1. user (2026-06-10T16:13:27.703Z)

You are a product-strategy researcher with web access. Today is June 2026. Research the market context for a two-repo personal project and assess product-market fit. Use WebSearch/WebFetch extensively (10+ searches); cite sources. Do NOT read local files other than what is stated here; everything you need about the project is below.

THE PROJECT (built by a single experienced engineer in Bangalore, India, for himself first):

- Repo A 'gmail-attachments-to-gdrive': a Google Apps Script tool that runs IN the user's own Google account, archives Gmail attachments to their Drive, quota-aware, well-tested, MIT, designed to be auditable/self-deployable ('run the code you read'). Vision: become the extraction front door that classifies emails (receipts, statements, travel, coupons), extracts normalized entities into a user-owned index, and only hands minimized non-PII signal to downstream processors. Stated first verticals: (1) grocery receipts, (2) bank statements. Currently OAuth 'Testing' mode, <100 users, deciding later whether to publish (which requires Google's restricted-scope verification + annual CASA assessment for gmail.readonly).
- Repo B 'muneem': a local-first, single-user Python CLI that parses Indian bank/CC statement PDFs (HDFC, Axis, AU verified on real data) into a SQLCipher-encrypted local ledger, arithmetic-reconciliation-gated (rows persist only if the balance walk + bank summary reconcile), OS-keychain keys, passphrase recovery, no cloud LLMs for sensitive data, deliberately offline. Roadmap: equity/MF/ETF/bond statements, provenance, local OCR/VLM fallback, eventually merchant canonicalization + receipts. India's Account Aggregator was researched and deferred (no individual/self-custody path; TSPs decrypt in their cloud).

RESEARCH (each with real searches):

1. India personal-finance-manager landscape 2025-2026: AA-based apps (Fold Money, INDmoney, Axio, ET Money, Jupiter, others), their coverage gaps (credit cards? bonds? non-demat MF?), privacy posture, business health. Has anything changed on AA self-custody/individual access in 2025-26?
2. Statement/PDF-parsing personal-finance tools, esp. India (e.g. anything parsing HDFC/ICICI PDFs), and the open-source local-first PFM world: Actual Budget, Firefly III, Beancount/plain-text-accounting + their India importers; how do they ingest Indian data?
3. Email-receipt/purchase extraction products, past and present: what happened to them (e.g. Slice/Rakuten, Truebill-style email parsers, Gmail-based purchase trackers, TripIt as the travel analogue, Fetch). Why did email-parsing consumer products succeed/die? Google's own Gmail purchase tracking?
4. Gmail-attachment-to-Drive add-ons on Google Workspace Marketplace: existing competitors, installs, pricing ? is that layer commoditized?
5. Grocery-receipt digitization/spend tracking in India 2026: do Indian grocery players (BigBasket, Blinkit, Zepto, Swiggy Instamart, DMart) email itemized receipts/invoices? Any products consolidating them? Consumer demand signals.
6. The cost/process wall for publishing a Gmail-restricted-scope app in 2026: verification + CASA tiers, realistic annual cost, timeline (cite current Google docs/recent developer reports).
7. SMS-transaction-parsing apps in India post-Walnut (privacy debates, RBI stance) ? as context for muneem's SMS-freshness idea.

THEN ASSESS (clearly separating personal-utility from public-product viability):

- grocery_wedge: grocery-receipt consolidation as the FIRST vertical ? pros/cons/verdict on both axes.
- finance_wedge: bank-statement/finance as the FIRST vertical ? same.
- other_wedges: at least 3 alternative first verticals (e.g. travel/bookings, warranties/invoices, subscriptions/renewals, coupons/deals carryover, tax-document season pack for India FY) with honest rationale of effort vs payoff.
- pmf_assessment: is the overall direction reasonable? Where is the real moat (hint: evaluate whether 'reconciliation-gated parsing of Indian PDFs, fully local' is differentiated vs AA-based apps and OSS PFMs)? What would make this a product someone pays for vs a personal tool ? and is the 100-user Apps Script path a sensible cheap PMF probe?
- publishing_constraints: the concrete 2026 facts.

Be specific, cite sources for factual claims (sources array), and mark inference as inference. Structured output only.

Based on the search results, here's what I found about Fold Money:

Overview

Fold is a personal finance and expense tracking app for India that helps you track bank accounts, credit cards, investments, loans, credit score, EPF, NPS, Fixed deposits and spending automatically in one place using RBI's Account Aggregator framework.

Account Aggregator Technology

One of the standout features is the AA (Account Aggregator)-based data retrieval system, which is incredibly safe, secure, and advanced. Fold establishes connection to your Banks through the Government regulated Account Aggregator Framework. Fold uses its RBI approved account aggregator status to pull data securely from all your bank accounts and do one thing well- make you painfully aware of your cash flow, without a painful interface and effort.

Company Details

Fold is a funded company based in Bengaluru (India), founded in 2019 by Utkarsh Verma, Akash Nimare, Shakti Goap and Nash Vail. Annual revenue of Fold is ₹4.99Cr as on Mar 31, 2025.

User Reviews

Users have praised Fold as a personal finance management app focused on Indian users, with the Account Aggregator-based data retrieval system being highlighted as a standout feature that is incredibly safe, secure, and advanced.

Here are the search results for Gmail restricted scope verification and CASA security assessment:

Overview

CASA is Google's official cloud app security audit for restricted scope APIs, built as a new security audit framework for cloud apps that handle sensitive Google user data. Apps accessing restricted scopes such as Gmail or Drive APIs must pass a CASA audit by a Google approved lab, then revalidate yearly.

Costs

Assessment costs range from \$500-\$4,500 depending on the tier level. Tier 2 self-scan is no longer an option, which means developers must use an independent assessor and incur costs.

Developer Experience Impact

The CASA requirement has created challenges for developers, particularly smaller ones. Costs from authorized labs can be beyond what independent developers can afford. If developers use restricted scopes like drive.readonly or gmail.readonly, Google will require CASA ? a third-party audit that's time-consuming and expensive. However, developers can avoid restricted scopes if possible by switching to non-restricted ones like drive.file.

Authorized Labs

Authorized labs include TAC Security, Leviathan, and DEKRA.

The search results reflect information from 2025-2026, showing that CASA compliance has become a mandatory requirement for accessing restricted Google APIs in this period.

