REVIEWER FINDINGS (across accuracy/fluency/integrity lenses):

```

[
  {
    "key": "train.intro",
    "severity": "medium",
    "problem": "The English present-tense framing 'your labels feed an owned rally model ? trained on your courts...' uses 'trained' as an adjective describing the model. The Kannada ends with '????? ????' (a dangling perfect participle 'trained/having been trained') which is grammatically truncated and reads as an incomplete clause. More importantly it shifts the aspirational/future sense: the model is being built (in-build), so it is not yet a fully 'trained' model. The English 'trained on your courts...' modifies the goal-state model fed by labels; the Kannada '????? ????' asserts the model has already been trained on the user's data, which under the honesty lens slightly over-claims given the pipeline is 'in build'.",
    "suggestion": "Rephrase so it reads as the intended state without asserting completed training, e.g. '...????? ?????? ???-????? ?????? ??? ?????? ?????? ??????' (a model that gets trained on...) or restructure to keep 'feeds an owned rally model trained on...' as a single coherent noun phrase rather than a trailing participle.",
    "lens": "accuracy"
  },
  {
    "key": "heroLead",
    "severity": "low",
    "problem": "'You can't train Gemini or GPT on your court footage' is rendered '????? ?????? ?????????? ??? ???? Gemini ??? GPT ?????? ??????????????????' The verb '?????????????????' is an impersonal/passive 'cannot be trained' form, but the sentence keeps the explicit subject '????' (you). The mismatch between an agentive subject '????' and an agentless/passive predicate is grammatically inconsistent; the intended 'you cannot train X' is conveyed but awkwardly. Meaning survives but the agency ('you can't') is blurred.",
    "suggestion": "Use a consistent agentive form, e.g. '????? ?????? ?????????? ??? ???? Gemini ??? GPT ?????? ?????????????? ??????????' to keep the 'you' subject coherent with 'cannot train'.",
    "lens": "accuracy"
  },
  {
    "key": "setup.install",
    "severity": "low",
    "problem": "Source: 'VLC ? Tools ? Plugins and extensions ? Reload extensions'. The keep-literal rule lists 'Tools ? Plugins and extensions' and 'Reload extensions' as UI labels to keep in English, and the original chains them with an arrow ('... Plugins and extensions ? Reload extensions'). The Kannada replaces the arrow connector with '?????' (and): 'Tools ? Plugins and extensions ?????? <i>Reload extensions</i>'. This drops the navigational '?' between 'Plugins and extensions' and 'Reload extensions', altering the instruction from a single menu drill-down path into two separate items joined by 'and', which mis-describes the actual UI step sequence.",
    "suggestion": "Keep the arrow to preserve the navigation path: '... VLC ? Tools ? Plugins and extensions ? <i>Reload extensions</i>, ...' (the '?' is in the keep-as-is symbol list).",
    "lens": "accuracy"
  },
  {
    "key": "train.honestBody",
    "severity": "low",
    "problem": "Source: 'The promise here is ownership, licensing, privacy and consent ? not \"more accurate than Gemini,\" and not \"one click to train.\"' The Kannada renders the negated

```

quote as \"Gemini ???? ?????? ????\" ????\" which means 'not \"more accurate than Gemini\"' ? accurate. However the leading '????? ?????' (the promise here [is]) lacks an explicit copula/'is', so the contrastive structure 'The promise is X ? not Y' is slightly under-marked; a reader could parse the dashes loosely. Meaning is recoverable but the emphatic honesty contrast is weaker than the source.",

"suggestion": "Add an explicit linking verb for clarity, e.g. '????? ?????? ???????????????, ???????????, ?????????? ?????? ????????? ? ... ????' to firm up the 'is X, not Y' contrast.",

"lens": "accuracy"

},

{

"key": "heroLead",

"severity": "high",

"problem": "\"????? ?????? ?????????? ???? ???? Gemini ???? GPT ?????? ?????????????????\" is ungrammatical. It mixes a personal subject (???? 'you') with an impersonal passive verb (???????????????? 'cannot be trained'). With ???? the verb must be ?????????????? / ??????????. As written it reads as a broken calque of the English. Also 'on your court footage' is rendered ...????????? ???? which is a literal 'on top of' ? unnatural for 'train on data'.",

