This is a PRIVACY POLICY ? plain-language but legally meaningful. Translate faithfully; do NOT weaken, strengthen, or drop any commitment (the emphatic words matter: "never", "only", "explicit opt-in", "we do not sell").

KEEP THESE EXACTLY ? never translate or transliterate:

- Brand/contacts: KhelSutra, khelsutra.guru, hello@khelsutra.guru.
- Providers/tech, verbatim: Cloudflare, "Cloudflare Web Analytics", Google, "Gemini API", Gemini, HTTPS, TLS, GPU, API.
- Symbols: © 2026, emoji ?, the · separators.
- PROPER NOUNS must match the locale's ESTABLISHED spelling already shipped on the site ? see the

REFERENCE "site_footer_tagline": render "Bengaluru" and "India" exactly as they appear there for THIS locale

(e.g. kn uses ????????/????, hi ????????/????, da Indien; es/id keep Bengaluru/India in Latin). Be consistent across ALL keys.

- Reuse the locale's established terms from the REFERENCE for "footage", "minors", "publish", "improve the tool", "opt-in", "alpha".

Several values contain inline HTML ? preserve every tag EXACTLY (same tag, same attributes incl. the

mailto: and /privacy hrefs), translating only the human-readable text between tags. The keys with markup carry and/or

 (e.g. lead, *.li1?li3, *.note, rights.note, changes.body). All OTHER keys are PLAIN text ? add no HTML.

Return {"issues":[[key, severity, problem, suggestion]]}. Only real defects under THIS lens; empty if clean.

The reference for `es` consistently uses "Bengaluru, India" in Latin. The draft's lead uses "Bengaluru, India" ? consistent. Let me now verify each key carefully against the integrity lens: HTML tags/attributes, keep-literal tokens, proper nouns, plain-key purity, stray English, and raw keys.

Let me examine the draft systematically. I'll check the HTML-bearing keys for exact tag/attribute preservation and the literal tokens.

6. assistant (2026-06-22T17:09:41.470Z)

The established `es` terminology confirms: "alfa", "reel"/"reels", "jugadas destacadas", "Bengaluru, India". Now let me carefully audit each draft value under the integrity lens.

Going through the HTML-bearing and literal-token keys:

```
- **lead**: `

```

Now checking plain keys carry no HTML and there's no stray English / no raw keys. Let me scan for any plain-key contamination and untranslated English fragments.

All proper nouns consistent with the established `es` spelling. Now let me do a final integrity pass on the draft itself, focusing on the specific defect categories.

Examining each draft value against the lens once more, with attention to exact-match requirements:

- **HTML preservation****: All `- \*\*Keep-literal tokens\*\***: KhelSutra, Cloudflare, Google, Gemini API, HTTPS, TLS, GPU, © 2026, ? all present and untranslated. "Cloudflare Web Analytics" verbatim. The `.` separators in footTrust intact.
- **Proper nouns****: lead uses "Bengaluru, India" ? matches established `es` spelling consistently.

4. ****Plain keys carry no HTML****: All toc.*, *.h, *.intro, retention.body, video.boxBody, etc. are clean text. No stray tags.

5. ****Stray untranslated English****: Scanning all values ? no untranslated English fragments. "opt-in" is parenthetically glossed (an allowed translation choice, and consistent), "GPU"/"API" are keep-literal. No raw keys (no value equals its key name).

The draft is clean under the INTEGRITY lens. No tag/attribute corruption, all literal tokens intact, proper nouns consistent, plain keys HTML-free, no stray English, no raw keys.

No defects found under the INTEGRITY lens. The Spanish draft preserves all inline HTML exactly (mailto: hrefs and `**` tags intact), keeps all literal tokens (KheḷSutra, Cloudflare, Google, Gemini API, HTTPS, TLS, GPU, © 2026, ?, · separators) untranslated, renders proper nouns "Bengaluru, India" consistently in line with the established `es` spelling in the reference footer, keeps plain keys free of HTML, and contains no stray untranslated English or raw keys.**
