1. user (2026-06-22T15:59:34.113Z)

You are a professional Danish (Dansk) localizer for KhelSutra, a badminton-highlights product (invite-only alpha, Bengaluru). Localize two small surfaces for a NON-technical coach/parent: the Request-Access form (storage/compute questions) and the site footer. Warm, plain, reassuring ? never scary or jargon-y.

SOURCE ? English, keyed by dotted key (translate the human-readable text of ALL 20 keys):

```
{  
  "site.join.gpuLabel": "Do you have a powerful computer that could process videos on its own?",  
  "site.join.gpuHint": "A gaming PC or laptop with a graphics card. No worries if not ? we can  
run it in the cloud for you.",  
  "site.join.gpuYes": "Yes ? a gaming PC or laptop with a graphics card",  
  "site.join.gpuUnsure": "Not sure",  
  "site.join.gpuNo": "No",  
  "site.join.gpuCloud": "No ? please run it in the cloud for me",  
  "site.join.storageLabel": "Where do your match videos live? How would you share them?",  
  "site.join.storageHint": "(pick any)",  
  "site.join.storageGdrive": "Google Drive",  
  "site.join.storageOnedrive": "OneDrive / Microsoft 365",  
  "site.join.storageDropbox": "Dropbox",  
  "site.join.storageBucket": "A cloud storage bucket ? advanced (e.g. Amazon S3, Google Cloud)",  
  "site.join.storageLocal": "SD card or the device itself",  
  "site.join.storageUnsure": "Not sure",  
  "site.footer.tagline": "Automatic badminton highlights · Bengaluru, India",  
  "site.footer.capture": "Capture checklist",  
  "site.footer.privacy": "Privacy",  
  "site.footer.flyer": "Academy flyer (print):",  
  "site.footer.trust": "? Served securely over HTTPS · ? Run from Bengaluru, India · Reels carry  
a \"Generated by Khelsutra.guru\" mark",  
  "site.footer.copyright": "© 2026 KhelSutra · Invite-only alpha"  
}
```

REFERENCE ? already-shipped Danish (Dansk) strings from the SAME product. Reuse this terminology and register

(esp. how "rally"/"reel"/"video"/"alpha"/"Request access"/the nav labels were rendered) so it reads as one product:

```
{  
  "app": {  
    "badge": "vælg dine dueller · alfa",  
    "title": "Vælg duellerne til din reel"  
  },  
  "grid_rally": "Duel {n}",  
  "ingest_title": "Behandl en video",  
  "result_ready": "Din reel er klar",
```

```

"lang": {
  "label": "Sprog"
},
"site_nav": {
  "how": "Sådan fungerer det",
  "ownModel": "Din egen model",
  "flyer": "Flyer",
  "faq": "FAQ",
  "requestAccess": "Anmod om adgang"
},
"site_hero_eyebrow": "Alfa ? kun med invitation · Bengaluru"
}

```

KEEP THESE EXACTLY ? never translate or transliterate:

- Brand/URLs: KhelSutra, khelsutra.guru, and the verbatim watermark "Generated by Khelsutra.guru". HTTPS stays HTTPS.
- Product names (storage providers, verbatim): "Google Drive", "OneDrive / Microsoft 365", "Dropbox", "Amazon S3", "Google Cloud". "SD card" keeps "SD".
- Place: Bengaluru stays "Bengaluru" (the country name "India" may take its natural local form).
- Symbols/emoji kept as-is: · © ? ?. The year "© 2026" stays literal.
- This is a NON-technical Request-Access form (already de-jargoned in English: "a powerful computer" instead of "GPU", "run it in the cloud" instead of server-speak). Keep that warm, plain, reassuring register ? do NOT re-introduce jargon. There is NO HTML markup in these strings (plain text only) ? do not add any tags.

Output {"translations": { "<dotted key>": "<translated value>", ... }} covering ALL 20 keys, nothing else.

2. assistant (2026-06-22T15:59:37.589Z)

I'll translate all 20 keys into Danish, reusing the shipped terminology and keeping the warm, non-technical register.

3. user (2026-06-22T15:59:46.644Z)

Structured output provided successfully

4. assistant (2026-06-22T15:59:55.979Z)

I've completed the Danish localization of all 20 keys and returned them via the StructuredOutput tool.

A few notes on the key choices, for register and consistency with the shipped strings:

- **"reel"** kept as-is (footer.trust uses "Reels") ? matching the shipped `result\_ready`: "Din reel er klar".
- **"alfa"** (lowercase) ? matching the shipped badge "vælg dine dueller · alfa" and `site\_hero\_eyebrow` "Alfa ? kun med invitation". For the copyright I used "Alfa kun med invitation" mirroring the hero's "kun med invitation" phrasing.
- **Non-technical register preserved**: "kraftig computer", "k\u00f8ber vi det i skyen for dig" ? no GPU/server jargon reintroduced.
- **Protected terms untouched**: KhelSutra, Khelsutra.guru watermark, HTTPS, storage provider names, "SD"-kort, the · © ? ? symbols, and literal "© 2026".
- **"India"** rendered in its natural Danish form "Indien" (allowed by the brief); **"Bengaluru"** kept verbatim.
- **storageBucket**: "cloud-lagerspand" with the "avanceret" flag preserved, keeping the advanced-user signposting from the source.
