Transcript

1. user (2026-06-12T15:01:08.155Z)

Repo: C:\Users\avidu\Projects\badminton-highlight-indexer (branch docs/pmf-field-signals ? uncommitted working-tree changes included; read the files as they are on disk).

Files under review (read all in full):

- docs/PRODUCT_FIELD_ASSOCIATE_FLYER.md (NEW - the recruiting flyer the owner hands to CANDIDATES; the owner recruits personally)
- docs/FIELD_RESEARCH_ASSOCIATE_FLYER.md (reframed - now the hired associate's visit PLAYBOOK: coach script Q1-Q7, demo-after-Q6 rule, student questions, ground rules, Phase-2 record-and-show-back)
- docs/FIELD_VISIT_ANSWER_SHEET.md (per-visit form incl. new demo-reaction + student blocks)
- docs/PMF_FIELD_SIGNALS.md (the pre-registered decision layer; demo/student data = product feedback, NOT verdict signals)

Grounding (read as needed): docs/PMF_MARKET_RESEARCH.md, docs/UI_PROPOSAL.md + docs/UI_ALPHA_EXECUTION_PLAN.md + docs/HOSTING_PLAN.md (what the UI/hosting can honestly claim today), CLAUDE.md guardrails (minors exclusion, consent).

Owner's spec (verbatim intent): hire a person who visits academies, talks to coaches AND students, to understand how the project helps them and gather improvement feedback - full stop. Stretch goal: that person helps record videos, we run the pipeline, show the academy a sample result ("how it will look for them"). UI will be ready by then; hosting plan exposes the service to a few allwlisted people. The flyer must let a reasonable (non-technical) person understand the gig; the owner recruits personally.

A critic claims the following flaw. Adversarially verify by reading the actual files - try to REFUTE it. Default to refuted if pedantic, out of scope for a one-person 3-4 week field gig run personally by the owner, or already handled elsewhere in the kit.

CLAIM [high] "A private web app is opening to a small set of invited academies" overstates reality and pre-promises the campaign's own verdict
Stated as present fact in BOTH associate-facing docs: C:\Users\avidu\Projects\badminton-highlight-indexer\docs\PRODUCT_FIELD_ASSOCIATE_FLYER.md (lines 19-20) and docs\FIELD_RESEARCH_ASSOCIATE_FLYER.md (lines 18-19). Repo reality per docs\UI_ALPHA_EXECUTION_PLAN.md: only backend PR-1/PR-2 are merged; the SPA (M1-M4) has not been started; PR-3 (identity/exposure) and PR-4 (correction loop) are open; the local E2E gate (GATE GL) and deployment gate (GATE GD) are both unpassed; and docs\HOSTING_PLAN.md is still 'Status: PROPOSAL ? awaiting owner ratification'. Worse, per docs\PMF_FIELD_SIGNALS.md §3, academy invites (Wave-1) happen only on a PROCEED verdict ? the campaign this flyer staffs is what DECIDES whether the app opens to academies, so the flyer asserts the outcome of its own experiment. Even granting the owner's 'UI will be ready by then', 'is opening' asserts an unratified deployment plus an unearned verdict. It also primes the associate to promise access: the playbook's own ground rule 3 forbids promising features/dates, yet the Phase-2 reaction sheet asks 'whether they asked to keep using it' with no scripted non-promising answer. Proposed fix: Soften to future/conditional in both docs: 'we're building a private web app that a few invited academies will be able to try'. In the playbook's Phase-2 section, add a scripted reply for 'can we keep using it?': capture it verbatim as the strongest possible signal, say

'I'll pass that straight to Avi', and promise nothing ? consistent with ground rule 3.

1      # Field & Product Outreach Associate ? KhelSutra (Sports-Tech, Bengaluru)
2
3      **Help a Bengaluru sports-AI product meet its first real users.**
4
5      | | |
6      |---|---|
7      | **Duration** | ~3?4 weeks, part-time (flexible; mostly afternoons/evenings when
academies are active) |
8      | **Location** | Bengaluru ? in-person visits to badminton academies |
9      | **Pay** | ? ___ per completed academy visit + travel reimbursement; recording sessions
(stretch goal below) paid extra ? ? ___ per session |
10     | **Reports to** | Avi (phone/WhatsApp: ___ ) |
11
12     ---
13
14     ## The product, in plain words
15
16     **KhelSutra** turns ordinary practice/match video from a badminton academy into
17     ready-to-use pieces: it automatically finds **every rally** in the recording, cuts
18     **highlight reels**, and produces a simple **match report**. It works on video from
19     a phone on a tripod ? no special cameras, no hardware to install. A private web
20     app is opening to a small set of invited academies.
21
22     ## The job, in one paragraph
23
24     Visit good badminton academies across Bengaluru and have honest conversations with
25     **coaches AND students**: how do they work with video today, would something like
26     this actually help them, and **what would make it genuinely useful for them** ?
27     including what's missing or wrong with the idea. You work from a provided
28     conversation guide, write down what people *actually say* (the negative answers
29     matter most), and debrief with Avi after each visit. **You are gathering feedback,
30     not selling.** No tech background needed.
31
32     ## The stretch goal (extra pay)
33
34     For academies that are interested, you coordinate a simple recording session ?
35     a phone on a tripod, one-page checklist provided. We run that video through
36     KhelSutra, and you go back and show them **their own court, their own players, as
37     highlight reels and a report**: "this is what it looks like for you." Then you
38     write down exactly what they say. There is no stronger feedback than that moment.
39
40     ## What you'll actually do
41
42     - Visit **10?15 academies** (intro + conversation, ~20?30 minutes each).
43     - Talk to the **owner/head coach** first, and ? with their permission ? a few
44       **senior or adult students** about whether they'd watch/share their own rally
45       clips and what they'd want from them.
46     - Fill **one structured answer sheet per visit** (we provide it) ? their words,
47       not yours, including the most negative thing said.
48     - Show a short sample reel on your phone **only at the point the guide says to**
49       (after the open questions ? it changes people's answers if shown early).
50     - Debrief with Avi after each visit (WhatsApp/call). **Your first two visits are
51       done together with him**, so you're never improvising.
52     - *Stretch:* coordinate recording sessions and present the sample results back.
53
54     ## You're a good fit if
55
56     - You're comfortable walking into an academy and starting a conversation with a
57       stranger ? and just as comfortable hearing "no, this is useless to us."
58     - You can capture what people said **accurately** ? quotes, not summaries.
59     - Kannada / Hindi / English, as the conversation needs (you choose the mix).
```