"suggestion": "Rewrite e.g. \"????? ?????? ?????????? ???? Gemini ???? GPT ?????? ?????????????? ???? ????\" (or drop ???? and keep the impersonal: \"...????????????????\"). Consider ...???? ? ...???/...???????? for a more natural 'train on'.",

"lens": "fluency"

},

{

"key": "heroLead",

"severity": "medium",

"problem": "The closing clause \"...????????????? ?????????? ????\" is left dangling at the very end of the sentence, far from the verb/noun it modifies (the model). This trailing prepositional phrase is a direct calque of English word order; in natural Kannada the 'on a ... stack you control' phrase should precede the noun it qualifies, not float at sentence end after a comma. The result reads as fragmented machine output.",

"suggestion": "Reorder so the stack-clause is attached attributively before ?????? ?????, e.g. \"...???? ??????????, ?????????????? ?????? ?????? ?????????????? ?????????? ???? ?????????? ???? ????\",

"lens": "fluency"

},

{

"key": "train.intro",

"severity": "high",

"problem": "The sentence ends in \"...???? ?????? ????\" ? the participial form ???? ('having received/trained') is a relative/adjectival ending and cannot terminate a sentence. It needs a finite verb (???? ????? ? modifying a noun) or ?????????/?????????????. As written the clause is grammatically incomplete and reads as a truncated calque of '... trained on your courts'.",

"suggestion": "Attach it as a modifier to the model: \"...???? ????? ?????? ?????? ?????????????? ? ????? ?????????? ... ????? ?????? ???-????? ?????? ???? ?????? ???? ?????\" or end the clause with a finite verb.",

"lens": "fluency"

},

{

"key": "train.honestBody",

"severity": "medium",

"problem": "\"????? ?????? ????????, ??????????, ?????? ?????? ?????? ? ...\" has no copula/predicate linking subject to the list. Kannada needs a linking word here (????? ... ?????? / ?????? ?????????? ...). Dropping the verb is an English-style dash construction that reads as clipped/unnatural in flowing prose.",

"suggestion": "\"????? ?????????? ????????, ??????????, ?????? ?????? ?????? ? ...\" (or end with ...???? before the dash).",

"lens": "fluency"

},

{

"key": "annotate.body",

"severity": "medium",

"problem": "\"????? ?????????? ?????? ?????? ?????????? ??????????\" is a word-for-word

calque of 'never leaves your machine'. ????? for a computer is stilted/odd in Kannada (it reads like 'machine/apparatus'), and 'leaves your machine' rendered literally as ????????? sounds like footage abandoning a device. Non-technical readers would find this jarring.",

"suggestion": "Use a natural phrasing such as \"????? ?????????? ?????? ?????? ?????????????????? ??????????????????\" (????????? is the everyday word; ??????? reads more naturally than ????.).",

"lens": "fluency"

},

{

"key": "not.i2",

"severity": "low",

"problem": "Same ????? issue: \"????? ?????? ???? VLC ?????\" ? ?????? ???? for 'on your machine' is a literal calque and reads as 'on top of your machine/apparatus'. Inconsistent and unnatural for a lay coach/parent.",

"suggestion": "\"...????? ?????????????????? VLC ?????? ?????????????\" (use ?????????? and the locative -????? rather than ????.).",

"lens": "fluency"

},

{

"key": "annotate.body",

"severity": "low",

"problem": "\"????? ?????????????\" for 'golden labels' is an over-literal calque. ?????? ('golden/golden-coloured') in Kannada evokes the literal metal/colour, not the figurative 'gold-standard / high-quality ground-truth' sense intended. A non-technical reader will be puzzled.",

"suggestion": "Use a figurative equivalent like \"????? ?????????? ?????????????\" or \"????????? ?????????????\", or keep it simple as \"????????? ?????????????\".",

"lens": "fluency"

