerit, Playment (and whether TELUS International acquired it), Cogito Tech, Anolytics, Infolks, Learning Spiral, Indika AI, Tech Mahindra, Sama, Scale AI, Labelbox, Toloka, SuperAnnotate, Encord, CloudFactory. Also identify any Bangalore-based startups specializing in video annotation.

Also briefly cover: (a) typical market rate RANGE for temporal video annotation in India vs US/global; and (b) the AUTOMATED-annotation alternative ? could a hosted VLM (e.g. Gemini) or an open model serve as a "fast tier" oracle for surprise regression tests, and what that implies (it must be a DIFFERENT model lineage than the production tool to avoid shared-blind-spot bias).

DELIVERABLE: a ranked shortlist (favoring Bangalore/India) with a comparison table (vendor | location | video-temporal capability | pricing model | security/DPA & DPDP posture | API/turnaround | QA process | pilot availability | verdict), plus 2-3 recommended vendors to approach for a pilot bake-off, and explicit flags on every unverifiable claim (especially pricing). Prioritize accuracy and primary-source citations over breadth."

Fetch and extract key claims from this source:

****URL:**** https://www.labellerr.com/

****Title:**** Labellerr (Tensor Matics) ? video annotation tool + services, SOC 2

****Found via:**** local sourcing ? Bangalore video-annotation startups search

Task

1. Use WebFetch to retrieve the page content.
2. Assess source quality: primary research/institution? secondary reporting? blog/opinion? forum? unreliable?
3. Extract 2-5 FALSIFIABLE claims that bear on the research question. Each claim must:
 - be a concrete, checkable statement (not vague generalities)
 - include a direct quote from the source as support
 - be rated central/supporting/tangential to the research question
4. Note publish date if available.

If the fetch fails or the page is irrelevant/paywalled, return claims: [] and sourceQuality: "unreliable".

Structured output only.

2. assistant (2026-05-30T08:33:07.430Z)

I'll fetch the Labellerr page and extract the relevant claims for this vendor research.

3. user (2026-05-30T08:33:46.999Z)

Labellerr / Tensor Matics: Vendor Analysis

(1) Company & Location

****Name:**** Tensor Matics Inc (operating as Labellerr)

****HQ:**** "44, Tehama St, San Francisco, CA USA 94107"

****India Office:**** "2nd Floor, Innovation Mission Punjab, Kissan Vikas Chamber...Chandigarh, Punjab 140306"

****Copyright:**** "Copyright © 2025 Tensor Matics, Inc."

(2) Video Annotation Capability

****Yes, supports video annotation.**** The platform offers a "Video Annotation Platform" with capabilities for "dynamic video labeling." Customer testimonials mention "transcript annotated" work. However, the page does ****not specify**** temporal annotation (timestamps, segments, tracking, action labeling) or sports/media-specific experience. One customer works in robotics; no explicit sports/surveillance video annotation examples provided despite a "Sports Vision" solution link.

(3) Pricing Model

****Model not publicly disclosed.**** Page states: "Free 14 days pilot" and "No minimum data commitment." Offers a free guide: "Free Data Annotation Workflow Plan." No per-task, per-hour, or managed-team rates are listed. Users must "Book a demo" for pricing details.

(4) Security & Compliance

****Certifications mentioned:****

- SOC 2: Logo displayed
- GDPR: "GDPR-icon" shown
- ISO/India DPDP Act: Not mentioned

****Security measures stated:****

- "Auth0 for authentication"
- "Transport Layer Security (TLSv1.2+)"
- "AES-256 standard" encryption
- "Least Privilege and Monitoring" with "comprehensive logs"
- "Customer Hosting Options" on preferred cloud platform

Data reuse: Not addressed on this page.

(5) Delivery & Integration

API/SDK: "Seamless SDK Integration" stated; "Programmatically sync data." SDK documentation link: <https://docs.labellerr.com/>

Turnaround: One case claims "99.5% accurate labels...in just 3 days." No published SLA or batch vs. fast tier distinction.

(6) Quality Process

Mentioned approaches:

- "Automated annotation, advanced analytics and smart QA"
- "model-assisted labeling and active learning"
- "Upload Pre-Annotations" for review/refinement

Not specified: Consensus voting, gold-standard/honeypot testing, Inter-Annotator Agreement (IAA) metrics, or explicit QA review layers.

Platform Type

SaaS + Managed Services hybrid. Self-service platform with optional "Annotation Services: Professional data labeling by experts."

4. user (2026-05-30T08:33:38.959Z)

The server returned HTTP 404 Not Found.

The response body was not retrieved. If this URL requires authentication, use an authenticated tool (e.g. `gh` for GitHub, or an MCP-provided fetch tool) instead of WebFetch.

