Web Searcher: pricing/market ? temporal video rate range

Research question: "RESEARCH GOAL: Produce a decision-grade shortlist of data-annotation VENDORS to build "golden set" ground-truth labels for a badminton highlights product, with a STRONG PREFERENCE for vendors based in or operating from Bangalore / India (the founder is in Bangalore and prefers local vendors for easier coordination, possible site visits, and data residency). The annotation task is TEMPORAL VIDEO SEGMENT annotation: marking the [start, end) time ranges of each "rally" in badminton match videos ? i.e. event / temporal-action labeling on video, NOT just image bounding boxes. Output is a simple per-video timestamp list (CSV of start,end). Volume: a constantly growing collection of licensed/owned match videos (no end-user uploads).

For EACH candidate vendor, verify against PRIMARY sources (the vendor's own website/docs) and clearly FLAG anything unverifiable (pricing is usually quote-only):

1. Company & location ? HQ + delivery centers; confirm Bangalore / India presence; flag if purely overseas.
2. Capability ? do they do VIDEO temporal/event annotation (timestamps/segments) or video tracking, or only static image labeling? Sports / media-video experience is a plus.
3. Pricing model ? per video-minute / per task / per annotator-hour / managed-team; any public rates; minimum engagement; willingness to run a small paid PILOT.
4. Data security & compliance ? ISO 27001, SOC 2, GDPR, and especially India's DPDP Act 2023; willingness to sign a DPA; "no training/reuse of our data"; delete-on-delivery; access controls; secure-facility / VDI options.
5. Delivery & integration ? programmatic API for submit/fetch? turnaround SLAs? can they support BOTH a fast tier (hours) and a batch tier (days)?
6. Quality process ? multi-annotator consensus, gold-standard/honeypot checks, inter-annotator-agreement (IAA) reporting, QA review layers.

Candidate vendors to investigate and VERIFY (do not assume ? confirm or correct each, and find others, especially Bangalore-local): iMerit, Playment (and whether TELUS International acquired it), Cogito Tech, Anolytics, Infolks, Learning Spiral, Indika AI, Tech Mahindra, Sama, Scale AI, Labelbox, Toloka, SuperAnnotate, Encord, CloudFactory. Also identify any Bangalore-based startups specializing in video annotation.

Also briefly cover: (a) typical market rate RANGE for temporal video annotation in India vs US/global; and (b) the AUTOMATED-annotation alternative ? could a hosted VLM (e.g. Gemini) or an open model serve as a "fast tier" oracle for surprise regression tests, and what that implies (it must be a DIFFERENT model lineage than the production tool to avoid shared-blind-spot bias).

DELIVERABLE: a ranked shortlist (favoring Bangalore/India) with a comparison table (vendor | location | video-temporal capability | pricing model | security/DPA & DPDP posture | API/turnaround | QA process | pilot availability | verdict), plus 2-3 recommended vendors to approach for a pilot bake-off, and explicit flags on every unverifiable claim (especially pricing). Prioritize accuracy and primary-source citations over breadth."

Your angle: ****pricing/market ? temporal video rate range**** ? Gathers the market-rate RANGE for temporal video annotation in India vs US/global, flagging that real pricing is typically quote-only ? the cost-benchmark deliverable.
Search query: `video annotation pricing per minute cost temporal labeling rate India vs US 2024 2025`

Task

Use WebSearch with the query above (or a refined version). Return the top 4-6 most relevant results.

Rank by relevance to the ORIGINAL question, not just the search query. Skip obvious SEO spam/content farms.

Include a short snippet capturing why each result is relevant.

Structured output only.

2. assistant (2026-05-30T08:29:10.292Z)

I'll search for market-rate information on temporal video annotation pricing.

3. user (2026-05-30T08:29:27.642Z)

Web search results for query: "video annotation pricing per minute cost temporal labeling rate India vs US 2024 2025"

Links: [{"title": "Data Annotation Pricing: Free Cost Calculator for Video and Image Annotation", "url": "https://labelyourdata.com/pricing"}, {"title": "Data Annotation Pricing: Key Models & Cost Factors Explained", "url": "https://www.gdsonline.tech/data-annotation-pricing/"}, {"title": "Transcription Rates in India: Benchmarking Freelance Costs Globally | ReelMind", "url": "https://reelmind.ai/blog/transcription-rates-in-india-benchmarking-freelance-costs-globally"}, {"title": "Data Annotation pricing & Cost Estimator", "url": "https://mindkosh.com/annotation-services/cost-estimator.html"}, {"title": "Data Annotation Pricing: Costs & Factors to Consider", "url": "https://annotationbox.com/pricing/"}, {"title": "Data Annotation Costs by Country: Comparing Global Rates in 2026 | Second Talent", "url": "https://www.seconddtalent.com/resources/data-annotation-costs-by-country-comparing-global-rates/"}, {"title": "Data Labeling Pricing 2026: Cost Per Image, Text & Video (USA vs India)", "url": "https://www.precisebposolution.com/blog/data-labeling-pricing.html"}, {"title": "How Much Do Data Annotation Services Cost? Based on the search results, here's what I found regarding video annotation pricing and temporal labeling rates comparing India and the US in 2024-2025:

Video Annotation Pricing: India vs USA

For video object tracking, India charges \$3-\$15 per hour while the USA charges \$15-\$60 per hour. For frame annotation, India ranges from \$0.05-\$0.25 per frame while the USA ranges from \$0.25-\$1+ per frame.