```

60 - You play or follow a racket sport (helps a lot; not required).
61 - No technical skills needed. Reliability matters more than anything else.
62
63 ## What you get
64
65 - Paid per completed honest visit ? **not** per positive answer. A well-documented
66 "they hated it, here's why" is a fully paid, fully successful visit.
67 - Ground-floor view of a real sports-AI product finding its market; your field
68 notes directly shape what gets built next.
69 - Flexible hours, short commitment, clear scope.
70
71 ## Ground rules (the short version ? full version provided on joining)
72
73 1. Honesty over positivity. Never oversell, never promise features, prices, or dates.
74 2. **No recording of any person without written consent** ? and sessions involving
75 **minors are never recorded** for our use, period. In regular visits you record
76 nothing at all: notes only.
77 3. People's contact details stay between you and Avi.
78
79 ## How to apply
80
81 Message Avi at ___ with ***"FIELD"**, one line about a sport you follow, and one
82 line about a time you had to get honest feedback out of someone. First reply gets
83 a 15-minute call.
84

```

1 # Field Visit Playbook ? academy conversations (KhelSutra)
2
3 > **Recruiting?** Hand candidates
4 [ `PRODUCT_FIELD_ASSOCIATE_FLYER.md` ](PRODUCT_FIELD_ASSOCIATE_FLYER.md)
5 > ? that's the role description. **This document is the working playbook the hired
6 > associate gets on day one:** the conversation script, the ground rules, and the
7 > Phase-2 (recording / show-back) procedure.
8
9 **Duration:** ~3?4 weeks, part-time (flexible hours, mostly afternoons/evenings when
academies are active)
10 **Location:** Bengaluru ? in-person visits to badminton academies
11 **Compensation:** ? ___ per completed academy visit + travel reimbursement; Phase-2
sessions paid extra *(discussed individually)*
12 **Reports to:** Avi (phone/WhatsApp: ___ )
13
14 ---
15
16 ## The gig in one paragraph
17
18 KhelSutra takes ordinary practice/match video from a badminton academy and automatically
finds every rally, builds
19 highlight reels, and generates match reports; a private web app is opening to a few
invited academies. We need honest,
20 on-the-ground feedback from real academies ? **how they work with video, whether this
actually helps them, and what
21 would make it genuinely useful**. **Your job: visit 10?15 good academies, have a
friendly 20?30 minute conversation
22 with the owner/head coach (and, with permission, a few senior/adult students) using the
script below, and write down
23 what they actually say.** No selling. No tech knowledge needed. For interested academies
there's a Phase-2 follow-up
24 (a recording session ? then you return and show them THEIR OWN footage as highlights)
with additional compensation.
25
26 ---
27
28 ## Phase 1 ? The conversation (what you actually do)

```

28

29 ****Who to talk to:**** the academy owner or head coach ? the person who decides what the academy spends money on.

30 If you get a junior coach, be friendly, gather what you can, and ask when the owner is available.

31

32 ****Opening (keep it this honest):****

33 > "Hi, I'm helping a Bengaluru engineer who's building an AI tool for badminton academies ? it takes normal practice

34 > video and automatically cuts it into rallies and highlights. He asked me to talk to a few serious academies to

35 > understand how you work with video today. Could I ask you a few questions? Takes 15 minutes, and we're not selling

36 > anything today."

37

38 ****The questions (ask in this order; the starred ones matter most):****

39

40 1. Do you ever video-record sessions or matches here? How ? phone, tripod, CCTV, a hired person?

41 2. ? ****Do you have recorded footage sitting around that nobody has time to watch?**** (multi-court hall recordings,

42 tournament days, CCTV) ? roughly how much?

43 3. Who would watch rally clips or highlights if they existed ? coaches for training? players? parents?

44 4. What do you use today for any of this? (Listen for: Machaxi, VISIST, Game Theory, Stupa, BadPro+, just

45 YouTube/phone.) What do you like / what's missing in it?

46 5. ? ****If you could hand over a full session's video and get back every rally cut out + a highlight reel + a simple**

47 report ? would you pay per match for that? What would that be worth to you, per match?** Then ****stop talking and**

48 wait** ? let THEM name the number. If they genuinely won't after a pause and one "roughly?", you may offer the

49 ladder: "?100, ?300, ?500?" ****On the sheet, tick whether their number came BEFORE or AFTER you offered the**

50 ladder** ? it changes what the answer means. (Note their face, not just the words.)

51 6. Your hall has multiple courts running at once, right? Does that make video less useful today?

52

53 ****? NOW (and only now) show the sample reel**** ? a ~60-second real highlight reel we put on your phone. Say: ****this is**

54 what it produces ? every rally found and cut automatically."** Then shut up and watch their face. Write down their

55 FIRST reaction verbatim, and ask one follow-up: ****"what would this need to do for it to be useful for YOUR academy?"****

56 (Improvement asks, in their words, go on the sheet. Showing it earlier anchors every answer above ? never lead with it.)

57

58 7. Would you let us record one session here (we pay a small fee for the time) and come back showing what the tool

59 produces on YOUR court, your players? *(This is the Phase-2 door ? just note yes/no/maybe and who to call.)*

60

61 ****Students (with the coach's permission ? senior/adult students only, 5 minutes):**** ask 2?3 of them:

62 (a) ****Would you watch clips of your own rallies if they existed after each session?****

63 (b) ****Would you share them ?**

64 with whom?"* (c) ****What would you want them to show?"** Capture their answers in the sheet's student block. Don't

65 collect students' contact details; if everyone available is a minor, skip the student questions ? note that instead.

66

67 ****After each visit, fill ONE answer sheet ? the template is**
FIELD_VISIT_ANSWER_SHEET.md
(print one per visit):** academy name, location, # courts, person spoken to + role +

