Source Extractor

Research question: "RESEARCH GOAL: Identify and eliminate every dependency that could legally or economically hinder monetizing the "badminton-highlight-indexer" project as a HOSTED API SaaS. Business model: the project runs server-side on a cloud GPU VM (NVIDIA); users upload their own badminton videos and receive auto-generated highlight reels. CRITICAL CONSTRAINT: we do NOT distribute the code or any binary to users ? everything stays server-side ? so software that is merely *hosted* on the server (invoked as a separate process, e.g. ffmpeg) is acceptable where distribution-triggered copyleft (GPL/LGPL) would NOT be triggered, BUT network/SaaS copyleft (AGPL §13) and external metered-API terms STILL apply. Preference order: permissively-licensed (Apache-2.0/MIT/BSD) and royalty-free, self-hostable components. Paid commercial licenses (e.g. Ultralytics Enterprise, codec patent licenses) are acceptable ONLY as clearly-flagged fallbacks. Output must be decision-grade with licenses verified against PRIMARY sources (actual GitHub LICENSE files, official pricing/terms pages), because this drives a real business decision ? flag any claim you could not verify.

CURRENT STACK TO AUDIT (verify each license + its SaaS implication):

- ultralytics (Python lib) + the bundled YOLOv8n.pt model weights ? believed AGPL-3.0. Confirm the license of BOTH the code and the pretrained weights, whether the AGPL network clause is triggered by a closed-source hosted service that uses ultralytics server-side, and the existence/cost/terms of the Ultralytics Enterprise license.
- google-genai SDK + the Google Gemini API (model gemini-2.5-flash). Distinguish the SDK license (Apache?) from the SERVICE terms. Confirm: (a) is commercial use of outputs allowed in a paid product; (b) does Google train on / human-review prompt+video data on the PAID/billed tier vs the free tier; (c) abuse-monitoring / data-retention terms; (d) current per-token / per-video pricing for gemini-2.5-flash (input video tokens-per-second, output) so we can sketch per-video cost.
- ffmpeg / ffprobe (system binaries, invoked as separate processes). Clarify GPL vs LGPL builds and whether pure server-side SaaS use (no distribution to users) triggers any source-disclosure obligation. SEPARATELY and importantly: video CODEC PATENT royalties for a commercial service that DECODES user-uploaded H.264/AVC and H.265/HEVC (e.g. GoPro footage) and ENCODES output ? covering MPEG-LA / Via-LA (AVC), Access Advance + Via-LA + others (HEVC) pools, AAC audio (Via-LA), what activities trigger royalties, any free thresholds (e.g. the AVC sub-100k or free-internet-broadcast provisions), and whether a small SaaS realistically incurs these. Then royalty-FREE codec alternatives for the OUTPUT we generate: AV1, VP9, Opus ? and their encoder maturity/speed on a GPU VM.
- torch, torchvision ? confirm BSD; flag that some torchvision *pretrained weights* may carry separate licenses.
- opencv-python ? confirm Apache-2.0 and that the PyPI wheel's bundled components are clean for commercial server use.
- lapx (a fork of "lap" for ByteTrack association) ? confirm license.
- Quick permissive confirmation for: fastapi, uvicorn, pydantic, jinja2, python-dotenv, numpy.

PERMISSIVE ALTERNATIVES TO RESEARCH (all must be GPU-VM-friendly and usable in a closed-source

commercial SaaS):

1. Object detection to replace ultralytics/YOLOv8 for player/person detection (and possibly shuttle): compare YOLOX (Apache-2.0), RT-DETR / RT-DETRv2 (the Baidu/Apache implementations ? NOT the Ultralytics port), PP-YOLOE, MMDetection (Apache-2.0), Detectron2 (Apache-2.0), torchvision built-in detectors (Faster R-CNN/RetinaNet/FCOS/SSD, BSD), RF-DETR (Roboflow), and D-FINE/DEIM. For EACH, verify BOTH the code license AND the pretrained-weights license (some "open" detectors like YOLO-NAS have restrictive weight licenses ? confirm). Note accuracy/speed trade-offs for person detection on sports video.
2. Shuttle/ball trajectory tracking ? VERIFY the actual repo licenses (commercial-use viability) of: WASB / WASB-SBDT ("Widely Applicable Strong Baseline" for sports ball detection), TrackNetV2 and TrackNetV3, MonoTrack, and any permissively-licensed alternative for tiny-fast-object tracking. This is the planned shuttle-tracking substrate, so its commercial-use license is high-stakes.
3. LLM / semantic rally-boundary step ? research ALL THREE strategies (the user wants all three compared):
 - (a) ELIMINATE the hosted LLM entirely: permissively-licensed temporal action segmentation / video models suitable for learning rally boundaries offline (e.g. MS-TCN/MS-TCN++, ASFormer, ActionFormer, and similar) ? verify licenses and whether they fit a from-annotations learned segmenter.
 - (b) SELF-HOST an open-weights vision-language model that can ingest video frames for semantic boundaries: compare Qwen2.5-VL, InternVL2/2.5, LLaVA-OneVision/LLaVA-Video, MiniCPM-V, VideoLLaMA ? for EACH verify the WEIGHTS license for commercial use (Apache-2.0 vs custom "research-only"/"non-commercial"/community licenses with MAU caps) and the GPU VRAM needed per size tier.
 - (c) KEEP Gemini but de-risk: summarize commercial terms, data-usage on paid tier, rate limits, and per-video cost at scale, plus other hosted-API alternatives (OpenAI, Anthropic) and how their commercial/data terms compare.