Yodlee", "url": "https://www.yodlee.com/data-aggregation/financial-aggregators"]}]
```

Based on my web search results, I can provide you with a comprehensive overview of India's Account Aggregator framework in 2025, including information on individual access, FIU consumer apps, credit card coverage, and known gaps:

Overview of India's Account Aggregator Framework (2025)

The Account Aggregator (AA) framework was officially launched on September 2, 2021, establishing a secure, consent-based system for financial data sharing. As on date, 112 Financial Institutions have gone live both as Financial Information Providers (FIP) and Financial Information Users (FIU), while 56 have gone live solely as FIP and 410 as FIU.

Individual Access and Personal Use

Personal finance management ? Consumers can analyze personal spends across accounts, which will help generate recommendations to streamline expenditure. This process will enable better personal finance goals and budgetary adherence for consumers. However, the Account Aggregator framework is primarily designed as an intermediary system for data sharing between FIPs and FIUs, rather than a direct self-custody platform for individuals.

FIU Consumer Apps and Market Coverage

The broader ecosystem now includes 179 Financial Information Providers (FIPs), 955 Financial Information Users (FIUs), and over 999 financial entities live on the rail. Sahamati's Credit Reimagined H1 FY26 report shows AA-facilitated lending reached ₹1.47 lakh crore across 1.5 crore loans in the April-September 2025 half-year. The monthly run-rate of ₹24,000 crore is up 71 percent from roughly ₹14,000 crore monthly in H2 FY25.

Credit Card Coverage Gaps

Investment data tilts heavily toward mutual funds and depository holdings. This indicates that credit card data may not be comprehensively covered across all FIUs. Only about 75 % of major banks are live; rural co-ops and RRBs are catching up.

Key Coverage Gaps and Challenges

Joint accounts are excluded from AA pulls under the current Master Direction. This affects MSME and family-business lending more than retail lending, but it is a real gap.

There is no universal interconnection across the AA ecosystem. FIPs join AAs one by one through bilateral integrations. The practical implication is that a serious FIU integrates with two or three AAs to get to ninety-percent-plus FIP coverage for their customer mix.

User Experience Challenges

According to Sahamati User Onboarding, the biggest challenge is consent confusion. Many users can't tell what data they are sharing, with whom, or for how long. The consent screens often read like legal documents, not simple instructions.

Apps on Google Play","url":"https://play.google.com/store/apps/details?id=money.jupiter&hl=en_IN"]}]
```

Based on the search results, here's what I found about INDmoney, Jupiter, and ET Money regarding expense tracking and related features:

INDmoney Features

INDmoney offers a chronological list of your expenses and charges, categorising them into different segments, like amount, date and merchant. Additionally, INDmoney offers an analytical representation of your expenses, dividing them into different categories so that you can analyse where you are spending your money in a simplified way. Using INDmoney to track your credit card bills is completely free of cost.

Jupiter Features

Jupiter provides multiple financial tracking capabilities:

- **Spend Insights**: Spend Insights is Jupiter's financial wellness tool that automatically tracks and categorizes every single rupee that leaves your account, identifying transactions and grouping them into categories like "Dining," "Shopping," "Travel," and "Bills".
- **Account Aggregator Integration**: Account Aggregator (AA) is a secure framework regulated by the RBI that lets you link and track balances and payments from all your bank accounts, and you stay in control and choose what to share and for how long.
- **Credit Card Tracking**: You can link your credit cards and view all your spends, dues, and statements in one place, even if they're from other banks.

The search results do not contain specific information about ET Money's features or 2025 updates for these services.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

```

Based on the web search results, here are several open-source tools and solutions for parsing HDFC and ICICI bank statements from India:

Open-Source Tools

HDFC Bank Statement Parsers:

1. **HDFC PDF Converter (Python)** - A Python tool that automatically extracts all transactions from HDFC Bank PDF statements and converts them to CSV format with intelligent categorization. The tool is available on GitHub at ``github.com/vishwaraja/hdfc-pdf-converter``.
2. **HDFC Credit Card Statement Parser** - This tool extracts information from HDFC Bank Credit Card statements and helps copy structured data out of your statement. Available at ``github.com/xaneem/hdfc-credit-card-statement-parser``.
3. **HDFC Credit Card Parser (Rust)** - This tool parses and extracts transaction data from HDFC Bank credit card statements to CSV format. It's notably fast and available at ``github.com/joeirimpan/hdfc-cc-parser-rs``.

Multi-Bank Solutions:

1. **StmtForge** - An open-source Python tool to parse credit card PDF statements from Indian banks (HDFC, ICICI, SBI, Axis + 5 more) into structured data with offline, privacy-first features and a Streamlit dashboard.
2. **Bank Statement Utility** - A utility that has various configurable parsers which can read and store bank statement data to database, supporting HDFC, KOTAK, SBI, BOB, and IDBI banks.

ICICI Bank Support:

For ICICI bank statements, the "bout" tool supports ICICI bank and credit card statements and can convert them to QIF format.

These tools offer transaction extraction, CSV export, and in some cases, automatic categorization and balance verification features.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

iii/firefly-iii","url":"https://github.com/firefly-iii/firefly-iii/issues/3120"}]]
```

Based on the search results, here's comprehensive information about importing CSV bank statements into Firefly III:

How to Import CSV Files into Firefly III

You can import CSV files from any source: your bank, YNAB, Tiller or any other source of financial data.

Basic Import Process

To import, browse to the importer, select CSV, and upload a CSV file. The flow is almost the same for each file type, but exceptions are noted clearly. Usually, banks call this "downloading" or "exporting" of your transactions.

CSV File Configuration

When preparing your CSV file, you need to understand its structure:

- You'll have to compare the column contents with a reference of all "roles" that a column can have. This is important, because in a later step during the import you must tell the importer the role of each column in your CSV file.
- When you import a CSV file, a checkbox allows you to indicate if your CSV file has headers on the first line of the file instead of data.
- When you import a CSV file, you must select the field separator of your CSV file. This is almost always a comma.
- The date format option sets the format of the date entries in the CSV file. If your file contains internationalized dates, you can prefix the date format with your country code.

Import Steps

The import process consists of two steps. First a conversion and data validation. Then, the data will actually be sent to Firefly III. Press "Start Job" to start the conversion and validation process. If this is successful, you can press "Start Job" after a few moments to import the data.

Data Field Roles

When importing, always make sure you have at least one "Transaction date" field configured, or your transactions will not be imported with the correct date. Other important roles include asset accounts, opposing accounts, descriptions, and amounts.

