Localize this badminton academy flyer to Danish (Dansk). Punchy + faithful to the website voice.

10     After B3 (#70, 2026-06-21), the localization catalogs are the single source of truth
at repo-root `~/locales/{en,kn,hi,es,da,id}/common.json` (D-CATALOG-HOME). Both surfaces
consume them:
11
12     - SPA (`web/`): web/src/i18n/index.ts imports ../../../locales/<lng>/common.json
directly. Vite resolves the workspace root via the repo .git marker, so dev/build/vitest all
read the parent-dir JSON. web/src/i18n/hygiene.test.ts reads /locales for key-parity +
placeholder-parity (+ an es 3-form plural check). Adding a key to en means adding it to ALL
locales or these tests fail.
13     - Marketing site (`site/`, dependency-free): site/scripts/copy-locales.mjs mirrors

```

`/locales` ? `site/public/locales/` (`npm run copy:locales`; `predeploy` hook). The committed copy is what ships; `site/src/locales-drift.test.js` fails CI if it drifts. The shim `site/public/i18n.js` (vanilla `t()`/`data-i18n`, ICU-lite via `Intl.PluralRules`) fetches those at runtime; `server.js` does Accept-Language negotiation (cookie??lang?Accept-Language?en) and stamps ``.

14
15 **Negotiation contract (both surfaces, identical):** persisted (`localStorage`/cookie key `kheIsutra.lang`) ? `?lang=` ? navigator/Accept-Language ? `en`; a missing key degrades to en, never a raw key.
16
17 **Marketing content is en-only so far (B3):** the `site.\*` namespace in the catalogs is authored in en; non-en `site.\*` values are en seeds **pending translation (tracker A3)**. The SPA console strings (app/query/grid/footer/?) ARE translated for kn/hi/es/da/id. Because the SPA bundles the whole `common.json`, it also ships the (unused) `site.\*` keys ? negligible.
18
19 Catalog files are a **contention hotspot** across i18n PRs ? see [[shared-checkout-concurrency]].

I have the context I need. The catalogs follow ICU-lite placeholder conventions and the Danish site strings are already shipped. Now I'll produce the Danish flyer localization, reusing the reference wording for overlapping lines and preserving all inline HTML exactly.

Structured output provided successfully

Danish localization complete for all 29 keys. Highlights of the approach:

- **Reused shipped site voice verbatim** where lines overlapped: the golden rule (`golden`), the consent + watermark sentences merged into `priv` (matching the reference `consent` + `watermark`), and the hero/rally/reel/court terminology ("duel" for rally, "highlights-reel"/"reels", "bane" for court, "den døde tid væk", "ingen redigering, ingen spoling").
- **Preserved inline HTML exactly**: `- \*\*Kept verbatim per instructions\*\*: KheIsutra, kheIsutra.guru/capture, WhatsApp, Instagram, 1080p, the "Generated by KheIsutra.guru" watermark, Bengaluru (Latin spelling), and the symbols `? . &` plus the `English, ?????, ?????` language list.
- **Tone**: punchy and warm for the marketing context ? e.g. `ctaPill` "Prøv det & fortæl os hvad du synes", `ctaH2` "Test det på din egen bane ? og vær med til at forme det, vi bygger næste gang."

One note: the flyer's `chip3s` uses a literal `&` (not `&`;) in the source, so I kept it as-is, while `lead`/`qrSmall` retain `&` as HTML source per the instructions.
