## Transcript

### 1. user (2026-06-21T03:20:42.291Z)

Adversarially VERIFY this claim about the KhelSutra repos by reading the actual files/docs yourself. Default to "refuted" if the evidence is not clear and direct.  
CLAIM: "The marketing site/ is vanilla HTML (index.html, capture.html, own-model.html) with NO frontend framework and NO i18n mechanism today; copy is hardcoded English in the HTML and the Node server."  
Repos: web/site SPA+marketing = C:/Users/avidu/Projects/khelsutra; design docs = C:/Users/avidu/Projects/badminton-highlight-indexer/docs.  
Read the specific files needed to confirm or refute (use Grep/Glob/Read). For string/i18n claims, actually grep for react-i18next, i18next, "t(", data-i18n, locales/ in C:/Users/avidu/Projects/khelsutra. For doc claims, read the relevant doc lines.  
Return: verdict (CONFIRMED | PARTIALLY-CONFIRMED | REFUTED), the concrete evidence (file:line or quote) you personally saw, and any important nuance the claim gets wrong.

### 2. assistant (2026-06-21T03:20:46.973Z)

I'll verify this claim by examining the actual files in the khelsutra repo.

### 3. user (2026-06-21T03:20:49.668Z)

#### 5. assistant (2026-06-21T03:20:56.301Z)

Note the `web/` directory has `index.html` and a `dist/` (suggesting a build/framework). Let me examine both `site/` and `web/` directories carefully since the claim is specifically about `site/`.

## 7. assistant (2026-06-21T03:21:01.856Z)

Important distinction: there are two separate things. `web/` is a React/Vite/Tailwind SPA (the "operator console Studio"). `site/` is the marketing site ? vanilla HTML in `site/public/` with a Node/Cloudflare server. The claim is specifically about `site/`. Let me verify the i18n claims by grepping in both, and check the server.js and HTML files.

80

```

### 11. assistant (2026-06-21T03:21:08.978Z)

No i18n mechanism anywhere in `site/`. The server serves three static HTML files and hardcodes routes. Let me verify the HTML files contain hardcoded English copy and confirm there's no framework (just check for script/framework imports + sample English copy). Let me also check for any `t` translation calls and lang attributes.

#### 14. assistant (2026-06-21T03:21:15.651Z)

All three HTML files use only inline ``<style>``, no framework ``<script src>`` imports, and hardcoded English copy with ``lang="en"`. The grep for framework script/import tags returned only the ``lang="en"`` matches (no ``<script src>``, no ``import from``). Let me confirm there are no ``t` translation calls in the HTML and quickly verify the design docs mention the i18n status (to round out the doc-side context).`

#### 18. assistant (2026-06-21T03:21:23.435Z)

The only ``<script>`` tags in ``site/public`` are: (1) a Cloudflare analytics beacon, and (2) one inline ``<script>`` at `index.html:597` (likely the access-request form handler) ? no framework, no i18n library. Let me view that inline script and confirm it's not an i18n mechanism, and check the I18N\_PLAN.md doc to see how it characterizes the current state.

#### 19. user (2026-06-21T03:21:24.332Z)

```

595     <script defer src="https://static.cloudflareinsights.com/beacon.min.js" data-cf-
beacon='{"token": "REPLACE_WITH_CF_TOKEN"}'></script>
596
597     <script>
598     (function(){
599         var f = document.getElementById('af');
600         if(!f) return;
601
602         var REEL_VIDEO = 'ajTCZ7pJW_o', REEL_SECS = 30;
603         function loadYTApi(cb){
604             if(window.YT && window.YT.Player) return cb();
605             var prev = window.onYouTubeIframeAPIReady;
606             window.onYouTubeIframeAPIReady = function(){ if(typeof prev === 'function'){ prev();
} cb(); };
607             if(!document.getElementById('yt-iframe-api')){

629             function close(){
630                 if(closed) return; closed = true;
631                 clearInterval(iv);
632                 try{ if(player){ player.destroy(); } }catch(_){ }
633                 host.innerHTML = ''; host.hidden = true;
634             }

```

## 20. user (2026-06-21T03:21:25.903Z)

11: Many academy coaches, parents, and players are far more comfortable in **Kannada** than English.

12: A product that only speaks English adds friction exactly at the point of first contact. So the

20: Today there is **zero i18n** in the repo (no i18n/locale/gettext/babel anywhere). Every

21: user-facing string is hardcoded English across four surfaces:

25: | **UI chrome** | `backend/api/static/{index.html,app.js,style.css}` (~40?50 strings) |  
`"Validate & Index Video"`, `alert("Validation Failed! ?")`, `` `\${count} Rally Segment\${count} > 1 ? 's' : '' } Selected` `` |

28: | **Coach-mode recommendations** (owner ask, future) | not built yet | localized recommendation text, not English |

44: ### 2.1 The "by design" invariant ? no hardcoded user-facing strings

47:Code references `t("compile.button")`, never the English prose. This is the single rule that  
58:### 2.2 One canonical English source catalog, per-locale siblings  
67:- \*\*Format: i18next-flavored JSON\*\* ? works for the vanilla shim today \*and\* react-i18next in  
70: This matters immediately ? the current UI already hand-rolls English plurals  
71: (`Rally Segment\${count > 1 ? 's' : ''}`), and Kannada/Hindi plural rules differ from  
English.  
89: English, never to a blank or a raw key in front of a user.  
93:Validator `message`s and API errors today bake in English prose \*and\* interpolated values  
100:- `ValidationResult` keeps an English `message` for logs/back-compat, but gains an optional  
102: keeps internal/technical messages English (good for debugging) while customer-facing text  
106:overlays keyed by rule `code`); the technical `message` blocks stay English (they cite  
156:| \*\*P1\*\* | Foundation + \*\*static-UI retrofit\*\*: `locales/` + `en` source catalog (extract  
the ~40?50 UI strings ? keys), a tiny vanilla \*\*`t(key, vars)`\*\* shim + `data-i18n` wiring in  
`index.html/`app.js`, \*\*language switcher (en/kn)\*\* + `localStorage` persistence + `?lang=`,  
the font decision applied, and the \*\*`kn`\*\* catalog (Gemini-draft ? owner review). Reuse the  
existing static mount / `serve\_index` in `backend/main.py`. | this | owner approval |  
185: defer technical/operator messages (they stay English by design).  
191:- \*\*Localize:\*\* `backend/api/static/{index.html,app.js,style.css}`; `backend/main.py`  
209: persists across reload; any missing key falls back to English (no raw keys shown).

## 21. assistant (2026-06-21T03:21:30.183Z)

The inline script at index.html:597 is the access-request form / YouTube reel handler ? not an i18n mechanism. The claim is fully verified. Note one nuance: the I18N\_PLAN.md doc focuses primarily on the \*engine's\* UI surfaces (`backend/api/static/...`), but it explicitly states "zero i18n in the repo" and "every user-facing string is hardcoded English" ? and even references "the vanilla shim" as a future P1 addition, confirming none exists today.

## 22. user (2026-06-21T03:21:43.093Z)

Structured output provided successfully

## 23. assistant (2026-06-21T03:21:46.314Z)

Verdict: CONFIRMED. The claim holds exactly as stated for the marketing `site/`. The one thing a reader should keep in mind is that the same khelsutra repo separately contains a `web/` React/Vite SPA (the operator "Studio"), but that is a distinct surface from the vanilla marketing `site/` the claim describes.