This information should help you import Indian bank CSV statements into Firefly III by properly mapping your bank's CSV columns to the required data roles.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

Acquisition, Slice Buys Unroll?Me To Add Email List Control To Its Shopping App |  
TechCrunch", "url": "https://techcrunch.com/2014/11/24/rakuten-slice-buys-unroll-me/"}]]
```

Based on the search results, here's what happened with Slice Intelligence and email receipt parsing:

****Background:****

Slice Intelligence's primary source of data came from Unroll.me subscribers, which was acquired by Slice in 2014. The service provided access to receipt data from users' email inboxes and extracted purchase data to provide information on exact products purchased, real-time shipment tracking, recall notifications, and price-drop alerts.

****What Happened:****

Rather than a shutdown, Slice Intelligence was acquired by a larger data analytics company. NielsenIQ announced that it would acquire e-receipt data provider Rakuten Intelligence for an undisclosed sum. The two firms had worked together for several years?since October 2018, NielsenIQ had leveraged Rakuten's Slice e-receipt data as part of its Omnisales product. NielsenIQ planned to invest heavily in the Slice panel and prioritize financial services clients within its growth strategy.

So Slice Intelligence didn't shut down but was instead integrated into NielsenIQ's operations as part of a strategic acquisition of the email receipt parsing and e-commerce data analytics business.

Web search results for query: "Google Workspace Marketplace "save Gmail attachments to Drive" add-on installs pricing"

Links: [{"title": "Save Emails and Attachments - Google Workspace Marketplace", "url": "https://workspace.google.com/marketplace/app/save_emails_and_attachments/513239564707"}, {"title": "Compare Flexible Pricing Plan Options | Google Workspace", "url": "https://workspace.google.com/pricing"}, {"title": "Google Drive: Share Files Online with Secure Cloud Storage | Google Workspace", "url": "https://workspace.google.com/products/drive/"}, {"title": "Save Emails and Attachments from Gmail to Google Drive - An Introduction - Digital Inspiration", "url": "https://digitalinspiration.com/docs/save-emails"}, {"title": "Export Emails to Sheets by cloudHQ - Google Workspace Marketplace", "url": "https://workspace.google.com/marketplace/app/export_emails_to_sheets_by_cloudhq/777824367087"}, {"title": "Save Emails to Google Drive: FAQ (Frequently Asked Questions) ? cloudHQ Support", "url": "https://support.cloudhq.net/save-emails-to-google-drive-faq-frequently-asked-questions/"}, {"title": "How to Save Emails & Attachments from Gmail to Google Drive | by Avrummy Schreiber | Medium", "url": "https://medium.com/@avrummy40/how-to-save-emails-attachments-from-gmail-to-google-drive-33da378cd40"}, {"title": "How to Download Email Attachments to Google Drive Automatically", "url": "https://filerev.com/blog/download-email-attachments-drive/"}, {"title": "Google Workspace Pricing 2026: Plans, Costs, Hidden Fees", "url": "https://www.larksuite.com/en_us/blog/google-workspace-pricing"}, {"title": "Google Drive pricing: A no-nonsense guide to storage plans | eesel AI", "url": "https://www.eesel.ai/blog/google-drive-pricing"}]]

Based on the search results, here's what I found about the Google Workspace Marketplace add-on for saving Gmail attachments to Drive:

Popular Add-ons

Save Emails is the ultimate email backup and archiving tool for Gmail. With Save Emails, you can effortlessly and automatically download email messages and file attachments from Gmail to your Google Drive in custom folders.

Pricing

There is an Upgrade to Premium paid version for even more ways to advanced filtering. However, the search results don't provide specific pricing details for the premium tier.

Another popular alternative is Export Emails to Sheets by cloudHQ, which offers 4 tiers: Free Plan, Premium Backup Plan, Premium Starter Plan, and Premium Plus Plan. The search results mention a pricing page exists at <https://www.emails-to-sheets.com/pricing> but don't display the specific prices.

Features

The free version runs for a few mails then stops, yet you just have to hit Run again and it will process 100s of mails for free. All email threads are converted into high-quality, print-ready PDF files, while file attachments are saved in their original native format on Google Drive.

For complete and current pricing information for these add-ons, I'd recommend visiting the Google Workspace Marketplace directly or checking the individual pricing pages linked in the search results.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

Web search results for query: "Walnut SMS parsing app India expense tracker privacy RBI shutdown Axio 2024 2025"

Links: [{"title": "axio: Income & Expense Tracker ? Apps on Google Play", "url": "https://play.google.com/store/apps/details?id=com.daamitt.walnut.app&hl=en_IN"}, {"title": "SMS Expense Tracking App: How Automatic Parsing Works | Finny Blog", "url": "https://getfinny.app/blog/sms-expense-tracking-app"}, {"title": "axio: Expense Tracker & Budget Free Download", "url": "https://walnut-money-manager.soft112.com/"}, {"title": "axio - APK Download for Android | Aptoide", "url": "https://walnut.en.aptoide.com/app"}, {"title": "axio ? Smarter Financial Solutions for a Better Tomorrow", "url": "https://www.axio.co.in/"}, {"title": "Walnut: Expense Tracker BNPL APK for Android - Download", "url": "https://walnut-expense-tracker-bnpl.en.softonic.com/android"}, {"title": "Download axio: Expense Tracker & BNPL APKs for Android - APKMirror", "url": "https://www.apkmirror.com/apk/axio-digital-pvt-ltd/axio-expense-tracker-bnpl/"}, {"title": "Walnut for Android - Free download", "url": "https://walnut.en.download.it/android"}, {"title": "Download axio: Expense Tracker & Budget App for Android | Bazaar", "url": "https://cafebazaar.ir/app/com.daamitt.walnut.app?l=en"}]

Based on the search results, here's what I found about Walnut, SMS parsing, and Axio:

Overview

Walnut was one of the first apps to build an entire product around SMS parsing in India. Now rebranded as Axio, it remains the most recognized name in SMS-based expense tracking.

Company Background

axio (formerly known as Capital Float, Walnut & Walnut 369) is the brand name of CapFloat Financial Services Private Limited, an NBFC registered with the RBI. Credit offered within the app is facilitated by CapFloat Financial Services Private Limited, an NBFC registered with the Reserve Bank of India, while Axio Digital Pvt. Ltd. provides the digital platform.

How It Works

axio App is an SMS-based money management app that makes managing money and tracking expenses simpler than ever. axio App only analyses transactional SMS messages, detecting spends, bills, and important information. It does not read your personal SMSs or upload any sensitive data.

Privacy Considerations

For apps like Axio and Moneyview that also offer lending products, the combination of SMS access and financial services creates a more complex trust equation. These apps can see your transaction patterns, spending behavior, and financial habits: data that is directly useful for credit scoring and loan targeting. However, Cloud-based apps like Axio and Moneyview encrypt data in transit but do store information on their servers.

The search results do not contain specific information about any RBI shutdown of Walnut or privacy controversies in 2024-2025, so I cannot provide details on those topics based on these sources.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

11. user (2026-06-10T16:15:03.485Z)

