Repo: C:\Users\avidu\Projects\badminton-highlight-indexer (branch docs/pmf-field-signals ? uncommitted working-tree changes included; read the files as they are on disk).
Files under review (read all in full):
- docs/PRODUCT_FIELD_ASSOCIATE_FLYER.md (NEW - the recruiting flyer the owner hands to CANDIDATES; the owner recruits personally)
- docs/FIELD_RESEARCH_ASSOCIATE_FLYER.md (reframed - now the hired associate's visit PLAYBOOK: coach script Q1-Q7, demo-after-Q6 rule, student questions, ground rules, Phase-2 record-and-show-back)
- docs/FIELD_VISIT_ANSWER_SHEET.md (per-visit form incl. new demo-reaction + student blocks)
- docs/PMF_FIELD_SIGNALS.md (the pre-registered decision layer; demo/student data = product feedback, NOT verdict signals)
Grounding (read as needed): docs/PMF_MARKET_RESEARCH.md, docs/UI_PROPOSAL.md + docs/UI_ALPHA_EXECUTION_PLAN.md + docs/HOSTING_PLAN.md (what the UI/hosting can honestly claim today), CLAUDE.md guardrails (minors exclusion, consent).

Owner's spec (verbatim intent): hire a person who visits academies, talks to coaches AND students, to understand how the project helps them and gather improvement feedback - full stop. Stretch goal: that person helps record videos, we run the pipeline, show the academy a sample result ("how it will look for them"). UI will be ready by then; hosting plan exposes the service to a few allowlisted people. The flyer must let a reasonable (non-technical) person understand the gig; the owner recruits personally.

A critic claims the following flaw. Adversarially verify by reading the actual files - try to REFUTE it. Default to refuted if pedantic, out of scope for a one-person 3-4 week field gig run personally by the owner, or already handled elsewhere in the kit.

CLAIM [low] Phase-2 consent bundles demo use and training-library retention into one 'building the tool' consent
Phase-2 footage explicitly enters the training pool ('recorded for our library', PMF_FIELD_SIGNALS.md §5; 'adult sessions only for the training pool', docs\NEXT_STEPS.md line 43), and the consent described is a single written consent where the academy is 'told plainly what the footage is for (building and demonstrating the tool)' (FIELD_RESEARCH_ASSOCIATE_FLYER.md lines 104-106). CLAUDE.md's guardrail treats training-data use as needing a SEPARATE explicit opt-in, distinct from service/demo use. 'Building' arguably covers it, but a single bundled consent is below the bar the project set for itself. The minors exclusion itself is intact and consistent in all three docs.
Proposed fix: When the Phase-2 consent form is drafted, give it two separately initialed lines: (1) record + process + show back to this academy, and (2) retain the footage to improve the model ? with (2) declinable without losing (1). One sentence in the playbook's Phase-2 hard rules ('consent form separates demo use from keeping the footage for training') locks it in.

```
1      # Field Visit Playbook ? academy conversations (KhelSutra)
```

```

2
3     > **Recruiting?** Hand candidates
4     > ? that's the role description. **This document is the working playbook the hired
5     > associate gets on day one:** the conversation script, the ground rules, and the
6     > Phase-2 (recording / show-back) procedure.
7
8     **Duration:** ~3?4 weeks, part-time (flexible hours, mostly afternoons/evenings when
academies are active)
9     **Location:** Bengaluru ? in-person visits to badminton academies
10    **Compensation:** ? ___ per completed academy visit + travel reimbursement; Phase-2
sessions paid extra *(discussed individually)*
11    **Reports to:** Avi (phone/WhatsApp: ___ )
12
13    ---
14
15    ## The gig in one paragraph
16
17    KhelSutra takes ordinary practice/match video from a badminton academy and automatically
finds every rally, builds
18    highlight reels, and generates match reports; a private web app is opening to a few
invited academies. We need honest,
19    on-the-ground feedback from real academies ? **how they work with video, whether this
actually helps them, and what
20    would make it genuinely useful**. **Your job: visit 10?15 good academies, have a
friendly 20?30 minute conversation
21    with the owner/head coach (and, with permission, a few senior/adult students) using the
script below, and write down
22    what they actually say.** No selling. No tech knowledge needed. For interested academies
there's a Phase-2 follow-up
23    (a recording session ? then you return and show them THEIR OWN footage as highlights)
with additional compensation.
24
25    ---
26
27    ## Phase 1 ? The conversation (what you actually do)
28
29    **Who to talk to:** the academy owner or head coach ? the person who decides what the
academy spends money on.
30    If you get a junior coach, be friendly, gather what you can, and ask when the owner is
available.
31
32    **Opening (keep it this honest):**
33    > "Hi, I'm helping a Bengaluru engineer who's building an AI tool for badminton
academies ? it takes normal practice
34    > video and automatically cuts it into rallies and highlights. He asked me to talk to a
few serious academies to
35    > understand how you work with video today. Could I ask you a few questions? Takes 15
minutes, and we're not selling
36    > anything today."
37
38    **The questions (ask in this order; the starred ones matter most):**
39
40    1. Do you ever video-record sessions or matches here? How ? phone, tripod, CCTV, a hired
person?
41    2. ? **Do you have recorded footage sitting around that nobody has time to watch?**
(multi-court hall recordings,
42    tournament days, CCTV) ? roughly how much?
43    3. Who would watch rally clips or highlights if they existed ? coaches for training?
players? parents?
44    4. What do you use today for any of this? (Listen for: Machaxi, VISIST, Game Theory,
Stupa, BadPro+, just
45    YouTube/phone.) What do you like / what's missing in it?
46    5. ? **If you could hand over a full session's video and get back every rally cut out +
a highlight reel + a simple