contact, answers 1?7 (their
68 words, not yours), the most negative thing they said (required), exact quotes, your gut
read, and whether they're a
69 Phase-2 candidate. *(How the answers get scored and what totals trigger which decision
lives in
70 [PMF_FIELD_SIGNALS.md])(PMF_FIELD_SIGNALS.md) ? that part is ours, not yours; just
capture honestly.)*
71
72 ---
73
74 ## Ground rules & gotchas (read twice ? this is the difference between useful and
useless)
75
76 1. **You are researching, not selling.** If they ask "how much will it cost", say
"that's exactly what he's trying to
77 figure out ? what would feel fair to you?" Never quote a price yourself.
78 2. **Past behavior beats opinions.** "Would you use video?" gets polite lies. "When did
you LAST record a session, and
79 what happened to that file?" gets the truth. Prefer the second kind of question.
80 3. **Don't promise anything.** No features, no dates, no free trials. You may SHOW the
standard sample reel (it's
81 real output ? at the scripted moment only, after Q6) and you may offer the Phase-2
idea (a paid recording session
82 + free sample output of their own court), and only as "would you be open to it".
Nothing else.
83 4. **Write down disappointing answers verbatim.** A "no, we'd never pay for that" with a
reason is worth MORE to us
84 than five vague yeses. You're paid per completed honest visit, not per positive
answer.
85 5. **If they already use a competitor (Machaxi/VISIST/Game Theory etc.) ? goldmine.**
Ask what it does well, what it
86 doesn't, and what they pay. Spend extra time here.
87 6. **Multi-court is our favorite topic.** If they complain that video is useless because
"all the courts are in frame
88 and it's chaos" ? capture that complaint in their exact words. That's the problem we
solve.
89 7. **No recordings of people without clear permission.** In Phase 1 you record NOTHING ?
notes only. Don't photograph
90 the academy or players unless the owner offers.
91 8. **Don't oversit.** 20 minutes, thank them, leave a good impression ? we may come back
to record.
92 9. **Confidentiality:** don't describe the tech beyond the opening line, don't name
other academies' answers, and
93 don't share the answer sheets with anyone except Avi.
94
95 ---
96
97 ## Phase 2 (only for academies that said yes ? separate briefing & pay)
98
99 You coordinate a recording session: we pay the academy a small fee, set up a
phone/camera on a tripod (we provide a
100 one-page capture checklist: behind the court, elevated, whole court in frame, landscape,
1080p/60fps, don't move it),
101 record 1?2 sessions ? then we process the footage through KhelSutra and **you return to
present the academy its own
102 sample output** (their court, their players, as a highlight reel + report, free) and
fill a short reaction sheet:
103 what they said when they saw it, what they'd change, whether they asked to keep using
it. That show-back conversation
104 is the single most valuable artifact this whole engagement produces. **Hard rules:**
written consent from the academy
105 AND the adult players being recorded; **sessions with minors are not recorded for our
library** ? adult sessions only;
106 the academy gets told plainly what the footage is for (building and demonstrating the
tool).

```

107
108 ---
109
110 ## Day one
111
112 Your first 2 visits are paired (you + Avi, or a live phone walkthrough) so you're never
improvising. Before visit 1:
113 read this playbook twice, have the sample reel saved offline on your phone, and carry
printed answer sheets
114 ([`FIELD_VISIT_ANSWER_SHEET.md`](FIELD_VISIT_ANSWER_SHEET.md) ? one per academy).
115

```

4. user (2026-06-12T15:01:14.498Z)

```

1 # Field Visit Answer Sheet ? one per academy (fill the same day)
2
3 > Print one per planned visit. Write THEIR words, not yours. A clear "no, because?"
4 > is a *good* sheet. Companion script: `FIELD_RESEARCH_ASSOCIATE_FLYER.md`.
5 > Scoring anchors (G/A/R): `PMF_FIELD_SIGNALS.md` §2.
6
7 ## Visit basics
8
9 | | |
10 |---|---|
11 | Date / time | |
12 | Academy name | |
13 | Area (neighbourhood) | |
14 | # courts in the hall | |
15 | Spoke to (name + role) | |
16 | Contact (phone/WhatsApp) ? *only if offered* | |
17 | How long the conversation ran | |
18
19 ## The seven questions ? their answers (verbatim where possible)
20
21 **Q1 ? Do they record sessions/matches today? How (phone / tripod / CCTV / hired)?**
22
23 >
24
25 **Q2 ? ? Footage sitting around that nobody watches? Roughly how much, and from what?**
26
27 >
28
29 **Q3 ? Who would watch rally clips/highlights (coach / players / parents)? When?**
30
31 >
32
33 **Q4 ? What do they use today (Machaxi / VISIST / Game Theory / Stupa / BadPro+ / none)?
34 What's good, what's missing, what does it cost them?**
35
36 >
37
38 **Q5 ? ? Would they pay per match for rally cuts + reel + report? What number did
39 THEY say (?)? What was their face doing?**
40
41 Their number came (tick one): ? BEFORE the ladder (they volunteered it) .
42 ? AFTER I offered ?100/300/500 . ? no number / refused .
43 ? they framed it differently (per student / per month ? write it below)
44
45 >
46
47 **Q6 ? Multiple courts in frame ? does that make video useless today? Their words:**
48
49 >
50
51 **Demo (shown AFTER Q6, never earlier) ? their FIRST reaction to the sample reel,

```

```

52     verbatim. Then: "what would this need to do to be useful for YOUR academy?" ?
53     their improvement asks, in their words:**
54
55     Demo shown? ? yes . ? no (why: _____ )
56
57     >
58
59     **Q7 ? Open to a paid recording session on their court (we return showing THEIR
60     footage as highlights)? (yes / maybe / no ? and who to call)**
61
62     >
63
64     **Students (coach-permitted, senior/adult only ? skip if only minors available):
65     would they watch clips of their own rallies? share with whom? what should clips
66     show? Their words:**
67
68     >
69
70     ## Required: the most negative thing they said (verbatim)
71
72     >
73
74     ## Best quotes (anything vivid, in their words)
75
76     >
77
78     ## Scores ? OFFICE USE, leave blank (scored by Avi at transcription per
79     PMF_FIELD_SIGNALS.md §2; when torn, score lower)
80
81     | Hypothesis | Score |
82     |---|---|
83     | H1 recording behavior | GREEN / AMBER / RED |
84     | H2 dead footage | GREEN / AMBER / RED |
85     | H3 audience | GREEN / AMBER / RED |
86     | H4 whitespace | GREEN / AMBER / RED |
87     | H5 willingness to pay ? their ? number: _____ | GREEN / AMBER / RED |
88     | H6 multi-court pain | GREEN / AMBER / RED |
89     | H7 Phase-2 door | GREEN / AMBER / RED |
90
91     ## Competitor block (only if they named one)
92
93     | | |
94     |---|---|
95     | Product | |
96     | What it does well (their words) | |
97     | What it misses (their words) | |
98     | What they pay | |
99
100     ## Your gut read (circle): COLD . POLITE . CURIOUS . EAGER
101
102     ## Phase-2 candidate? (circle): YES ? call: _____ . MAYBE . NO
103
104     ## Anything else worth knowing (layout, lighting, camera positions you noticed, who
105     really decides)
106     >

```

5. user (2026-06-12T15:01:15.826Z)

```

1     # C13 Field Signals ? what academy visits must tell us (and when to change course)
2
3     **Status:** ACTIVE ? the decision layer for the C13 beachhead validation
4     (owner-ratified direction, 2026-06-12: *PMF validation is handled by physically
5     visiting academies and reading signals on the ground*).