Web search results for query: "CRED credit card statement email parsing gmail access privacy India"

Links: [{"title": "privacy policy | CRED.", "url": "https://cred.club/legal/privacy"}, {"title": "Access of email by CRED-a security concern | Desidime", "url": "https://www.desidime.com/discussions/access-of-email-by-cred-a-security-concern"}, {"title": "Is CRED Protect is really safe? How to Hide Personal Email ? Saratoga Wire", "url": "https://www.gridsaratoga.com/is-cred-protect-is-really-safe-how-to-hide-personal-email/"}]

I found relevant information about CRED's email parsing practices and privacy policies. Here are the key findings:

Email Access and Privacy

CRED restricts its email reading to those related to financial services, such as credit card statements, loan statements, bank statements, insurance policies, and biller details, and does not access any personal emails.

Your explicit consent is required for CRED to access one or more of your email accounts. Additionally, you may revoke the access to your email at any time.

How Email Parsing Works

You can activate 'CRED Protect' by linking your email account(s) with your CRED account. If you authorize the linkage and connection of your email account with CRED, the app may access the email account to collect certain financial information such as credit card bill specifics like total amount due, minimum amount due and due date, and other financial and transactional information.

CRED employs automated processes for accessing and analyzing information provided by you, which may involve its algorithm to access a password-protected document utilizing your data.

Privacy Concerns

There are some user concerns documented in discussions about this practice. While CRED is considered a trustworthy app, it is recommended not to give full email access of your personal email to any third-party app. A common recommendation is CRED Protect doesn't care if your email is coming from the bank's official email address or you're forwarding it from your personal email id, as long as it has a PDF file attached and the last 4 digits of your card number.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

12. user (2026-06-10T16:15:03.711Z)

Web search results for query: "Google purchases page Gmail parsing receipts shut down history TripIt email itinerary parsing success"

Based on the search results, here's what I found about Google's email parsing features and TripIt:

Google's Purchases Page

Gmail scans emails for receipts and collects these automatically, with purchases neatly listed on a Purchases page on Google's My Account portal. The listing includes application purchases, Google hardware purchases, and items bought on third-party sites like Amazon or the Lego store. Some purchases come without detailed information, likely when Gmail had difficulties parsing the receipt.

TripIt Email Itinerary Parsing Success

TripIt users with Gmail and TripIt accounts can log onto TripIt and click a "Start Auto Import" button to authorize TripIt to import their travel-itinerary confirmations automatically instead of having to email them manually. TripIt's Inbox Sync feature automatically adds travel plans from email inboxes to TripIt itineraries, and once connected, travel plans are automatically added to the account. TripIt picks up the email-parsing piece of Google Trips and runs with it, allowing users to forward confirmation emails for flights, hotels, car rentals, and restaurant reservations, which TripIt automatically assembles into a master itinerary.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

Web search results for query: "Blinkit Zepto BigBasket email invoice itemized receipt GST consumer spend tracking India app"

Links: [{"title": "Centre using real time data from Blinkit, and Zepto like quick commerce platforms to monitor price after GST rate cuts: Report", "url": "https://www.opindia.com/news-updates/centre-using-real-time-data-from-blinkit-and-zepto-like-quick-commerce-platforms-to-monitor-price-after-gst-rate-cuts-report/"}, {"title": "Where can I get my invoice? | Blinkist Help Center", "url": "https://support.blinkist.com/en/articles/10033378-where-can-i-get-my-invoice"}, {"title": "Blinkit, Zepto, Instamart under govt lens to monitor GST cut ...", "url": "https://bestmediainfo.com/mediainfo/mediainfo-digital/blinkit-zepto-instamart-under-govt-lens-to-monitor-gst-cut-impact-on-prices-10561383"}, {"title": "Blinkit Launches GST Invoicing as New Feature for Businesses", "url": "https://startuptalky.com/news/blinkit-gst-invoicing-feature-businesses/"}, {"title": "Real-Time Grocery Price Comparison - BigBasket, Zepto & Blinkit", "url": "https://www.actowizsolutions.com/real-time-grocery-price-comparison-bigbasket-zepto-blinkit.php"}, {"title": "Blinkit launches GST invoicing feature for businesses, offering up to 28% input credit - BusinessToday", "url": "https://www.businesstoday.in/technology/news/story/blinkit-launches-gst-invoicing-feature-for-businesses-offering-up-to-28-input-credit-449126-2024-10-07"}, {"title": "Blinkit rolls out GST invoicing feature for businesses - Varindia", "url": "https://varindia.com/news/blinkit-rolls-out-gst-invoicing-feature-for-businesses"}, {"title": "blinkit | FAQs", "url": "https://blinkit.com/faq"}, {"title": "Blinkit Enables Businesses To Add GSTIN While Making Purchases", "url": "https://inc42.com/buzz/blinkit-enables-businesses-to-add-gstin-while-making-purchases/"}, {"title": "After 10 minute delivery, Blinkit introduces 10 minute returns and exchanges for clothing, footwear - BusinessToday", "url": "https://www.businesstoday.in/technology/news/story/after-10-minute-delivery-blinkit-introduces-10-minute-returns-and-exchanges-for-clothing-footwear-450150-2024-10-15"}]

Based on the search results, here's what I found about the topics you're interested in:

Government Monitoring of GST Compliance

The Central government and its Commerce Ministry are using real-time data from quick commerce platforms like Blinkit, Zepto, BigBasket, Flipkart Minutes, and Swiggy Instamart to monitor whether brands are passing benefits of reduced GST rates to consumers. Some of these quick commerce sites have been directed by the government to showcase savings made on account of GST rate cuts, aimed at ensuring that tax cuts yield lower retail prices on a daily basis and the savings are explicitly visible to consumers.

Blinkit's GST Invoicing Feature

Blinkit has rolled out a feature that allows businesses to add their GSTIN (Goods and Services Tax Identification Number) while purchasing products on the platform. Users will see an option to "Add GSTIN" in the Blinkit app during checkout, and once the GSTIN is added, a GST-compliant invoice is automatically generated for the transaction. With the addition of GST invoices, companies can now claim up to 28 percent in GST input credit on their purchases.

Consumer Spend Tracking

Shoppers increasingly rely on apps like BigBasket, Zepto, and Blinkit for their daily essentials, with e-grocery sales growing at an annual CAGR of 20% between 2020 and 2025, with app-based platforms accounting for nearly 45% of all online grocery orders.

The search results focus primarily on GST-related features and government monitoring rather than consumer spend tracking apps specifically, so comprehensive details on that aspect were limited.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

Based on the search results, here's what I found about the Amazon-Axio acquisition:

Amazon's Axio Acquisition in 2025