```

47 report ? would you pay per match for that? What would that be worth to you, per
match? ** Then **stop talking and

48 wait ** ? let THEM name the number. If they genuinely won't after a pause and one
"roughly?", you may offer the

49 ladder: "?100, ?300, ?500?" **On the sheet, tick whether their number came BEFORE or
AFTER you offered the

50 ladder ** ? it changes what the answer means. (Note their face, not just the words.)

51 6. Your hall has multiple courts running at once, right? Does that make video less
useful today?

52

53 **? NOW (and only now) show the sample reel ** ? a ~60-second real highlight reel we put
on your phone. Say: "this is

54 what it produces ? every rally found and cut automatically." Then shut up and watch
their face. Write down their

55 FIRST reaction verbatim, and ask one follow-up: "what would this need to do for it to
be useful for YOUR academy?"

56 (Improvement asks, in their words, go on the sheet. Showing it earlier anchors every
answer above ? never lead with it.)

57

58 7. Would you let us record one session here (we pay a small fee for the time) and come
back showing what the tool

59 produces on YOUR court, your players? *(This is the Phase-2 door ? just note
yes/no/maybe and who to call.)*

60

61 **Students (with the coach's permission ? senior/adult students only, 5 minutes):** ask
2?? of them:

62 (a) "Would you watch clips of your own rallies if they existed after each session?"

63 (b) "Would you share them ?

64 with whom?" (c) "What would you want them to show?" Capture their answers in the
sheet's student block. Don't

65 collect students' contact details; if everyone available is a minor, skip the student
questions ? note that instead.

66

66 **After each visit, fill ONE answer sheet ? the template is
FIELD_VISIT_ANSWER_SHEET.md

67 (print one per visit):** academy name, location, # courts, person spoken to + role +
contact, answers 1?? (their

68 words, not yours), the most negative thing they said (required), exact quotes, your gut
read, and whether they're a

69 Phase-2 candidate. *(How the answers get scored and what totals trigger which decision
lives in

70 PMF_FIELD_SIGNALS.md ? that part is ours, not yours; just
capture honestly.)*

71

72 ---

73

74 ## Ground rules & gotchas (read twice ? this is the difference between useful and
useless)

75

76 1. **You are researching, not selling.** If they ask "how much will it cost", say
"that's exactly what he's trying to

77 figure out ? what would feel fair to you?" Never quote a price yourself.

78 2. **Past behavior beats opinions.** "Would you use video?" gets polite lies. "When did
you LAST record a session, and

79 what happened to that file?" gets the truth. Prefer the second kind of question.

80 3. **Don't promise anything.** No features, no dates, no free trials. You may SHOW the
standard sample reel (it's

81 real output ? at the scripted moment only, after Q6) and you may offer the Phase-2
idea (a paid recording session

82 + free sample output of their own court), and only as "would you be open to it".
Nothing else.

83 4. **Write down disappointing answers verbatim.** A "no, we'd never pay for that" with a
reason is worth MORE to us

84 than five vague yeses. You're paid per completed honest visit, not per positive
answer.

