}

```

Rules: KEEP THESE EXACTLY ? never translate or transliterate:

- Brand/URLs: KhelSutra, khelsutra.guru, and the verbatim watermark "Generated by Khelsutra.guru". HTTPS stays HTTPS.
 - Product names (storage providers, verbatim): "Google Drive", "OneDrive / Microsoft 365", "Dropbox", "Amazon S3", "Google Cloud". "SD card" keeps "SD".
 - Place: Bengaluru stays "Bengaluru" (the country name "India" may take its natural local form).
 - Symbols/emoji kept as-is: · © ? ?. The year "© 2026" stays literal.
 - This is a NON-technical Request-Access form (already de-jargoned in English: "a powerful computer" instead of "GPU", "run it in the cloud" instead of server-speak). Keep that warm, plain, reassuring register ? do NOT re-introduce jargon. There is NO HTML markup in these strings (plain text only) ? do not add any tags.
- Return {"issues":[[key, severity, problem, suggestion]]}. Only real defects under THIS lens; empty if clean.

2. assistant (2026-06-22T15:59:59.811Z)

I'll review the Danish translation against the integrity lens.

3. user (2026-06-22T16:00:00.070Z)

Structured output provided successfully

4. assistant (2026-06-22T16:00:07.929Z)

The Danish translation is clean under the integrity lens. I verified all the required elements:

- **Keep-literal tokens preserved:** "KhelSutra" (verbatim), "Generated by Khelsutra.guru" (verbatim watermark), HTTPS (kept as HTTPS), Bengaluru (kept, with "India" ? "Indien" which is the natural Danish form), "© 2026" (literal year). Storage product names all verbatim: "Google Drive", "OneDrive / Microsoft 365", "Dropbox", "Amazon S3", "Google Cloud", and "SD" kept in "SD-kort".
- **Emoji and symbols kept:** ? ? and · all present and correctly placed.
- **No HTML tags introduced:** all strings remain plain text.
- **No stray untranslated English in prose:** the only English ("Generated by Khelsutra.guru", "HTTPS") is the required keep-literal content. "highlights" and "Reels" are acceptable as established loanwords/product terms in Danish.
- **No raw keys** leaked into values.
- **Register stays warm/non-jargon:** "i skyen" (in the cloud), "kraftig computer" (powerful computer) ? no re-introduced jargon. "cloud-lagerspand" is fine as it mirrors the English "cloud storage bucket" which itself is flagged as advanced.

No defects found.