Amazon completed its acquisition of Axio (formerly Capital Float), a leading digital lending and checkout finance provider in India, following receipt of regulatory approval from the Reserve Bank of India (RBI). Amazon closed its \$200M acquisition of fintech lender Axio, securing RBI approval and direct NBFC access.

Axio, which has powered Amazon Pay's Buy Now Pay Later (BNPL) services for over six years, will now operate as an Amazon subsidiary while retaining its current leadership team.

What This Acquisition Means

The deal accelerates Amazon's push to build a full-stack financial-services capability in India, combining payments, lending and commerce, and gives it an NBFC foothold through a local fintech with established distribution and underwriting experience.

****Note:**** The search results did not contain any information about an "expense tracker discontinued" related to this acquisition, so I cannot provide details on that aspect of your query.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

Plain Text Accounting Tool for Power Users", "url": "https://homebudgettools.com/program/beancount/"}, {"title": "Awesome Beancount", "url": "https://awesome-beancount.com/"}]

Based on the search results, here are the key findings about Beancount plain text accounting importers for Indian banks and brokers:

Primary Resource: beancount-importers-india

There is a project called prabusw/beancount-importers-india which provides importers for some of the Indian banks and brokers (updated to use beangulp + v3).

Supported Institutions

The importers include support for ICICI, SBI, and Zerodha among various other Indian financial institutions. However, based on the available documentation, **HDFC bank is not explicitly listed** in the directory structure shown.

Specific Importer Details

For ICICI Bank:

When downloading statements from ICICI bank, choose the xls format. The importer script `icici.py` can be used to handle the csv formatted file which can be generated by the `xls2csv` tool from `catdoc` package. The `icici` importer uses the account number in the downloaded statement and this must be configured in your importer config file.

For Zerodha:

The `'zerodha.py'` importer works with the csv formatted `'tradebook'` downloaded from zerodha backoffice site. Almost every broker in India gives similar tradebook and hence can work for every one of them, with minor changes based on column headings. Additionally, the importer `'zerodha_xml_importer.py'` can be used to import Equity transactions from the xml formatted report. This captures all the Transaction charges which are not part of the tradebook.

Architecture

In beangulp, the importers are called by an `import_XXX.py` which has replaced the `config.py` files used earlier.

The project is available on GitHub at <https://github.com/prabusw/beancount-importers-india> for more information and usage examples.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

16. user (2026-06-10T16:15:24.218Z)

Google CASA Requirements Summary

Tiers & Structure

Google's Cloud Application Security Assessment uses three risk-based tiers:

- **Tier 1**: Self-assessment with internal automated scans (DAST/SAST)
- **Tier 2**: "Mid level" testing by authorized labs covering many critical controls
- **Tier 3**: Full third-party manual audit of all OWASP ASVS categories, required for Marketplace badges

Costs

Pricing varies by lab and tier:

- **Tier 2**: Starting around \$540-\$1,800 per assessment
- **Tier 3**: Approximately \$4,500 (example from TAC Security)
- Annual revalidation required at same tier level

Authorized Labs

Approved providers include TAC Security, Leviathan, DEKRA, and Bishop Fox. These labs issue the

official Letter of Validation (LOV) required by Google.

Process

1. Determine applicable tier based on user count, data sensitivity, and scopes
2. Conduct internal scans and fix obvious issues
3. Engage an authorized lab with app credentials
4. Undergo lab assessment and remediate findings
5. Receive LOV upon passing
6. Submit LOV to Google via Cloud Console OAuth verification

Timeline

- **Tier 2**: 1-3 weeks turnaround
- **Tier 3**: 2-4 weeks turnaround
- Overall project: Budget 2 months accounting for remediation delays

Annual Recertification

"Required security measures for Restricted Scopes include following CASA." Google mandates yearly revalidation; apps must maintain compliance or risk API access denial.

2025/2026 Updates

CASA became mandatory for apps accessing restricted Gmail/Drive scopes under Google's updated OAuth and Workspace API policies (October 2025).

17. user (2026-06-10T16:15:46.995Z)

Web search results for query: "Truebill email scanning subscriptions pivot Plaid Rocket Money history Unroll.me Uber data scandal"

Links: [{"title":"Does Rocket Money actually help you save cash?","url":"https://www.spokesman.com/stories/2026/jun/09/does-rocket-money-actually-help-you-save-cash/"},"{"title":"The Best AI Tools for Tracking Subscriptions and Cutting Bills in 2025 - zenfinanceai.com","url":"https://zenfinanceai.com/ai-tools-track-subscriptions/"},"{"title":"Rocket Money can find and cancel unwanted subscriptions. But is it safe?","url":"https://www.cnn.com/select/truebill-review/"},"{"title":"Apps Like Rocket Money: 6 Alternatives for 2026 | Finny Blog","url":"https://getfinny.app/blog/apps-like-rocket-money"},"{"title":"Rocket Money Review [2026]: Money Well-Spent on Feature-Packed Budgeting App","url":"https://financebuzz.com/truebill-review"},"{"title":"Rocket Money Review (Formerly Truebill) - Scam Saving App or Legit?","url":"https://www.wallstreetzen.com/blog/rocket-money-review/"},"{"title":"Rocket Money Reviews from Real Customers","url":"https://www.consumeraffairs.com/finance/truebill.html"},"{"title":"Rocket Money Review: Expense Tracking and Bill Negotiation","url":"https://erika.com/rocket-money-review/"}]

Based on the search results, here's what I found regarding the topics you searched for:

Truebill, Rocket Money, and Plaid

Truebill was rebranded as Rocket Money after being acquired by Rocket Companies. The app scans your transaction history to identify recurring charges ? including "vampire" subscriptions you forgot you had. By connecting to your financial institutions using multi-factor login via secure services like Plaid, it provides real-time tracking that theoretically removes the manual labor from budgeting.

Security and Privacy Considerations

Rocket Money stores your data using bank-level 256-bit-encryption and uses Plaid's services to securely connect your Rocket account to more than 15,000 U.S. financial institutions. However, the tradeoff is the data exchange: another party reads your transaction history continuously.

Unroll.me and Uber Data Scandal

The search results did not contain information about Unroll.me or the Uber data scandal in relation to Truebill/Rocket Money. To get information about those topics and any potential

connection to Rocket Money's history, you would need a more specific search focused on those particular subjects.

Would you like me to search for more information about Unroll.me, the Uber data scandal, or any other aspects of this topic?

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

Save Emails and Attachments Add-on

****Developer:**** Digital Inspiration

****User Base:**** 2M+ installations with 726 reviews

****Rating:**** The page indicates user reviews exist but doesn't display a specific star rating.

****Cost:**** Free with optional paid features available

****Core Functionality:****

This Gmail add-on enables users to "Download emails and file attachments from Gmail? to Google Drive? automatically." Users can save messages in multiple formats including PDF, HTML, text, or EML files.

