You are an adversarial Danish (Dansk) translation reviewer. Be strict ? find problems, don't praise. Review ONE lens only.

LENS ? FLUENCY/NATURALNESS: does it read as natural, idiomatic, grammatical native Danish (Dansk) for a non-technical coach/parent? Flag awkward literal calques, anglicisms where a native term exists, wrong register, and inconsistent terminology vs the app-console reference (e.g. the word used for "rally"/"reel").

ENGLISH SOURCE (dotted key ? value):

Rules the translation must obey:

KEEP THESE EXACTLY ? never translate or transliterate:

- Brand/URLs: Khelsutra, khelsutra.guru, and the verbatim watermark "Generated by Khelsutra.guru".
- Tools/proper nouns: VLC, "VLC 3.0.x", "Rally Annotator", rally-annotator, rally_annotator.lua, WASB, WhatsApp.

- Models/licences/acronyms: Gemini, GPT, LLM, GPU, CPU, MIT, Apache, BSD, CLI, CSV.
- Everything inside `...` stays byte-identical (the ending_reason enum values unknown/winner/forced_error/unforced_error/service_fault/let/other, <video>.rallies.csv, "extensions", file paths).
- Numbers & units literal: 1080p, 30 fps, 60 fps, ~30°, 0.1.0. Keyboard keys literal: Ctrl/Cmd + P; "PDF" stays.
- VLC UI button/menu labels that appear in the page's screenshots STAY IN ENGLISH (translate the surrounding text):
 - "Mark START", "Mark END", "Save Rally", "Edit / Delete / Undo", "Reload extensions", "View ? Rally Annotator", "Tools ? Plugins and extensions".
- Symbols/emoji kept as-is: ? · ? ? ? ° ? ?.
- Sport names MAY take their natural local form (e.g. Spanish "bádminton", "tenis de mesa") ? that is correct localization, not a violation.

Preserve every inline HTML tag EXACTLY ? same tags, same attributes, same order: `<b>`, `<i>`, `<a href="...">`, `<code>`, `<span class="hl">`, and `<b style="color:#EAF3EE">`. Translate ONLY the human-readable text between tags. Keep `</>` entities and the literal text inside `<code>` unchanged. A link `<a href="/#join">request access</a>` keeps the same href; only the link text is translated.

Return {"issues":[{"key, severity (high|medium|low), problem, suggestion}]}]. Only real defects under THIS lens; empty if clean.

I'll review the Danish translation for fluency and naturalness. Let me check the app-console reference for terminology consistency first.

```

9. assistant (2026-06-22T03:24:29.376Z)

The app-console reference confirms the established terminology: "duel/dueller" for rally/rallies, "reel" kept as-is, "alfa" for alpha, "Anmod om adgang" for request access. The translation under review is consistent with these. Let me check a few more terms used in the reference to verify consistency.

10. user (2026-06-22T03:24:32.050Z)

```

145:      "lead": "KhelSutra finds every rally in your session and strips out the knock-ups, walks and gaps ? so a full match becomes a clean highlight reel you can watch and download. No editing, no scrubbing.",

11. assistant (2026-06-22T03:24:41.561Z)

The site reference is still in English (the Danish site translation is what's under review). The app-console reference (`locales/da/common.json`) confirms the terminology. Now I have enough to do a strict fluency review.

Let me analyze the Danish translation carefully for naturalness, idiom, register, and consistency.

Key findings from my analysis:

1. **`site.nav.ownModel`: "Ej din egen model"*** ? "Ej" as an imperative of "eje" (to own) is archaic/non-standard. Native Danish "ej" reads primarily as the negation "not/nay". This is jarring and confusing.
2. **`site.hero.eyebrow`: "Alfa kun med invitation"*** ? word order is an awkward calque. Natural Danish: "Kun adgang med invitation · alfa" or "Alfa ? kun med invitation".
3. **`site.record.title`: "pålideligt fantastiske reels"*** ? "pålideligt fantastiske" is an awkward literal calque of "reliably great"; the adverb modifying adjective construction is unidiomatic.

4. `site.ownModel.train.kicker` / `train.title` "fordelen"` ? "moat" translated as "fordelen" (the advantage). Inconsistent and loses the metaphor; elsewhere it's fine but reviewing register.

5. `site.capture.diagram.title` : "Set fra siden"` ? acceptable but let me verify.

Let me confirm the "Ej" concern and the app's own term for "knock-ups".

I have enough context. The app-console reference confirms the core terminology (duel/dueller, reel, alfa, "Anmod om adgang"), and the translation under review is consistent with it. Now let me finalize my fluency findings.

Key fluency defects identified:

1. `""Ej din egen model""` (high) ? "Ej" as imperative of "eje" is archaic and overwhelmingly read as the negation "ikke/nej". A native reader sees "Not your own model". Severe meaning collision.
2. `""Alfa kun med invitation""` (medium) ? awkward word-order calque of "Invite-only alpha".
3. `""pålideligt fantastiske reels""` (medium) ? literal calque of "reliably great"; unidiomatic adverb+adjective stacking.
4. `""grund til afslutning""` for "ending reason" (low) ? somewhat clunky; "afslutningsårsag" reads more naturally as a noun term, especially as a label.
5. `""Optag det rigtigt""` for "Record it right" (low) ? "det" is a vague dangling object; native phrasing would drop it or specify.
6. `""Den døde tid, væk.""` (low) ? comma-fragment calque of "The dead time, gone." Works stylistically but slightly stilted in Danish.
7. `""fast kamera""` vs "Fast stativ" consistency is fine. `""Belys og optag""` for "Light & record" (low) ? "Belys" as bare imperative is stiff; "Lys og optag" or "Belysning og optagelse" reads better.
8. `""travle optagelser"/"travle haller""` for "busy" (low) ? "travl" (busy=having much to do) is a person-attribute calque; for crowded footage Danish prefers "rodede"/"hektiske"/"med meget aktivitet".

Let me compile these.

14. user (2026-06-22T03:25:16.541Z)

Structured output provided successfully

15. assistant (2026-06-22T03:25:22.875Z)

I reviewed the Danish translation under the fluency/naturalness lens, cross-checking terminology against the app-console reference at `C:\Users\avidu\Projects\khelsutra\locales\da\common.json``. The core terms (duel/dueller for rally, "reel" kept, "alfa", "Anmod om adgang") are consistent with that reference.

The most serious defect is `site.nav.ownModel` "Ej din egen model"` ? "Ej" as an imperative of "eje" (to own) is archaic and reads to modern Danish speakers as the negation "not", flipping the meaning of a prominent nav item to "Not your own model". I flagged that as high severity, plus six lower-severity fluency issues (anglicism word-order in the eyebrow, the `p\u00e5lideligt fantastiske` calque, dangling "det" in the kicker, stiff "Belys", the "travl" =

busy false friend, and a clunky "grund til afslutning").
