Adversarially review these Hindi (?????) <title> translations for accuracy + fluency (concise, natural, KhelSutra/?/& kept, consistent with the REFERENCE page titles).

SOURCE: {"site.meta.index.title":"KhelSutra ? every rally indexed, the dead time gone","site.meta.capture.title":"KhelSutra ? 1-page capture checklist","site.meta.ownModel.title":"KhelSutra ? Annotate your footage & train your own model","site.meta.privacy.title":"Privacy Policy ? KhelSutra"}

DRAFT: {"site.meta.index.title":"KhelSutra ? ? ???? , ??? ???? . ????? ???? , ????? .","site.meta.capture.title":"KhelSutra ? 1-??? ?????? ?????????","site.meta.ownModel.title":"KhelSutra ? ???? ?????? ?????? ???? ? ???? ???? ?????","site.meta.privacy.title":"???????? ???? ? KhelSutra"}

REFERENCE: {"app_title":"???? ? ? ? ? ? ?????? ?????","site_hero_title":"? ? ???? , ???? ???? . ???? ? ? , ????? .","site_nav_ownModel":"???? ???? ?????","site_privacy_title":"???????? ????","site_capture_title":"1-??? ?????? ?????????"} Return {"issues":[{"key,severity,problem,suggestion}]}; empty if clean.

I'll review these Hindi title translations against the source and reference page titles.

3. assistant (2026-06-22T17:35:04.800Z)

These are short title strings, so I can review them directly without external tooling. Let me analyze each translation against the source and reference.

Key observations:

****1. `site.meta.index.title`**** ? SOURCE: "KhelSutra ? every rally indexed, the dead time gone". DRAFT: "KhelSutra ? ? ???? , ??? ???? . ????? ???? , ????? ." The REFERENCE `site\_hero\_title` is exactly "? ???? , ???? ???? . ????? ???? , ????? ." So the draft matches the established hero copy verbatim ? fully consistent. Clean.

****2. `site.meta.capture.title`**** ? SOURCE: "KhelSutra ? 1-page capture checklist". DRAFT: "KhelSutra ? 1-??? ?????? ?????????". The REFERENCE `site\_capture\_title` is exactly "1-??? ?????? ?????????". Matches verbatim. Clean.

****3. `site.meta.ownModel.title`**** ? SOURCE: "KhelSutra ? Annotate your footage & train your own model". DRAFT: "KhelSutra ? ???? ?????? ?????? ???? ? ???? ???? ??????". Issues:

- The source uses "&" ? the task says "& kept". The draft renders it as "???" (the word "and") instead of preserving the literal "&" ampersand. The reference `site\_nav\_ownModel` ("???? ???? ?????") doesn't contain a conjunction so it doesn't settle this, but the instruction explicitly lists "&" among the glyphs to keep. This is the one substantive consistency concern.
- "train your own model" ? "???? ???? ??????" translates as "make/build your own model" rather than "train." This matches the REFERENCE nav label `site\_nav\_ownModel` ("???? ???? ?????") verbatim, so the deviation from "train" is a deliberate, reference-consistent choice ? not a

defect. The tail of the title aligns with the nav term, which is good.

****4. `site.meta.privacy.title`**** ? SOURCE: "Privacy Policy ? KhelSutra". DRAFT: "???????? ???? ? KhelSutra". REFERENCE `site\_privacy\_title` is "???????? ????". Matches, correct word order (KhelSutra trailing as in source). Clean.

The only real finding is the "&" ? "???" substitution, which contradicts the explicit "& kept" instruction. I'll flag it as medium (it's a consistency/instruction-compliance issue, not an accuracy error ? "???" is a fluent, correct rendering, just not the literal glyph requested).

Structured output provided successfully

5. assistant (2026-06-22T17:35:15.757Z)

Review complete. Three of the four Hindi titles are clean and match the reference verbatim:

- `site.meta.index.title` ? matches `site\_hero\_title` exactly
- `site.meta.capture.title` ? matches `site\_capture\_title` exactly
- `site.meta.privacy.title` ? matches `site\_privacy\_title`, with correct trailing-KhelSutra word order

One medium finding on `site.meta.ownModel.title`: the source's literal "&" was rendered as the Hindi conjunction "???" rather than kept as the "&" glyph the brief asked to preserve. The "train ? ????? (build)" choice is fine since it aligns with the reference nav label `site\_nav\_ownModel`.