****Attachment Handling:****

The tool saves file attachments in their original native format to Google Drive. It includes special features like decrypting password-protected PDFs from banks and credit card companies, and transcribing voice messages to text using OpenAI's Whisper technology.

****Key Capability:****

Unlike some email automation solutions, this add-on can download both new incoming messages and historical emails matching user-defined search criteria to specified Drive folders. All activity is logged in a Google Spreadsheet for reference.

Based on the web search results, here's comprehensive information about Sahamati's Account Aggregator framework and its personal finance use cases for individuals in 2026:

Account Aggregator Framework Overview

Through the Account Aggregator framework, individuals can bring together their financial information from multiple accounts into one consented view. The Account Aggregator framework is India's entry into the world of open finance, and this RBI approved initiative provides limitless opportunities to deliver better value and create innovative services for customers.

Personal Finance Management (PFM) Use Case

Personal financial management (PFM) apps are emerging as a potential driver of improved financial health, and by aggregating data across accounts and generating real-time insights, they promise personalized financial advice. Over 25% of respondents reported using a consent-based process to share data with PFM apps to track their finances or to have an aggregate view of their accounts.

PFM apps use AA data (with consent) and give users a 360-degree financial view; income, spending patterns, balances, assets, etc.

Individual Data Access and Control

The user can provide or withhold permission to share data from any accounts with any intermediary when they register for an account with the aggregator, and the decision over how much of the user's data can be shared will remain in their hands.

PFM Adoption and Growth

Recent data shows strong PFM adoption: 86% of respondents who opted for the consent-based sharing process for PFM applications reported a positive experience overall, with over half of the respondents rating their experience as 'good', and 34% rating it as 'very good'. Some 69% of respondents who opted to share data through the consent-based process said they were motivated to use the process due to its convenience and ease of use.

Broader Ecosystem Growth

Around 4-5 crore customers are estimated to have availed a financial service (loan, insurance, PFM, portfolio management) using the AA Framework.

Invoice | Government Finances", "url": "https://www.scribd.com/document/723301224/Blinkit"}]

Based on the search results, here's what I found about Blinkit order invoices:

How to Download Blinkit Invoices

To download an invoice for your Blinkit order, visit <https://blinkit.com>, login to your account, click on My Account, then select My Orders, where all your orders will be displayed.

Tax/GST Invoices for Consumers

While Blinkit issues invoices for most products including groceries and beauty items, proper Tax or GST invoices are particularly important for products that carry manufacturer warranties, such as electronics. You can store the Blinkit Tax Invoice for future reference or take a printout.

Invoice Details

Blinkit's tax invoices are comprehensive documents. Tax invoices summarize sales from Blink Commerce Private Limited and include details of the seller such as GSTIN and FSSAI license number. The invoices detail various grocery items purchased along with their prices, taxes, and total amounts.

The search results show that Blinkit provides PDF invoices that can be downloaded through the account portal, and these include standard tax information required for warranty claims and other purposes.

Based on the search results, here's what I found regarding Google Play SMS permission policy for financial apps in India with recent restrictions:

Key Policy Updates for Financial Apps

Google Play updated their Personal Loan policy on April 3rd to restrict the use of sensitive information, including SMS content and call logs, which poses challenges for financial service apps in terms of loan applications and risk assessment.

All new personal loan apps on Google Play in India must be in compliance as of Oct 30, 2025.

SMS Permission Restrictions

Personal loans or budgeting apps may not exfiltrate or share non-financial or personal SMS history of a user. Additionally, clarifications were made on restrictions for financial apps accessing SMS history, especially regarding potential misuse in spyware-like behavior.

Compliance Deadlines

Financial app developers must update permissions and metadata to comply with the new personal loan policy by May 28, 2025, or risk having their apps removed from the store.

General SMS/Call Log Permission Rules

Apps lacking default SMS, Phone, or Assistant handler capability may not declare use of SMS or Call Log permissions, and apps must be actively registered as the default SMS handler before prompting users to accept these permissions.

Fraud Protection in India

Google Play Protect inspects permission declarations in real-time and specifically looks for permission requests frequently abused by fraudsters to intercept one-time passwords via SMS or notifications (RECEIVE_SMS, READ_SMS, BIND_Notifications, and Accessibility).

Digital Personal Data Protection Rules, 2025 -"}]

SRL", "url": "https://spiceroutelegal.com/publications/indias-new-data-protection-regime-explained-dpdp-rules-update-note/"]]

Based on the web search results, here's what I found regarding RBI's Account Aggregator framework and its connection to the 2025 amendments related to DPDP and data portability:

Account Aggregator Framework Overview

An Account Aggregator is a type of Non-Banking Financial Company (NBFC-AA) regulated by the Reserve Bank of India (RBI) that helps individuals securely and digitally access and share information from one financial institution to another in a real-time, consent-based, and secure manner.

Individual Access to Own Data

The AA system flips data ownership ? for the first time, users own and control their financial information. Account Aggregators (AAs) are a category of RBI-regulated NBFCs that function as consent managers, allowing consumers to give, manage, review, and withdraw consents from FIUs to access their data from FIPs, and with AAs, consumers can access, manage, and share data across all financial institutions with explicit, informed consent.

DPDP Act and 2025 Amendment Integration

With the Digital Personal Data Protection (DPDP) Act, 2023 and Draft DPDP Rules, 2025, India aims to expand its consent-based data-sharing system by building on the Account Aggregator model. The Account Aggregator framework is built on consent as its core principle ? requiring explicit, purpose-specific consent for every data fetch, which aligns well with DPDP requirements, and the DPDP Act adds additional dimensions including the right to withdraw consent and data principal rights over AA-aggregated data.

Data Portability and Personal Use

RBI has built a consent-based infrastructure that aligns with Digital Personal Data Protection (DPDP) Act principles. The framework supports data portability by enabling individuals to access and share their financial data across regulated institutions with their explicit consent.

Based on the search results, here's what I found about receipt scanning rewards cashback apps in India for 2025, with comparisons to the Fetch model:

India-Specific Receipt Scanning Apps

