Rules: KEEP THESE EXACTLY ? never translate or transliterate:

- Brand/URLs: KhelSutra, khelsutra.guru, and the verbatim watermark "Generated by Khelsutra.guru". HTTPS stays HTTPS.
  - Product names (storage providers, verbatim): "Google Drive", "OneDrive / Microsoft 365", "Dropbox", "Amazon S3", "Google Cloud". "SD card" keeps "SD".
  - Place: Bengaluru stays "Bengaluru" (the country name "India" may take its natural local form).
  - Symbols/emoji kept as-is: · © ? ?. The year "© 2026" stays literal.
  - This is a NON-technical Request-Access form (already de-jargoned in English: "a powerful computer" instead of "GPU", "run it in the cloud" instead of server-speak). Keep that warm, plain, reassuring register ? do NOT re-introduce jargon. There is NO HTML markup in these strings (plain text only) ? do not add any tags.
- Return {"issues":[{"key, severity, problem, suggestion}]}. Only real defects under THIS lens; empty if clean.

I'll review this Spanish translation under the meaning/accuracy lens. Let me analyze each string against the English source.

Key checks:

- `gpuHint` reassurance "No worries if not ? we can run it in the cloud for you" ? "Si no lo tienes, no te preocupes ? podemos procesarlo por ti en la nube." ? Reassurance intact, faithful.
- `gpuCloud` "No ? please run it in the cloud for me" ? "No ? por favor, procésalo por mí en la nube" ? faithful.
- `storageLabel` two questions preserved ? faithful.
- `storageHint` "(pick any)" ? "(elige las que quieras)" ? faithful, plural neutral.
- `storageBucket` "advanced (e.g. Amazon S3, Google Cloud)" ? "avanzado (p. ej. Amazon S3, Google Cloud)" ? product names verbatim, faithful.
- `storageLocal` "SD card or the device itself" ? "Tarjeta SD o el propio dispositivo" ? faithful.
- `footer.trust` "Run from Bengaluru" ? "Operado desde Bengaluru" ? acceptable; watermark verbatim preserved.
- `footer.copyright` "Invite-only alpha" ? "Alfa solo por invitación" ? faithful.

Let me look closely for meaning defects. The translation is accurate throughout. One minor consideration: "gpuUnsure"/"storageUnsure" "Not sure" ? "No estoy seguro" uses masculine gender (gendered self-reference where English is neutral), but that is a register/gender-neutrality concern, not strictly a meaning defect, and "neutral Spanish" commonly defaults to masculine. Under the strict MEANING/ACCURACY lens, no dropped/added meaning. The translation faithfully preserves all content and the reassurance.

I find no real defects under the meaning/accuracy lens.
