## Transcript

### 1. user (2026-05-30T08:30:03.541Z)

#### Source Extractor

Research question: "RESEARCH GOAL: Produce a decision-grade shortlist of data-annotation VENDORS to build "golden set" ground-truth labels for a badminton highlights product, with a STRONG PREFERENCE for vendors based in or operating from Bangalore / India (the founder is in Bangalore and prefers local vendors for easier coordination, possible site visits, and data residency). The annotation task is TEMPORAL VIDEO SEGMENT annotation: marking the [start, end) time ranges of each "rally" in badminton match videos ? i.e. event / temporal-action labeling on video, NOT just image bounding boxes. Output is a simple per-video timestamp list (CSV of start,end). Volume: a constantly growing collection of licensed/owned match videos (no end-user uploads).

For EACH candidate vendor, verify against PRIMARY sources (the vendor's own website/docs) and clearly FLAG anything unverifiable (pricing is usually quote-only):

1. Company & location ? HQ + delivery centers; confirm Bangalore / India presence; flag if purely overseas.
2. Capability ? do they do VIDEO temporal/event annotation (timestamps/segments) or video tracking, or only static image labeling? Sports / media-video experience is a plus.
3. Pricing model ? per video-minute / per task / per annotator-hour / managed-team; any public rates; minimum engagement; willingness to run a small paid PILOT.
4. Data security & compliance ? ISO 27001, SOC 2, GDPR, and especially India's DPDP Act 2023; willingness to sign a DPA; "no training/reuse of our data"; delete-on-delivery; access controls; secure-facility / VDI options.
5. Delivery & integration ? programmatic API for submit/fetch? turnaround SLAs? can they support BOTH a fast tier (hours) and a batch tier (days)?
6. Quality process ? multi-annotator consensus, gold-standard/honeypot checks, inter-annotator-agreement (IAA) reporting, QA review layers.

Candidate vendors to investigate and VERIFY (do not assume ? confirm or correct each, and find others, especially Bangalore-local): iMerit, Playment (and whether TELUS International acquired it), Cogito Tech, Anolytics, Infolks, Learning Spiral, Indika AI, Tech Mahindra, Sama, Scale AI, Labelbox, Toloka, SuperAnnotate, Encord, CloudFactory. Also identify any Bangalore-based startups specializing in video annotation.

Also briefly cover: (a) typical market rate RANGE for temporal video annotation in India vs US/global; and (b) the AUTOMATED-annotation alternative ? could a hosted VLM (e.g. Gemini) or an open model serve as a "fast tier" oracle for surprise regression tests, and what that implies (it must be a DIFFERENT model lineage than the production tool to avoid shared-blind-spot bias).

DELIVERABLE: a ranked shortlist (favoring Bangalore/India) with a comparison table (vendor | location | video-temporal capability | pricing model | security/DPA & DPDP posture | API/turnaround | QA process | pilot availability | verdict), plus 2-3 recommended vendors to approach for a pilot bake-off, and explicit flags on every unverifiable claim (especially pricing). Prioritize accuracy and primary-source citations over breadth."

Fetch and extract key claims from this source:

**\*\*URL:\*\*** https://www.sama.com/

**\*\*Title:\*\*** Sama | Data Annotation Platform for Computer Vision and GenAI

**\*\*Found via:\*\*** broad/primary ? vendor video-temporal capability search

## Task

1. Use WebFetch to retrieve the page content.
2. Assess source quality: primary research/institution? secondary reporting? blog/opinion? forum? unreliable?
3. Extract 2-5 FALSIFIABLE claims that bear on the research question. Each claim must:
  - be a concrete, checkable statement (not vague generalities)
  - include a direct quote from the source as support
  - be rated central/supporting/tangential to the research question
4. Note publish date if available.

If the fetch fails or the page is irrelevant/paywalled, return claims: [] and sourceQuality: "unreliable".

Structured output only.

### 2. assistant (2026-05-30T08:30:06.862Z)

I'll fetch the Sama page and extract the relevant claims for the vendor research.

### 3. user (2026-05-30T08:30:37.176Z)

The server returned HTTP 404 Not Found.

The response body was not retrieved. If this URL requires authentication, use an authenticated tool (e.g. `gh` for GitHub, or an MCP-provided fetch tool) instead of WebFetch.

### 4. user (2026-05-30T08:30:41.918Z)

## Sama Data Annotation Vendor Evaluation

### 1. Company Location & Delivery Centers

**\*\*Not disclosed on this page.\*\*** The website contains no information about headquarters location or delivery center locations, including any India/Bangalore presence.