General Pricing Models

The search results indicate that industry benchmarks reflect market trends in 2025, with several pricing approaches:

- ****Hourly Rate Model****: Data annotation pricing for projects billed by time is typically \$6 per annotator hour.

- ****Per-Label Pricing****: Bounding boxes may cost around \$0.02-\$0.04 per object, while polygon or semantic segmentation can be \$0.06 or higher per label due to increased effort.

Regional Cost Differences

Asia (India, Vietnam, Philippines) offers competitive rates, often 30-50% lower per unit. A project needing 50,000 simple image bounding box annotations might cost \$0.04 per image (Asia) or \$0.10 per image (US-based vendor).

India-Specific Rates for ML Training Data

Rates for data labeling and transcription for model training purposes in India can range from \$15 to \$30 per hour of audio reviewed.

The search results show that video annotation pricing varies significantly based on complexity, volume, and specific annotation type, with India consistently offering 30-50% lower rates than US-based providers.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

4. user (2026-05-30T08:29:24.447Z)

The server returned HTTP 404 Not Found.

The response body was not retrieved. If this URL requires authentication, use an authenticated tool (e.g. `gh` for GitHub, or an MCP-provided fetch tool) instead of WebFetch.

5. user (2026-05-30T08:29:33.552Z)

The server returned HTTP 404 Not Found.

The response body was not retrieved. If this URL requires authentication, use an authenticated tool (e.g. `gh` for GitHub, or an MCP-provided fetch tool) instead of WebFetch.

6. user (2026-05-30T08:29:34.374Z)

The server returned HTTP 403 Forbidden.

The response body was not retrieved. If this URL requires authentication, use an authenticated tool (e.g. `gh` for GitHub, or an MCP-provided fetch tool) instead of WebFetch.

7. user (2026-05-30T08:29:45.885Z)

The server returned HTTP 404 Not Found.

Structured output provided successfully

9. assistant (2026-05-30T08:30:08.946Z)

The search returned strong results with concrete India-vs-US figures. My initial guessed URLs 404'd, but the search itself surfaced better primary sources. Let me verify the key figures against the actual pages the search returned, then finalize.

Video Annotation Pricing - Concrete Figures

Based on the document, here are the specific video annotation rates:

Video Object Tracking

- **India:** "\$3-\$15 /hour of footage"
- **USA:** "\$15-\$60 /hour of footage"

Frame-by-Frame Annotation

- **India:** "\$0.05-\$0.25 /frame"
- **USA:** "\$0.25-\$1.00+ /frame"

Key Takeaway

The material indicates that "video annotation is significantly more expensive than image annotation because every frame must be labeled and object identities tracked across frames." The document notes teams often use "sparse frame sampling or AI-assisted tracking to reduce manual effort on large video datasets" as a cost optimization strategy.

Currency: All figures are in USD.

Geographic Comparison: India-based video work costs 60-80% less than USA-based equivalent services, consistent with the general annotation cost differential cited throughout the document.

The document does not provide separate per-minute rates or temporal/event labeling specific pricing.

Video Annotation Pricing - Label Your Data

Based on the provided webpage content, **specific video annotation rates are not explicitly stated**.

The page mentions video annotation services exist but does not provide:

- Per-frame rates
- Per-minute rates
- Per-hour rates specific to video

The only concrete pricing mentioned is:

- **\$0.015 per object** for keypoint annotations
- **\$0.02 per entity** for NLP tasks
- **\$6 per annotator hour** for time-based billing

The site directs users to:

1. Use their cost calculator tool
2. Submit sample data for a "free pilot project to evaluate pricing for your specific needs"
3. Contact sales for custom quotes

Recommendation: Contact Label Your Data directly or use their calculator tool for precise video annotation pricing, as rates appear customized based on project complexity and volume rather than published per-unit rates.

12. user (2026-05-30T08:30:20.430Z)

Video Annotation Pricing

Based on the provided web content, **concrete video annotation pricing is not available**.

The page explicitly states: "For Video annotation, please get in touch with us for getting a quote."

The cost estimator tool includes sections for image annotation, speech transcription, and LIDAR annotation with specific per-unit rates, but video annotation is notably absent from the pricing calculator. The document does not provide per-frame, per-minute, or per-object rate comparisons between video and image services.

