Adversarial Claim Verifier (voter 1/3)

Be SKEPTICAL. Try to REFUTE this claim. ?2/3 refutations kill it.

Research question

RESEARCH GOAL: Produce a decision-grade shortlist of data-annotation VENDORS to build "golden set" ground-truth labels for a badminton highlights product, with a STRONG PREFERENCE for vendors based in or operating from Bangalore / India (the founder is in Bangalore and prefers local vendors for easier coordination, possible site visits, and data residency). The annotation task is TEMPORAL VIDEO SEGMENT annotation: marking the [start, end) time ranges of each "rally" in badminton match videos ? i.e. event / temporal-action labeling on video, NOT just image bounding boxes. Output is a simple per-video timestamp list (CSV of start,end). Volume: a constantly growing collection of licensed/owned match videos (no end-user uploads).

For EACH candidate vendor, verify against PRIMARY sources (the vendor's own website/docs) and clearly FLAG anything unverifiable (pricing is usually quote-only):

1. Company & location ? HQ + delivery centers; confirm Bangalore / India presence; flag if purely overseas.
2. Capability ? do they do VIDEO temporal/event annotation (timestamps/segments) or video tracking, or only static image labeling? Sports / media-video experience is a plus.
3. Pricing model ? per video-minute / per task / per annotator-hour / managed-team; any public rates; minimum engagement; willingness to run a small paid PILOT.
4. Data security & compliance ? ISO 27001, SOC 2, GDPR, and especially India's DPDP Act 2023; willingness to sign a DPA; "no training/reuse of our data"; delete-on-delivery; access controls; secure-facility / VDI options.
5. Delivery & integration ? programmatic API for submit/fetch? turnaround SLAs? can they support BOTH a fast tier (hours) and a batch tier (days)?
6. Quality process ? multi-annotator consensus, gold-standard/honeypot checks, inter-annotator-agreement (IAA) reporting, QA review layers.

Candidate vendors to investigate and VERIFY (do not assume ? confirm or correct each, and find others, especially Bangalore-local): iMerit, Playment (and whether TELUS International acquired it), Cogito Tech, Anolytics, Infolks, Learning Spiral, Indika AI, Tech Mahindra, Sama, Scale AI, Labelbox, Toloka, SuperAnnotate, Encord, CloudFactory. Also identify any Bangalore-based startups specializing in video annotation.

Also briefly cover: (a) typical market rate RANGE for temporal video annotation in India vs US/global; and (b) the AUTOMATED-annotation alternative ? could a hosted VLM (e.g. Gemini) or an open model serve as a "fast tier" oracle for surprise regression tests, and what that implies (it must be a DIFFERENT model lineage than the production tool to avoid shared-blind-spot bias).

DELIVERABLE: a ranked shortlist (favoring Bangalore/India) with a comparison table (vendor | location | video-temporal capability | pricing model | security/DPA & DPDP posture |

API/turnaround | QA process | pilot availability | verdict), plus 2?3 recommended vendors to approach for a pilot bake-off, and explicit flags on every unverifiable claim (especially pricing). Prioritize accuracy and primary-source citations over breadth.

Claim under review

"iMerit publicly claims strong security/compliance certifications (SOC 2, ISO 27001, GDPR), which covers most of the buyer's data-security requirements; however, no mention of India's DPDP Act 2023 was found on the site, so DPDP posture and DPA willingness remain unverified."

****Source:**** <https://imerit.net/services/video-annotation/> (primary)

****Supporting quote:**** "iMerit is SOC2, ISO 27001, GDPR, HIPAA, and TISAX compliant."

Checklist

1. Is the claim actually supported by the quote, or is it an overreach/misread?
2. WebSearch for contradicting evidence ? does any credible source dispute or heavily qualify this?
3. Is the source quality sufficient for the claim's strength? (extraordinary claims need primary sources)
4. Is the claim outdated? (check dates ? old claims about fast-moving fields are suspect)
5. Is this a marketing claim / press release / cherry-picked benchmark / forum speculation?

****refuted=true**** if: unsupported by quote / contradicted / low-quality source for strong claim / outdated / marketing fluff.

****refuted=false**** ONLY if: claim is well-supported, current, and source quality matches claim strength.

Default to refuted=true if uncertain.

Structured output only. Evidence MUST be specific.