---

### 2. Video Annotation Capabilities

**\*\*YES - Video annotation is offered.\*\*** The page explicitly lists:

- "Video Annotation" with description: **\*\*"Object Tracking and Temporal Attributes"**
- Navigation menu item for **\*\*"/2d-video-annotation-tool-services"**

However, **\*\*no sports/media-specific experience is mentioned.\*\*** The case studies reference autonomous vehicles, waste sorting, shoe sizing, and robotics?but no media or sports video projects are described.

---

### 3. Pricing Model

**\*\*Not disclosed on this page.\*\*** No pricing information, rate cards, per-task costs, managed team rates, or pilot pricing appears anywhere on the website content provided.

---

### 4. Data Security & Compliance

**\*\*Minimal disclosure.\*\*** The page mentions:

- A "Security" link in footer navigation to **\*\*"/data-security-and-trust"**

- A "Privacy" link referencing "/privacy-policy"

However, **no specific certifications are listed** (ISO 27001, SOC 2, GDPR, India DPDP Act, DPA, no-data-reuse clauses, or secure facility details). These details are not present in the provided content.

---

## 5. Delivery & Integration

**Not specified.** The page mentions **"Predictable timelines, controlled costs"** but provides no API documentation, SLA details, turnaround times, or batch vs. express tier information on this homepage.

---

## 6. Quality Process

**General claims only.** The page states:

- **"99% first-batch acceptance rate"**
- **"Ongoing calibration"** and **"continuously adjusting labeling instructions"**
- **"Robust labeling guides"**

However, **no technical QA methodology is detailed**?no mention of consensus voting, gold-standard/honeypot samples, inter-annotator agreement (IAA) metrics, or review layer architecture.

---

**Publication Date:** Not provided on the page.

### 5. user (2026-05-30T08:30:43.712Z)

The server returned HTTP 404 Not Found.

The response body was not retrieved. If this URL requires authentication, use an authenticated tool (e.g. `gh` for GitHub, or an MCP-provided fetch tool) instead of WebFetch.

### 6. user (2026-05-30T08:30:45.371Z)

The server returned HTTP 404 Not Found.

The response body was not retrieved. If this URL requires authentication, use an authenticated tool (e.g. `gh` for GitHub, or an MCP-provided fetch tool) instead of WebFetch.

### 7. user (2026-05-30T08:30:51.818Z)

The server returned HTTP 404 Not Found.

The response body was not retrieved. If this URL requires authentication, use an authenticated tool (e.g. `gh` for GitHub, or an MCP-provided fetch tool) instead of WebFetch.

### 8. user (2026-05-30T08:31:06.488Z)

Structured output provided successfully

### 9. assistant (2026-05-30T08:31:10.881Z)

The homepage fetch succeeded and returned richer content than I anticipated ? notably an explicit "Video Annotation: Object Tracking and Temporal Attributes" capability claim and a "99% first-batch acceptance rate." The four sub-page fetches all 404'd. Let me fetch the actual security and video-annotation URLs that the homepage referenced, then submit corrected claims grounded in the verified content.

### 10. user (2026-05-30T08:31:17.839Z)

The server returned HTTP 404 Not Found.

The response body was not retrieved. If this URL requires authentication, use an authenticated tool (e.g. `gh` for GitHub, or an MCP-provided fetch tool) instead of WebFetch.

## Sama Data Security & Compliance Statements

### Certifications & Compliance Present

**\*\*ISO 27001:\*\*** "ISO 27001" - explicitly listed with Bureau Veritas logo

**\*\*GDPR:\*\*** "GDPR compliant as a data processor" and "EU GDPR COMPLIANT" certification shown

**\*\*SOC 2 Type II:\*\*** Listed as "AICPA SOC-2" with notation "AICPA SOC-2 certification in progress"

**\*\*Additional certifications shown:\*\***

- ISO 9001
- ISO 42001
- TISAX

### Security Practices Stated

**\*\*Data not reused:\*\*** "Your Data is Yours ? Sama does not share or keep any datasets for training or other purposes"

**\*\*Encryption:\*\*** "Data storage encryption via industry-standard TLS/SSL"

**\*\*Access controls:\*\*** "Facilities are biometrically secured to a project level; rooms and data are not accessible to employees who aren't part of the project"

**\*\*Secure facilities:\*\*** "ISO certified delivery centers, biometric authentication"

**\*\*Background checks:\*\*** "Production staff complete background checks before they begin work"

### NOT Found in Document

- SOC 2 Type II (only "in progress" status mentioned)
- India DPDP Act reference
- DPA willingness statement
- Delete-on-delivery policy
- VDI/virtual desktop infrastructure mention
- Specific HQ location
- India/Bangalore delivery center locations

**12. user (2026-05-30T08:31:23.143Z)**

The server returned HTTP 404 Not Found.

The response body was not retrieved. If this URL requires authentication, use an authenticated tool (e.g. `gh` for GitHub, or an MCP-provided fetch tool) instead of WebFetch.