```

```

6      **Companions:** [`PRODUCT_FIELD_ASSOCIATE_FLYER.md`](PRODUCT_FIELD_ASSOCIATE_FLYER.md)
7      (the recruiting flyer candidates see) .
8      [`FIELD_RESEARCH_ASSOCIATE_FLYER.md`](FIELD_RESEARCH_ASSOCIATE_FLYER.md)
9      (the hired associate's visit playbook: script + ground rules + Phase-2) .
10     [`FIELD_VISIT_ANSWER_SHEET.md`](FIELD_VISIT_ANSWER_SHEET.md) (the per-visit capture
form) .
11     [`PMF_MARKET_RESEARCH.md`](PMF_MARKET_RESEARCH.md) (the hypotheses under test, esp. §6).
12
13     **Why this doc exists:** the flyer collects answers; this doc fixes ? **before the
14     first visit** ? what those answers *mean* and what totals trigger which decision.
15     Pre-registering the thresholds is the honesty mechanism: it stops us from reading
16     15 ambiguous conversations as whatever we hoped to hear.
17
18     ---
19
20     ## 1. The hypotheses under test (each maps to script questions)
21
22     | ID | Hypothesis (from PMF research) | Falsified looks like | Script Q |
23     |---|---|---|---|
24     | H1 | **Recording behavior exists** ? academies already produce fixed-angle / CCTV /
multi-court footage without us | nobody records; "we'd have to start for you" | Q1 |
25     | H2 | **Dead-footage pain** ? recorded footage piles up unwatched (the indexing wedge)
| footage is small, or already gets watched | Q2 ? |
26     | H3 | **An audience exists** ? coach, player, or parent would actually consume rally
clips/reels | shrug; "who has time to watch clips" | Q3 |
27     | H4 | **Whitespace** ? incumbents (Machaxi, VISIST, Game Theory, Stupa, BadPro+ ? the
India set is field-sourced from the 2026-06-10 competitive audit; PMF §4's web table predates
it) leave a gap we fit | "we use X, it's fine, fully solved" | Q4 |
28     | H5 | **Willingness to pay per match** at a price that clears unit economics | "should
be free" / <?100 everywhere | Q5 ? |
29     | H6 | **Multi-court chaos is a felt problem** (our moat: indexing messy BYO multi-court
footage) | multi-court video already useful to them | Q6 |
30     | H7 | **Behavioral commitment** ? they'll let us record on their court (Phase-2 door) |
polite no across the board | Q7 |
31
32     Unit-economics floor behind H5: serving COGS on the Gemini path is ~$0.30?0.60 per
33     hour of video (? 25?50/hr; 2026-06-10 quality table). A 2?3 hr session costs
34     roughly 75?150 to process, so **2300/match has real margin, 100/match is
35     break-even-ish at retail** ? that's why the script's anchor ladder is 100/300/500.
36
37     ## 2. Per-visit scoring ? GREEN / AMBER / RED anchors
38
39     **Scoring is done by the owner (or a Claude session) at transcription ? the
40     associate only captures answers** (the sheet's score grid is marked OFFICE USE).
41     Score each hypothesis **from what they said and showed, not what you inferred**.
42     When between two grades, take the lower one.
43
44     | | GREEN (strong confirm) | AMBER (weak/mixed) | RED (disconfirm) |
45     |---|---|---|---|
46     | **H1 record** | shows or names actual setup (tripod/CCTV/phone rig) used ?monthly |
records occasionally (tournaments only) | doesn't record; no plans |
47     | **H2 dead footage** | points at real unwatched volume (?~5 hrs, "CCTV runs all day",
tournament backlog) | some footage, partially watched | no backlog exists |
48     | **H3 audience** | names WHO would watch and WHEN (e.g. "parents ask for clips", "I
review with students Mondays") | "could be useful, maybe" | no consumer identified |
49     | **H4 whitespace** | no tool today, or uses one and volunteers a gap we cover (multi-
court, BYO footage, price) | uses a competitor, mildly satisfied | competitor solves it,
satisfied, sticky |
50     | **H5 WTP** | names ??300/match **BEFORE the ladder was offered** (the sheet's tick-box
records this), or proposes a budget framing of their own whose per-match equivalent is ??300
(see counting rule below) | names a number only **AFTER** the ladder (anchored ? even
?300/?500), or volunteers ~?100 | refuses to name a number / "should be free" / volunteers <?100
|
51     | **H6 multi-court** | complains about it in their own words before/without prompting |
agrees when asked | multi-court footage already works for them |

```

52 | **H7 Phase-2** | yes + gives a name/number/slot | "maybe, come back" | no |

53

54 **The H5 counting rule ("H5 at ?300+"):** a visit counts toward the "?300+" tally

55 only when the ? number (a) is ?300 **and** (b) came *before* the ladder was offered

56 ? an anchored ?300 is the modal polite answer to a read-aloud 100/300/500 ladder

57 and proves nothing, so it scores AMBER and does **not** count. Budget-framed

58 answers convert at transcription: their monthly ? ÷ the matches/month they cited

59 (if they cited none, ÷4); the computed equivalent counts if ??300 and the

60 conversion is written into the rollup row. Stated WTP ? even clean ? remains

61 *talk*: the confirming step before any PROCEED-triggered build is the fake-door /

62 paid-pilot test already pre-agreed in PMF §6 risk 2 and the C13 row.

63

64 **Weighting rule (behavior > words):** H7-GREEN and H2-GREEN are *behavioral*

65 signals and count double in your gut-read; H3/H5 answers are *talk* until a Phase-2

66 session or a real payment corroborates them. A visit with H5-GREEN but H7-RED is a

67 polite conversation, not a customer.

68

69 **Disconfirming-evidence quota:** every visit sheet must record at least one

70 verbatim *negative* quote (the thing they liked least / wouldn't pay for). If a

71 sheet has only positives, the visit gets re-done or its evidence discounted in the

72 rollup (**never the associate's pay** ? they're paid per completed honest visit);

73 per the flyer's ground rule 4, a reasoned "no" is worth more than five vague yeses.

74

75 **Sampling note (read the verdict with this in mind):** the flyer sends the

76 associate to 10?15 *good* academies ? the verdict therefore reads "does the

77 beachhead work where it should work best?", not "what fraction of the market is

78 addressable". A PROCEED here licenses the next validation step, not a TAM claim;

79 the rollup's area/courts columns record what was actually sampled.

80

81 ## 3. Pre-registered decision rules

82

83 **Stopping rule (fixes the optional-stopping loophole):** the campaign targets

84 **n = 15** completed owner/head-coach sheets and may end earlier **only for

85 logistics** (associate availability, academies exhausted) ? **never because of how

86 the tallies look**. The 5-sheet check-ins below are progress reports, not verdict

87 opportunities; **the verdict is computed exactly once, at the final n**, and the

88 rollup records what that n was and why the campaign stopped. The count thresholds

89 below are written for n = 15 and apply unchanged at any final n in 10?14 ? which

90 deliberately makes the ?-bars *relatively harder* at smaller n (biases away from a

91 premature PROCEED) and the <-bars relatively harder to trip at n = 15 (biases away

92 from a premature FALSIFIED). Both biases err toward "keep investigating," the safe

93 failure mode. Counts, not percentages ? at this sample size we're reading

94 direction, not estimating proportions. "GREEN" below means GREEN on that

95 hypothesis row.