2. assistant (2026-05-30T08:40:55.550Z)

I'll verify this claim about iMerit's security certifications. Let me check the primary source and search for any contradicting evidence.

```

Based on the search results, here's what I found about iMerit's compliance certifications:

iMerit's Compliance Certifications

****ISO 27001:**** iMerit participates in rigorous audits every 3 years to remain ISO 27001 compliant, with the International Organization for Standardization 27001 Standard ensuring office sites, development centers, support centers and data centers are securely managed.

****GDPR:**** iMerit's security policies and processes, including data protection, network security, incident response and risk assessment, have been thoroughly evaluated for GDPR compliance, and the company is committed to complying with GDPR in providing services to customers.

****HIPAA:**** iMerit complies with the Health Insurance Portability and Accountability Act of 1996 to use a secure environment to process, maintain, and store protected health information.

****TISAX:**** The Trusted Information Security Assessment Exchange (TISAX) is a globally recognized certification for the automotive industry that evaluates an organization's IT security, and iMerit undergoes regular TISAX assessments to comply with stringent security standards.

****ISO 9001:**** iMerit underwent a systematic, independent examination of the quality management system to determine whether activities meet the requirements of ISO 9001:2015.

****Additional Recognition:**** iMerit has earned the prestigious Great Place to Work certification for 2021.

Note: The search results did not return specific information about iMerit's SOC 2 certification status.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

6. user (2026-05-30T08:41:27.039Z)

Web search results for query: "iMerit SOC 2 ISO 27001 GDPR HIPAA TISAX compliance certifications"

Links: [{"title":"Compliance and Certifications | iMerit","url":"https://imerit.net/compliance-and-certifications/"}, {"title":"11 SSO Compliance Requirements Compared: SOC 2, ISO 27001, HIPAA, PCI DSS, and GDPR - Security Boulevard","url":"https://securityboulevard.com/2026/04/11-sso-compliance-requirements-compared-soc-2-iso-27001-hipaa-pci-dss-and-gdpr/"}, {"title":"SOC 2 vs. ISO 27001: differences, similarities and standards mapping","url":"https://www.strikegraph.com/blog/difference-between-iso-27001-and-soc-2"}, {"title":"SOC 2, ISO 27001 & TISAX Certification Guide | CyBirds","url":"https://cybirds.org/certifications/"}, {"title":"SOC 2 vs ISO 27001, HIPAA, HITRUST: Compared | ISMS.online","url":"https://www.isms.online/soc-2/framework-comparisons/"}, {"title":"IT Compliance for Integrations | ISO 27001, GDPR, SOC 2, HIPAA","url":"https://www.zigiwave.com/resources/it-compliance-integrations"}, {"title":"ISO 27001 Mapping with SOC 2, HIPAA, PCI DSS, NIST CSF","url":"https://www.ampcuscyber.com/blogs/iso-27001-mapping-with-security-standards/"}, {"title":"Comp AI: The open-source way to get compliant with SOC 2, ISO 27001, HIPAA and GDPR - Help Net Security","url":"https://www.helpnetsecurity.com/2026/04/07/comp-ai-open-source-compliance-platform/"}, {"title":"SOC 2 vs ISO 27001: which compliance standard fits your business?","url":"https://www.trustcloud.ai/iso-27001/choose-soc-2-and-iso-27001/"}, {"title":"ISO 27001 compared to other information security standards","url":"https://www.secfix.com/post/key-differences-between-iso-27001-and-other-information-security-standards"}]

Based on the search results, here's what I found about iMerit's compliance certifications:

iMerit's Compliance Certifications

iMerit holds ISO 27001 certification and participates in rigorous audits every 3 years to remain compliant.

****GDPR Compliance:**** iMerit's security policies and processes have been thoroughly evaluated for GDPR compliance, including data protection, network security, incident response and risk assessment.

****HIPAA:**** iMerit complies with the Health Insurance Portability and Accountability Act (HIPAA) and uses a secure environment to process, maintain, and store protected health information.

****TISAX:**** iMerit undergoes regular TISAX (Trusted Information Security Assessment Exchange) assessments to comply with stringent security standards.

****Additional Certification:**** iMerit has also undergone independent examination of its quality management system to determine compliance with ISO 9001:2015.

The search results show iMerit maintains these various compliance certifications, though the results did not contain specific information about SOC 2 certification for iMerit.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

AI-Powered ISO 27001 Compliance", "url": "https://www.ismscopilot.com/"}]

Based on the web search results, here's what I found about iMerit's compliance certifications:

iMerit Compliance and Certifications

iMerit holds SOC 2 Type 2 attestation as a testament to their commitment to enterprise-grade security, privacy, availability, and performance. They undergo regular audits to ensure security requirements are met and remain SOC 2-compliant.

iMerit participates in rigorous audits every 3 years to remain ISO 27001 compliant.

iMerit undergoes regular TISAX assessments to comply with stringent security standards.

Additionally, iMerit provides services in a HIPAA-compliant environment, and their compliance efforts align with GDPR requirements for data protection.

The search results confirm that iMerit maintains compliance with the major security and data protection standards you mentioned: SOC 2, ISO 27001, TISAX, HIPAA, and operates in accordance with GDPR. More details about their specific compliance practices can be found on their [Compliance and Certifications page](https://imerit.net/compliance-and-certifications/).

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

