You are a professional Indonesian (Bahasa Indonesia) localizer for KhelSutra, a badminton-highlights product (invite-only alpha, Bengaluru). Localize two small surfaces for a NON-technical coach/parent: the Request-Access form (storage/compute questions) and the site footer. Warm, plain, reassuring ? never scary or jargon-y.

SOURCE ? English, keyed by dotted key (translate the human-readable text of ALL 20 keys):

```
{  
  "site.join.gpuLabel": "Do you have a powerful computer that could process videos on its own?",  
  "site.join.gpuHint": "A gaming PC or laptop with a graphics card. No worries if not ? we can  
run it in the cloud for you.",  
  "site.join.gpuYes": "Yes ? a gaming PC or laptop with a graphics card",  
  "site.join.gpuUnsure": "Not sure",  
  "site.join.gpuNo": "No",  
  "site.join.gpuCloud": "No ? please run it in the cloud for me",  
  "site.join.storageLabel": "Where do your match videos live? How would you share them?",  
  "site.join.storageHint": "(pick any)",  
  "site.join.storageGdrive": "Google Drive",  
  "site.join.storageOnedrive": "OneDrive / Microsoft 365",  
  "site.join.storageDropbox": "Dropbox",  
  "site.join.storageBucket": "A cloud storage bucket ? advanced (e.g. Amazon S3, Google Cloud)",  
  "site.join.storageLocal": "SD card or the device itself",  
  "site.join.storageUnsure": "Not sure",  
  "site.footer.tagline": "Automatic badminton highlights · Bengaluru, India",  
  "site.footer.capture": "Capture checklist",  
  "site.footer.privacy": "Privacy",  
  "site.footer.flyer": "Academy flyer (print):",  
  "site.footer.trust": "? Served securely over HTTPS · ? Run from Bengaluru, India · Reels carry  
a \"Generated by Khelsutra.guru\" mark",  
  "site.footer.copyright": "© 2026 KhelSutra · Invite-only alpha"  
}
```

REFERENCE ? already-shipped Indonesian (Bahasa Indonesia) strings from the SAME product. Reuse this terminology and register (esp. how "rally"/"reel"/"video"/"alpha"/"Request access"/the nav labels were rendered) so it reads as one product:

```
{  
  "app": {  
    "badge": "pilih reli kamu · alfa",  
    "title": "Pilih reli untuk reel kamu"  
  },  
  "grid_rally": "Reli {n}",  
  "ingest_title": "Proses video",  
}
```

```

"result_ready": "Reel kamu siap",
"lang": {
  "label": "Bahasa"
},
"site_nav": {
  "how": "Cara kerjanya",
  "ownModel": "Miliki modelmu sendiri",
  "flyer": "Flyer",
  "faq": "FAQ",
  "requestAccess": "Minta akses"
},
"site_hero_eyebrow": "Alfa khusus undangan · Bengaluru"
}

```

KEEP THESE EXACTLY ? never translate or transliterate:

- Brand/URLs: KhelSutra, khelsutra.guru, and the verbatim watermark "Generated by Khelsutra.guru". HTTPS stays HTTPS.
- Product names (storage providers, verbatim): "Google Drive", "OneDrive / Microsoft 365", "Dropbox", "Amazon S3", "Google Cloud". "SD card" keeps "SD".
- Place: Bengaluru stays "Bengaluru" (the country name "India" may take its natural local form).
- Symbols/emoji kept as-is: · © ? ?. The year "© 2026" stays literal.
- This is a NON-technical Request-Access form (already de-jargoned in English: "a powerful computer" instead of "GPU", "run it in the cloud" instead of server-speak). Keep that warm, plain, reassuring register ? do NOT re-introduce jargon. There is NO HTML markup in these strings (plain text only) ? do not add any tags.

Output {"translations": { "<dotted key>": "<translated value>", ... }} covering ALL 20 keys, nothing else.

2. assistant (2026-06-22T15:59:36.950Z)

I'll localize these strings into Indonesian. Let me check the reference terminology first, then provide all 20 translations.

3. user (2026-06-22T15:59:44.205Z)

Structured output provided successfully

4. assistant (2026-06-22T15:59:50.663Z)

I've localized all 20 keys into Indonesian (Bahasa Indonesia) and returned them via the StructuredOutput tool.

Key decisions for consistency with the shipped product:

- Reused "Reel" (capitalized, matching `result\_ready`: "Reel kamu siap") in the footer trust line, and "Alfa khusus undangan" to match the shipped hero eyebrow.
- Kept the warm, informal `kamu`/`untukmu`/`untukku` register from the reference strings rather than formal `Anda`.
- Preserved all brand names, product names, URLs, the verbatim watermark, HTTPS, Bengaluru, and all symbols/emoji (· © ? ?) exactly.
- Kept it jargon-free: "komputer yang cukup bertenaga", "jalankan di cloud", "kartu grafis" ? no GPU/server-speak reintroduced.
