Adversarial Claim Verifier (voter 3/3)

Be SKEPTICAL. Try to REFUTE this claim. ?2/3 refutations kill it.

Research question

RESEARCH GOAL: Produce a decision-grade shortlist of data-annotation VENDORS to build "golden set" ground-truth labels for a badminton highlights product, with a STRONG PREFERENCE for vendors based in or operating from Bangalore / India (the founder is in Bangalore and prefers local vendors for easier coordination, possible site visits, and data residency). The annotation task is TEMPORAL VIDEO SEGMENT annotation: marking the [start, end) time ranges of each "rally" in badminton match videos ? i.e. event / temporal-action labeling on video, NOT just image bounding boxes. Output is a simple per-video timestamp list (CSV of start,end). Volume: a constantly growing collection of licensed/owned match videos (no end-user uploads).

For EACH candidate vendor, verify against PRIMARY sources (the vendor's own website/docs) and clearly FLAG anything unverifiable (pricing is usually quote-only):

1. Company & location ? HQ + delivery centers; confirm Bangalore / India presence; flag if purely overseas.
2. Capability ? do they do VIDEO temporal/event annotation (timestamps/segments) or video tracking, or only static image labeling? Sports / media-video experience is a plus.
3. Pricing model ? per video-minute / per task / per annotator-hour / managed-team; any public rates; minimum engagement; willingness to run a small paid PILOT.
4. Data security & compliance ? ISO 27001, SOC 2, GDPR, and especially India's DPDP Act 2023; willingness to sign a DPA; "no training/reuse of our data"; delete-on-delivery; access controls; secure-facility / VDI options.
5. Delivery & integration ? programmatic API for submit/fetch? turnaround SLAs? can they support BOTH a fast tier (hours) and a batch tier (days)?
6. Quality process ? multi-annotator consensus, gold-standard/honeypot checks, inter-annotator-agreement (IAA) reporting, QA review layers.

Candidate vendors to investigate and VERIFY (do not assume ? confirm or correct each, and find others, especially Bangalore-local): iMerit, Playment (and whether TELUS International acquired it), Cogito Tech, Anolytics, Infolks, Learning Spiral, Indika AI, Tech Mahindra, Sama, Scale AI, Labelbox, Toloka, SuperAnnotate, Encord, CloudFactory. Also identify any Bangalore-based startups specializing in video annotation.

Also briefly cover: (a) typical market rate RANGE for temporal video annotation in India vs US/global; and (b) the AUTOMATED-annotation alternative ? could a hosted VLM (e.g. Gemini) or an open model serve as a "fast tier" oracle for surprise regression tests, and what that implies (it must be a DIFFERENT model lineage than the production tool to avoid shared-blind-spot bias).

DELIVERABLE: a ranked shortlist (favoring Bangalore/India) with a comparison table (vendor | location | video-temporal capability | pricing model | security/DPA & DPDP posture |

API/turnaround | QA process | pilot availability | verdict), plus 2?3 recommended vendors to approach for a pilot bake-off, and explicit flags on every unverifiable claim (especially pricing). Prioritize accuracy and primary-source citations over breadth.

Claim under review

"Labellerr is operated by Tensor Matics, Inc. with a San Francisco HQ and an India back office in Chandigarh, Punjab (and Noida per third-party listings) ? India presence exists but is NOT Bangalore, limiting the local-coordination/site-visit advantage the founder prefers."

****Source:**** <https://www.labellerr.com/> (primary)

****Supporting quote:**** "HQ: "44, Tehama St, San Francisco, CA USA 94107" ... India Office: "2nd Floor, Innovation Mission Punjab, Kissan Vikas Chamber...Chandigarh, Punjab 140306""

Checklist

1. Is the claim actually supported by the quote, or is it an overreach/misread?
2. WebSearch for contradicting evidence ? does any credible source dispute or heavily qualify this?
3. Is the source quality sufficient for the claim's strength? (extraordinary claims need primary sources)
4. Is the claim outdated? (check dates ? old claims about fast-moving fields are suspect)
5. Is this a marketing claim / press release / cherry-picked benchmark / forum speculation?

****refuted=true**** if: unsupported by quote / contradicted / low-quality source for strong claim / outdated / marketing fluff.

****refuted=false**** ONLY if: claim is well-supported, current, and source quality matches claim strength.

Default to refuted=true if uncertain.

Structured output only. Evidence MUST be specific.

Based on the search results, here's what I found about Labellerr's office locations in India:

Labellerr is headquartered in the US with back office locations in Chandigarh and Noida, India. The search results do not specifically mention a Bangalore office for Labellerr.

Additionally, Labellerr is based out in Chandigarh, which they refer to as "the City Beautiful."

So while Labellerr has a presence in India through offices in Chandigarh and Noida, there is no mention of a Bangalore location in the available information. If you're looking for Labellerr services in Bangalore specifically, you may want to contact them directly through their website to inquire about local support or partnerships in that region.

Based on the search results, here's what I found about Labellerr and Tensor Matics:

Company Overview

Labellerr by Tensor Matics Private Limited is a B2B SAAS training data platform for enterprises to build computer vision AI solutions in days instead of years.

Headquarters and Locations

The search results show different headquarters information depending on the source:

- The company is headquartered in the US with back office in Chandigarh and Noida, India.
- According to LinkedIn, the headquarters is in Mohali, Punjab.
- CB Insights lists the headquarters at 651 North Broad Street, Middletown.

****Regarding Bangalore/Bengaluru specifically:**** The search results do not mention Bangalore or Bengaluru as a headquarters or delivery center location for Labellerr or Tensor Matics. The company's operations appear to be primarily based in the US and in various cities in northern India (Chandigarh, Noida, and Mohali).

If you're looking for specific information about a Bangalore delivery center, it may not be publicly listed in the available sources, or this location may not be part of their current

operations.