```

Based on the search results, I found the iMerit compliance and certifications page. Here's what I found:

iMerit maintains ISO 27001 compliance, the information security standard that ensures office sites, development centers, support centers and data centers are securely managed, participating in rigorous audits every 3 years.

iMerit complies with the Health Insurance Portability and Accountability Act (HIPAA), which sets the standard for sensitive patient data protection, and undergoes regular TISAX assessments to comply with stringent security standards.

The company has also undergone a systematic, independent examination for ISO 9001:2015 compliance, which demonstrates the company's ability to consistently provide products and services that meet customer requirements.

The official iMerit compliance and certifications page is located at:
<https://imerit.net/compliance-and-certifications/>

Based on the search results, here's what I found about iMerit and ISO 27001 certification:

iMerit's ISO 27001 Certification

ISO 27001 is an information security standard that ensures office sites, development centers, support centers and data centers are securely managed. iMerit participates in rigorous audits every 3 years to remain ISO 27001 compliant.

These measures are evidence of iMerit's commitment to information security at every level of the organization. In addition to ISO 27001, iMerit's SOC 2 Type 2 attestation is a testament to its commitment to enterprise-grade security, privacy, availability, and performance.

About ISO 27001

ISO/IEC 27001 is the world's best-known standard for information security management systems (ISMS) and defines requirements an ISMS must meet. Conformity with ISO/IEC 27001 means that an organization has put in place a system to manage risks related to the security of data owned or handled by the company.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

11. user (2026-05-30T08:41:44.491Z)

Based on the web search results, here's what I found regarding iMerit's data security compliance:

iMerit's Data Security Certifications

iMerit holds ISO 27001 certification, the International Organization for Standardization 27001 Standard that ensures office sites, development centers, support centers and data centers are securely managed, and participates in rigorous audits every 3 years to remain ISO 27001 compliant.

iMerit undergoes regular TISAX (Trusted Information Security Assessment Exchange) assessments to comply with stringent security standards. TISAX is a globally recognized certification for the automotive industry that evaluates an organization's IT security.

iMerit enables covered entities and their business associates to comply with HIPAA (Health Insurance Portability and Accountability Act), which sets the standard for sensitive patient data protection.

The company's security policies and processes, that include data protection, network security, incident response and risk assessment, have been thoroughly evaluated for GDPR compliance, and iMerit is committed to complying with GDPR in providing services to customers.

These multiple certifications demonstrate that iMerit maintains comprehensive data security practices across healthcare, automotive, and EU data protection requirements.

REMINDER: You MUST include the sources above in your response to the user using markdown

hyperlinks.

12. user (2026-05-30T08:41:46.157Z)

Based on the search results, here's what I found about iMerit's security certifications:

iMerit Security Certifications and Compliance

iMerit's SOC 2 Type 2 attestation is a testament to their commitment to enterprise-grade security, privacy, availability, and performance. They undergo regular audits to ensure the security requirements are met and that they remain SOC 2-compliant.

iMerit participates in rigorous audits every 3 years to remain ISO 27001 compliant. ISO 27001 is an information security standard that ensures office sites, development centers, support centers and data centers are securely managed.

iMerit undergoes regular TISAX assessments to comply with stringent security standards. TISAX is a globally recognized certification for the automotive industry that evaluates an organization's IT security.

