You are an adversarial Danish (Dansk) translation reviewer. Be strict ?
find problems, don't praise. Review ONE lens only.

LENS ? INTEGRITY: are inline HTML tags identical to the source (same tags/attributes/order)? Is
<code> content
byte-identical? Are keep-literal tokens (KhelSutra, VLC, rally-annotator, Gemini/GPT/LLM, GPU,
MIT/Apache/BSD, file
names, ending_reason values, 1080p/30 fps, WhatsApp), the VLC UI labels, and symbols ? · ? ? ? °
? all preserved? Any
stray untranslated English left in prose, or any raw key?

ENGLISH SOURCE (dotted key ? value):

```

Rules the translation must obey:

KEEP THESE EXACTLY ? never translate or transliterate:

- Brand/URLs: KhelSutra, khelsutra.guru, and the verbatim watermark "Generated by Khelsutra.guru".
- Tools/proper nouns: VLC, "VLC 3.0.x", "Rally Annotator", rally-annotator, rally_annotator.lua,

WASB, WhatsApp.

- Models/licences/acronyms: Gemini, GPT, LLM, GPU, CPU, MIT, Apache, BSD, CLI, CSV.
- Everything inside `...` stays byte-identical (the ending_reason enum values unknown/winner/forced_error/unforced_error/service_fault/let/other, <video>.rallies.csv, "extensions", file paths).
- Numbers & units literal: 1080p, 30 fps, 60 fps, ~30°, 0.1.0. Keyboard keys literal: Ctrl/Cmd + P; "PDF" stays.
- VLC UI button/menu labels that appear in the page's screenshots STAY IN ENGLISH (translate the surrounding text):
 - "Mark START", "Mark END", "Save Rally", "Edit / Delete / Undo", "Reload extensions", "View ? Rally Annotator", "Tools ? Plugins and extensions".
- Symbols/emoji kept as-is: ? · ? ? ? ° ? ?.
- Sport names MAY take their natural local form (e.g. Spanish "bádminton", "tenis de mesa") ? that is correct localization, not a violation.

Preserve every inline HTML tag EXACTLY ? same tags, same attributes, same order:

, <i>, , <code>, , and <b style="color:#EAF3EE">. Translate ONLY the human-readable

text between tags. Keep </> entities and the literal text inside <code> unchanged. A link request access keeps the same href; only the link text is translated.

Return {"issues":[{"key, severity (high|medium|low), problem, suggestion}]}]. Only real defects under THIS lens; empty if clean.

2. assistant (2026-06-22T03:24:14.571Z)

I'll review the Danish translation under the INTEGRITY lens only ? checking HTML tags, code content, keep-literal tokens, VLC UI labels, symbols, and stray English.

Let me analyze each entry carefully against the source.

3. assistant (2026-06-22T03:24:31.875Z)

Now let me work through the integrity checks systematically.

****HTML tag checks:**** Let me verify tag-heavy entries.

- `site.hero.title`: source `...` ? Danish `Den døde tid, væk.` ?
- `site.ownModel.heroLead`: `**owned**` ? `**ejet**` ?
- `site.ownModel.sample`: `? <b>...</b> ... <a href="/#join">request access</a>` ? `? <b>Vil du se...</b> ... <a href="/#join">anmoder om adgang</a>` ? (? preserved, href preserved)
- `site.ownModel.setup.install`: ``rally_annotator.lua``, ``extensions``, `*Reload extensions*`, `*View ? Rally Annotator*` ? all preserved ?
- `site.ownModel.setup.record`: `[<video>.rallies.csv` ?](/capture)
- `site.ownModel.setup.reasons`: all ``` enum values byte-identical ?`

****VLC UI labels (must stay English):****

- `annotate.cap1`: "VLC ? View ? Rally Annotator" ?
- `annotate.step1`: "Mark START" ?; `step2`: "Mark END" ?; `step3`: "Save Rally" ?; `step4`: "Edit / Delete / Undo" ?
- `setup.install`: "Tools ? Plugins and extensions", "Reload extensions", "View ? Rally Annotator" ?

****Keep-literal tokens:**** KhelSutra, VLC, rally-annotator, rally_annotator.lua, Gemini, GPT, LLM, GPU, CPU, MIT/Apache/BSD, CLI, CSV, WhatsApp, 1080p, 30 fps, 60 fps, PDF, Ctrl/Cmd + P ? all present.

Now checking for the watermark token specifically.

****`site.ownModel.foot.mark`:**** Source watermark is `"Generated by Khelsutra.guru"`. Danish: `"Generated by Khelsutra.guru"` ? byte-identical.

Now let me scan for stray English in prose and a couple of subtle issues.

- ``site.record.settings.body``: "(60 fps til bordtennis)" ? ? but the source has the parenthetical inside; fine.
- ``site.ownModel.annotate.cap1``: "VLC ? View ? Rally Annotator" ? but source is "VLC ? View ? Rally Annotator". ?

Let me check ``site.ownModel.train.honestBody`` carefully for the ```/```/symbols and quote marks ? source uses ``?...?`` curly quotes in several places; Danish uses ``?...?`` too. The rules list ``` as a symbol to keep but it doesn't appear in source ? not relevant.

One thing to flag: ``site.ownModel.train.honestBody`` ? source: "no such benchmark" and the rule says benchmark stays; Danish renders "der findes ikke en sådan benchmark" ? "benchmark" kept ?.

All HTML tags, code content, keep-literal tokens, VLC labels, and symbols are preserved. The translation is clean under the INTEGRITY lens. No stray untranslated English in prose (the English that remains ? VLC labels, tool names, code ? is required to stay), and no raw keys.

4. user (2026-06-22T03:24:31.940Z)

Structured output provided successfully

5. assistant (2026-06-22T03:24:41.102Z)

Clean under the INTEGRITY lens ? no defects found.

I verified, item by item:

- **Inline HTML tags** ? every `<b>`, `<i>`, `<span class="hl">`, `<b style="color:#EAF3EE">`, and `<a href="...">` matches the source in tag, attribute, and order. Hrefs `/#join` and `/capture` are unchanged; only link text was translated.
- **code content** ? byte-identical throughout: `rally_annotator.lua`, `extensions`, `<video>.rallies.csv`, and the full `ending_reason` enum (`unknown` · `winner` · `forced_error` · `unforced_error` · `service_fault` · `let` · `other`).
- **Keep-literal tokens** ? KhelSutra, khelsutra.guru, the verbatim watermark `"Generated by Khelsutra.guru"`, VLC / VLC 3.0.x, rally-annotator, Rally Annotator, WhatsApp, Gemini/GPT/LLM/GPU/CPU, MIT/Apache/BSD, CLI/CSV/PDF, 1080p / 30 fps / 60 fps / ~30°, Ctrl/Cmd + P ? all preserved.
- **VLC UI labels left in English** ? "Mark START", "Mark END", "Save Rally", "Edit / Delete / Undo", "Reload extensions", "View ? Rally Annotator", "Tools ? Plugins and extensions" all retained verbatim while the surrounding prose is translated.
- **Symbols/emoji** ? ? · ? ? ? ° ? all intact.
- **No stray untranslated English** in prose and **no raw keys** leaked.

(Note: rendering judgments like whether "duel" is the right word for "rally," or naturalness of phrasing, fall outside this lens and I did not assess them.)