85 5. ****If they already use a competitor (Machaxi/VISIST/Game Theory etc.) ? goldmine.****
 Ask what it does well, what it
 86 doesn't, and what they pay. Spend extra time here.
 87 6. ****Multi-court is our favorite topic.**** If they complain that video is useless because
 "all the courts are in frame
 88 and it's chaos" ? capture that complaint in their exact words. That's the problem we
 solve.
 89 7. ****No recordings of people without clear permission.**** In Phase 1 you record NOTHING ?
 notes only. Don't photograph
 90 the academy or players unless the owner offers.
 91 8. ****Don't oversit.**** 20 minutes, thank them, leave a good impression ? we may come back
 to record.
 92 9. ****Confidentiality:**** don't describe the tech beyond the opening line, don't name
 other academies' answers, and
 93 don't share the answer sheets with anyone except Avi.
 94
 95 ---
 96
 97 ## Phase 2 (only for academies that said yes ? separate briefing & pay)
 98
 99 You coordinate a recording session: we pay the academy a small fee, set up a
 phone/camera on a tripod (we provide a
 100 one-page capture checklist: behind the court, elevated, whole court in frame, landscape,
 1080p/60fps, don't move it),
 101 record 1?2 sessions ? then we process the footage through KhelSutra and ****you return to**
 present the academy its own
 102 sample output****** (their court, their players, as a highlight reel + report, free) and
 fill a short reaction sheet:
 103 what they said when they saw it, what they'd change, whether they asked to keep using
 it. That show-back conversation
 104 is the single most valuable artifact this whole engagement produces. ****Hard rules:****
 written consent from the academy
 105 AND the adult players being recorded; ****sessions with minors are not recorded for our**
 library****** ? adult sessions only;
 106 the academy gets told plainly what the footage is for (building and demonstrating the
 tool).
 107
 108 ---
 109
 110 ## Day one
 111
 112 Your first 2 visits are paired (you + Avi, or a live phone walkthrough) so you're never
 improvising. Before visit 1:
 113 read this playbook twice, have the sample reel saved offline on your phone, and carry
 printed answer sheets
 114 ([`FIELD\_VISIT\_ANSWER\_SHEET.md`](FIELD_VISIT_ANSWER_SHEET.md) ? one per academy).
 115

3. user (2026-06-12T15:02:38.571Z)

1 # C13 Field Signals ? what academy visits must tell us (and when to change course)
 2
 3 ****Status:**** ACTIVE ? the decision layer for the C13 beachhead validation
 4 (owner-ratified direction, 2026-06-12: *PMF validation is handled by physically
 5 visiting academies and reading signals on the ground*).
 6 ****Companions:**** [`PRODUCT\_FIELD\_ASSOCIATE\_FLYER.md`](PRODUCT_FIELD_ASSOCIATE_FLYER.md)
 7 (the recruiting flyer candidates see) .
 8 [`FIELD\_RESEARCH\_ASSOCIATE\_FLYER.md`](FIELD_RESEARCH_ASSOCIATE_FLYER.md)
 9 (the hired associate's visit playbook: script + ground rules + Phase-2) .
 10 [`FIELD\_VISIT\_ANSWER\_SHEET.md`](FIELD_VISIT_ANSWER_SHEET.md) (the per-visit capture
 form) .
 11 [`PMF\_MARKET\_RESEARCH.md`](PMF_MARKET_RESEARCH.md) (the hypotheses under test, esp. §6).
 12
 13 ****Why this doc exists:**** the flyer collects answers; this doc fixes ? ****before the**
 14 first visit****** ? what those answers *mean* and what totals trigger which decision.