The search results show that iMerit maintains these key security certifications on their compliance and certifications page (imerit.net/compliance-and-certifications/), but the specific details about GDPR, HIPAA, or video annotation services were not included in the search results retrieved.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

```

Based on the search results, here's information about India's DPDP Act and Digital Personal Data Protection compliance:

Overview of the DPDP Act

The Digital Personal Data Protection Act of 2023, commonly referred to as the DPDP Act, is India's data privacy law. On August 11, 2023, the Government of India published the Digital Personal Data Protection Act, 2023 (DPDP Act), which will form the personal data protection and regulatory regime in India.

Scope and Application

The DPDP Act is applicable only to personal data in digital form and does not regulate non-personal and non-digital data. While the DPDP Act is applicable to Indian entities which engage in the processing of personal data, it also has extra-territorial applicability, applying to foreign entities who offer goods and services to Data Principals located within the territory of India and process personal data in connection to such activities.

Implementation Timeline

On November 13, 2025, the MeitY notified the DPDP Act and the Digital Personal Data Protection Rules, 2025 (DPDP Rules). Sections of the DPDP Act and rules framed under the DPDP Rules will be effective in a phased manner. Phase III (effective 18 months from notification i.e., from 13 May 2027): All other substantive provisions of the DPDP Act, including specific compliance obligations, are only set to be effective 18 months from the date of notification, i.e., from May 13, 2027.

Key Compliance Obligations

The DPDP Act introduces several compliances with respect to the collection, processing, storage and transfer of digital personal data. Compliance obligations include appointing consent managers and data protection officers, implementing systems for express user permission, and reporting data breaches within 72 hours.

Penalties for Non-Compliance

DPDP Act also introduces significant penalties for non-compliance, with fines reaching up to INR 250 crore for failing to implement reasonable security measures to prevent data breaches. Other breaches like failing to notify the Board or affected individuals of a breach or mishandling sensitive categories like children's data can draw fines as high as INR 200 crore, and lesser violations up to INR 50 crore.

Note: The search results did not contain specific information about iMerit's DPDP Act compliance. For details about that specific company's compliance approach, you may need to search for iMerit's official compliance statements or announcements.

Based on the search results, here is information about iMerit's ISO 27001:2013 certification and the Information Security Management System standard:

iMerit's ISO 27001 Certification

ISO 27001 is an information security standard that ensures office sites, development centers, support centers and data centers are securely managed. iMerit participates in rigorous audits every 3 years to remain ISO 27001 compliant.

Employing a systematic approach, iMerit ensures high confidentiality, integrity, and availability through robust security policies, risk assessments, security control monitoring, and employee training.

ISO 27001:2013 Standard Overview

ISO/IEC 27001:2013 specifies the requirements for establishing, implementing, maintaining and continually improving an information security management system within the context of the organization, and includes requirements for the assessment and treatment of information security risks tailored to the needs of the organization.

The requirements set out in ISO/IEC 27001:2013 are generic and are intended to be applicable to all organizations, regardless of type, size or nature.

The standard provides organizations with a comprehensive framework for managing information security and protecting their critical assets through systematic risk management and security controls.

```

Based on the search results, I found information about a security incident involving **IDMerit** (an identity verification company), but not specifically about "iMerit" (a data annotation and AI model evaluation company). These appear to be two different organizations. Here's what I found:

IDMerit Data Breach (Not iMerit)

Cybersecurity researchers from the Cybernews investigative team uncovered an unprotected MongoDB instance on November 11, 2025 that they traced to US based identity verification firm IDMerit. The exposed server, used to store know your customer KYC data, held multiple databases totaling more than 3 billion records and nearly 1 terabyte of data.

The incident is a real (though unintentional) exposure, not fake news or a hack, and the data exposure presents a high risk for users.

iMerit's Security Claims

Regarding iMerit (the data annotation company), the company is ISO27001:2013 certified, SOC 2 compliant and has been audited based on AICPA guidelines. However, the search results did not reveal any significant compliance violations, data breaches, or security incidents specific to iMerit.

If you're looking for information about a specific security incident or compliance issue involving iMerit, you may want to clarify further, as the search results primarily returned information about IDMerit's breach rather than iMerit.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

```

Based on the search results, here's the information about iMerit's SOC 2 Type 2 compliance and certifications:

iMerit's SOC 2 Type 2 Attestation

iMerit's SOC 2 Type 2 attestation is a testament to their commitment to enterprise-grade security, privacy, availability, and performance. The company undergoes regular audits to ensure the security requirements are met and remain SOC 2-compliant.

Additional Information Security Certifications

Beyond SOC 2 Type 2, iMerit holds several other important information security certifications:

- **ISO 27001**: ISO 27001 is an information security standard that ensures office sites, development centers, support centers and data centers are securely managed, and iMerit participates in rigorous audits every 3 years to remain ISO 27001 compliant.
- **ISO 9001:2015**: iMerit underwent a systematic, independent examination of the quality management system to determine whether the activities meet the requirements of ISO 9001:2015.
- **GDPR Compliance**: The company's security policies and processes, including data protection, network security, incident response and risk assessment, have been thoroughly evaluated for GDPR compliance, and iMerit is committed to complying with GDPR in providing services to customers.
- **TISAX**: TISAX is a globally recognized certification for the automotive industry that evaluates an organization's IT security, and iMerit undergoes regular TISAX assessments to comply with stringent security standards.

