FINDINGS:

```

[
  {
    "key": "site.footer.tagline",
    "severity": "medium",
    "problem": "\"highlights\" is rendered as ????? (a literary 'main points / headlines'
calque). Everywhere else in the same catalog the product's core noun is the loan
????/???? (e.g. hero.demo \"????\", wizard.intro \"????\", key.title \"AI
????\"). ????? reads like newspaper headlines, not sports highlight reels, and
breaks term consistency with the app console reference.",
    "suggestion": "Use ????? for consistency: \"????? ???? ???? .
?????, ???\".",
    "lens": "fluency"
  },
  {
    "key": "site.footer.capture",
    "severity": "low",
    "problem": "\"Capture checklist\" is rendered ?????, but the same
artifact is named ????? everywhere else in the catalog (capture.title
\"1-??? ???? ????\", record.checklistCta, faq.q3 \"???? ????\").
???? (filming/cinematography) is fine Kannada but inconsistent with the established
footer/nav term; a footer link that names the page differently from the page itself is mildly
jarring.",
    "suggestion": "Align with the rest of the site: \"???? ????\" (or keep
???? everywhere ? but pick one).",
    "lens": "fluency"
  },
  {
    "key": "site.join.gpuLabel",
    "severity": "low",
    "problem": "???? (\"by itself / spontaneously\") for \"on its own\" is a slightly odd
collocation with a computer processing videos ? it leans toward the
'automatically/spontaneously' sense rather than the intended 'on the device itself, without the
cloud'. For a non-technical parent it can read a touch awkward/ambiguous.",
    "suggestion": "Consider ????? / ???, e.g. \"????? ????
????? ???? ???? ????\" to make the 'on the device' meaning
unambiguous.",
    "lens": "fluency"
  }
]

```

KEEP THESE EXACTLY ? never translate or transliterate:

- Brand/URLs: KhelSutra, khelsutra.guru, and the verbatim watermark "Generated by Khelsutra.guru". HTTPS stays HTTPS.
- Product names (storage providers, verbatim): "Google Drive", "OneDrive / Microsoft 365", "Dropbox", "Amazon S3", "Google Cloud". "SD card" keeps "SD".
- Place: Bengaluru stays "Bengaluru" (the country name "India" may take its natural local form).
- Symbols/emoji kept as-is: . © ? ?. The year "© 2026" stays literal.
- This is a NON-technical Request-Access form (already de-jargoned in English: "a powerful computer" instead of "GPU", "run it in the cloud" instead of server-speak). Keep that warm, plain, reassuring register ? do NOT re-introduce jargon. There is NO HTML markup in these strings (plain text only) ? do not add any tags.

Return {"translations": { "<dotted key>": "<final value>", ... }} with ALL 20 keys.

2. assistant (2026-06-22T16:01:33.732Z)

I'll start by examining the catalog to verify term consistency before applying the findings.

3. user (2026-06-22T16:01:35.263Z)

No matches found

4. user (2026-06-22T16:01:37.806Z)

No matches found

5. assistant (2026-06-22T16:01:41.127Z)

Let me find the actual Kannada catalog file to verify the consistency claims in the findings.

6. user (2026-06-22T16:01:41.735Z)

????????? GEMINI_API_KEY=? ??????, ??? ??????????????????",
```

9. assistant (2026-06-22T16:01:52.212Z)

The findings are verified against the live catalog. Term consistency is confirmed:

- `????????????` / `??????` is the established loan for "highlights" (lines 145, 159, 196, 444, etc.) ? confirming the `site.footer.tagline` finding.

- `????????? ???????? ?????` is the established term for "capture checklist" (lines 185, 195, 413) ? confirming the `site.footer.capture` finding.

Now applying the three findings, leaving clean keys unchanged, and obeying the keep-literal rules (brands, URLs, product names, place, symbols, watermark verbatim).

10. user (2026-06-22T16:02:20.642Z)

Structured output provided successfully

11. assistant (2026-06-22T16:02:34.615Z)

Applied all three findings against the verified live catalog
(`C:\Users\avidu\Projects\khelsutra\locales\kn\common.json`), left clean keys unchanged, and obeyed the keep-literal rules.

Changes made:

- `site.footer.tagline` ? `????????????` ? `????????????` (matches the established loan used at catalog lines 145/159/196/444 etc.)
- `site.footer.capture` ? `????????? ???????? ?????` ? `????????? ???????? ?????` (matches lines 185/195/413)
- `site.join.gpuLabel` ? `????????` ? `????????` to make the "on the device itself" sense unambiguous for a non-technical parent

Left unchanged (no findings, already clean): all other `site.join.\*` keys,
`site.footer.privacy`, `site.footer.flyer`, `site.footer.trust`, `site.footer.copyright`.

Keep-literal rules honored: KhelSutra, the verbatim watermark "Generated by Khelsutra.guru", HTTPS, Google Drive / OneDrive / Microsoft 365 / Dropbox / Amazon S3 / Google Cloud, SD (in "SD ?????"), Bengaluru rendered as ?????, India as ????, and the symbols/emoji `· © ? ?` plus `© 2026` all preserved. No HTML tags introduced; warm de-jargoned register retained.