15 Pre-registering the thresholds is the honesty mechanism: it stops us from reading
16 15 ambiguous conversations as whatever we hoped to hear.
17
18 ---
19
20 ## 1. The hypotheses under test (each maps to script questions)
21
22 | ID | Hypothesis (from PMF research) | Falsified looks like | Script Q |
23 |---|---|---|---|
24 | H1 | ****Recording behavior exists**** ? academies already produce fixed-angle / CCTV /
multi-court footage without us | nobody records; "we'd have to start for you" | Q1 |
25 | H2 | ****Dead-footage pain**** ? recorded footage piles up unwatched (the indexing wedge)
| footage is small, or already gets watched | Q2 ? |
26 | H3 | ****An audience exists**** ? coach, player, or parent would actually consume rally
clips/reels | shrug; "who has time to watch clips" | Q3 |
27 | H4 | ****Whitespace**** ? incumbents (Machaxi, VISIST, Game Theory, Stupa, BadPro+ ? the
India set is field-sourced from the 2026-06-10 competitive audit; PMF \$4's web table predates
it) leave a gap we fit | "we use X, it's fine, fully solved" | Q4 |
28 | H5 | ****Willingness to pay per match**** at a price that clears unit economics | "should
be free" / <?100 everywhere | Q5 ? |
29 | H6 | ****Multi-court chaos is a felt problem**** (our moat: indexing messy BYO multi-court
footage) | multi-court video already useful to them | Q6 |
30 | H7 | ****Behavioral commitment**** ? they'll let us record on their court (Phase-2 door) |
polite no across the board | Q7 |
31
32 Unit-economics floor behind H5: serving COGS on the Gemini path is ~\$0.30?0.60 per
33 hour of video (? ?25?50/hr; 2026-06-10 quality table). A 2?3 hr session costs
34 roughly ?75?150 to process, so ****?300/match has real margin, ?100/match is**
35 **break-even-ish at retail**** ? that's why the script's anchor ladder is ?100/300/500.
36
37 ## 2. Per-visit scoring ? GREEN / AMBER / RED anchors
38
39 ****Scoring is done by the owner (or a Claude session) at transcription ? the**
40 **associate only captures answers**** (the sheet's score grid is marked OFFICE USE).
41 Score each hypothesis ****from what they said and showed, not what you inferred****.
42 When between two grades, take the lower one.
43
44 | | GREEN (strong confirm) | AMBER (weak/mixed) | RED (disconfirm) |
45 |---|---|---|---|
46 | ****H1 record**** | shows or names actual setup (tripod/CCTV/phone rig) used ?monthly |
records occasionally (tournaments only) | doesn't record; no plans |
47 | ****H2 dead footage**** | points at real unwatched volume (?~5 hrs, "CCTV runs all day",
tournament backlog) | some footage, partially watched | no backlog exists |
48 | ****H3 audience**** | names WHO would watch and WHEN (e.g. "parents ask for clips", "I
review with students Mondays") | "could be useful, maybe" | no consumer identified |
49 | ****H4 whitespace**** | no tool today, or uses one and volunteers a gap we cover (multi-
court, BYO footage, price) | uses a competitor, mildly satisfied | competitor solves it,
satisfied, sticky |
50 | ****H5 WTP**** | names ??300/match ****BEFORE** the ladder was offered** (the sheet's tick-box
records this), or proposes a budget framing of their own whose per-match equivalent is ??300
(see counting rule below) | names a number only ****AFTER**** the ladder (anchored ? even
?300/?500), or volunteers ~?100 | refuses to name a number / "should be free" / volunteers <?100
|
51 | ****H6 multi-court**** | complains about it in their own words before/without prompting |
agrees when asked | multi-court footage already works for them |
52 | ****H7 Phase-2**** | yes + gives a name/number/slot | "maybe, come back" | no |
53
54 ****The H5 counting rule ("H5 at ?300+")****: a visit counts toward the "?300+" tally
55 only when the ? number (a) is ?300 ****and**** (b) came ***before*** the ladder was offered
56 ? an anchored ?300 is the modal polite answer to a read-aloud 100/300/500 ladder
57 and proves nothing, so it scores AMBER and does ****not**** count. Budget-framed
58 answers convert at transcription: their monthly ? ÷ the matches/month they cited
59 (if they cited none, ÷4); the computed equivalent counts if ??300 and the
60 conversion is written into the rollup row. Stated WTP ? even clean ? remains
61 ***talk***: the confirming step before any PROCEED-triggered build is the fake-door /

62 paid-pilot test already pre-agreed in PMF §6 risk 2 and the C13 row.

63

64 ****Weighting rule (behavior > words):**** H7-GREEN and H2-GREEN are ***behavioral***

65 signals and count double in your gut-read; H3/H5 answers are ***talk*** until a Phase-2

66 session or a real payment corroborates them. A visit with H5-GREEN but H7-RED is a

67 polite conversation, not a customer.

68

69 ****Disconfirming-evidence quota:**** every visit sheet must record at least one

70 verbatim ***negative*** quote (the thing they liked least / wouldn't pay for). If a

71 sheet has only positives, the visit gets re-done or its evidence discounted in the

72 rollup (****never the associate's pay**** ? they're paid per completed honest visit);

73 per the flyer's ground rule 4, a reasoned "no" is worth more than five vague yeses.

74

75 ****Sampling note (read the verdict with this in mind):**** the flyer sends the

76 associate to 10?15 ***good*** academies ? the verdict therefore reads "does the

77 beachhead work where it should work best?", not "what fraction of the market is

78 addressable". A PROCEED here licenses the next validation step, not a TAM claim;

79 the rollup's area/courts columns record what was actually sampled.