96

97 | Verdict | Trigger (pre-registered) | What we then do |

98 |---|---|---|

99 | **PROCEED ? beachhead validated** | ?6 H2-GREEN **and** ?4 H5 at ?300+ (per the §2

counting rule ? anchored numbers don't count) **and** ?3 H7-GREEN | Run the camera pilot at the

2?3 warmest academies; those contacts seed the UI-alpha Wave-1 invite list

(UI_ALPHA_EXECUTION_PLAN Phase R); the **fake-door/paid-pilot WTP test** (PMF §6 risk 2) runs

before money is spent on build |

100 | **PIVOT A ? "index the backlog" ? "record + index" service** | <3 H2-GREEN **and** ?6

visits with H3 GREEN-or-AMBER **and** ?3 H5 at ?300+ | The pain isn't the archive, it's that

nothing useful gets made at all ? lead with the Phase-2 recording offer; camera pilot becomes

the product wedge, not the demo |

101 | **PIVOT B ? partner/API motion** | H4 RED at ?5 academies (incumbents entrenched and

liked) | Don't fight installed hardware head-on; explore the engine/API route through whoever

owns the academy relationship¹ |

102 | **PIVOT C ? payer is the parent, not the academy** | ?4 visits where H5 is RED **and**

the Q3 answer names parents/players as the watcher | Re-test WTP as B2C per-student reels

(?/reel to parents) with the academy as channel, not customer |

103 | **FALSIFIED ? beachhead assumption fails** | <3 academies record at all (H1) **and** 0

H7-GREEN | The "academies already record fixed-angle" premise (PMF §5 beachhead #1; the academy

arm of §6 risk 1) is wrong for this market ? revisit beachheads #2/#3 (pickleball-US, badminton

Asia/Denmark) before building further |

104

105 ¹ The template (surfaced by the 2026-06-10 competitive audit, not yet in PMF §4's

106 web-sourced table): ****PB Vision**** sells pickleball video analysis B2C at ~\$99/yr

107 ***and*** as an ~\$8/hr-of-video partner API through facility platforms like

108 ****PodPlay**** ? the engine is ours, the academy relationship belongs to whoever

109 already owns it.

110

111 Mixed outcomes that match no row: write up the per-hypothesis tallies and decide

112 explicitly with the owner ? but ****the tallies above get computed first****, so the

113 discussion starts from the pre-registered read, not from anecdotes.

114

115 ****Competitor-intel side-channel (always-on):**** any visit where a competitor is

116 named ? fill the answer sheet's competitor block (what it does, what it misses,

117 what they pay). ?3 consistent reports about one product = update

118 `PMF\_MARKET\_RESEARCH.md` §4 with field-verified rows (today's table is web-sourced).

119

120 **## 4. Mechanics**

121

122 - One [`FIELD\_VISIT\_ANSWER\_SHEET.md`](FIELD_VISIT_ANSWER_SHEET.md) per academy,

123 same day as the visit, in the associate's words + verbatim quotes.

124 - The owner (or Claude session) transcribes each sheet into one row of the rollup

125 table below (keep it in this doc or a sheet next to it); tallies refresh per 5

126 visits as ****progress checks only**** ? the verdict is computed once, at the final

127 n, per the §3 stopping rule.

128 - Demo asset: the associate carries the real compiled reel

129 (`output/MahadevpuraSingles\_highlights.mp4`, trimmed to ~60s) saved offline on

130 their phone, shown ****only at the scripted moment (after Q6, before Q7)**** ? ***show,**

131 **never promise***. Demo reactions and improvement asks are ****product feedback****, not

132 scored signals: they feed the build backlog verbatim, while the H1?H7 verdict

133 machinery stays anchored to the pre-demo answers (that's why the demo comes last;

134 the sheet records whether it was shown). Showing it right before Q7 also makes

135 the Phase-2 ask a reaction to something seen, not imagined ? a stronger

136 behavioral read.

137 - Student answers (sheet's student block) likewise feed product feedback and the

138 H3 (audience) gut-read; they don't enter the verdict tallies, and no student

139 contact details are ever collected.

140

141 **### Rollup table (one row per completed visit)**

142

143 | # | Academy | Area | Courts | Role spoken to | H1 | H2 | H3 | H4 | H5 (?) | H6 | H7 |

144 Gut | Phase-2? |

145 |---|---|---|---|---|---|---|---|---|---|---|---|

146 | 1 | | | | | | | | | | | |

147 **### Tally ? decision read-out (progress check per 5 visits; verdict ONCE at final n)**

148

149 | Metric | Count | Threshold in play |

150 |---|---|---|

151 | H2 GREEN (dead footage) | /n | ?6 ? PROCEED leg; <3 ? PIVOT A leg |

152 | H5 at ?300+ (pre-ladder / converted only ? §2 counting rule) | /n | ?4 ? PROCEED leg;

153 ?3 ? PIVOT A leg |

154 | H7 GREEN (Phase-2 yes + contact) | /n | ?3 ? PROCEED leg; 0 ? FALSIFIED leg |

155 | H3 GREEN-or-AMBER (audience exists) | /n | ?6 ? PIVOT A leg |

156 | H4 RED (incumbent satisfied) | /n | ?5 ? PIVOT B |

157 | H1 any recording | /n | <3 ? FALSIFIED leg |

158 | H5 RED ****and**** Q3 names parents/players | /n | ?4 ? PIVOT C |

159 **## 5. Guardrails that bind the field work**

160

161 - ****Phase 1 records nothing**** ? notes only (flyer rule 7).

162 - ****Phase 2 consent rules are hard:**** written consent from the academy AND adult

163 players; ****sessions with minors are never recorded for our library**** (training-pool

164 guardrail, CLAUDE.md); the academy is told plainly what the footage is for.