Web search results for query: "Labellerr Tensor Matics SOC 2 compliance headquarters location video annotation"

Links: [{"title": "Labellerr - Products, Competitors, Financials, Employees, Headquarters Locations", "url": "https://www.cbinsights.com/company/labellerr"}, {"title": "Best Data Labeling & Image Annotation Software - Labellerr", "url": "https://www.labellerr.com/"}, {"title": "Labellerr Reviews 2026: Details, Pricing, & Features | G2", "url": "https://www.g2.com/products/labellerr/reviews"}, {"title": "Tensor Matics Labellerr · GitHub", "url": "https://github.com/tensormatics"}, {"title": "labellerr (Tensor Matics Pvt Ltd)", "url": "https://huggingface.co/labellerr"}, {"title": "Tensor Matics Inc - Labellerr", "url": "https://indiaai.gov.in/startup/tensor-matics-inc"}, {"title": "Labellerr - Crunchbase Company Profile & Funding", "url": "https://www.crunchbase.com/organization/business-promotion"}, {"title": "Labellerr | LinkedIn", "url": "https://www.linkedin.com/company/labellerr"}, {"title": "Labellerr By Tensor Matics Private Limited Company Profile & Overview", "url": "https://internshala.com/company/labellerr-by-tensor-matics-private-limited-1619436661/"}, {"title": "Labellerr Pricing 2026", "url": "https://www.g2.com/products/labellerr/pricing"}]

Based on the search results, here's what I found about Labellerr (Tensor Matics):

Company Overview

Labellerr is a technology company that provides data labeling and image annotation software for the AI and machine learning sectors, with offerings including a data annotation platform, annotation services, and tools for video and image labeling, as well as text and medical image annotations.

Headquarters Location

Labellerr's headquarters is located at 651 North Broad Street, Middletown. Additionally, the company is headquartered in the US with back office in Chandigarh and Noida, India.

Parent Company

Labellerr is operated by Tensor Matics Inc.

Video Annotation

The search results confirm that Labellerr supports data types including videos, and the company offers tools for video and image labeling.

SOC 2 Compliance

The search results did not contain specific information about SOC 2 compliance certification for Labellerr. This compliance status would typically be found on the company's security or compliance documentation page, which was not included in these search results.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

Structured output provided successfully

10. assistant (2026-05-30T08:34:31.019Z)

The homepage fetch returned richer data than my first-pass StructuredOutput assumed (it found a SOC 2 logo, GDPR icon, San Francisco HQ + Chandigarh India office, free 14-day pilot, SDK). My initial claims were too pessimistic on several verifiable points. Let me correct the record with accurate, primary-source-grounded claims.

Key corrections vs my draft:

- Location: NOT unconfirmed ? SF HQ + Chandigarh/Noida India back office (India presence is Chandigarh/Noida, NOT Bangalore).
- SOC 2 + GDPR: logos displayed on site (primary), plus AES-256/TLS encryption.
- Pilot: explicitly "Free 14 days pilot" with "No minimum data commitment."
- Entity name varies across sources: "Tensor Matics, Inc." (US) and "Tensor Matics Pvt Ltd" / "Private Limited" (India) ? worth flagging.

Structured output provided successfully

13. assistant (2026-05-30T08:35:10.371Z)

I've completed the extraction. Summary of findings on Labellerr (Tensor Matics):

****Source quality:**** Primary (vendor's own website), supplemented by third-party listings (CB Insights, G2, IndiaAI) for cross-verification.

****Key claims extracted:****

- **Location (central):**** SF HQ + India back office in ****Chandigarh, Punjab**** (and Noida per third-party listings) ? India presence exists but is ****NOT Bangalore****, which limits the founder's preferred local-coordination advantage.
- **Vendor type (central):**** Primarily a ****self-serve SaaS annotation platform**** with an optional managed-services add-on ? a tool-plus-services hybrid, not a pure managed-labeling vendor.
- **Video temporal capability (central):**** Supports video annotation but the site does ****NOT**** confirm temporal/segment (start/end timestamp) or action labeling, nor sports-video experience. The exact rally-segmentation capability is ****UNVERIFIED**** despite a generic "Sports Vision" link.
- **Pricing/pilot (supporting):**** Offers a ****"Free 14 days pilot," "No minimum data**

commitment,"** and an SDK for programmatic sync ? so a bake-off pilot is feasible. But **no concrete rates** are published; pricing is demo-gated (**UNVERIFIED**).

5. **Security/compliance (supporting):** Displays **SOC 2 and GDPR** badges; states AES-256, TLS 1.2+, Auth0, least-privilege logging, customer-hosting option. **No ISO 27001, no India DPDP Act, no signed DPA, no no-reuse commitment** mentioned (**UNVERIFIED**).

Note: I issued an initial StructuredOutput call before the homepage WebFetch result was fully reflected, then corrected it once the richer primary-source data (SF/Chandigarh location, SOC 2 + GDPR badges, free 14-day pilot, SDK) was confirmed. The final structured output reflects the corrected, primary-source-grounded claims.