80

81 **## 3. Pre-registered decision rules**

82

83 ****Stopping rule (fixes the optional-stopping loophole):**** the campaign targets

84 ****n = 15**** completed owner/head-coach sheets and may end earlier ****only for**

85 **logistics**** (associate availability, academies exhausted) ? ****never because of how**

86 **the tallies look****. The 5-sheet check-ins below are progress reports, not verdict

87 opportunities; ****the verdict is computed exactly once, at the final n****, and the

88 rollup records what that n was and why the campaign stopped. The count thresholds

89 below are written for n = 15 and apply unchanged at any final n in 10?14 ? which

90 deliberately makes the ?-bars ***relatively harder*** at smaller n (biases away from a

91 premature PROCEED) and the <-bars ***relatively harder*** to trip at n = 15 (biases away

92 from a premature FALSIFIED). Both biases err toward "keep investigating," the safe

93 failure mode. Counts, not percentages ? at this sample size we're reading

94 direction, not estimating proportions. "GREEN" below means GREEN on that

95 hypothesis row.

96

97 | Verdict | Trigger (pre-registered) | What we then do |

98 |---|---|---|

99 | ****PROCEED ? beachhead validated**** | ?6 H2-GREEN ****and**** ?4 H5 at ?300+ (per the §2

counting rule ? anchored numbers don't count) ****and**** ?3 H7-GREEN | Run the camera pilot at the

2?3 warmest academies; those contacts seed the UI-alpha Wave-1 invite list

(UI_ALPHA_EXECUTION_PLAN Phase R); the ****fake-door/paid-pilot WTP test**** (PMF §6 risk 2) runs

before money is spent on build |

100 | ****PIVOT A ? "index the backlog" ? "record + index" service**** | <3 H2-GREEN ****and**** ?6

visits with H3 GREEN-or-AMBER ****and**** ?3 H5 at ?300+ | The pain isn't the archive, it's that

nothing useful gets made at all ? lead with the Phase-2 recording offer; camera pilot becomes

the product wedge, not the demo |

101 | ****PIVOT B ? partner/API motion**** | H4 RED at ?5 academies (incumbents entrenched and

liked) | Don't fight installed hardware head-on; explore the engine/API route through whoever

owns the academy relationship¹ |

102 | ****PIVOT C ? payer is the parent, not the academy**** | ?4 visits where H5 is RED ****and****

the Q3 answer names parents/players as the watcher | Re-test WTP as B2C per-student reels

(?/reel to parents) with the academy as channel, not customer |

103 | ****FALSIFIED ? beachhead assumption fails**** | <3 academies record at all (H1) ****and**** 0

H7-GREEN | The "academies already record fixed-angle" premise (PMF §5 beachhead #1; the academy

arm of §6 risk 1) is wrong for this market ? revisit beachheads #2/#3 (pickleball-US, badminton

Asia/Denmark) before building further |

104

105 ¹ The template (surfaced by the 2026-06-10 competitive audit, not yet in PMF §4's

106 web-sourced table): ****PB Vision**** sells pickleball video analysis B2C at ~\$99/yr

107 ***and*** as an ~\$8/hr-of-video partner API through facility platforms like

108 ****PodPlay**** ? the engine is ours, the academy relationship belongs to whoever

109 already owns it.

110

111 Mixed outcomes that match no row: write up the per-hypothesis tallies and decide

112 explicitly with the owner ? but ****the tallies above get computed first****, so the

discussion starts from the pre-registered read, not from anecdotes.

****Competitor-intel side-channel (always-on):**** any visit where a competitor is named ? fill the answer sheet's competitor block (what it does, what it misses, what they pay). ?3 consistent reports about one product = update
`PMF\_MARKET\_RESEARCH.md` §4 with field-verified rows (today's table is web-sourced).

4. Mechanics

- One [`FIELD\_VISIT\_ANSWER\_SHEET.md`](FIELD_VISIT_ANSWER_SHEET.md) per academy, same day as the visit, in the associate's words + verbatim quotes.
- The owner (or Claude session) transcribes each sheet into one row of the rollup table below (keep it in this doc or a sheet next to it); tallies refresh per 5 visits as ****progress checks only**** ? the verdict is computed once, at the final n, per the §3 stopping rule.
- Demo asset: the associate carries the real compiled reel (``output/MahadevpuraSingles_highlights.mp4``, trimmed to ~60s) saved offline on their phone, shown ****only** at the scripted moment (after Q6, before Q7)** ? *show, never promise*. Demo reactions and improvement asks are ****product feedback****, not scored signals: they feed the build backlog verbatim, while the H1?H7 verdict machinery stays anchored to the pre-demo answers (that's why the demo comes last; the sheet records whether it was shown). Showing it right before Q7 also makes the Phase-2 ask a reaction to something seen, not imagined ? a stronger behavioral read.
- Student answers (sheet's student block) likewise feed product feedback and the H3 (audience) gut-read; they don't enter the verdict tallies, and no student contact details are ever collected.