165 - Answer sheets contain personal contact details ? they stay between the associate

166 and the owner; transcribe to the rollout without phone numbers.
167

1      # UI Alpha Execution Plan ? KhelSutra Guru
2
3      **Status:** ACTIVE · updated 2026-06-10 · **Linked:** `UI_PROPOSAL.md` ·
`HOSTING_PLAN.md` ·
4      `mockups/ui_alpha_mockup.html` · ADR-009 (`archives/decisions/DECISIONS.md`).
5      **Sequencing principle (owner-requested):** build and test **everything locally first**;  
6      deployment (DNS/tunnel/Pages/Access) starts only after the local end-to-end gate passes.
7
8      ## Decisions locked
9
10     | Date | Decision |
11     |---|---|
12     | 2026-06-10 | Product name **KhelSutra Guru** · domain **khelsutra.guru** (GoDaddy,  
3-yr + protection) |
13     | 2026-06-10 | Separate **private repo `khelsutra`** ("heart and brain"): `web/` SPA  
now, control plane at beta; backend enablers stay in the indexer repo |
14     | 2026-06-10 | **Local-first delivery** (this plan's phase structure) |
15     | open | Final "go" on PR-1 coding start (= #16 greenlight) · training opt-in default  
OFF · invite list · stack (React+Vite+TS+Tailwind stands unless owner objects) |
16
17     ## Master checklist
18
19     ### G0 ? Setup (now)
20     - [x] Name/domain/repo-split ratified; spelling confirmed via GoDaddy receipt
21     - [x] `khelsutra` repo **scaffolded** at `C:\Users\avidu\Projects\khelsutra` (README,  
.gitignore, web/, docs/)
22     - [x] **Owner:** git-init + private GitHub push ? done 2026-06-10:  
23     `https://github.com/avidullu/khelsutra` (private; git runs Windows-side per ADR-009)
24     - [x] **Owner:** explicit "go" for PR-1 ? given 2026-06-10
25     - [x] **Owner:** Gemini API key rotated ? 2026-06-10, owner-verified (confirm old-key  
deletion in AI Studio)
26
27     ### Phase L ? build & test locally (no cloud; ?6?? sessions)
28
29     **L1 ? backend enablers** (indexer repo · branch off master · ONE PR each, no stacking ·  
offline tests in every PR · GPU/real-video checks = owner):
30     - [x] **PR-1 · B1 async job model (#16):** `jobs` table (user_version 1?2), `POST  
/api/process` ? 202 + `job_id`, `GET /api/jobs/{job_id}`, ThreadPoolExecutor worker,  
restart/crash state handling ? **MERGED 2026-06-11, PR #87** (CI green: 333 passed; machine-side  
real-video checks fold into L3)
31     - [x] **PR-2 · B2+B3 upload & download:** chunked upload (init ? sequential ?95 MB parts  
? complete ? MD5; caps + mp4/mov allowlist; per-user dirs deferred to PR-3) + streaming `GET  
/api/highlights/{video_id}/{name}` ? **MERGED 2026-06-11, PR #99** (also fixes static-UI  
`segment_ids` compile bug + adds browser download link). **Live E2E verified at merge:** 86 MB  
real video uploaded in 3 sequential parts and reassembled to MD5 byte-identity; out-of-order 409  
/ traversal 400 (handler) + 404 (router) / unknown-id 404 confirmed; compile of a real confirmed  
rally ? streamed ? download (3.9 MB reel).
32     - [ ] **PR-3 · B4+B7 identity & exposure:** `owner_email` column + scoping on every  
query; Access-JWT/header read with `DEV_USER_EMAIL` env fallback for local dev; CORS narrowed;  
rate limit; per-user quota
33     - [ ] **PR-4 · B6 correction loop:** `PATCH /api/segments/{id}` accept/reject/boundary-  
nudge ? `candidate_segments.human_label`/`notes` + provenance (who/when); retire  
`backend/api/static` (B5)
34
35     **L2 ? SPA** (khelsutra repo, `web/`; dev server proxies to `http://localhost:8000`):
36     - [ ] **M1 scaffold:** Vite + React + TS + Tailwind, router, typed API client, branding
```

```

(KhelSutra Guru)
37 - [ ] **M2:** A2 Upload (chunked, guidelines checklist) + A3 Job Progress (poll)
38 - [ ] **M3:** A1 Matches + A4 Rally Review (player seek, accept/reject/nudge wired to
PR-4)
39 - [ ] **M4:** A5 Highlights (compile + download) + A6 Report + engine-offline banner
40 - [ ] Unit tests for API client + review-state logic; `npm run build` clean
41
42 **L3 ? local end-to-end (owner's box, real match videos):**
43 - [ ] Full UI flow on localhost: upload ? job ? review/correct ? compile ? download
44 - [ ] `python run_all_tests.py` green; UI polling vs SQLite WAL sanity; WASB/CLI paths
untouched
45 - [ ] **GATE GL:** owner signs off local E2E ? only then deployment work begins
46
47 ### Phase D ? deployment (?2 sessions + ~1 hr owner)
48 - [ ] **D1 (owner):** Cloudflare account ? add khelsutra.guru ? GoDaddy nameserver
switch (HOSTING_PLAN $5) ? scoped API token ($6) ? Pages project connected to GitHub `khelsutra`
(build root `web/`)
49 - [ ] **D2 (Claude):** DNS records; `cloudflared` Windows service on the box ?
`api.khelsutra.guru`; Access apps + email-allowlist policies for `app` & `api`; SPA prod env
50 - [ ] **D3:** deployed smoke E2E (owner-only allowlist); go-live security checklist
(HOSTING_PLAN $7) all green
51 - [ ] **GATE GD:** checklist signed off
52
53 ### Phase R ? rollout
54 - [ ] Wave 1: 5 testers (C13/camera-pilot contacts) + feedback channel (WhatsApp group
or Google Form)
55 - [ ] 2-week retro ? punch list ? widen toward 25 ? beta planning (UI_PROPOSAL $4)
56 - Metrics: matches/week · % rallies corrected · median turnaround · verdict mix · week-2
tester retention
57
58 ## Working agreement
59 Claude (Cowork) designs, codes, writes tests + docs, and leaves a
`scratch/PRn_HANDOFF.md` per
60 work item. **Claude Code executes all git/PR mechanics** (branch, commit, push, PR,
conflict
61 fixes, merges after owner review) by reading that handoff ? the owner never copy-pastes
62 commands (ratified 2026-06-11 after PR-1/#88 friction; supersedes the command-block
pattern).
63 Cowork's sandbox cannot run git on mounts (ADR-009) and CI runs the offline suite on
every PR.
64 One PR per item; no stacking; never push to master directly. PowerShell note: no `&&`.
65
66 ## Risks & mitigations
67 Box uptime (offline banner, alpha-acceptable) · Gemini 429 burst-throttle (serial
workers,
68 `ai_max_workers=1`, 6-attempt backoff ? learned 2026-06-10) · CF free-tier 100 MB body
cap
69 (chunked upload design) · single-GPU box (alpha default = Gemini path; WASB jobs queue-
depth 1) ·
70 .guru renewal cost ?18.8k/3-yr (optional: transfer to Cloudflare Registrar at-cost after
the
71 60-day registration lock; domain-protection may need toggling for transfer).
72
73 ## Session map (default order)
74 S1?S2 PR-1 · S3 PR-2 · S4 PR-3 · S5 PR-4 · S6 M1+M2 · S7 M3 · S8 M4 · S9 L3 E2E + fixes
·
75 S10 D1?D3 · S11 wave-1 launch
76

```

1 # Hosting Plan ? khelsutra.guru
2
3 **Status:** PROPOSAL ? awaiting owner ratification.
4 **Date:** 2026-06-10 · **Constraints:** budget $10?25/mo · GCP credits available ·