## Video Annotation Capabilities - Sama

### Core Video Annotation Features

**\*\*Object Tracking & Temporal Capabilities:\*\***

- "Object Tracking and Temporal Attributes" explicitly listed as video annotation service

- "Utilize linear interpolation between frames" mentioned across multiple annotation types
- "Use state tracking for occlusion, truncation and overlapping objects" (bounding boxes)
- Supports "static and dynamic annotations" with "complex object changes over time"

**\*\*Annotation Types Supported:\*\***

- Bounding boxes, polygons, keypoints, lines/arrows, cuboids
- Frame-by-frame labeling for video sequences
- "Classification" for "scene level attributes with ease for indicating weather conditions, environment type, and activity identification"

## Industry Experience

**\*\*Sports/Media:\*\***

- "player tracking for sports analytics" mentioned as use case
- No detailed sports video portfolio described
- Media industry listed but limited specifics provided

## Technical Integration & Operations

**\*\*API/Integration:\*\*** Not mentioned in provided content

**\*\*Turnaround/SLA:\*\***

- "Get models to market 3x faster" claimed
- No specific SLA timelines stated

**\*\*Quality Metrics:\*\***

- "99% First batch client acceptance rate"
- "92% 2024 Customer Satisfaction (CSAT) score and an NPS of 64"
- No inter-annotator agreement (IAA) or consensus methodology disclosed

**\*\*Pricing/Pilots:\*\*** No pricing information or pilot program details provided

## Delivery Locations

**\*\*Geographic Operations:\*\*** Not specified; no mention of India or Bangalore facilities in provided content

**14. user (2026-05-30T08:31:27.853Z)**

## Security & Compliance Certifications

**\*\*Certifications/Frameworks Named:\*\***

- ISO 9001
- ISO 27001
- ISO 42001
- EU GDPR COMPLIANT
- TISAX
- AICPA SOC-2 (noted as "in progress")

---

## Key Security & Data Protection Statements

**\*\*Data Ownership & Non-Reuse:\*\***

"Your Data is Yours ? Sama does not share or keep any datasets for training or other purposes, unlike crowdsourced alternatives."

**\*\*Encryption:\*\***

"Data storage encryption via industry-standard TLS/SSL, protecting your data from unauthorized access and data corruption."

**\*\*Access Control & Physical Security:\*\***

"Facilities are biometrically secured to a project level; rooms and data are not accessible to employees who aren't part of the project."

"All data is accessed on-site via secure connections. Production staff complete background checks before they begin work on any Sama customer data."

**\*\*Privacy Compliance:\*\***

"GDPR compliant as a data processor, as well as CCPA compliant, to ensure all information shared with us, including PII, is kept secure."

**\*\*Facilities:\*\***

References to "ISO certified delivery centers" and "secure facility" with "full-time in-house workforce" ? specific office locations are not listed on this page.

#### **15. user (2026-05-30T08:31:33.793Z)**

Structured output provided successfully

#### **16. assistant (2026-05-30T08:31:40.645Z)**

The follow-up fetches returned substantially richer, verifiable content from Sama's own pages, so I'll submit a final corrected set of claims grounded in those primary sources. The key corrections: Sama DOES do temporal video annotation with player-tracking-for-sports use case, holds ISO 27001 / GDPR / TISAX (with SOC 2 only "in progress"), has explicit no-data-reuse and on-site secure-facility commitments, but discloses NO India/Bangalore location and NO DPDP Act reference.

#### **17. user (2026-05-30T08:31:57.190Z)**

Structured output provided successfully

#### **18. assistant (2026-05-30T08:32:05.152Z)**

Done. I fetched Sama's homepage plus its data-security-and-trust and 2D-video-annotation pages (all primary sources) and submitted five verified, falsifiable claims via StructuredOutput.

Key verified findings on Sama for the badminton golden-set vendor decision:

- Temporal video capability: CONFIRMED ? "Object Tracking and Temporal Attributes," frame interpolation, dynamic annotations, and an explicit "player tracking for sports analytics" use case. On-point for rally segmentation.
- Security: ISO 27001, GDPR (as processor), CCPA, ISO 9001/42001, TISAX confirmed; SOC 2 only "in progress"; no DPDP Act mention; strong no-data-reuse + biometric on-site facilities; no stated delete-on-delivery or VDI.
- Location: NOT disclosed on-site; no India/Bangalore presence shown ? likely a poor fit for the founder's local-vendor preference (widely reported SF HQ + East Africa delivery; flagged for secondary-source confirmation).
- Pricing/API/SLA/QA methodology: all UNVERIFIABLE from primary sources (managed-service model, quote-only; "99% first-batch acceptance" and CSAT/NPS marketing metrics only, no consensus/IAA disclosure).

Source quality: primary (vendor's own site).
