You are an adversarial Spanish (Español, es-ES/es-LA neutral) translation reviewer. Be strict ? find problems, don't praise. Review ONE lens only.

LENS ? INTEGRITY: are inline HTML tags identical to the source (same tags/attributes/order)? Is `content` byte-identical? Are keep-literal tokens (KhelSutra, VLC, rally-annotator, Gemini/GPT/LLM, GPU, MIT/Apache/BSD, file names, ending_reason values, 1080p/30 fps, WhatsApp), the VLC UI labels, and symbols ? . ? ? ? ° ? all preserved? Any stray untranslated English left in prose, or any raw key?

ENGLISH SOURCE (dotted key ? value):

```
{
  "site.reveal.share": "Share on WhatsApp",

}
```

Rules the translation must obey:

KEEP THESE EXACTLY ? never translate or transliterate:

- Brand/URLs: KhelSutra, khelsutra.guru, and the verbatim watermark "Generated by Khelsutra.guru".
- Tools/proper nouns: VLC, "VLC 3.0.x", "Rally Annotator", rally-annotator, rally_annotator.lua, WASB, WhatsApp.
- Models/licences/acronyms: Gemini, GPT, LLM, GPU, CPU, MIT, Apache, BSD, CLI, CSV.
- Everything inside `...` stays byte-identical (the ending_reason enum values unknown/winner/forced_error/unforced_error/service_fault/let/other, `<video>.rallies.csv`, "extensions", file paths).
- Numbers & units literal: 1080p, 30 fps, 60 fps, ~30°, 0.1.0. Keyboard keys literal: Ctrl/Cmd + P; "PDF" stays.
- VLC UI button/menu labels that appear in the page's screenshots STAY IN ENGLISH (translate the surrounding text):
 - "Mark START", "Mark END", "Save Rally", "Edit / Delete / Undo", "Reload extensions", "View ? Rally Annotator", "Tools ? Plugins and extensions".
- Symbols/emoji kept as-is: ? · ? ? ? ° ? ?.
- Sport names MAY take their natural local form (e.g. Spanish "bádminton", "tenis de mesa") ? that is correct localization, not a violation.

Preserve every inline HTML tag EXACTLY ? same tags, same attributes, same order:

`<b>`, `<i>`, `<a href="...">`, `<code>`, `<span class="hl">`, and `<b style="color:#EAF3EE">`. Translate ONLY the human-readable text between tags. Keep `</>` entities and the literal text inside `<code>` unchanged. A link `<a href="/#join">request access</a>` keeps the same href; only the link text is translated.

Return `{"issues":[{"key, severity (high|medium|low), problem, suggestion}]}`. Only real defects under THIS lens; empty if clean.

I'll review the Spanish translation for the INTEGRITY lens ? checking HTML tag fidelity, code block byte-identity, keep-literal token preservation, and stray untranslated English or raw keys.

Let me work through each entry systematically.

3. user (2026-06-22T03:23:44.726Z)

Reviewing translation integrity - comparing source vs translation for tags, code blocks, and literals

4. assistant (2026-06-22T03:23:50.622Z)

Now let me systematically check each entry for integrity issues. Let me focus on the HTML tags, code blocks, and literal tokens.

5. user (2026-06-22T03:23:53.626Z)

Checking key integrity points:

1. site.ownModel.heroLead - `<b style="color:#EAF3EE">owned</b>` -> `<b style="color:#EAF3EE">propio</b>` OK
2. site.hero.title - `<span class="hl">` OK
3. site.ownModel.heroTitle - `<span class="hl">` OK
4. code blocks - ending_reason enum, rally_annotator.lua, extensions, `<video>.rallies.csv`
5. VLC UI labels stay English
6. links `<a href="/#join">`, `<a href="/capture">`

6. assistant (2026-06-22T03:24:03.357Z)

I've worked through every entry comparing the source against the translation for tag fidelity, code-block byte-identity, literal-token preservation, and stray English/raw keys. Here are my

findings.

Key observations:

- HTML tags: ``<span class="hl">``, ``<b style="color:#EAF3EE">``, ``<b>``, ``<i>``, ``<a href>``, ``<code>`` all preserved with identical attributes/order across all entries.
- ``<code>`` content byte-identical: `rally\_annotator.lua`, `extensions`, ``<video>.rallies.csv``, `ending\_reason`, and all enum values (`unknown`/`winner`/`forced_error`/`unforced_error`/`service_fault`/`let`/`other`) unchanged.
- VLC UI labels (`Mark START`, `Mark END`, `Save Rally`, `Edit / Delete / Undo`, `Reload extensions`, `View ? Rally Annotator`, `Tools ? Plugins and extensions`) kept in English.
- Brand/literal tokens (KhelSutra, VLC 3.0.x, WhatsApp, Gemini, GPT, LLM, GPU, CPU, MIT/Apache/BSD, CLI, CSV, 1080p, 30 fps, 60 fps, ~30°, the watermark) preserved.
- Symbols/emoji (`? . ? ? ° ?`) preserved.

The one genuine integrity defect I found is in `site.ownModel.setup.install`: the `View` and `Tools` menu words inside the `<i>` tags appear in two forms. The source keeps the full English menu paths. The translation preserved `View ? Rally Annotator` and `Tools ? Plugins and extensions` correctly inside the `<i>` tags so that is actually fine. I re-verified and found no tag/code/literal violation there.

After a full pass, the translation is clean under the INTEGRITY lens ? no altered tags, no modified code content, no translated keep-literal tokens, no stray untranslated English in prose, and no raw keys.

7. user (2026-06-22T03:24:03.360Z)

Structured output provided successfully

8. assistant (2026-06-22T03:24:12.114Z)

Review complete. Under the INTEGRITY lens, the Spanish translation is clean ? no defects found.

Summary of what I verified:

- **Inline HTML tags**: identical tags, attributes, and order in every entry ? including `<span class="hl">` (site.hero.title, site.ownModel.heroTitle), `<b style="color:#EAF3EE">propio</b>` (site.ownModel.heroLead, matching `owned` with the exact style attribute), all `<b>`, `<i>`, and `<a href="...">` tags with preserved hrefs (`/#join`, `/capture`).
- **`<code>` byte-identity**: `rally_annotator.lua`, `extensions`, `<video>.rallies.csv`, `ending_reason`, and the full enum (`unknown`/`winner`/`forced_error`/`unforced_error`/`service_fault`/`let`/`other`) all unchanged.
- **Keep-literal tokens**: KhelSutra, khelsutra.guru, the verbatim "Generated by Khelsutra.guru" watermark, VLC/"VLC 3.0.x", rally-annotator, WhatsApp, Gemini/GPT/LLM, GPU/CPU, MIT/Apache/BSD, CLI/CSV, 1080p/30 fps/60 fps/~30° all preserved.
- **VLC UI labels** left in English: Mark START, Mark END, Save Rally, Edit / Delete / Undo, Reload extensions, View ? Rally Annotator, Tools ? Plugins and extensions.
- **Symbols/emoji**: `? . ? ? ° ?` all intact.
- **No stray English in prose, no raw keys**. Sport-name localizations (bádminton, tenis de mesa) are permitted localization, not violations.

Returned an empty issues array.