```

```

DigitalOcean
5      acceptable · alpha backend = owner's GPU box behind a tunnel · 10?25 alpha testers ·
registrar = GoDaddy.
6      **Companion:** `docs/UI_PROPOSAL.md`.
7
8      ## 1. Recommendation in one line
9
10     **Alpha: free edge + your box** (Cloudflare DNS/Pages/Access/Tunnel ? FastAPI on the GPU
box) at
11     **$0/mo**, saving GCP credits; **Beta: GCP control plane + your box as pull-worker**
(Cloud Run +
12     GCS + Firebase Auth, credits-covered), keeping the edge where it's free.
13
14     Rationale for the Cloudflare pieces despite the GCP preference: GCP has no free
equivalent of the
15     Tunnel + Access combo (IAP requires a load balancer, ~$18/mo standing cost), and the
alpha needs
16     exactly three things GCP charges for but Cloudflare gives free: a secure tunnel to a
home box with
17     a custom domain, email-allowlist auth (free ?50 users ? fits 10?25 testers), and static
hosting.
18     Credits are better spent at beta on compute/storage, which is where GCP is excellent.
19
20     ## 2. Alpha topology ($0/mo)
21
22     ```
23     tester browser
24         ? https
25         ?
26     Cloudflare edge (free): DNS + TLS + Access (email-OTP allowlist)
27         ??? app.khelsutra.guru ? Cloudflare Pages (React SPA; auto-deploy from GitHub)
28         ??? api.khelsutra.guru ? Cloudflare Tunnel (outbound-only `cloudflared` service on
the box)
29         ?
30         ?
31         FastAPI :8000 on the GPU box (Windows)
32         ? Gemini segmenter path (no GPU in request path)
33         ? async jobs (#16), SQLite WAL, output/ on disk
34     ```
35
36     - **No inbound ports opened** on the home network; `cloudflared` dials out. Home IP
never exposed.
37     - **Auth:** Cloudflare Access in front of BOTH hostnames; backend trusts the
38     `Cf-Access-Authenticated-User-Email` header (verify the Access JWT for rigor) for per-
user scoping.
39     - **Upload limit:** free-tier proxy caps request bodies at **100 MB** ? SPA uploads in
?90 MB
40     chunks (UI_PROPOSAL B2). Match videos (1?4 GB) flow fine as chunks.
41     - **Box offline = service offline.** Acceptable for alpha; SPA shows a friendly
"processing engine
42     offline" banner (a `/api/health` ping). Beta removes this with the queue.
43     - **Costs:** Pages, Tunnel, Access, DNS = $0. Only the Gemini per-run cost
(~$0.05/match) and
44     domain renewal.
45
46     ## 3. Beta topology (GCP credits; ~$15?20/mo post-credits)
47
48     ```
49     browser ??? Cloudflare edge (free, unchanged) ??? app.khelsutra.guru (Pages)
50         ??? api.khelsutra.guru ??? Cloud Run
(FastAPI control plane, scale-to-zero)
51
52         ? jobs
table (Cloud SQL Postgres)
52
53         ? signed
resumable URLs

```

```

53                                     ?
54                                     GCS buckets
(uploads / reels, lifecycle ? cold)
55                                     ? pull
56                                     GPU box = first
`byo_worker` (PLATFORM P3)
57     ` ` `
58
59     - Uploads go **browser ? GCS directly** (resumable signed URLs) ? no proxy body limit,
no home
60         bandwidth for ingest; the box pulls only what it processes (WASB/owned-model jobs),
Cloud Run
61         handles Gemini-path jobs entirely in-cloud.
62     - Auth graduates to **Firebase Auth** (free; Google + email sign-in; India-friendly
phone OTP
63         later); Access allowlist retires.
64     - Post-credits estimate: Cloud Run ~$0?5 (free tier: 2 M req + 180 K vCPU-s/mo, scale-
to-zero) .
65     GCS 100 GB ? $2.60 + egress $0.12/GB (reel downloads ? watch this line) . Cloud SQL
smallest
66     ? $10 ? **~$15?20/mo**, inside budget. Egress lever if it grows: serve reels from
Cloudflare R2
67     (zero egress) while keeping everything else GCP.
68
69     ## 4. Alternatives considered
70
71     | Option | Monthly (alpha ? beta) | Pros | Cons |
72     |---|---|---|---|
73     | **Recommended hybrid** (CF edge + box ? +GCP) | **$0 ? ~$0 w/ credits** (~$15?20
after) | Cheapest at every phase; credits used where they matter; maps to PLATFORM P2/P3 | Two
vendors (CF + GCP) |
74     | **All-DigitalOcean** | ~$11 ? ~$17 ($6 droplet + Spaces $5: 250 GiB + **1 TiB egress
included**) | One simple vendor; Spaces' included egress is the best video-download deal; per-
second billing | No credits; no scale-to-zero; still needs a tunnel-equivalent to reach the box
(run `frp`/WireGuard on the droplet) |
75     | **All-GCP from day 1** | ~$18+ ? credits | Single vendor, credits immediately | LB+IAP
standing cost just to gate an alpha; no free tunnel to the home box; credits burn on plumbing |
76     | **All-Cloudflare** (Pages+Workers+R2) | ~$0 ? ~$5 | Zero egress on R2; cheapest
forever | FastAPI doesn't run on Workers (API stays on box/Cloud Run anyway); ignores GCP
credits |
77
78     ## 5. Domain setup ? GoDaddy ? Cloudflare DNS (one-time, ~15 min, you)
79
80     1. Create a free Cloudflare account ? **Add a domain** ? `khelsutra.guru` ? Free plan.
Cloudflare
81         imports existing records and shows **two nameservers** (e.g.
`xxx.ns.cloudflare.com`).
82     2. GoDaddy ? **My Products ? khelsutra.guru ? Manage DNS ? Nameservers ? Change ?
83         "I'll use my own nameservers"** ? paste the two Cloudflare nameservers ? Save.
Propagation:
84         minutes to 24 h. (Registration/renewal stays at GoDaddy; only DNS moves. Optional
later:
85         transfer the registration to Cloudflare Registrar for at-cost .guru renewals.)
86     3. Records (I manage after takeover): `app` ? Pages project; `api` ? `**Cloudflare API token** (you create: dash ? My Profile ? API Tokens) | Zone:DNS>Edit,
Account:Pages>Edit, Account:Access:Apps>Edit, Account:Tunnel>Edit ? scoped to this zone | DNS
records, Pages deploys (wrangler), Access policies, tunnel config |

