1. user (2026-06-22T01:31:01.174Z)

You are a professional Kannada (?????, script U+0C80?U+0CFF) localizer for KhelSutra, a badminton-highlights product. Localize the "Annotate your footage / train your own model" page for a NON-technical coach or parent ? warm, plain, honest. This page is candid about what is and isn't shipping; keep every honest caveat intact (e.g. "open / in build", "optional", "no accuracy claim", "no Train-now button yet", privacy/consent/minors lines).

SOURCE ? English values keyed by dotted key (translate the human-readable text of EVERY one of the 52 keys):

```
{  
  "heroTitle": "Annotate your footage. <span class=\\"hl\\">Train a model that's yours.</span>",  
  "heroLead": "You can't train Gemini or GPT on your court footage. KhelSutra's direction is the inverse ? a small, <b style=\\"color:#EAF3EE\\">owned</b> rally model where the moat is your consented dataset, on a commercially-clean, inspectable stack you control.",  
  "nav.home": "? KhelSutra home",  
  "nav.annotate": "Annotate",  
  "nav.train": "Train your own model",  
  "nav.setup": "Setup & use",  
  "sample": "? <b>Want to see what KhelSutra produces?</b> A real sample reel plays the moment you <a href=\\"/#join\\">request access</a>.",  
  "annotate.kicker": "Step 1 · real and shipping today",  
  "annotate.title": "Annotate your footage",  
  "annotate.pill": "live today",  
  "annotate.body": "<b>rally-annotator</b> is a free, open-source (MIT) <b>VLC plugin</b> that turns \\"watch a match\\" into golden labels. While you watch your own video in VLC, you mark each rally's start and end plus how the point ended; it writes one row per rally to a plain CSV next to your video. <b>Your footage never leaves your machine.</b> It covers five net-separated racquet sports (badminton, tennis, table tennis, pickleball, padel).",  
  "annotate.cap1": "Enable it once: VLC ? View ? Rally Annotator.",  
  "annotate.cap2": "Mark each rally's start/end + ending reason, then Save Rally.",  
  "annotate.flowLead": "The flow, per rally:",  
  "annotate.step1": "<b>Mark START</b> on the serve-contact frame (pause/scrub for accuracy).",  
  "annotate.step2": "<b>Mark END</b> when the shuttle is dead.",  
  "annotate.step3": "Pick an <b>ending reason</b>, optionally a shot count, then <b>Save Rally</b> ? one CSV row.",  
  "annotate.step4": "Fix anything with <b>Edit / Delete / Undo</b>; re-open the same video later to continue.",  
  "annotate.note": "It's a click-driven dialog (no marking hotkeys yet), and targets <b>VLC 3.0.x</b>.",  
  "train.kicker": "Step 2 · the moat",  
  "train.title": "Train your own model",  
  "train.pill": "open pipeline · in build",  
  "train.reassureTitle": "You don't have to train anything to start.",
```

```

"train.reassureBody": "KhelSutra runs on a ready-made default, so you get rally detection and
reels <b>out of the box</b> ? nothing to set up. Training on your own footage (below) is an
<b>optional</b> power-up: a model tuned to your courts, your angles, your halls.",
"train.intro": "For those who want it, your labels feed an <b>owned</b> rally model ? trained
on <b>your</b> courts, <b>your</b> angles, <b>your</b> busy multi-court halls. The pipeline is
open and inspectable:",
"train.moat.ownTitle": "You own it",
"train.moat.ownBody": "A model and dataset that are yours to keep and improve ? not rented
inference.",
"train.moat.cleanTitle": "Commercially clean",
"train.moat.cleanBody": "MIT/Apache/BSD-only stack; we never train on a paid LLM's output.",
"train.moat.privateTitle": "Private & consented",
"train.moat.privateBody": "Footage stays yours; training use is explicit opt-in, never
automatic.",
"train.moat.minorsTitle": "Minors protected",
"train.moat.minorsBody": "Footage involving minors is never used for training and never
published.",
"train.honestTitle": "Read this honestly.",
"train.honestBody": "The labeling tool is real and shipping. The training pipeline is <b>open
and in active build</b> ? today it's a developer CLI; the no-GPU path trains a pipeline-
validation <b>mock</b>, and a real model needs a GPU. There is <b>no \"Train now\" button</b>
yet, and we make <b>no accuracy claim vs a paid LLM</b> (there's no such benchmark). The promise
here is <b>ownership, licensing, privacy and consent</b> ? not \"more accurate than Gemini,\"
and not \"one click to train.\",
"setup.kicker": "Step 3 · for power users",
"setup.title": "Setup & use",
"setup.install": "<b>Install the plugin (VLC 3.0.x).</b> Copy <code>rally_annotator.lua</code>
into VLC's per-user Lua <code>extensions</code> folder (create it if missing), then VLC ? Tools
? Plugins and extensions ? <i>Reload extensions</i>, and enable it from <i>View ? Rally
Annotator</i>:",
"setup.record": "<b>Record</b> per the <a href=\"\"/capture\">one-page capture checklist</a>
(fixed tripod, full court, landscape, whole session) ? <b>annotate</b> in VLC ? you get
<code>&lt;video&gt;.rallies.csv</code>:",
"setup.reasons": "<code>ending_reason</code> is one of: <code>unknown</code> ·
<code>winner</code> · <code>forced_error</code> · <code>unforced_error</code> ·
<code>service_fault</code> · <code>let</code> · <code>other</code>. Times are decimal seconds;
downstream tools read by column name.",
"setup.train": "<b>Train</b> (developer CLI). A GPU-free dry run validates the whole pipeline
on a CPU mock; a real model needs a GPU:",
"setup.joinRule": "One join rule: keep the video <b>byte-identical</b> to what you annotated
(don't re-encode after labeling) ? labels match videos by content hash.",
"not.kicker": "So expectations stay honest",
"not.title": "What this is not",
"not.i1": "Not a one-click trainer ? training is an offline CLI today.",
"not.i2": "Not in-browser ? labeling runs in VLC on your machine.",
"not.i3": "Not an accuracy claim vs Gemini/GPT ? no such benchmark.",
"not.i4": "Shot-type, player and score detection are roadmap.",
"cta.title": "Want in?",
"cta.button": "Request alpha access",
"foot.flyer": "Academy flyer:",
"foot.mark": "Reels carry a \"Generated by Khelsutra.guru\" mark."
}