```

Based on the search results, here is what I found regarding iMerit's data security compliance and certifications:

iMerit's Compliance and Certifications

****ISO 27001 Certification:****

iMerit holds ISO 27001 certification, an information security standard that ensures office sites, development centers, support centers and data centers are securely managed, and participates in rigorous audits every 3 years to remain compliant.

****GDPR Compliance:****

iMerit's security policies and processes, including data protection, network security, incident response and risk assessment, have been thoroughly evaluated for GDPR compliance. iMerit is committed to complying with GDPR in providing services to customers.

****HIPAA Compliance:****

iMerit enables covered entities and their business associates under the Health Insurance Portability and Accountability Act (HIPAA) to use a secure environment to process, maintain, and store protected health information.

****Additional Certifications:****

iMerit has also undergone examination for ISO 9001:2015 compliance, demonstrating the company's ability to consistently provide products and services that meet customer requirements and applicable statutory and regulatory requirements.

iMerit has also obtained TISAX (Trusted Information Security Assessment Exchange) certification, a globally recognized certification for the automotive industry, and undergoes regular TISAX assessments to comply with stringent security standards.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

18. user (2026-05-30T08:41:58.172Z)

Based on the search results, here's information about iMerit's company profile and security certifications:

iMerit Security Certifications and Compliance

iMerit participates in rigorous audits every 3 years to remain ISO 27001 compliant. iMerit undergoes regular TISAX assessments to comply with stringent security standards.

Additionally, iMerit is able to offer client services across all its offices that comply with international security and privacy standards including ISO 27001, SOC 2 and HIPAA.

Services and Annotation Capabilities

Physicians in various specialties summarize clinical encounter notes to validate fine-tuned GenAI model performance in a HIPAA-compliant environment. iMerit specializes in complex domains like medical, AV, and mapping with end-to-end human-in-the-loop service with strong QA practices, and is ISO 27001 and SOC 2 certified for enterprise and healthcare compliance.

iMerit's Infrastructure and Information Security office is focused on the use of advanced security solutions and practices that enable iMerit to keep pace with its rapid growth, its expansion into highly regulated industries, and the ever-evolving cybersecurity landscape.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

Based on the search results, I found relevant information about iMerit and GDPR compliance:

iMerit has published content addressing GDPR compliance, discussing how organizations must handle personally identifiable information (PII) such as names, contact numbers, and addresses without proper justification under GDPR guidelines. The company highlights that GDPR requires healthcare organizations to implement strong security protocols to ensure secure storage and transfer of individual data, and to provide proof of implementation to be certified as GDPR compliant.

The search results show that iMerit has content on their website addressing GDPR requirements in the context of healthcare data de-identification, indicating they provide resources related to GDPR-compliant data protection practices. However, the specific details about iMerit's own GDPR compliance status or European operations for annotation services were not fully detailed in these search results.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

20. user (2026-05-30T08:42:20.925Z)

Structured output provided successfully

21. assistant (2026-05-30T08:42:27.941Z)

I have already completed my verification and called StructuredOutput. The evidence gathered confirms my verdict.

The claim states iMerit publicly claims SOC 2, ISO 27001, GDPR, HIPAA, TISAX compliance, with no DPDP Act mention found, leaving DPDP posture unverified.

My searches strongly corroborated this:

- SOC 2 Type 2 confirmed via a dedicated primary source (iMerit's own compliance/news pages)
- ISO 27001, GDPR, HIPAA, TISAX all confirmed on iMerit's "Compliance and Certifications" page (imerit.net/compliance-and-certifications/)
- No DPDP Act mention surfaced anywhere on iMerit's site, supporting the claim's hedged "unverified" framing
- Adversarial searches for breaches/non-compliance returned nothing contradicting the certs (the only "breach" result was IDMerit, a different company)

The claim is well-supported, current, conservatively framed, and backed by primary sources.

Verdict: refuted=false, which I have already submitted.
