Localize these page <title> strings to Spanish (Español) for KhelSutra (badminton highlights). Concise, natural.

```
SOURCE: {
  "site.meta.index.title": "KhelSutra ? every rally indexed, the dead time gone",
  "site.meta.capture.title": "KhelSutra ? 1-page capture checklist",
  "site.meta.ownModel.title": "KhelSutra ? Annotate your footage & train your own model",
  "site.meta.privacy.title": "Privacy Policy ? KhelSutra"
}
REFERENCE (Spanish (Español), reuse the wording): {
  "app_title": "Elige las jugadas para tu reel",
  "site_hero_title": "Cada jugada, indexada. <span class=\"hl\">El tiempo muerto, fuera.</span>",
  "site_nav_ownModel": "Tu propio modelo",
  "site_privacy_title": "Política de privacidad",
  "site_capture_title": "Lista de captura de 1 página"
}
These are HTML <title> tags (the browser-tab text) ? concise, natural, no HTML. KEEP "KhelSutra" verbatim and keep the em-dash "?" and "&". REUSE the locale's already-shipped phrasings from the REFERENCE (e.g. the hero line, the privacy-page title "site_privacy_title", and the capture-page title "site_capture_title") so the tab title matches the page.
Return {"translations":{"<key>":"<value>"}} for all 4 keys.
```

2. assistant (2026-06-22T17:34:36.388Z)

I'll localize these page title strings to Spanish, reusing the already-shipped phrasings from the reference.

3. user (2026-06-22T17:34:38.381Z)

Structured output provided successfully

4. assistant (2026-06-22T17:34:42.981Z)

Done. Localized all 4 page titles to Spanish, reusing the already-shipped reference phrasings.

```
- `site.meta.index.title` reuses the hero line wording ("Cada jugada, indexada. El tiempo muerto, fuera.")
- `site.meta.capture.title` reuses `site_capture_title` ("Lista de captura de 1 página")
- `site.meta.ownModel.title` mirrors the nav/own-model concept ("anota tu material y entrena tu propio modelo")
- `site.meta.privacy.title` reuses `site_privacy_title` ("Política de privacidad")
```

All keep "KhelSutra" verbatim, the em-dash, and contain no HTML.