```

```

94 | **GitHub repo** `khelsutra` (private) | Pages connects once (dashboard, you; build
root = `web/`) ? every push auto-deploys | I write the SPA in your Projects folder; commits
pushed = deployed |
95 | **On the box** (one-time, I hand you exact commands) | `cloudflared` installed as a
Windows service + `config.yml` | The tunnel itself |
96 | **GCP (beta only)** | A `khelsutra` project + service account (Cloud Run admin,
Storage admin, Cloud SQL admin) | Control-plane deploys |
97
98 Day-to-day flow after setup: I build ? commit ? push ? Pages deploys the SPA
automatically;
99 API/tunnel/DNS changes via the scoped token. Secrets (Gemini key, Access policy) never
live in the
100 repo; `.env` on the box + Cloudflare/GCP dashboards.
101
102 ## 7. Go-live security checklist (alpha)
103
104 Access allowlist ON for both hostnames ? CORS narrowed to `https://app.khelsutra.guru` ?
rate
105 limit + per-user upload quota ? `security.allowed_video_root` set ? upload size cap +
extension
106 allowlist ? **rotate the Gemini API key** (NEXT_STEPS housekeeping ? it was shared in
chat) ?
107 confirm no router port-forwards ? weekly backup: SQLite DB + `output/` ? GCS bucket
(rclone
108 scheduled task; credits).
109
110 ## 8. Decisions needed from owner
111
112 1. Ratify the **hybrid recommendation** (CF free edge now, GCP credits at beta)? Or
force
113 single-vendor (DO / GCP) despite the cost notes above?
114 2. OK to move **DNS to Cloudflare** (registration stays at GoDaddy)?
115 3. Beta reel storage: **GCS (credits)** vs **R2 (zero egress)** vs **DO Spaces (1 TiB
included)** ?
116 can defer until beta Drop 2.
117 4. Approve the access grants in $6 so I can run the setup end-to-end.
118
119 *Ratified choices get recorded in `docs/archives/decisions/DECISIONS.md`.*

1 # UI Proposal ? khelsutra.guru web app (alpha ? beta)
2
3 **Status:** PROPOSAL ? awaiting owner ratification (no implementation starts without
explicit approval, per CLAUDE.md).
4 **Date:** 2026-06-10 . **Inputs:** PMF_MARKET_RESEARCH, COMMERCIALIZATION,
PLATFORM_ARCHITECTURE, DEFERRED_HARDENING_PLAN (#16), ROADMAP, VIDEO_RECORDING_GUIDELINES,
reporting/spec.yaml, current API + static UI.
5 **Companion:** `docs/HOSTING_PLAN.md` (domain, topology, costs).
6
7 ## 1. Strategic frame ? why a UI now, and what it secretly is
8
9 The UI is not just product surface; it is the **corpus-growth engine**. The single
highest-leverage
10 item in NEXT_STEPS is growing the golden corpus, and the v1 scope already commits to a
11 **human correction loop**. Every tester who accepts/rejects/nudges a rally boundary in
the review
12 screen produces exactly the labels the Gen-0/M0.x track is starved for (subject to the
per-user
13 training opt-in guardrail). 10?25 alpha testers ? a steady stream of labeled, real-
world,
14 multi-court-biased footage ? the distribution where the owned model's 0.66 ship target
lives.
15

```

16 Serving economics per the 2026-06-10 quality table: alpha serves the ****Gemini path****
 17 (0.93 on clean footage, ~\$0.05/run) ? no GPU required in the request path. The
 WASB/owned-model
 18 path stays on the owner's box and is ***not*** exposed in the alpha UI (segmenter choice
 hidden).
 19
 20 ****The CLI is not replaced.**** The web app talks to the same FastAPI surface the CLI
 drives; the CLI
 21 remains the power-user/ops tool.
 22
 23 **## 2. Personas (from PMF research)**
 24
 25 - ****Coach / academy (primary, B2B, India):**** batches of match recordings, wants rally
 review,
 26 per-player reels for students/parents, per-rally stats. Already records on static
 cameras.
 27 - ****Enthusiast (B2C funnel):**** records own matches, wants a highlight reel + basic
 stats, shares
 28 with friends. Tripod discipline is the known adoption risk ? the UI must teach
 recording
 29 guidelines ***before*** upload, not fail videos after.
 30
 31 **## 3. ALPHA ? "quick & dirty"** (goal: 10?25 invited testers, end-to-end, zero hand-
 holding)
 32
 33 ****Stack:**** React + Vite + Tailwind SPA, deployed per HOSTING_PLAN (static hosting, \$0).
 34 API = existing FastAPI on the GPU box via tunnel at `api.khelsutra.guru`.
 35 ****Auth:**** Cloudflare Access email-allowlist (OTP), free ?50 users, ****zero auth code**** ?
 backend
 36 reads the authenticated-email header for per-user scoping (alpha-grade tenancy: header
 is
 37 trustworthy because the tunnel only accepts Access-authenticated traffic).
 38
 39 **### Alpha screens (6)**
 40

10. user (2026-06-12T15:02:37.456Z)

190- fixed camera, B2C TAM collapses to coaches\clubs. ***Validate:*** observe 3?5 academies +
 191- 50?100 enthusiasts on whether they already record fixed-angle.
 192-2. ****Free / near-free alternatives**** (YouTube, free app tiers, BadPro+ pay-per-use) cap
 193- B2C WTP. ***Validate:*** fake-door pricing at USD 60?180/yr.
 194-3. ****Capture-quality variance = the failure mode**** (gym lighting, off-center angle,
 195- occlusion, mixed resolutions). ***Validate:*** benchmark rally-detection P/R on 100+ real
 196- amateur clips; define a "good-capture" spec + auto-reject (ties to
 --
 207- purchasing criterion via 5?10 buyer interviews.
 208-
 209-****Cheapest next steps:**** (a) 10?15 discovery interviews with Indian badminton academy
 210-owners/coaches; (b) a capture-quality benchmark on real amateur footage; (c) a fake-door
 211-pricing test across B2C (~USD 99/yr) and B2B academy (~USD 600/yr).
 212-
 213----

11. user (2026-06-12T15:03:34.347Z)

Structured output provided successfully

12. assistant (2026-06-12T15:03:40.627Z)

Verification complete. The claim is real with all citations accurate, graded down from high to medium severity because the pre-registered verdict machinery itself is insulated from the flawed sentence.