Rollup table (one row per completed visit)

	#	Academy	Area	Courts	Role spoken to	H1	H2	H3	H4	H5 (?)	H6	H7
Gut Phase-2?	?											
	1											

Tally ? decision read-out (progress check per 5 visits; verdict ONCE at final n)

Metric	Count	Threshold in play
H2 GREEN (dead footage)	/n	?6 ? PROCEED leg; <3 ? PIVOT A leg
H5 at ?300+ (pre-ladder / converted only)	/n	?4 ? PROCEED leg; ?3 ? PIVOT A leg
H7 GREEN (Phase-2 yes + contact)	/n	?3 ? PROCEED leg; 0 ? FALSIFIED leg
H3 GREEN-or-AMBER (audience exists)	/n	?6 ? PIVOT A leg
H4 RED (incumbent satisfied)	/n	?5 ? PIVOT B
H1 any recording	/n	<3 ? FALSIFIED leg
H5 RED **and** Q3 names parents/players	/n	?4 ? PIVOT C

5. Guardrails that bind the field work

- ****Phase 1 records nothing**** ? notes only (flyer rule 7).
- ****Phase 2 consent rules are hard:**** written consent from the academy AND adult players; ****sessions with minors are never recorded for our library**** (training-pool guardrail, CLAUDE.md); the academy is told plainly what the footage is for.
- Answer sheets contain personal contact details ? they stay between the associate and the owner; transcribe to the rollup without phone numbers.

13
14     ## The product, in plain words
15
16     **KhelSutra** turns ordinary practice/match video from a badminton academy into
17     ready-to-use pieces: it automatically finds **every rally** in the recording, cuts
18     **highlight reels**, and produces a simple **match report**. It works on video from
19     a phone on a tripod ? no special cameras, no hardware to install. A private web
20     app is opening to a small set of invited academies.
21
22     ## The job, in one paragraph
23
24     Visit good badminton academies across Bengaluru and have honest conversations with
25     **coaches AND students**: how do they work with video today, would something like
26     this actually help them, and **what would make it genuinely useful for them** ?
27     including what's missing or wrong with the idea. You work from a provided
28     conversation guide, write down what people **actually say** (the negative answers
29     matter most), and debrief with Avi after each visit. **You are gathering feedback,
30     **not selling.** No tech background needed.
31
32     ## The stretch goal (extra pay)
33
34     For academies that are interested, you coordinate a simple recording session ?
35     a phone on a tripod, one-page checklist provided. We run that video through
36     KhelSutra, and you go back and show them **their own court, their own players, as
37     **highlight reels and a report**: **"this is what it looks like for you."** Then you
38     write down exactly what they say. There is no stronger feedback than that moment.
39
40     ## What you'll actually do
41
42     - Visit **10?15 academies** (intro + conversation, ~20?30 minutes each).
43     - Talk to the **owner/head coach** first, and ? with their permission ? a few
44     **senior or adult students** about whether they'd watch/share their own rally
45     clips and what they'd want from them.
46     - Fill **one structured answer sheet per visit** (we provide it) ? their words,
47     not yours, including the most negative thing said.
48     - Show a short sample reel on your phone **only at the point the guide says to**
49     (after the open questions ? it changes people's answers if shown early).
50     - Debrief with Avi after each visit (WhatsApp/call). **Your first two visits are
51     **done together with him**, so you're never improvising.
52     - **Stretch: coordinate recording sessions and present the sample results back.
53
54     ## You're a good fit if
55
56     - You're comfortable walking into an academy and starting a conversation with a
57     stranger ? and just as comfortable hearing "no, this is useless to us."
58     - You can capture what people said **accurately** ? quotes, not summaries.
59     - Kannada / Hindi / English, as the conversation needs (you choose the mix).
60     - You play or follow a racket sport (helps a lot; not required).
61     - No technical skills needed. Reliability matters more than anything else.
62
63     ## What you get
64
65     - Paid per completed honest visit ? **not** per positive answer. A well-documented
66     "they hated it, here's why" is a fully paid, fully successful visit.
67     - Ground-floor view of a real sports-AI product finding its market; your field
68     notes directly shape what gets built next.

```

