You are an adversarial Indonesian (Bahasa Indonesia) translation reviewer. Be strict ? find problems, don't praise. Review ONE lens only.

LENS ? FLUENCY/NATURALNESS: does it read as natural, idiomatic, grammatical native Indonesian (Bahasa Indonesia) for a non-technical coach/parent? Flag awkward literal calques, anglicisms where a native term exists, wrong register, and inconsistent terminology vs the app-console reference (e.g. the word used for "rally"/"reel").

ENGLISH SOURCE (dotted key ? value):

```

```

Rules the translation must obey:

KEEP THESE EXACTLY ? never translate or transliterate:

- Brand/URLs: KhelSutra, khelsutra.guru, and the verbatim watermark "Generated by Khelsutra.guru".
- Tools/proper nouns: VLC, "VLC 3.0.x", "Rally Annotator", rally-annotator, rally_annotator.lua, WASB, WhatsApp.
- Models/licences/acronyms: Gemini, GPT, LLM, GPU, CPU, MIT, Apache, BSD, CLI, CSV.
- Everything inside `...` stays byte-identical (the ending_reason enum values unknown/winner/forced_error/unforced_error/service_fault/let/other, <video>.rallies.csv, "extensions", file paths).
- Numbers & units literal: 1080p, 30 fps, 60 fps, ~30°, 0.1.0. Keyboard keys literal: Ctrl/Cmd + P; "PDF" stays.
- VLC UI button/menu labels that appear in the page's screenshots STAY IN ENGLISH (translate the surrounding text):
 - "Mark START", "Mark END", "Save Rally", "Edit / Delete / Undo", "Reload extensions", "View ? Rally Annotator", "Tools ? Plugins and extensions".
- Symbols/emoji kept as-is: ? · ? ? ? ° ? ?.
- Sport names MAY take their natural local form (e.g. Spanish "bádminton", "tenis de mesa") ? that is correct localization, not a violation.

Preserve every inline HTML tag EXACTLY ? same tags, same attributes, same order:

, <i>, , <code>, , and <b style="color:#EAF3EE">. Translate ONLY the human-readable text between tags. Keep </> entities and the literal text inside <code> unchanged. A link request access keeps the same href; only the link text is translated.

Return {"issues":[{"key, severity (high|medium|low), problem, suggestion}]}. Only real defects under THIS lens; empty if clean.

2. assistant (2026-06-22T03:23:52.962Z)

I'll review the Indonesian translation for fluency and naturalness. Let me check the app-console reference for terminology consistency first.

7. assistant (2026-06-22T03:24:06.858Z)

I now have the app-console reference. Key terminology established in the console: "reli" (rally), "reel" (reel, kept as-is), "bulu tangkis" (badminton), "sorotan" is used for "highlight" in shareText ("reel sorotan"), but "highlight" is also left untranslated in some app strings. "Bagikan ke WhatsApp" (console) vs "Bagikan di WhatsApp" (under review). Let me now analyze the translation under review for fluency issues.

Let me note the key reference points:

- Console: `"share": "Bagikan ke WhatsApp"` ? under review uses `"Bagikan di WhatsApp"`
- Console: `"reel sorotan"` for "highlight reel"; under review uses `"reel highlight"` (anglicism)
- Console: `"sorotan"` used for highlights; under review uses `"highlight"` (untranslated)

Now I'll compile the fluency/naturalness issues.

8. user (2026-06-22T03:24:38.387Z)

Structured output provided successfully

9. assistant (2026-06-22T03:24:47.833Z)

I reviewed the Indonesian translation under the fluency/naturalness lens and cross-checked terminology against the app-console reference at
`C:\Users\avidu\Projects\khelsutra\locales\id\common.json`.

Key findings (returned via StructuredOutput):

****Terminology inconsistency with the console (highest-impact):****

- `site.reveal.share`: "Bagikan **di** WhatsApp" vs console's "Bagikan **ke** WhatsApp" (line

63) ? the share-action collocation is "agikan ke", and "agikan di" is a calque of "Share on".
- `site.reveal.shareText` / `site.hero.lead`: "reel **highlight**" leaves "highlight" as an untranslated anglicism, where the console consistently uses "reel **sorotan**" (line 64).

****Awkward literal calques:****

- `site.hero.lead`: "jeda berjalan" for "walks" reads as "walking pause" ? unclear to a coach/parent.
- `site.capture.dont1`: "Genggam tangan" literally means "grip the hand" ? not idiomatic for "handheld".
- `site.ownModel.train.intro`: "label-labelmu memberi makan model" is a literal calque of "labels feed a model".
- `site.record.still.body`: "menjadi acuan alat ini" mis-renders "what the tool is tuned for".

****Register/anglicism nits (low):**** bare "stack" and "default" as jargon for the stated non-technical audience; "Tips:" where singular "Tip:" fits.

The "reli"/"reel"/"bulu tangkis" base terminology is otherwise applied consistently with the console.
