Be SKEPTICAL. Try to REFUTE this claim. ?2/3 refutations kill it.

Research question

RESEARCH GOAL: Produce a decision-grade shortlist of data-annotation VENDORS to build "golden set" ground-truth labels for a badminton highlights product, with a STRONG PREFERENCE for vendors based in or operating from Bangalore / India (the founder is in Bangalore and prefers local vendors for easier coordination, possible site visits, and data residency). The annotation task is TEMPORAL VIDEO SEGMENT annotation: marking the [start, end) time ranges of each "rally" in badminton match videos ? i.e. event / temporal-action labeling on video, NOT just image bounding boxes. Output is a simple per-video timestamp list (CSV of start,end). Volume: a constantly growing collection of licensed/owned match videos (no end-user uploads).

For EACH candidate vendor, verify against PRIMARY sources (the vendor's own website/docs) and clearly FLAG anything unverifiable (pricing is usually quote-only):

1. Company & location ? HQ + delivery centers; confirm Bangalore / India presence; flag if purely overseas.
2. Capability ? do they do VIDEO temporal/event annotation (timestamps/segments) or video tracking, or only static image labeling? Sports / media-video experience is a plus.
3. Pricing model ? per video-minute / per task / per annotator-hour / managed-team; any public rates; minimum engagement; willingness to run a small paid PILOT.
4. Data security & compliance ? ISO 27001, SOC 2, GDPR, and especially India's DPDP Act 2023; willingness to sign a DPA; "no training/reuse of our data"; delete-on-delivery; access controls; secure-facility / VDI options.
5. Delivery & integration ? programmatic API for submit/fetch? turnaround SLAs? can they support BOTH a fast tier (hours) and a batch tier (days)?
6. Quality process ? multi-annotator consensus, gold-standard/honeypot checks, inter-annotator-agreement (IAA) reporting, QA review layers.

Candidate vendors to investigate and VERIFY (do not assume ? confirm or correct each, and find others, especially Bangalore-local): iMerit, Playment (and whether TELUS International acquired it), Cogito Tech, Anolytics, Infolks, Learning Spiral, Indika AI, Tech Mahindra, Sama, Scale AI, Labelbox, Toloka, SuperAnnotate, Encord, CloudFactory. Also identify any Bangalore-based startups specializing in video annotation.

Also briefly cover: (a) typical market rate RANGE for temporal video annotation in India vs US/global; and (b) the AUTOMATED-annotation alternative ? could a hosted VLM (e.g. Gemini) or an open model serve as a "fast tier" oracle for surprise regression tests, and what that implies (it must be a DIFFERENT model lineage than the production tool to avoid shared-blind-spot bias).

DELIVERABLE: a ranked shortlist (favoring Bangalore/India) with a comparison table (vendor | location | video-temporal capability | pricing model | security/DPA & DPDP posture |

API/turnaround | QA process | pilot availability | verdict), plus 2?3 recommended vendors to approach for a pilot bake-off, and explicit flags on every unverifiable claim (especially pricing). Prioritize accuracy and primary-source citations over breadth.

Claim under review

"Sama does NOT disclose its headquarters or delivery-center city/country on its public pages and shows no India/Bangalore presence, making it a likely poor fit for the founder's strong local-vendor preference (Sama is widely reported to be San Francisco-HQ'd with East Africa delivery operations ? to be confirmed against secondary sources)."

****Source:**** <https://www.sama.com/> (primary)

****Supporting quote:**** "specific office locations are not listed on this page"

Checklist

1. Is the claim actually supported by the quote, or is it an overreach/misread?
2. WebSearch for contradicting evidence ? does any credible source dispute or heavily qualify this?
3. Is the source quality sufficient for the claim's strength? (extraordinary claims need primary sources)
4. Is the claim outdated? (check dates ? old claims about fast-moving fields are suspect)
5. Is this a marketing claim / press release / cherry-picked benchmark / forum speculation?

****refuted=true**** if: unsupported by quote / contradicted / low-quality source for strong claim / outdated / marketing fluff.

****refuted=false**** ONLY if: claim is well-supported, current, and source quality matches claim strength.

Default to refuted=true if uncertain.

Structured output only. Evidence MUST be specific.

The search results already reveal key information. Let me verify the primary source (the correct contact-us URL) and check the secondary sources more closely, especially the India presence claim.

Sama's Location Information

Headquarters

Sama's main office is located in ****San Francisco, California****, United States.

Operations Centers

The Wikipedia article mentions "worldwide operations, especially in Africa" but specifically identifies **Kenya** as a significant operational hub. Multiple references discuss Sama's work in Kenya, including a center in **Nairobi**.

India/Bangalore Presence

The provided content contains **no mention of any operations, delivery centers, or presence in India or Bangalore**. There is no evidence in this article that Sama has facilities in either location.

All Locations Mentioned

- San Francisco, California (headquarters)
- Kenya (operational center, specifically Nairobi mentioned)
- Africa (general regional operations)

The article does not provide comprehensive details about all global delivery centers?it primarily focuses on the company's African operations and controversies related to its Kenyan workforce.

Based on the search results, here's what I found about Sama AI's data annotation delivery center operations in India:

India Operations

Sama directly operates delivery centers in Nairobi and Kampala, Uganda, with partnerships extending to other centers in India. More specifically, the company partners with external delivery centers in India to scale annotation capacity.

Geographic Footprint

Sama established its headquarters in San Francisco, California, while maintaining core delivery centers in Nairobi, Kenya, and expanding to owned facilities in Kampala and Gulu, Uganda. Additional offices support operations in Montreal, Canada; San Jose, Costa Rica; and The Hague, Netherlands. These geographic expansions have enabled workforce growth to over 5,000 employees across Kenya, Uganda, and India, facilitating service to global AI clients.

Core Services

Sama delivers human-verified annotation, validation, and evaluation at scale so your models ship on time, stay on budget, and work in production. The company offers image, video, and sensor data annotation and validation for machine learning algorithms in industries including automotive, navigation, augmented reality, virtual reality, biotechnology, agriculture, manufacturing, and e-commerce.

The fetched primary source confirms my verdict. Sama's actual public contact page (<https://www.sama.com/contact-us>) explicitly lists eight office locations with full street addresses including "Sama HQ" / San Francisco ("2017 Mission St, Suite 301"), plus Montreal, Costa Rica, Nairobi (Kenya), Gulu and Kampala (Uganda), and The Hague. The claim that "Sama does NOT disclose its headquarters or delivery-center city/country on its public pages" is directly false. The supporting quote applied only to the homepage, but the claim overreached to "its public pages" generally.

I've already submitted the StructuredOutput with `refuted=true` and high confidence. The evidence is specific and cites the primary source that contradicts the claim, while noting the parenthetical aside (San Francisco HQ, East Africa delivery) is accurate.
