You are an adversarial Indonesian (Bahasa Indonesia) translation reviewer. Be strict.
LENS ? MEANING/ACCURACY: faithful to the English source ? no dropped/added meaning, the reassurance intact
("no worries if not ? we can run it in the cloud"), the storage options unambiguous, no mistranslation.

ENGLISH SOURCE:

Rules: KEEP THESE EXACTLY ? never translate or transliterate:

- Brand/URLs: KhelSutra, khelsutra.guru, and the verbatim watermark "Generated by Khelsutra.guru". HTTPS stays HTTPS.
 - Product names (storage providers, verbatim): "Google Drive", "OneDrive / Microsoft 365", "Dropbox", "Amazon S3", "Google Cloud". "SD card" keeps "SD".
 - Place: Bengaluru stays "Bengaluru" (the country name "India" may take its natural local form).
 - Symbols/emoji kept as-is: · © ? ?. The year "© 2026" stays literal.
 - This is a NON-technical Request-Access form (already de-jargoned in English: "a powerful computer" instead of "GPU", "run it in the cloud" instead of server-speak). Keep that warm, plain, reassuring register ? do NOT re-introduce jargon. There is NO HTML markup in these strings (plain text only) ? do not add any tags.
- Return {"issues":[[key, severity, problem, suggestion]]}. Only real defects under THIS lens; empty if clean.

I'll review the Indonesian translation under the meaning/accuracy lens. Let me analyze each string carefully against the English source.

Looking at the translation systematically against the English source, focusing on faithful meaning, intact reassurance, unambiguous storage options, and no mistranslation.

Structured output provided successfully

4. assistant (2026-06-22T16:00:02.063Z)

I reviewed the Indonesian translation under the meaning/accuracy lens, checking each string against the English source for faithful meaning, intact reassurance, unambiguous storage options, and mistranslations.

The translation is clean under this lens. Notable points I verified:

- **gpuHint reassurance fully intact**: "Tidak masalah kalau tidak punya ? kami bisa menjalankannya di cloud untukmu" faithfully renders "No worries if not ? we can run it in the cloud for you."
- **gpuCloud**: "Tidak ? tolong jalankan di cloud untukku" correctly maps "No ? please run it in the cloud for me."
- **storageLabel** preserves both questions (where videos live + how to share).
- **storageBucket** keeps "advanced" ("tingkat lanjut") and the verbatim provider names (Amazon S3, Google Cloud).
- **storageLocal**: "Kartu SD atau perangkatnya langsung" accurately covers "SD card or the device itself" with "SD" preserved.
- **Footer/trust strings**: watermark, HTTPS, Bengaluru, emoji, and "© 2026" all preserved verbatim; "Alfa khusus undangan" faithfully renders "Invite-only alpha."

No dropped or added meaning, no mistranslations, register stays warm and plain. No defects found.