```

REFERENCE ? already-approved Kannada (?????, script U+0C80?U+0CFF) strings from the SAME site. Reuse this exact terminology and register (e.g. how "rally", "court", "footage", "baseline", "Request access" were rendered) so the page reads consistently:

```

{
  "ownModel_requestAccess": "?????? ???? ?",
  "nav": {
    "how": "??? ???? ???? ??????????",
    "why": "??? ??? ?????",
    "ownModel": "???????? ??????",
    "flyer": "?????????",
    "roadmap": "?????????",

```

```

    "faq": "?????????",
    "requestAccess": "????? ??"
  },
  "record_intro": "????? ?????? ?????????????????? ??????????????. ?????????????? ?????? ???
  ?????????? ??? ? ?????????????? ?????? KhelSutra ?? ?????? ?????? ??????????.",
  "record_place": {
    "title": "????????? ??????",
    "body": "<b>????? ??????????</b> ?????, ?????????? (????? ?????????? ??? ??????), ~30°
  ?????? ?????? ? <b>??? ??????</b> ??????????????, ?????? ?????? ??????????????????."
  },
  "capture_consent": "????????? ?????????? ??? ?????????????? ?????????? ????. ?????????? ??????????
  ?????????????? ?????????? ?????????? ?????? ?????????????? ?????? ?????? ??????????????????",
  "capture_ruleLead": "?????? ????: ??? ?????, ??? ?????, ??? ?????????????? ? ?????
  ?????????????? ??????????????",
  "capture_step1": {
    "title": "????????? ??????",
    "b1": "<b>????? ??????????</b> ?????, ?????????? ? ?????? ?????????, ?????? ?????? ???????????,
    ??? ? ??????",
    "b2": "?????? <b>30°</b> ?????? ?????; ?????? ??? ?????? ??? ?????? ?????????? <b>???
    ??????</b> ?????????????? ??????",
    "b3": "????????? ?????? ?????????????? ??????????????"
  },
  "app_title": "????? ?????????? ?????????????? ??????",
  "grid_rally": "????? {n}"
}

```

KEEP THESE EXACTLY ? never translate or transliterate them:

- Brand/URLs: KhelSutra, khelsutra.guru, and the watermark text "Generated by Khelsutra.guru".
- Tools/proper nouns: VLC, "VLC 3.0.x", "Rally Annotator", rally-annotator, rally_annotator.lua, WASB.
- Models/licences/acronyms: Gemini, GPT, LLM, GPU, CPU, MIT, Apache, BSD, CLI, CSV.
- Everything inside <code>...</code> stays byte-identical (commands, paths, the ending_reason enum values
 - unknown / winner / forced_error / unforced_error / service_fault / let / other,
 <video>.rallies.csv, "extensions", the python command lines).
- Numbers & units literal: 1080p, 30 fps, 60 fps, ~30°, 0.1.0.
- VLC UI button/menu labels that appear in the page's screenshots STAY IN ENGLISH so the text matches what the
 - user sees on screen: "Mark START", "Mark END", "Save Rally", "Edit / Delete / Undo", "Reload extensions",
 - "View ? Rally Annotator", "Tools ? Plugins and extensions". Translate the sentence AROUND them.
- Symbols/punctuation kept as-is: ? · ? ? ? °.

Preserve every inline HTML tag EXACTLY as in the source ? same tags, same attributes, same order:

, <i>, , <code>, , and <b style="color:#EAF3EE">. Only the human-readable text

BETWEEN tags is translated. Keep the < / > entities and the literal text inside <code> unchanged.

A link like request access keeps the same href; only "request access" is translated.

Output {"translations": { "<dotted key>": "<translated value>", ... }} containing ALL 52 keys, nothing else.

2. assistant (2026-06-22T01:31:04.744Z)

I'll translate all 52 keys to Kannada, preserving HTML tags, code blocks, brand names, and VLC UI labels exactly as instructed.

3. user (2026-06-22T01:33:35.517Z)

Structured output provided successfully

4. assistant (2026-06-22T01:33:59.922Z)

All 52 keys have been localized to Kannada and returned via StructuredOutput.

Summary of key decisions made to keep the translation consistent and honest:

- **Reused approved terminology** from the reference strings: ????? (rally), ????? (court), ???????? (footage), ???????? (baseline), ????? ??? (request access), ???????? (minors), ????? ???????? (tripod), ??? ????? (full court).
- **Preserved every honest caveat**: "open / in build" (???? ????????? . ?????????????), "optional" (????), "no accuracy claim" / "no benchmark" (???? ????????????? ???), "no Train-now button yet", and all privacy/consent/minors lines.
- **Kept untouched**: brand/URLs (KhelSutra, Generated by Khelsutra.guru), tool names (VLC, Rally Annotator, rally-annotator, rally_annotator.lua), acronyms (MIT/Apache/BSD/LLM/GPU/CPU/CLI/CSV), Gemini/GPT, all ``` content (commands, paths, the `ending_reason` enum values, `- Preserved all inline HTML exactly ? `` , `` , `` , `` , ``
