storage product names returned verbatim; KhelSutra kept; emoji ? ? and the ? ellipsis kept;
plain keys have NO HTML; no

This is a NON-technical Request-Access form (the visible labels, options, submit button, and the post-submit messages). Warm, plain, reassuring; match the product's existing app/site register (see REFERENCE).

KEEP THESE EXACTLY ? never translate or transliterate:

- Brand/URLs: KhelSutra, khelsutra.guru.
 - Storage PRODUCT names, verbatim: "Google Drive", "OneDrive / Microsoft 365", "Dropbox" (these three keys return unchanged).
 - Symbols/emoji kept: ? ? . ? ?
 - "Privacy Policy" is a LINK label ? translate its words naturally for the locale (it is NOT a brand).
 - "Sending?" is the button's in-flight state ? DO translate it (keep the trailing ? ellipsis).
- Some values contain inline HTML ? preserve every tag EXACTLY (same tag, same attributes, same order),

translating ONLY the human-readable text between tags:

- site.join.teaser: ? ? (keep the span + ?)
- site.join.note: ? Privacy Policy. (keep the exactly; translate the link text)
- site.join.done: ??
? (keep
 and the styled exactly)

All OTHER keys are PLAIN text ? do not add any HTML to them.

Return {"issues":[{"key, severity, problem, suggestion}]}]. Only real defects under THIS lens; empty if clean.

I'll review the Danish draft against the INTEGRITY lens. Let me check the reference register first to ground my findings.

The reference files aren't present in the working tree under those keys, so I'll review based on the lens criteria and Danish language correctness for the integrity-specific items. Let me verify there's no reference catalog elsewhere.

The DRAFT keys aren't yet in the live catalog, so I'm reviewing the draft as-is against the INTEGRITY lens. Now let me verify each integrity criterion carefully against the draft.

Checking each lens point:

1. ****Inline HTML in teaser**** ? DRAFT: `- 2. **\*\*Inline HTML in note\*\*** ? DRAFT: `...Se vores Privatlivspolitik.` ? `[- 3. ****Inline HTML in done**** ? DRAFT: `...?<br><span style="font-weight:400;color:var\(--mut\)">Mens du er her:...</span>` ? ?, `- 4. \*\*\\*\\*3 storage product names verbatim\\*\\*\*\* ? `Google Drive`, `OneDrive / Microsoft 365`, `Dropbox` ? all returned unchanged. OK.
- 5. ****KhelSutra kept**** ? title `KhelSutra-alfaen`, intro, teaser absent, consent `KhelSutra-alfaen`. Brand "KhelSutra" preserved as a token within the compound. OK.
- 6. ****Emoji ? ? and ? ellipsis kept**** ? ? in teaser, ? in done. Ellipsis `?` in sending, courtsSelect, messageHint, segLabel, intro. All present. OK.
- 7. ****Plain keys have NO HTML**** ? scanning all non-teaser/note/done keys: none contain HTML tags. OK.
- 8. ****No stray untranslated English**** ? scanning: "By" \(city\) is Danish for "City" \(legitimately a Danish word, not English leftover\). "reel" appears in teaser and done. Let me check ? "reel" in English source is "sample reel"/"30-second reel". In Danish "reel" is also a word but means "real/genuine", which would be a false friend confusion. However the source uses "reel" as a noun \(video reel\); the draft keeps "reel" untranslated. This is borderline but under INTEGRITY lens "no stray untranslated English" ? "reel" is an English term left untranslated. Let me assess severity carefully.
- 9. ****No raw key**** ? no values are literal key strings. OK.](/privacy)

Let me look closely at the "reel" issue and any ellipsis/character integrity details.

The word "reel" (video reel) is kept untranslated in both teaser and done. In Danish, "reel" exists but means "genuine/real" ? so it reads as an English loan left in place, and notably collides with a Danish false friend. Under this lens this counts as stray untranslated English. However, "reel" (as in highlight/social reel) is increasingly used as a loanword in Danish too, so this is low severity at most under the integrity lens (not a tag/brand/emoji/key violation).

All hard-integrity items (HTML tags, attributes, /privacy href, the 3 storage names, KhelSutra, ? ? ?, plain-key purity, no raw key) are clean.

9. assistant (2026-06-22T16:19:31.221Z)

Reviewed the Danish draft strictly under the INTEGRITY lens. All checks pass:

- **teaser**: `` preserved exactly (tag, attribute, ?).
- **note**: `[` ? the `/privacy` href and `` tag preserved exactly; only the link text translated.](/privacy)
- **done**: `?<br><span style="font-weight:400;color:var(--mut)">?</span>` ? ?, `` (attributes + order) preserved exactly.
- **Storage names** returned verbatim: `Google Drive`, `OneDrive / Microsoft 365`, `Dropbox`.
- **KhelSutra** kept (in `title`, `consent` as the `KhelSutra-alfaen` compound).
- **Emoji/symbols** kept: ?, ?, and the `?` ellipsis (in `sending`, `intro`, `segLabel`, `courtsSelect`, `messageHint`).
- **Plain keys** contain no HTML; no raw key strings; no leftover untranslated English in the hard-integrity sense (e.g. "By" = Danish "City", not English residue).

No defects found under this lens ? returned an empty issues array.
