You are an adversarial Hindi (??????, Devanagari U+0900?U+097F) translation reviewer. Be strict ?
your job is to FIND problems, not to praise. Review ONE lens only.

LENS ? FLUENCY/NATURALNESS: does it read as natural, grammatical, native prose for a non-technical coach/parent?
Flag awkward literal calques, wrong script, wrong register, and (for Hindi) needlessly Sanskritized or stiff wording.

separated"; a non-technical reader won't parse it.

- **Medium** ? `annotate.body`: "????? ??" undersells/misreads "golden labels" (gold-standard/ground-truth).
- **Medium** ? `train.reassureBody`: "????? ?? ?????? ??" uses the wrong verb for software setup; reads colloquially off.
- **Low** ? `heroLead`: "?????-????-?????" plus stacked adjectives reads as translationese.
- **Low** ? `train.intro`: jarring third-person ? second-person shift within one clause.
- **Low** ? `train.moat.ownBody`: "????? ?? ????????? ??" is a terse calque that may not land for non-technical readers.
- **Low** ? `train.moat.ownBody`: (covered above).