},

{

"key": "train.reassureBody",

"severity": "low",

"problem": "\"????? ??????-????? ?????????? ???? ?????????????\" ? 'runs on a ready-made default' is calqued with ???? ('on top of'). For 'runs on X' Kannada more naturally uses ...????? ?????????? or ...????????? ??????????. Also ?????????? as a bare noun with no head (default what?) is bumpy for a lay reader.",

"suggestion": "e.g. \"KhelSutra ???? ?????-????? ?????????? ?????????? ???? ?????????????\" (add ?????? as the head noun and replace ???? with ????.).",

"lens": "fluency"

},

{

"key": "train.moat.privateTitle",

"severity": "low",

"problem": "\"????? ?????? ?????????\" ? the second adjective ????????? ('of-consent', genitive) dangling without a head noun reads as incomplete/unnatural as a standalone heading. 'Private & consented' needs an adjective form for 'consented', e.g. ??????? ???? ('consent-obtained').",

"suggestion": "\"????? ?????? ?????????? ?????\" (parallel adjectives), which reads as a natural heading.",

"lens": "fluency"

},

{

"key": "annotate.flowLead",

"severity": "low",

"problem": "\"????? ?????????, ?????? ??????:\" ? ?????? literally means 'flow (of water/current)'. Using it for a procedural workflow ('the flow') is a literal calque that sounds odd; native usage would prefer ???? ('steps/sequence') or ?????? ('procedure').",

"suggestion": "\"????? ?????????? ???? ??????:\" or \"????? ?????????? ???? ??????:\".",

"lens": "fluency"

},

{

"key": "cta.title",

"severity": "low",

"problem": "\"????? ?????????\" is a literal rendering of 'Want in?' meaning 'do you want to come inside?' ? it loses the idiomatic 'want to join / be part of this' sense and sounds physically spatial. A coach/parent reads it as 'come in (the room)?'.",

```

    "suggestion": "Use something idiomatic like \"???????\" ('want to join?') or \"????
???????\".",
    "lens": "fluency"
  },
  {
    "key": "setup.install",
    "severity": "low",
    "problem": "A required \"?\" symbol is dropped. The source string is \"...VLC ? Tools ?
Plugins and extensions ? <i>Reload extensions</i>...\" (the menu path uses ? between every step,
so Reload extensions is reached via an arrow). The translation renders it as \"...VLC ? Tools ?
Plugins and extensions ???? <i>Reload extensions</i>...\", replacing the third \"?\" with the
Kannada word ???? (\"and\"). The ? symbol is on the keep-as-is list, so the translation
contains one fewer ? than the source (3 arrows outside <i> vs the source's 3... only 2 remain
before the first <i>), and the UI navigation path is altered from a sequential menu-step arrow
to a coordinating conjunction.",
    "suggestion": "Restore the arrow to mirror the source exactly: \"...??? VLC ? Tools ?
Plugins and extensions ? <i>Reload extensions</i>, ???? <i>View ? Rally Annotator</i> ???
????? ??????????:\" (use ? before Reload extensions, not ?????).",
    "lens": "integrity"
  }
]

```

KEEP THESE EXACTLY ? never translate or transliterate them:

- Brand/URLs: KhelSutra, khelsutra.guru, and the watermark text "Generated by Khelsutra.guru".
 - Tools/proper nouns: VLC, "VLC 3.0.x", "Rally Annotator", rally-annotator, rally_annotator.lua, WASB.
 - Models/licences/acronyms: Gemini, GPT, LLM, GPU, CPU, MIT, Apache, BSD, CLI, CSV.
 - Everything inside `...` stays byte-identical (commands, paths, the ending_reason enum values
 - unknown / winner / forced_error / unforced_error / service_fault / let / other,`<video>.rallies.csv`, "extensions", the python command lines).
 - Numbers & units literal: 1080p, 30 fps, 60 fps, ~30°, 0.1.0.
 - VLC UI button/menu labels that appear in the page's screenshots STAY IN ENGLISH so the text matches what the user sees on screen: "Mark START", "Mark END", "Save Rally", "Edit / Delete / Undo", "Reload extensions", "View ? Rally Annotator", "Tools ? Plugins and extensions". Translate the sentence AROUND them.
 - Symbols/punctuation kept as-is: ? . ? ? ? °.
- Preserve every inline HTML tag EXACTLY as in the source ? same tags, same attributes, same order:
- `<b>`, `<i>`, `<a href="...">`, `<code>`, `<span class="hl">`, and `<b style="color:#EAF3EE">`. Only the human-readable text BETWEEN tags is translated. Keep the `<` / `>` entities and the literal text inside `<code>` unchanged.
- A link like `<a href="/#join">request access</a>` keeps the same href; only "request access" is translated.