Magicpin, launched in 2015, is a unique rewards and cashback app that lets users earn points called magicPoints for everyday spending, including dining out, grocery shopping, and buying clothes by snapping a photo of bills and uploading them. MagicPoints can be used to unlock discounts on food delivery, fashion, groceries, and to redeem vouchers and gift cards from leading brands.

Another major player is Club Corra, India's first coalition loyalty program, where you upload a receipt from any of 40+ partner brands, OCR verifies it, and Corra Coins (1 coin = ₹1) are credited, redeemable as direct UPI cashback.

How These Apps Compare to Fetch

The key difference is that Fetch accepts any receipt, whereas India's apps like Magicpin and Club Corra focus on specific partner brands and stores. India's cashback app market includes affiliate-based platforms, UPI reward apps, and receipt-scanning models.

General Strategy

The same receipt can earn from 3-4 apps simultaneously, allowing users to stack multiple apps on every receipt. This approach maximizes rewards across different platforms.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

Web search results for query: "Gmail based expense tracker India parse email receipts app 2025"

Links: [{"title": "Build your own email-based expense tracking with Google Apps Script | by Joshua Mustill | Medium", "url": "https://joshmustill.medium.com/build-your-own-email-based-expense-tracking-with-google-apps-script-ee91c148fae7"}, {"title": "Expense Report Software Integrated with Gmail (2025) - GetApp", "url": "https://www.getapp.com/finance-accounting-software/expenses-management/w/gmail/"}, {"title": "Zoho Expense for Gmail - Google Workspace Marketplace", "url": "https://workspace.google.com/marketplace/app/zoho_expense_for_gmail/927860167710"}, {"title": "Automatic Email Receipt Scanner | SparkReceipt", "url": "https://sparkreceipt.com/features/email-receipts/"}, {"title": "AI Receipt Scanner for Small Business | SparkReceipt", "url": "https://sparkreceipt.com/"}, {"title": "Scan Email for Receipts", "url": "https://www.easy-expense.com/features/scan-email-for-receipts.html"}, {"title": "Expensify - Google Workspace Marketplace", "url": "https://workspace.google.com/marketplace/app/expensify/452047858523"}, {"title": "WellyBox - Expense Tracker Software | 100% Automatic | Try For Free", "url": "https://www.wellybox.com/expense-tracker-software/"}]

Based on the search results, here are the Gmail-based expense tracker apps that parse email receipts:

Key Solutions Found:

1. Zoho Expense for Gmail

Zoho Expense's Gmail add-on extracts necessary details from e-receipts in your inbox automatically, capturing line-item details such as date, currency, amount, merchant, payment mode, tax details and invoice number at the line-item level. The app scans multi-lingual receipts in 14 different languages.

2. SparkReceipt

SparkReceipt lets you link Gmail, Outlook, Microsoft, or any IMAP email account, automatically scans new incoming emails, and only imports receipt and invoice emails. AI extracts vendor, amount, date, tax, and currency from every receipt, with receipts auto-categorized by expense

type.

****3. Easy-Expense****

You can connect your Gmail account and create professional PDF expense reports in seconds or export a powerful CSV file for advanced accounting and bookkeeping.

****4. WellyBox****

WellyBox automatically finds all digital receipts & invoices from your email and shows them on your unique dashboard, scanning your email for receipts.

****5. Expensify****

Expensify automatically transcribes receipt details when you take a photo, can categorize and code each receipt, and can automatically submit business expenses for approval and reimbursement.

These solutions range from specialized receipt scanning apps to broader expense management platforms, with most supporting automatic email parsing and AI-powered data extraction from receipts.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

25. user (2026-06-10T16:16:37.642Z)

Restricted Scope Verification for Gmail API

Required Steps

Apps requesting restricted Gmail scopes must:

1. Confirm eligibility (not under exemptions)
2. Meet branding requirements and verify domain ownership
3. Ensure OAuth consent screen accurately represents the app
4. Declare all scopes in Cloud Console
5. Submit demonstration video showing the OAuth flow and scope usage
6. Specify permitted application type
7. Complete brand verification (typically 2-3 business days)

Security Assessment Requirement

"Every app that requests access to Google users' restricted data and has the ability to access data from or through a third-party server must go through a security assessment." This uses the App Defense Alliance framework and must occur annually.

Timeline

The process "can potentially take several weeks to complete" due to security assessment requirements.

Annual Recertification

Apps must "be reverified for compliance and complete a security assessment at least every 12 months" after initial approval.

Exemptions

Apps are exempt if they:

- Are personal use only
- Are in development/testing/staging phases
- Use service accounts for service-owned data only
- Are internal-use only within organizations

- Use domain-wide installation exclusively

Apps Under 100 Users/Testing Mode

Testing-phase apps have a "user cap" restricting access and face a "tester warning screen," but don't require verification submission.

Costs

No costs are mentioned in this documentation.

26. user (2026-06-10T16:16:57.008Z)

Web search results for query: "Fold Money funding round Stellaris 2024 2025 paid subscription business model"

Links: [{"title": "Stellaris Corporation Updates, Team, and Funding Progress | Wefunder, Home of the Community Round", "url": "https://wefunder.com/stellaris.corporation"}, {"title": "Stellaris", "url": "https://crowdability.com/deals/stellaris"}, {"title": "Stellaris on StartEngine 2024 - Kingscrowd", "url": "https://kingscrowd.com/stellaris-on-startengine-2024/"}, {"title": "Stellaris on Wefunder 2025 - Kingscrowd", "url": "https://kingscrowd.com/stellaris-on-wefunder-2025/"}, {"title": "Stellaris Venture Partners", "url": "https://www.stellarisvp.com/"}, {"title": "Stellaris | StartEngine", "url": "https://www.startengine.com/offering/stellaris"}, {"title": "Stellaris | Crowdfunding Deals | Crowdability", "url": "https://legacy.crowdability.com/deals/stellaris"}, {"title": "Stellaris: Expansion Subscription on Steam", "url": "https://store.steampowered.com/app/2729490/Stellaris_Expansion_Subscription/"}, {"title": "Space Industry Funding Rounds Database | SpaceNexus", "url": "https://spacenexus.us/funding-rounds"}]

Based on my search results, I found information about Stellaris Corporation's funding activities, but I did not find any information about a company called "Fold Money" or any connection between Fold Money and Stellaris.

Here's what I found about Stellaris:

Stellaris has raised over \$7 million from venture capitalists including Convexa and iEnergies as well as retail investors. The company had a valuation of \$25.02 million and conducted a crowdfunding campaign on StartEngine in August 2024, and had another crowdfunding campaign on Wefunder with a valuation of \$25 million.

Stellaris is a solar technology company that develops photovoltaic electricity-generating windows called ClearPower, not a subscription-based software or money management service.

If you're looking for information about a different company called "Fold Money" and its business model, I would need to search for that separately. Could you clarify if you meant to ask about these as separate companies, or provide additional context about what Fold Money does?

Federal Bank","url":"https://www.federal.bank.in/account-aggregator"]}]
```