DELIVERABLE: A cited report containing (1) a per-dependency RISK TABLE ? columns: dependency, license, does-SaaS-hosting-trigger-obligations?, monetization verdict (CLEAR / WATCH / BLOCKER), recommended action; (2) a recommended FULLY-PERMISSIVE target stack that eliminates all BLOCKERS; (3) paid-license fallbacks where relevant; (4) a rough per-video processing-cost sketch on a GPU VM for each of the three LLM strategies; (5) an explicit list of the codec/patent considerations and the royalty-free output-codec recommendation. Prioritize accuracy and primary-source citations over breadth."

Fetch and extract key claims from this source:

****URL:**** <https://github.com/jhwang7628/monotrack>

****Title:**** jhwang7628/monotrack ? MonoTrack: shuttle trajectory reconstruction from monocular badminton video (CVPRW 2022)

****Found via:**** Shuttle/ball trajectory tracking repo licenses (commercial-use viability) search

Task

1. Use WebFetch to retrieve the page content.
2. Assess source quality: primary research/institution? secondary reporting? blog/opinion? forum? unreliable?
3. Extract 2-5 FALSIFIABLE claims that bear on the research question. Each claim must:
 - be a concrete, checkable statement (not vague generalities)
 - include a direct quote from the source as support
 - be rated central/supporting/tangential to the research question
4. Note publish date if available.

If the fetch fails or the page is irrelevant/paywalled, return claims: [] and sourceQuality: "unreliable".

Structured output only.

2. assistant (2026-05-30T03:08:44.941Z)

I'll fetch the MonoTrack repository page to extract claims relevant to the commercial-use licensing research question.

MonoTrack Repository Analysis

Project Description

MonoTrack is an end-to-end system for reconstructing 3D and 2D trajectories from broadcast-style badminton videos, specifically tracking shuttle movement from monocular video footage.

Key Dependencies

- **MMPose** and **MMDet**: Used for pose detection
- **Modified TrackNet**: Custom shuttle tracking implementation
- **HitNet**: Trained as part of the pipeline

License Information

A LICENSE file is present in the repository, but the specific license type is not detailed in the provided content. The page indicates a license exists but does not specify which license (MIT, Apache, GPL, etc.).

Publication Information

The work is described in the paper: "MonoTrack: Shuttle trajectory reconstruction from monocular badminton video" (CVPR 2022, available at cs.stanford.edu)

Commercial Use & Restrictions

No explicit statements regarding commercial use restrictions or licensing limitations for pretrained model weights are visible in the provided content.

Pretrained Models

The content references trained models (court detection, pose estimation, TrackNet, HitNet) but does not provide information about publicly available weights or their licensing terms.

Note: For complete licensing details, you would need to directly examine the LICENSE file in the repository.

License Information

SPDX License ID: NOASSERTION

License Name: Other

LICENSE File Present: Yes

The repository contains a LICENSE file, but the GitHub API classifies it under "Other" with no recognized SPDX identifier. The actual license content is an Adobe Research License, which permits noncommercial use only for academic research and teaching, with commercial use explicitly prohibited.

8. assistant (2026-05-30T03:09:35.784Z)

The fetch revealed important details that contradict my initial structured output. The license is NOT null ? it's a LICENSE file classified as "Other" (NOASSERTION), and one fetch result identified it as an Adobe Research License (noncommercial use only, commercial use prohibited). This is high-stakes for the research question. Let me verify the actual license content directly.

9. user (2026-05-30T03:09:40.494Z)

Adobe Research License

```
**License Title:** Adobe Research License

**Commercial Use Restriction (exact wording):**
"The rights granted herein may be exercised for noncommercial research purposes (i.e., academic research and teaching) only."

**Key Provisions:**

The license permits licensees to reproduce, use, modify, and publicly display Licensed Materials, as well as redistribute them or derivative works, subject to specific conditions.

**Noncommercial Research Definition:**
"Noncommercial research purposes do not include commercial licensing or distribution, development of commercial products, or any other activity that results in commercial gain."

**Redistribution Terms:**
Modifications and derivative works may be redistributed under additional or different license terms, provided such terms "limit the use, reproduction, modification, public display, and redistribution of such modifications and derivative works to noncommercial research purposes only."

**Ownership:**
"Adobe and its licensors own all right, title, and interest in the Licensed Materials."

**Warranty Disclaimer:**
```

The materials are provided "as is" without warranties, and Adobe disclaims liability for damages arising from use of the Licensed Materials.

