Adversarial Indonesian (Bahasa Indonesia) reviewer of a privacy policy. Be strict ? defects only, one lens.
LENS ? INTEGRITY: inline HTML preserved exactly (tags/attributes incl. mailto: + /privacy hrefs); keep-literal tokens
(KhelSutra, Cloudflare, Google, Gemini API, HTTPS, TLS, GPU, © 2026, ?) intact; PROPER NOUNS (Bengaluru/India) match the
locale's established spelling CONSISTENTLY across all keys; plain keys carry no HTML; no stray untranslated English; no raw key.

This is a PRIVACY POLICY ? plain-language but legally meaningful. Translate faithfully; do NOT weaken, strengthen, or drop any commitment (the emphatic words matter: "never", "only", "explicit opt-in", "we do not sell").

KEEP THESE EXACTLY ? never translate or transliterate:

- Brand/contacts: KhelSutra, khelsutra.guru, hello@khelsutra.guru.
- Providers/tech, verbatim: Cloudflare, "Cloudflare Web Analytics", Google, "Gemini API", Gemini, HTTPS, TLS, GPU, API.
- Symbols: © 2026, emoji ?, the · separators.
- PROPER NOUNS must match the locale's ESTABLISHED spelling already shipped on the site ? see the

REFERENCE "site_footer_tagline": render "Bengaluru" and "India" exactly as they appear there for THIS locale

(e.g. kn uses ???????/????, hi ???????/????, da Indien; es/id keep Bengaluru/India in Latin). Be consistent across ALL keys.

- Reuse the locale's established terms from the REFERENCE for "footage", "minors", "publish", "improve the tool", "opt-in", "alpha".

Several values contain inline HTML ? preserve every tag EXACTLY (same tag, same attributes incl. the

mailto: and /privacy hrefs), translating only the human-readable text between tags. The keys with markup carry and/or

 (e.g. lead, *.li1?li3, *.note, rights.note, changes.body). All OTHER keys are PLAIN text ? add no HTML.

Return {"issues":[{"key, severity, problem, suggestion}]} . Only real defects under THIS lens; empty if clean.

I'll review the Indonesian draft against the integrity lens. Let me check the reference for the established spelling of proper nouns first.

The reference consistently uses "Bengaluru" and "India" in Latin script for the id locale. Now let me verify the established Indonesian terms for key vocabulary by checking the existing id locale file for terms like footage, minors, opt-in, alpha, publish.

6. assistant (2026-06-22T17:09:58.681Z)

The draft is consistent with the reference: "alfa", "reli", "reel", "Bengaluru", "India" all match. Now let me carefully verify the integrity aspects of the draft itself ? HTML tags, attributes, keep-literal tokens, and check for any stray English or raw keys. Let me scan each HTML-bearing key methodically.

Let me check the draft for the key integrity concerns. I'll verify the HTML tags and hrefs are exact.

The draft keys with HTML I need to verify:

```

- `lead`: `` tags
- `use.li1/li2/li3`, `use.note`: `` tags
- `video.li2/li3/li4`: `` tags
- `sharing.li1/li2`, `sharing.note`: `` tags
- `cookies.li1/li2`: `` tags
- `minors.body`, `security.body`: `` tags
- `rights.note`, `changes.body`: `mailto:` hrefs

```

Let me carefully compare the `**` tag boundaries between English and the draft, since misplaced bold is an integrity defect. I'll examine specifically the tricky ones.**

In English `collect.li1`: `**Request-access details</b>` ? draft `**Detail permintaan akses</b>` ? matched.****

Let me look at `collect.li2`: English `**Match videos you choose to give us</b>` ? draft `**Video pertandingan yang kamu pilih untuk kamu berikan</b>` ? bold opens and closes correctly.****

All `**` pairs in the draft appear balanced. Let me verify there are no leftover English words or missing literal tokens by scanning the draft text values for the required keep-literal tokens.**

Checking keep-literal tokens in the draft:

```

- KhelSutra: present in back, sub, lead, footTrust ? intact
- Cloudflare: collect.li3, sharing.li1, cookies.li2 ? intact ("Cloudflare Web Analytics" intact in cookies.li2)
- Google / Gemini API: video.li2 ("Gemini API milik Google"), sharing.li2 ("Google (Gemini API)") ? intact
- HTTPS: security.body, footTrust ? intact

Now the one item under this lens worth flagging: in `lead`, the English is `KhelSutra ("we", "us")` and the draft renders `KhelSutra ("kami")`. That's a translation/fidelity matter, not integrity (tokens/HTML/proper-noun/raw-key). Under the strict integrity lens, that's out of scope.

Let me double check there are no raw untranslated English fragments or raw keys. Scanning all draft values ? everything is rendered in Indonesian except the keep-literal tokens, which is correct. "browser" appears in `cookies.li1` ("browser-mu") and `collect.li3` ("jenis browser") ? "browser" is an accepted loanword in Indonesian and also appears in the reference; not a defect. "host" appears in `sharing.li1` ("menjadi host") ? also acceptable Indonesian usage.

"reel"/"reel-mu" matches reference. "edge" in `collect.li3`/`sharing.li1` ? used in English source as "edge-security"; acceptable.

The integrity lens checks pass: all inline HTML tags/attributes preserved, all keep-literal tokens intact, proper nouns (Bengaluru/India) match the established Latin spelling consistently, no plain key carries HTML, no stray untranslated English, no raw keys.

No defects found under the integrity lens. The Indonesian draft is clean:

- All inline HTML preserved exactly ? the `[?</b>` pair is balanced and correctly placed around the same emphasized spans as the English.](mailto:hello@kheldutra.guru)
- Keep-literal tokens intact and untranslated: KhelSutra, Cloudflare, "Cloudflare Web Analytics", Google, Gemini API, HTTPS, TLS, GPU, API, © 2026, ?, and the . separators in `footTrust`.
- Proper nouns match the locale's established Latin spelling consistently ? "Bengaluru" and "India" in `lead`, matching the shipped reference (`locales/id/common.json` footer tagline: "Bengaluru, India").
- Plain keys (e.g. `title`, `home`, all `toc.\*`, headings) carry no HTML.
- No stray untranslated English (loanwords "browser"/"host"/"edge"/"reel" are consistent with the established id locale, not untranslated leftovers) and no raw i18n keys.