****To obtain video annotation pricing, users must contact Mindkosh directly**** via their contact form or email.

Data Annotation Rates by Country: Key Figures

Hourly Rates by Region

****United States:**** "\$25-60+"
****Western Europe:**** "\$20-45"
****Eastern Europe:**** "\$10-25"
****Latin America:**** "\$8-20"
****India:**** "\$5-15"
****Philippines:**** "\$5-12"
****Vietnam:**** "\$5-10"
****Africa (Kenya, Nigeria):**** "\$2-8"

Per-Unit Pricing Examples

The document provides specific task-based rates:

- Bounding boxes: "\$0.02-\$0.10 per object"
- Polygon annotations: "\$0.04-\$0.15 per object"
- Semantic segmentation: "\$0.10-\$3.00 per mask"
- Basic image classification: "\$0.03-\$0.10 per image"
- Text classification: "\$0.01-\$0.03 per item"

Video-Specific Rates

"Video Annotation (per minute)" ranges from "\$1.00-3.00" (low-cost regions) to "\$8.00-15.00" (US/EU premium).

Key Comparative Finding

The document states data annotation costs "range from \$2/hour in Africa to \$60+/hour in the US," representing a 30-fold difference across markets.

India dominates volume (handling "36% of the world's image and video labeling tasks"), while Southeast Asia delivers the strongest "cost efficiency and quality" combination for most projects.

14. user (2026-05-30T08:30:25.575Z)

Annotation Pricing: Key Figures from the Guide

Video Annotation Rates

The document provides these video annotation ranges:

****Per-second pricing by region:****
- ****US/EU:**** "\$1.00 ? \$6.00" per second
- ****Asia (India, Vietnam, Philippines):**** "\$0.20 ? \$1.80" per second
- ****Eastern Europe/LatAm:**** "\$0.60 ? \$2.80" per second

Offshore vs. Onshore Cost Differences

****Hourly rates comparison:****
- ****North America/EU:**** "\$15 ? \$40" per hour
- ****Asia (India/Vietnam/Philippines):**** "\$4 ? \$12" per hour

The guide notes that "Offshore vendors, especially in Asia or Eastern Europe, often provide up to 50% lower rates than US/EU providers."

Video-Specific Context

For video work, the material indicates that "Frame rate, complexity matter" as price influencers. The document also mentions that costs vary based on task type?"Asia best for simple, EU for complex" video projects.

Key Takeaway

The pricing data demonstrates significant regional arbitrage: Indian and Southeast Asian vendors typically deliver services at roughly one-third the cost of North American providers, though quality and communication factors should inform vendor selection.

15. user (2026-05-30T08:30:43.432Z)

Structured output provided successfully

16. assistant (2026-05-30T08:30:49.483Z)

The verification fetches succeeded and gave me concrete, primary-source figures from multiple vendors that corroborate each other. I now have solid India-vs-US/global benchmark data with real numbers. Let me finalize the structured output with the verified sources.

17. user (2026-05-30T08:31:08.570Z)

Structured output provided successfully

18. assistant (2026-05-30T08:31:20.967Z)

Structured output delivered. Summary of what was found and verified for the pricing/market angle (temporal video rate range):

Verified India-vs-US/global benchmarks (all USD, all from vendor/aggregator pages so directional, not committed quotes):

- Annotator hourly rates (Second Talent, verified): India \$5-15/hr; US \$25-60+/hr; W. Europe \$20-45; Philippines \$5-12; Vietnam \$5-10; Africa \$2-8 ? roughly a 30x global spread; India handles ~36% of global image/video labeling.
- Video object tracking per hour of footage (Precise BP0, verified): India \$3-15/hr vs USA \$15-60/hr; per-frame India \$0.05-\$0.25 vs USA \$0.25-\$1.00+ ? India ~60-80% cheaper.
- Per-time-unit video (GigaBP0, verified): US/EU \$1.00-\$6.00 per second vs Asia \$0.20-\$1.80/sec; Second Talent gives a per-minute band of \$1-3/min (low-cost) vs \$8-15/min (US/EU premium).
- Pricing-model reference (Label Your Data, verified): ~\$6 per annotator-hour for time-based billing, plus an explicit free-pilot offer.

Two load-bearing caveats baked into the snippets:

1. Quote-only is the norm. Mindkosh's own estimator publishes image/speech/LIDAR rates but says video requires a custom quote ? concrete proof that temporal/video pricing is almost never list-priced. Every figure above is flagged as indicative pending a real RFQ.
2. The task here is lighter than the benchmarks. Published video rates assume per-frame tracking/segmentation. Pure [start,end) rally timestamping is far cheaper, so realistic cost for this project sits at the LOW end of the India ranges ? best confirmed via a paid pilot bake-off.

No project files were relevant to this market-research task, so none are cited.
