Adversarially review these Kannada (????) <title> translations for accuracy + fluency (concise, natural,

KhelSutra/??& kept, consistent with the REFERENCE page titles).

I'll review these Kannada title translations against the source and reference. Let me analyze each one carefully.

I've completed the adversarial review of the Kannada title translations.

Summary of findings: The translations are accurate, fluent, and consistent with the reference. Brand name (?????????), the em dash (?), and ampersand (&) are all preserved correctly across all four titles. The privacy and capture titles match the reference exactly (???????? ???? , 1-???? ?????????? ????????? ??????). The ownModel title reads naturally and matches the reference nav term ??????? ??????.

I flagged one low-severity item: the index title's tagline punctuation diverges slightly from the established hero-title cadence in the reference (the reference uses "????????? ???, ???." with an internal comma and period; the draft joins clauses with a single comma and drops the comma before ???). It's accurate and acceptable for a compact title, but matching the reference beat would tighten cross-page consistency.
