Decompose this research question into complementary search angles.

Question

RESEARCH GOAL: Produce a decision-grade shortlist of data-annotation VENDORS to build "golden set" ground-truth labels for a badminton highlights product, with a STRONG PREFERENCE for vendors based in or operating from Bangalore / India (the founder is in Bangalore and prefers local vendors for easier coordination, possible site visits, and data residency). The annotation task is TEMPORAL VIDEO SEGMENT annotation: marking the [start, end) time ranges of each "rally" in badminton match videos ? i.e. event / temporal-action labeling on video, NOT just image bounding boxes. Output is a simple per-video timestamp list (CSV of start,end). Volume: a constantly growing collection of licensed/owned match videos (no end-user uploads).

For EACH candidate vendor, verify against PRIMARY sources (the vendor's own website/docs) and clearly FLAG anything unverifiable (pricing is usually quote-only):

1. Company & location ? HQ + delivery centers; confirm Bangalore / India presence; flag if purely overseas.
2. Capability ? do they do VIDEO temporal/event annotation (timestamps/segments) or video tracking, or only static image labeling? Sports / media-video experience is a plus.
3. Pricing model ? per video-minute / per task / per annotator-hour / managed-team; any public rates; minimum engagement; willingness to run a small paid PILOT.
4. Data security & compliance ? ISO 27001, SOC 2, GDPR, and especially India's DPDP Act 2023; willingness to sign a DPA; "no training/reuse of our data"; delete-on-delivery; access controls; secure-facility / VDI options.
5. Delivery & integration ? programmatic API for submit/fetch? turnaround SLAs? can they support BOTH a fast tier (hours) and a batch tier (days)?
6. Quality process ? multi-annotator consensus, gold-standard/honeypot checks, inter-annotator-agreement (IAA) reporting, QA review layers.

Candidate vendors to investigate and VERIFY (do not assume ? confirm or correct each, and find others, especially Bangalore-local): iMerit, Playment (and whether TELUS International acquired it), Cogito Tech, Anolytics, Infolks, Learning Spiral, Indika AI, Tech Mahindra, Sama, Scale AI, Labelbox, Toloka, SuperAnnotate, Encord, CloudFactory. Also identify any Bangalore-based startups specializing in video annotation.

Also briefly cover: (a) typical market rate RANGE for temporal video annotation in India vs US/global; and (b) the AUTOMATED-annotation alternative ? could a hosted VLM (e.g. Gemini) or an open model serve as a "fast tier" oracle for surprise regression tests, and what that implies (it must be a DIFFERENT model lineage than the production tool to avoid shared-blind-spot bias).

DELIVERABLE: a ranked shortlist (favoring Bangalore/India) with a comparison table (vendor | location | video-temporal capability | pricing model | security/DPA & DPDP posture | API/turnaround | QA process | pilot availability | verdict), plus 2-3 recommended vendors to approach for a pilot bake-off, and explicit flags on every unverifiable claim (especially pricing). Prioritize accuracy and primary-source citations over breadth.

Task

Generate 5 distinct web search queries that together cover the question from different angles.

Pick angles that suit the question's domain. Examples:

- broad/primary · academic/technical · recent news · contrarian/skeptical · practitioner/implementation
- For medical: anatomy · common causes · serious differentials · authoritative refs · red flags
- For tech: state-of-art · benchmarks · limitations · industry adoption · cost/tradeoffs

Make queries specific enough to surface high-signal results. Avoid redundancy.

Return: the question (verbatim or lightly normalized), a 1-2 sentence decomposition strategy, and the angles.

Structured output only.

2. assistant (2026-05-30T08:28:42.001Z)

I'll decompose this research question into complementary search angles. Let me analyze the question first to identify the key dimensions that need coverage.

The question is dense, but for *search angle* purposes the high-signal axes are: (1) verifying the named global/India vendors' video-temporal capability, (2) finding Bangalore-local video-annotation specialists, (3) the Playment/TELUS acquisition + DPDP/security posture, (4) market rate ranges for temporal video annotation India vs global, and (5) the automated VLM-oracle alternative.

3. user (2026-05-30T08:29:03.570Z)

Structured output provided successfully

4. assistant (2026-05-30T08:29:07.339Z)

I've decomposed the research question into 6 complementary search angles that together cover all five major axes of the question without redundancy. The structured output has been returned successfully.
