REVIEWER FINDINGS (accuracy/fluency/integrity):

```

[
{
  "key": "site.hero.lead",

```

```

    "severity": "medium",
    "problem": "The English 'strips out the knock-ups, walks and gaps' is rendered as 'elimina los calentamientos, los desplazamientos y las pausas'. 'knock-ups' specifically means the pre-game warm-up rallies/hitting (badminton 'knock-up'), and 'calentamientos' (warm-ups) is an acceptable rendering. However 'walks' (players walking between points / dead-time movement) is translated as 'desplazamientos' (movements/commutes), which loses the intended sense of idle walking/dead-time between rallies. Minor meaning drift but the overall 'dead time' claim survives.",
    "suggestion": "Consider 'los calentamientos, las caminatas y las pausas' or rephrase 'walks' as the idle walking between points to preserve the dead-time sense.",
    "lens": "accuracy"
  },
  {
    "key": "site.record.settings.body",
    "severity": "low",
    "problem": "English '<b>30 fps</b>' for badminton (60 fps for table tennis)' ? the source pairs only badminton with 30fps in this short version. The translation faithfully keeps this. No defect, but note the parenthetical '(60 fps para tenis de mesa)' correctly preserves the claim. Re-verified: accurate. (Listed only to confirm no dropped unit; not an actual issue.)",
    "suggestion": "No change needed.",
    "lens": "accuracy"
  },
  {
    "key": "site.ownModel.train.moat.privateBody",
    "severity": "low",
    "problem": "English 'training use is explicit opt-in, never automatic' is rendered 'el uso para entrenamiento es una aceptación explícita, nunca automática'. 'opt-in' as 'aceptación explícita' is acceptable and preserves the consent promise; the 'never automatic' caveat survives. Faithful ? no real defect.",
    "suggestion": "Optionally 'es una adhesión/consentimiento explícito' but current wording is accurate.",
    "lens": "accuracy"
  },
  {
    "key": "site.hero.lead",
    "severity": "low",
    "problem": "\"Sin edición, sin adelantar y retroceder\" ? the parallel structure breaks: the first item is a noun (\"edición\"), the second a verb phrase (\"adelantar y retroceder\"). It reads slightly off-balance for the punchy ad-copy register of the English \"No editing, no scrubbing.\".",
    "suggestion": "Make both parallel nouns: \"Sin edición, sin tener que rebobinar.\" or \"Sin edición ni rebobinados.\" (\"rebobinar\"/\"avanzar\" is the natural term for scrubbing through video for a coach/parent audience).",

KEEP THESE EXACTLY ? never translate or transliterate:

- Brand/URLs: KhelSutra, khelsutra.guru, and the verbatim watermark "Generated by Khelsutra.guru".
- Tools/proper nouns: VLC, "VLC 3.0.x", "Rally Annotator", rally-annotator, rally_annotator.lua, WASB, WhatsApp.
- Models/licences/acronyms: Gemini, GPT, LLM, GPU, CPU, MIT, Apache, BSD, CLI, CSV.
- Everything inside `...` stays byte-identical (the ending_reason enum values unknown/winner/forced_error/unforced_error/service_fault/let/other, <video>.rallies.csv, "extensions", file paths).
- Numbers & units literal: 1080p, 30 fps, 60 fps, ~30°, 0.1.0. Keyboard keys literal: Ctrl/Cmd + P; "PDF" stays.
- VLC UI button/menu labels that appear in the page's screenshots STAY IN ENGLISH (translate the

surrounding text):

"Mark START", "Mark END", "Save Rally", "Edit / Delete / Undo", "Reload extensions",
"View ? Rally Annotator", "Tools ? Plugins and extensions".

- Symbols/emoji kept as-is: ? · ? ? ? ° ? ?.

- Sport names MAY take their natural local form (e.g. Spanish "bádminton", "tenis de mesa") ?
that is correct localization, not a violation.

Preserve every inline HTML tag EXACTLY ? same tags, same attributes, same order:

, <i>, , <code>, , and <b style="color:#EAF3EE">. Translate
ONLY the human-readable
text between tags. Keep </> entities and the literal text inside <code> unchanged. A link
request access keeps the same href; only the link text is translated.

Return {"translations": { "<dotted key>": "<final value>", ... }} with ALL 115 keys.

2. assistant (2026-06-22T03:24:19.648Z)

I'll apply the reviewer findings. Let me work through each flagged key and produce the final translations.

Based on the reviewer findings, I'll fix these keys:

- `site.hero.lead` ? "walks" ? "caminatas"; parallel structure "Sin edición ni rebobinados"
- `site.record.settings.body` ? better onomatopoeia for the shuttle "thwack"
- `site.record.intro` ? "Coloca la cámara así una sola vez"
- `site.ownModel.heroLead` ? "pila" ? "base tecnológica"
- `site.ownModel.train.moat.cleanBody` ? "Pila" ? "Base tecnológica"
- `site.ownModel.train.pill` ? "pipeline" ? "flujo" (apply uniformly to audience-facing pipeline strings)
- `site.ownModel.annotate.body` ? "etiquetas de oro" ? "etiquetas de referencia"
- `site.ownModel.train.moat.privateBody` ? rephrase opt-in

For "pipeline" consistency, I'll apply "flujo" uniformly across audience-facing strings
(train.pill, train.intro, train.honestBody, setup.train).

3. user (2026-06-22T03:25:10.837Z)

Structured output provided successfully

4. assistant (2026-06-22T03:25:22.535Z)

I've applied all the reviewer findings and returned the complete set of 115 keys via StructuredOutput.

Summary of the fixes applied:

Accuracy

- `site.hero.lead` ? "walks" changed from "desplazamientos" to "caminatas" to preserve the idle dead-time-between-points sense.

Fluency

- `site.hero.lead` ? parallel structure fixed: "Sin edición ni rebobinados." (two parallel nouns, punchier register).
- `site.record.settings.body` ? weak onomatopoeia "el 'toc'" replaced with "el sonido seco del golpe al volante" for the shuttle's thwack.
- `site.record.intro` ? reordered to "Coloca la cámara así una sola vez" (natural word order).
- `site.ownModel.heroLead` ? "pila" (battery/pile calque) ? "base tecnológica" for the lay audience.
- `site.ownModel.train.moat.cleanBody` ? "Pila únicamente MIT/Apache/BSD" ? "Base tecnológica solo con licencias MIT/Apache/BSD".
- `site.ownModel.annotate.body` ? "etiquetas de oro" calque ? "etiquetas de referencia" (ground-truth sense).
- `site.ownModel.train.moat.privateBody` ? stilted "es una aceptación explícita" ? "se activa solo con tu consentimiento explícito, nunca de forma automática".
- "pipeline" anglicism resolved consistently to "flujo" across all four audience-facing strings: `train.pill`, `train.intro`, `train.honestBody`, and `setup.train`.

****No-change findings**** (reviewer confirmed accurate): ``site.record.settings.body`` unit preservation and ``site.ownModel.train.moat.privateBody`` opt-in sense ? both kept faithful.

All keep-literal rules were honored: brand/URLs, tool/proper nouns, ``<code>`` contents (enum values, file paths), VLC UI labels in English, numbers/units, symbols/emoji, and every inline HTML tag (``<b>``, ``<i>``, ``<a href>``, ``<span class="hl">``, ``<b style="color:#EAF3EE">``) preserved exactly. All other clean keys left unchanged.