```

69 - Flexible hours, short commitment, clear scope.
70
71 ## Ground rules (the short version ? full version provided on joining)
72
73 1. Honesty over positivity. Never oversell, never promise features, prices, or dates.
74 2. **No recording of any person without written consent** ? and sessions involving
75    **minors are never recorded** for our use, period. In regular visits you record
76    nothing at all: notes only.
77 3. People's contact details stay between you and Avi.
78
79 ## How to apply
80
81 Message Avi at ____ with ***"FIELD"**, one line about a sport you follow, and one
82 line about a time you had to get honest feedback out of someone. First reply gets
83 a 15-minute call.
84

```

1  # Field Visit Answer Sheet ? one per academy (fill the same day)
2
3  > Print one per planned visit. Write THEIR words, not yours. A clear "no, because?"
4  > is a *good* sheet. Companion script: `FIELD_RESEARCH_ASSOCIATE_FLYER.md`.
5  > Scoring anchors (G/A/R): `PMF_FIELD_SIGNALS.md` §2.
6
7  ## Visit basics
8
9  | | |
10 |---|---|
11 | Date / time | |
12 | Academy name | |
13 | Area (neighbourhood) | |
14 | # courts in the hall | |
15 | Spoke to (name + role) | |
16 | Contact (phone/WhatsApp) ? *only if offered* | |
17 | How long the conversation ran | |
18
19 ## The seven questions ? their answers (verbatim where possible)
20
21 **Q1 ? Do they record sessions/matches today? How (phone / tripod / CCTV / hired)?**
22
23 >
24
25 **Q2 ? ? Footage sitting around that nobody watches? Roughly how much, and from what?**
26
27 >
28
29 **Q3 ? Who would watch rally clips/highlights (coach / players / parents)? When?**
30
31 >
32
33 **Q4 ? What do they use today (Machaxi / VISIST / Game Theory / Stupa / BadPro+ / none)?
34 What's good, what's missing, what does it cost them?**
35
36 >
37
38 **Q5 ? ? Would they pay per match for rally cuts + reel + report? What number did
39 THEY say (?)? What was their face doing?**
40
41 Their number came (tick one): ? BEFORE the ladder (they volunteered it) .
42 ? AFTER I offered ?100/300/500 . ? no number / refused .
43 ? they framed it differently (per student / per month ? write it below)
44
45 >
46

```

47 **Q6 ? Multiple courts in frame ? does that make video useless today? Their words:**
48
49 >
50
51 **Demo (shown AFTER Q6, never earlier) ? their FIRST reaction to the sample reel,
52 verbatim. Then: "what would this need to do to be useful for YOUR academy?" ?
53 their improvement asks, in their words:**
54
55 Demo shown? ? yes . ? no (why: _____)
56
57 >
58
59 **Q7 ? Open to a paid recording session on their court (we return showing THEIR
60 footage as highlights)? (yes / maybe / no ? and who to call)**
61
62 >
63
64 **Students (coach-permitted, senior/adult only ? skip if only minors available):
65 would they watch clips of their own rallies? share with whom? what should clips
66 show? Their words:**
67
68 >
69
70 ## Required: the most negative thing they said (verbatim)
71
72 >
73
74 ## Best quotes (anything vivid, in their words)
75
76 >
77
78 ## Scores ? OFFICE USE, leave blank (scored by Avi at transcription per
PMF_FIELD_SIGNALS.md §2; when torn, score lower)
79
80 | Hypothesis | Score |
81 |---|---|
82 | H1 recording behavior | GREEN / AMBER / RED |
83 | H2 dead footage | GREEN / AMBER / RED |
84 | H3 audience | GREEN / AMBER / RED |
85 | H4 whitespace | GREEN / AMBER / RED |
86 | H5 willingness to pay ? their ? number: _____ | GREEN / AMBER / RED |
87 | H6 multi-court pain | GREEN / AMBER / RED |
88 | H7 Phase-2 door | GREEN / AMBER / RED |
89
90 ## Competitor block (only if they named one)
91
92 | | |
93 |---|---|
94 | Product | |
95 | What it does well (their words) | |
96 | What it misses (their words) | |
97 | What they pay | |
98
99 ## Your gut read (circle): COLD . POLITE . CURIOUS . EAGER
100
101 ## Phase-2 candidate? (circle): YES ? call: _____ . MAYBE . NO
102
103 ## Anything else worth knowing (layout, lighting, camera positions you noticed, who
really decides)
104
105 >
106

The claim hinges on what CLAUDE.md's "separate explicit opt-in" guardrail actually governs. Let me read the grounding docs for that context.

7. user (2026-06-12T15:02:58.818Z)

18- contextual questions ("longest rally", "make a clip of all service faults", "rallies over 20 shots").