Return {"translations": { "dotted key": "<final value>", ... }} with ALL 52 keys.

2. assistant (2026-06-22T01:36:08.737Z)

I'll review the findings and apply the fixes to the flagged keys while leaving clean keys unchanged. Let me work through each finding carefully, respecting all keep-literal and HTML rules.

Let me analyze the flagged keys:

1. **heroLead** (3 findings): Fix the ungrammatical "???? + passive verb" construction, the "train on" calque, and the dangling trailing stack-clause.
2. **train.intro** (2 findings): Fix the dangling participle "????? ??" ? attach as modifier "????? ???? ?????".
3. **setup.install** (2 findings): Restore the "?" arrow before "Reload extensions" instead of "?????".
4. **train.honestBody** (2 findings): Add explicit copula "?????".

5. ****annotate.body**** (2 findings): Fix "?????" ? "?????????" and "?????" ? figurative quality.
6. ****not.i2**** (1): "?????" ? "?????????".
7. ****train.reassureBody**** (1): "?????" ? "?????" + add "?????" head noun.
8. ****train.moat.privateTitle**** (1): "?????????" ? "???????? ????".
9. ****annotate.flowLead**** (1): "?????" ? "?????".
10. ****cta.title**** (1): "???? ??????" ? "?????????".

All other keys are clean and remain unchanged. Let me compose the final translations.

3. user (2026-06-22T01:38:21.096Z)

Structured output provided successfully

4. assistant (2026-06-22T01:38:52.382Z)

I've applied all the reviewer findings and returned the finalized Kannada translation via StructuredOutput. Here's a summary of what was fixed versus left untouched.

****Fixed keys (flagged by reviewers):****

- ****heroLead**** (3 findings): Rewrote the ungrammatical `???? + ?????????????????` (agentive subject + passive verb) to a clean agentive form `???? Gemini ??? GPT ????? ????????????????? ????? ?????????`, replacing the literal "on... ??" with `????`. Reordered the dangling trailing stack-clause to attach attributively before the model noun: `...???????? ???? ?????, ????? ????? ?????...`.
- ****train.intro**** (2 findings): Fixed the sentence-terminating participle `????? ????` by attaching it as a modifier to a head noun: `...???? ????? ????? ????` ? also avoids over-claiming completed training.
- ****setup.install**** (2 findings): Restored the `?` arrow before `Reload extensions` (was incorrectly `????`), preserving the menu drill-down path.
- ****train.honestBody**** (2 findings): Added explicit copula ? `????? ?????????` ? to firm up the "is X, not Y" contrast.
- ****annotate.body**** (2 findings): `????? ? ?????????` with `????????????????`; `????? ?????????? ? ????? ????????? ?????????`.
- ****not.i2****: `????? ???? ? ?????????????????`.
- ****train.reassureBody****: `???????? ???? ?????????? ? ????????? ?????????? ???? ?????????`.
- ****train.moat.privateTitle****: `???????? ? ????????? ????`.
- ****annotate.flowLead****: `????? ? ?????`.
- ****cta.title****: `???? ?????? ? ?????????`.

****All other keys left unchanged**** (no findings). Keep-literal rules respected throughout: brand/URLs, VLC UI labels (`Mark START`, `Mark END`, `Save Rally`, `Edit / Delete / Undo`, `Reload extensions`, `View ? Rally Annotator`, `Tools ? Plugins and extensions`), ``` contents byte-identical, acronyms/models/licences, symbols (`? . ? ?`), `</>` entities, and every inline HTML tag/attribute preserved in original order. All 52 keys returned.`