****Termination:****

Failure to meet conditions automatically terminates granted rights.

Adobe Research License - Key Terms

****License Title:**** ADOBE RESEARCH LICENSE

****Commercial Use Restriction:****

"The rights granted herein may be exercised for noncommercial research purposes (i.e., academic research and teaching) only."

****Definition of Noncommercial:****

"Noncommercial research purposes do not include commercial licensing or distribution, development of commercial products, or any other activity that results in commercial gain."

****Derivative Works Condition:****

You may modify materials and add your own copyright, "provided that such license terms limit the use...to noncommercial research purposes only."

****Ownership:****

"Adobe and its licensors own all right, title, and interest in the Licensed Materials."

****Distribution Requirement:****

"All copies of the Licensed Materials must include the above copyright notice, this list of conditions, and the disclaimer."

****Disclaimer:****

"THE LICENSED MATERIALS ARE PROVIDED 'AS IS' WITHOUT WARRANTY OF ANY KIND" and Adobe disclaims liability for damages arising from use or performance of the materials.

ADOBE RESEARCH LICENSE

****Full Text:****

Copyright © <YEAR>, Adobe Inc. and its licensors. All rights reserved.

ADOBE RESEARCH LICENSE

Adobe grants any person or entity ("you" or "your") obtaining a copy of these certain research materials that are owned by Adobe ("Licensed Materials") a nonexclusive, worldwide, royalty-free, revocable, fully paid license to (A) reproduce, use, modify, and publicly display the Licensed Materials; and (B) redistribute the Licensed Materials, and modifications or derivative works thereof, provided the following conditions are met:

- The rights granted herein may be exercised for noncommercial research purposes (i.e., academic research and teaching) only. Noncommercial research purposes do not include commercial licensing or distribution, development of commercial products, or any other activity that results in commercial gain.

- You may add your own copyright statement to your modifications and/or provide additional or different license terms for use, reproduction, modification, public display, and redistribution of your modifications and derivative works, provided that such license terms limit the use, reproduction, modification, public display, and redistribution of such modifications and derivative works to noncommercial research purposes only.

- You acknowledge that Adobe and its licensors own all right, title, and interest in the

Licensed Materials.

- All copies of the Licensed Materials must include the above copyright notice, this list of conditions, and the disclaimer below.

Failure to meet any of the above conditions will automatically terminate the rights granted herein.

THE LICENSED MATERIALS ARE PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND. THE ENTIRE RISK AS TO THE USE, RESULTS, AND PERFORMANCE OF THE LICENSED MATERIALS IS ASSUMED BY YOU. ADOBE DISCLAIMS ALL WARRANTIES, EXPRESS, IMPLIED OR STATUTORY, WITH REGARD TO YOUR USE OF THE LICENSED MATERIALS, INCLUDING, BUT NOT LIMITED TO, NONINFRINGEMENT OF THIRD-PARTY RIGHTS. IN NO EVENT WILL ADOBE BE LIABLE FOR ANY ACTUAL, INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES, INCLUDING WITHOUT LIMITATION, LOSS OF PROFITS OR OTHER COMMERCIAL LOSS, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THE LICENSED MATERIALS, EVEN IF ADOBE HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

****Noncommercial/Academic Restriction:****

"The rights granted herein may be exercised for noncommercial research purposes (i.e., academic research and teaching) only."

****Commercial Use Prohibition:****

"Noncommercial research purposes do not include commercial licensing or distribution, development of commercial products, or any other activity that results in commercial gain."

Structured output provided successfully

13. assistant (2026-05-30T03:10:03.477Z)

I now have the verbatim LICENSE text confirming the Adobe Research License (noncommercial only). Let me submit the final, fully-verified structured output.

14. user (2026-05-30T03:10:15.428Z)

Structured output provided successfully

15. assistant (2026-05-30T03:10:21.102Z)

Structured output submitted.

Summary of findings on <https://github.com/jhwang7628/monotrack>: MonoTrack is licensed under the ****Adobe Research License**** ? GitHub classifies it as SPDX `NOASSERTION`/"Other" (not a permissive Apache/MIT/BSD license). The verbatim LICENSE text restricts use to "noncommercial research purposes (i.e., academic research and teaching) only" and explicitly excludes "development of commercial products, or any other activity that results in commercial gain."

For the research question this is a ****BLOCKER****: MonoTrack cannot be used as the shuttle-tracking substrate in a paid hosted-API SaaS. The restriction is not distribution-triggered (so the server-side-only argument does not help), and it is virally noncommercial ? derivative works must also be relicensed as noncommercial-only. It additionally depends on a modified TrackNet plus MMPose/MMDet, each needing separate license review. The repo is also dormant (last push 2023-07-27, no description).
