Localize these page <title> strings to Indonesian (Bahasa Indonesia) for KhelSutra (badminton highlights). Concise, natural.

```
SOURCE: {
  "site.meta.index.title": "KhelSutra ? every rally indexed, the dead time gone",
  "site.meta.capture.title": "KhelSutra ? 1-page capture checklist",
  "site.meta.ownModel.title": "KhelSutra ? Annotate your footage & train your own model",
  "site.meta.privacy.title": "Privacy Policy ? KhelSutra"
}
REFERENCE (Indonesian (Bahasa Indonesia), reuse the wording): {
  "app_title": "Pilih reli untuk reel kamu",
  "site_hero_title": "Setiap reli, terindeks. <span class=\"hl\">Waktu kosongnya, hilang.</span>",
  "site_nav_ownModel": "Miliki modelmu sendiri",
  "site_privacy_title": "Kebijakan Privasi",
  "site_capture_title": "Daftar periksa perekaman 1 halaman"
}
These are HTML <title> tags (the browser-tab text) ? concise, natural, no HTML. KEEP "KhelSutra" verbatim and keep the em-dash "?" and "&". REUSE the locale's already-shipped phrasings from the REFERENCE (e.g. the hero line, the privacy-page title "site_privacy_title", and the capture-page title "site_capture_title") so the tab title matches the page.
Return {"translations":{"<key>":"<value>"}} for all 4 keys.
```

2. assistant (2026-06-22T17:34:36.668Z)

I'll localize these page title strings, reusing the shipped Indonesian phrasings from the reference.

3. user (2026-06-22T17:34:38.666Z)

Structured output provided successfully

4. assistant (2026-06-22T17:34:43.601Z)

Done. All 4 page titles localized to Indonesian, returned via StructuredOutput.

I reused the shipped reference phrasings:

- `index.title` ? built from the hero line ("Setiap reli, terindeks. Waktu kosongnya, hilang.")
- `capture.title` ? reused `site\_capture\_title` ("Daftar periksa perekaman 1 halaman")
- `privacy.title` ? reused `site\_privacy\_title` ("Kebijakan Privasi")
- `ownModel.title` ? derived from `site\_nav\_ownModel` ("Miliki modelmu sendiri")

"KhelSutra", the em-dash "?", and "&" are all preserved verbatim.