Based on the web search results, here's what I found regarding credit card data and the Account Aggregator (AA) ecosystem:

FIP Coverage and Live Status (2025)

As of December 31, 2025, 126 financial institutions are live as both FIP and FIU, with an additional 54 operating solely as FIPs. Over 130 FIPs are connected with one or more Account Aggregators.

HDFC and ICICI Coverage

Real-time data fetching from major FIPs (like HDFC, ICICI, SBI) typically occurs in under 15 seconds. Both banks are active participants in the AA ecosystem. ICICI Bank participates in the Account Aggregator (AA) framework as both a Financial Information Provider (FIP) and a Financial Information User (FIU).

Credit Card Data Limitation

The current Account Aggregator framework primarily focuses on bank account data. The search results emphasize that Phase 1 of the AA rollout focused entirely on bank accounts (CASA), with Phase 2 expanding to other data types like GSTIN and equities/mutual funds. There is no specific mention of credit card data being live in the current 2025 AA ecosystem coverage.

User Adoption

As of December 2025, approximately 38% of borrowers have accounts enabled on the Account Aggregator framework, indicating the ecosystem is still in growth phase regarding adoption.

A deeper look inside Fold's categorisation engine | Building Bridges - Setu","url":"https://blog.setu.co/articles/a-deeper-look-inside-fold-s-categorisation-engine"}]

Based on the search results, here's what I found about Fold Money:

Funding

Fold Money has raised a seed investment of \$2.5M to support its vision of building a personal finance products ecosystem for India.

Company Overview

Fold is a Bengaluru-based fintech company founded in 2019 by Utkarsh Verma, Akash Nimare, Shakti Goap and Nash Vail. Akash Nimare is the CEO of Fold.

Product Description

Fold is an app that connects to users' bank accounts via the Account Aggregator framework to automatically pull, categorize, and display expenses for easier financial tracking. Fold uses its RBI approved account aggregator status to pull data securely from all bank accounts and helps make users aware of their cash flow without a painful interface and effort.

Company Growth

Fold has managed to get a waiting list of 25,000 users purely through word of mouth. As of April 30, 2026, the latest employee count at Fold is 11.

REMINDER: You MUST include the sources above in your response to the user using markdown hyperlinks.

Web search results for query: "Google account "purchases" page Gmail receipt tracking removed deprecated 2023 2024 antitrust"

Links: [{"title":"Google Ads Developer Blog: Buy on Google For Search and Shopping Deprecation","url":"https://ads-developers.googleblog.com/2023/09/buy-on-google-for-search-and-shopping.html"}, {"title":"Google Is Tracking Your Purchases through Your Email","url":"https://www.expressvpn.com/blog/google-tracks-purchases-gmail/"}, {"title":"Google Has Been Tracking All Your Purchases. Here's How to Find Them","url":"https://www.inc.com/minda-zetlin/google-gmail-purchases-privacy-how-to-delete.html"}, {"title":"Account Purchases - Sign in - Google Accounts","url":"https://myaccount.google.com/purchases"}, {"title":"Gmail's New Purchases Tab Finally Tames Your Package Chaos << Android :: Gadget Hacks","url":"https://android.gadgethacks.com/news/gmails-new-purchases-tab-finally-tames-your-package-chaos/"}, {"title":"Google keeps records of everything you buy, even if you delete the email receipt | Hacker News","url":"https://news.ycombinator.com/item?id=28631540"}, {"title":"Introducing a new purchase tracking view and more relevant promotions in Gmail","url":"https://blog.google/products-and-platforms/products/gmail/one-stop-purchase-tracking-in-gmail/"}, {"title":"Google uses receipts sent to Gmail to log online purchases | TechSpot","url":"https://www.techspot.com/news/80134-google-uses-receipts-sent-gmail-log-online-purchases.html"}, {"title":"Track your purchases in Gmail - Android - Gmail Help","url":"https://support.google.com/mail/answer/16624561?hl=en&co=GENIE.Platform%3DAndroid"}]

Based on the search results, here's what I found about Google's purchases tracking feature:

Overview

A "Google Purchases" page keeps track of all digital receipts sent to your Gmail from as far back as 2012. The page is not limited to purchases made directly from Google, including flight tickets, Amazon purchases, and food delivery services.

Current Status

The Google Purchases page and tracking feature do not appear to have been removed or deprecated. Gmail shows a new "Purchases" view in the left menu, and users can track all their online purchases with Gmail's Purchases view, which gathers all order, shipping, and delivery confirmations in one place. These features are actively being promoted and updated as of 2025.

Privacy Considerations

Google stated that only users can see their own purchase information and that Google won't sell the information or use it to choose which ads users see.

The search results do not contain specific information about antitrust actions related to this feature or deprecation in 2023-2024. If you're looking for information about antitrust concerns, you may want to search for more specific antitrust-related queries.

Refresh Token Expiration for Testing Status

According to the documentation, projects with an OAuth consent screen configured for external user type and "Testing" publishing status receive refresh tokens with limited validity:

> "A Google Cloud Platform project with an OAuth consent screen configured for an external user type and a publishing status of "Testing" is issued a refresh token expiring in 7 days, unless the only OAuth scopes requested are a subset of name, email address, and user profile"

The exception applies when developers request only these scopes (or their OpenID Connect equivalents):

- `userinfo.email`
- `userinfo.profile`
- `openid`

In other words, the 7-day expiration can be avoided by limiting scope requests to basic user profile information.