19-- ****On-device is LATER**** (a model-compression goal so power users save upload cost/hassle) ? definitely on the

20- roadmap, but ****not**** the immediate target. Don't over-index the strategy on it now.

21:- ****The moat = the consented dataset + the eval harness, not the weights.****

22-

23-**## Hard guardrails (non-negotiable ? "never corrupted")**

24-- ****Commercial-clean licensing for EVERY dependency ? code, data, AND model weights: MIT / Apache-2.0 / BSD only.****

--

26- ****Gemma 3n**** (Gemma Terms follow derivatives ? even cleaner reject), Llama 4 (700M-MAU cap), Commons-Clause repos.

27-- ****Never train on paid-LLM (Gemini\OpenAI\Anthropic) outputs.**** Also forbidden: public grounding-CoT datasets that

28- were Gemini-generated (e.g. TVG-R1's 56K) ? we must originate our own CoT supervision (a real, binding cost).

29:- ****Exclude minors; per-user training data needs a separate explicit opt-in; split data by match.****

30-- ? ****Base-model pretraining provenance is unauditale for *every* open VLM (incl. Qwen3-VL).**** Our "no paid-LLM

31- training" rule is enforceable at ***our fine-tuning data*** layer, not the base's pretraining ? an ****explicit owner**

32- **risk-acceptance**** is required to use any open VLM. (Governed by the base's license, not our pipeline.)

--

101-**### M0.1 ? The labeled-corpus spine ****+ the event-index contract**** (the moat) . *greenlight item***

102-Canonical JSONL row per rally (corpus) ****and**** the queryable per-video event-index schema (the conversational seam)

103-? same row, wired to a store. Fields: `{video_id(MD5), rally_ordinal, sport, start, end, ending_reason/fault_tags,

104:shot_count, label_type, source(human|pseudo|vendor), consent/training_opt_in, split(BY MATCH), trajectory_ref,

105-labeled_window, derived_clip_ref, confidence}`. 3 transcoders (heuristic/LogReg · TAL ActivityNet-JSON · VLM clip?QA),

106-one scorer spine (`metrics.match\_intervals`). Authored in `sports-data-collector` (system-of-record; extends PR #13).

107-****Reserve fault\event taxonomy now.**** Acceptance: round-trip test; split-by-match enforced; ****no Gemini-sourced rows in any training view****.

8. user (2026-06-12T15:02:59.665Z)

39-1. ****[owner, in progress] GROW THE GOLDEN CORPUS**** ? the single highest-leverage move; every lever below feeds on it.

40- Priority order for new videos: **** (a) multi-court badminton**** (the target distribution AND where the ship target

41- lives), **** (b) ?3 matches per new sport ? table tennis first**** (WASB transfers at F1 0.909; pickleball labels are

42- corpus-gold but not trainable until a clean MIT/Apache ball detector exists), (c) capture variety per

43: `VIDEO\_RECORDING\_GUIDELINES.md`; ****adult sessions only for the training pool**** (consent guardrail). Per video:

44- label ? `curate import-local --normalize --license Proprietary --fps <true fps>` ? re-run the Gen-0 harness.

45- The paired sign test needs n: at n=10 with 9 wins, p?0.011 ? significance is reachable this month.

46-2. ****[owner decision] Set the ship-gate target**** ? now informed: floor = heuristic 0.480 (necessary), ****multi-court**

47- reference = wrapper 0.66** (the number that makes the owned model worth serving), clean-

footage ceiling = 0.93

--

54- badminton+TT once TT has 23 matches; identify a clean pickleball ball detector. ? TT-on-WASB serving stays gated

55- by C3 (provenance multiplies per sport).

56-5. **PMF validation (cheaper than any engineering month):** C13 academy interviews (+ the two added questions:

57- "multi-court footage nobody watches?" / "pay per-match to index it?"); camera pilot at the warmest 2-3 academies

58: (consent at capture; demo served via the Gemini path or human-polish ? the reel pattern exists:

59- `output/MahadevpuraSingles\_highlights.mp4`). **Field kit COMPLETE (2026-06-12, owner ratified the

60- physical-visit approach; reframed product-feedback-first per owner spec):**

61- `docs/PRODUCT\_FIELD\_ASSOCIATE\_FLYER.md` (the recruiting flyer ? owner fills ?/contact placeholders and recruits) +

62- `docs\FIELD\_RESEARCH\_ASSOCIATE\_FLYER.md` (the hired associate's visit playbook: coach + student script, demo-after-Q6

9. user (2026-06-12T15:04:29.036Z)

Structured output provided successfully

10. assistant (2026-06-12T15:04:35.171Z)

Done.
