Finalize the Kannada (????) <title> translations; apply findings, keep KhelSutra/??& literal. SOURCE: {"site.meta.index.title":"KhelSutra ? every rally indexed, the dead time gone","site.meta.capture.title":"KhelSutra ? 1-page capture checklist","site.meta.ownModel.title":"KhelSutra ? Annotate your footage & train your own model","site.meta.privacy.title":"Privacy Policy ? KhelSutra"}

DRAFT: {"site.meta.index.title":"????????? ? ????? ????????? ?????????, ?????????? ??? ???","site.meta.capture.title":"????????? ? 1-???? ?????????? ????????? ?????","site.meta.ownModel.title":"????????? ? ????? ?????? ?????????? ??? & ?????? ?????????? ?????? ???","site.meta.privacy.title":"??????? ??? ? ??????????"}

FINDINGS: [{"key":"site.meta.index.title","severity":"low","problem":"The REFERENCE site_hero_title renders the tagline as two clauses separated by a period with a comma inside the second clause: '????? ?????????? ??????????. ?????????? ???, ???.' The DRAFT title uses a single comma to join both clauses and drops the comma before '???': '????? ?????????? ?????????, ?????????? ??? ???'. This is accurate and fluent, but the punctuation/rhythm diverges from the established reference phrasing of the same tagline. A title is allowed to be more compact than a hero heading, so this is minor ? but matching the reference's '????????? ???, ???' beat would improve consistency.","suggestion":"Optionally align with the reference cadence: '????????? ? ?????? ?????????? ?????????, ?????????? ??? ???' is fine as-is; if matching the hero exactly is desired, use '????????? ???, ???'."}]

Return {"translations":{...all 4 keys...}}.

I'll verify the Kannada title translations against the reference site strings before finalizing.

5. assistant (2026-06-22T17:35:42.671Z)

The reference hero title confirms the finding. Reference renders: `????? ????????? ??????????. ?????????? ???, ???.` ? so the established cadence uses a comma in `????????? ???, ???`. I'll apply the finding's suggestion to align the title with the reference cadence.

The other three keys are clean (KhelSutra/?/& kept literal where applicable; only & appears, kept literal).

6. user (2026-06-22T17:35:49.802Z)

Structured output provided successfully

7. assistant (2026-06-22T17:35:57.113Z)

Finalized the Kannada title translations. Verified against the reference hero title at `C:\Users\avidu\Projects\kheIsutra\locales\kn\common.json:174` (mirrored at `C:\Users\avidu\Projects\kheIsutra\site\public\locales\kn\common.json:174`), which renders the tagline as `????? ????????? ??????????. ?????????? ???, ???.`

Applied the FINDINGS suggestion to align the index title with that established cadence ? restored the comma in `????????? ???, ???`:

- `site.meta.index.title`: `????????? ? ?????? ????????? ?????????, ?????????? ???, ???`

The other three keys were left as drafted (already accurate). KhelSutra (?????????? transliteration), the em dash (?), and the literal ampersand (&) were all preserved.
