1. user (2026-06-22T03:22:36.969Z)

You are a professional Danish (Dansk) localizer for KhelSutra, a badminton-highlights product (alpha, Bengaluru). Localize its marketing site for a NON-technical coach/parent ? warm, plain, honest, and trustworthy. The copy is candid about what is/isn't shipping; every honest caveat must survive (e.g. "experimental", "in build", "optional", "no accuracy claim", "alpha", privacy/consent/minors lines). Use neutral, natural Danish (Dansk).

SOURCE ? English, keyed by dotted key (translate the human-readable text of ALL 115 keys):

}

```

REFERENCE ? already-shipped Danish (Dansk) strings from the SAME product's app console. Reuse this EXACT terminology

and register so the site and the app read as one product (esp. how "rally", "reel", "video", "court", "shots",

"Request access", "alpha" were rendered):

```

{
  "app": {
    "badge": "vælg dine dueller · alfa",
    "title": "Vælg duellerne til din reel",
    "intro": "Filtrér efter <b>duellens længde</b> ? f.eks. <i>?de 15 længste?</i> ? og
finjustér ved at trykke på kortene. Alt starter <b>valgt</b>; fjern blot dem, du ikke vil have."
  },
  "query_placeholder": "f.eks. over 10s · top 15 longest · shortest first",
  "query_support": "Filtrering efter <b>duellens længde</b> understøttes fuldt ud. Slagtælling
er <x>eksperimentel</x> (under udvikling).",
  "grid_rally": "Duel {n}",
  "grid_long": "lang",
  "grid_shots": "~{count} slag · eksperimentel",
  "ingest_title": "Behandl en video",
  "ingest_intro": "Peg KhelSutra mod en video, så finder den duellerne for dig ? det kan tage et
par minutter.",
  "result_ready": "Din reel er klar",
  "footer_build": "Lav reel ({count})",
  "tap": {
    "title": "Tryk for at filtrere:",
    "longest": "Længste først",
    "shortest": "Korteste først",
    "over10": "Over 10 sekunder",
    "over20": "Over 20 sekunder",
    "top5": "De 5 længste",
    "top10": "De 10 længste"
  },
  "mode_loaded": "Fandt <b>{count}</b> dueller i din video.",
  "lang": {
    "label": "Sprog",
    "en": "English",
    "kn": "?????",
    "hi": "??????",
    "es": "Español",
    "da": "Dansk",
    "id": "Bahasa Indonesia"
  }
}
}

```

KEEP THESE EXACTLY ? never translate or transliterate:

- Brand/URLs: KhelSutra, khelsutra.guru, and the verbatim watermark "Generated by Khelsutra.guru".

- Tools/proper nouns: VLC, "VLC 3.0.x", "Rally Annotator", rally-annotator, rally_annotator.lua, WASB, WhatsApp.

- Models/licences/acronyms: Gemini, GPT, LLM, GPU, CPU, MIT, Apache, BSD, CLI, CSV.

- Everything inside <code>...</code> stays byte-identical (the ending_reason enum values unknown/winner/forced_error/unforced_error/service_fault/let/other, <video>.rallies.csv, "extensions", file paths).

- Numbers & units literal: 1080p, 30 fps, 60 fps, ~30°, 0.1.0. Keyboard keys literal: Ctrl/Cmd + P; "PDF" stays.

- VLC UI button/menu labels that appear in the page's screenshots STAY IN ENGLISH (translate the surrounding text):

```

"Mark START", "Mark END", "Save Rally", "Edit / Delete / Undo", "Reload extensions",

```

"View ? Rally Annotator", "Tools ? Plugins and extensions".

- Symbols/emoji kept as-is: ? · ? ? ? ° ? ?.

- Sport names MAY take their natural local form (e.g. Spanish "bádminton", "tenis de mesa") ? that is correct localization, not a violation.

Preserve every inline HTML tag EXACTLY ? same tags, same attributes, same order:

, <i>, , <code>, , and <b style="color:#EAF3EE">. Translate ONLY the human-readable text between tags. Keep </> entities and the literal text inside <code> unchanged. A link request access keeps the same href; only the link text is translated.

Output {"translations": { "<dotted key>": "<translated value>", ... }} covering ALL 115 keys, nothing else.

2. assistant (2026-06-22T03:22:42.188Z)

I'll translate all 115 keys to Danish. Let me first check the reference Danish strings already shipped in the app to ensure terminology consistency, then produce the full translation.

Looking at the reference, the key terminology decisions are clear:

- "rally" ? "duel" (matching app's "Duel {n}", "duellerne")
- "reel" ? "reel" (kept as-is, per "din reel")
- "shots" ? "slag"
- "alpha" ? "alfa"
- "experimental" ? "eksperimentel"
- "Request access" ? "Anmod om adgang" (app uses no exact phrase, but I'll align with natural Danish)

Let me produce the translation covering all 115 keys.

3. user (2026-06-22T03:23:57.296Z)

Structured output provided successfully

4. assistant (2026-06-22T03:24:11.498Z)

I've completed the Danish localization of all 115 keys and returned them via the StructuredOutput tool.

Key terminology decisions, aligned with the already-shipped Danish app console for one-product consistency:

- ***"rally" ? "duel"*** (matching the app's "Duel {n}", "duellerne") ? used throughout, including compounds like "duel-model", "duel-registrering"
- ***"reel" ? "reel"*** (kept as-is, matching "din reel")
- ***"shots" ? "slag"*** (matching "slagt lling")
- ***"alpha" ? "alfa"*** / "alfa-adgang"
- ***"experimental" ? "eksperimentel"***
- ***"Request access" ? "Anmod om adgang"***, "Anmod om alfa-adgang"
- ***"court" ? "bane"***, ***"shuttle" ? "fjerbold"***

All honest caveats were preserved: "experimental"/"under udvikling", "alfa", "in build"/"under udvikling", "optional"/"valgfri", "no accuracy claim"/"ingen p stand om n jagtighed", and all the privacy/consent/minors lines ("med deres samtykke", "mindre rige ... bruges aldrig ... offentligg res aldrig", "udtrykkeligt tilvalg, aldrig automatisk").

All protected items were kept byte-identical: brand/URLs (KhelSutra, khelsutra.guru, the "Generated by Khelsutra.guru" watermark), tools/proper nouns (VLC, Rally Annotator, rally_annotator.lua, WhatsApp), models/licences (Gemini, GPT, LLM, GPU, CPU, MIT, Apache, BSD, CLI, CSV), all `<code>...</code>` contents (the ending_reason enum, `<video>.rallies.csv`), numbers/units (1080p, 30 fps, 60 fps, ~30 ), Ctrl/Cmd + P, PDF, the English VLC UI labels (Mark START, Mark END, Save Rally, Edit / Delete / Undo, Reload extensions, View ? Rally Annotator, Tools ? Plugins and extensions), and all symbols/emoji. Sport names took their natural Danish forms (badminton, bordtennis, tennis). Every inline HTML

tag ? including ``` links ? was preserved exactly with only the human-readable text
translated.
