Senior Danish (Dansk) localizer: apply the findings, fix flagged keys, leave clean keys unchanged, obey the keep-literal rules.

ENGLISH:

```
{  
  "site.join.gpuLabel": "Do you have a powerful computer that could process videos on its own?",  
  "site.join.gpuHint": "A gaming PC or laptop with a graphics card. No worries if not ? we can  
run it in the cloud for you.",  
  "site.join.gpuYes": "Yes ? a gaming PC or laptop with a graphics card",  
  "site.join.gpuUnsure": "Not sure",  
  "site.join.gpuNo": "No",  
  "site.join.gpuCloud": "No ? please run it in the cloud for me",  
  "site.join.storageLabel": "Where do your match videos live? How would you share them?",  
  "site.join.storageHint": "(pick any)",

}

```

FINDINGS:

```

[
  {
    "key": "site.join.storageBucket",
    "severity": "medium",
    "problem": "\\\"cloud-lagerspand\\\" literally back-translates as \\\"cloud storage bucket/pail\\\"
? \\\"spand\\\" is the everyday Danish word for a physical bucket/pail, which reads oddly and
slightly comically here. While the English deliberately uses the technical term \\\"bucket\\\" (this
option is flagged \\\"advanced\\\"), translating it to the literal household-bucket word \\\"spand\\\"
risks confusing the meaning rather than conveying the intended cloud-storage-container sense. A
Danish reader would more naturally understand \\\"cloud-lagerplads\\\" or keeping \\\"bucket\\\" as the
known technical term.",
    "suggestion": "En cloud-lagerbøtte/bucket ? avanceret (f.eks. Amazon S3, Google Cloud) ? or
more clearly: En cloud-lagerplads (bucket) ? avanceret (f.eks. Amazon S3, Google Cloud)",
    "lens": "accuracy"
  },
  {
    "key": "site.join.storageBucket",
    "severity": "high",
    "problem": "\\\"En cloud-lagerspand\\\" is an awkward, unidiomatic literal calque of \\\"storage
bucket\\\". \\\"Spand\\\" (a physical pail/bucket) reads as nonsense to a Danish coach/parent in a
storage context ? it does not convey \\\"cloud storage container\\\". This is the kind of jarring
word-for-word translation that breaks the warm, plain register.",
    "suggestion": "Reword to natural Danish, e.g. \\\"En cloud-lagerplads ? avanceret (f.eks.
Amazon S3, Google Cloud)\\\" or \\\"Cloud-lagring (en bucket) ? avanceret (f.eks. Amazon S3, Google
Cloud)\\\". Keep it plain rather than coining \\\"lagerspand\\\".",
    "lens": "fluency"
  },
  {
    "key": "site.footer.copyright",
    "severity": "medium",
    "problem": "\\\"Alfa kun med invitation\\\" reads as a stiff, slightly disjointed word order.
The English \\\"Invite-only alpha\\\" is a tight label; the Danish lands awkwardly with the bare
\\\"Alfa\\\" leading. Word order feels like a calque rather than natural Danish phrasing.",
    "suggestion": "More natural: \\\"Alfa ? kun efter invitation\\\" or \\\"Lukket alfa (kun med
invitation)\\\". Using \\\"efter invitation\\\" reads more idiomatically than \\\"med invitation\\\".",
    "lens": "fluency"
  },
  {
    "key": "site.footer.trust",
    "severity": "low",
    "problem": "\\\"Reels bærer et ... -mærke\\\" is understandable but \\\"bærer et mærke\\\" is a
slightly literal rendering of \\\"carry a mark\\\". It is acceptable, but in plain Danish \\\"har et
...-mærke\\\" or \\\"er forsynet med et ...-mærke\\\" flows more naturally for a non-technical
reader.",
    "suggestion": "Consider \\\"Reels har et \\\"\\\"Generated by Khelsutra.guru\\\"\\\"-mærke\\\" for a
slightly more natural, plain register. Optional polish.",
    "lens": "fluency"
  }
]

```

KEEP THESE EXACTLY ? never translate or transliterate:

- Brand/URLs: KhelSutra, khelsutra.guru, and the verbatim watermark "Generated by Khelsutra.guru". HTTPS stays HTTPS.
- Product names (storage providers, verbatim): "Google Drive", "OneDrive / Microsoft 365", "Dropbox", "Amazon S3", "Google Cloud". "SD card" keeps "SD".
- Place: Bengaluru stays "Bengaluru" (the country name "India" may take its natural local form).

- Symbols/emoji kept as-is: · © ? ?. The year "© 2026" stays literal.
- This is a NON-technical Request-Access form (already de-jargoned in English: "a powerful computer" instead of "GPU",
"run it in the cloud" instead of server-speak). Keep that warm, plain, reassuring register ? do NOT re-introduce
jargon. There is NO HTML markup in these strings (plain text only) ? do not add any tags.
Return {"translations": { "<dotted key>": "<final value>", ... }} with ALL 20 keys.

2. assistant (2026-06-22T16:00:20.097Z)

I'll review the findings and apply the fixes to produce the final Danish translations.

Looking at the findings:

1. ****site.join.storageBucket**** (medium + high severity): "cloud-lagerspand" is an awkward literal calque. I'll reword to natural Danish keeping "bucket" as the technical term per the suggestion.
2. ****site.footer.copyright**** (medium): "Alfa kun med invitation" has awkward word order. I'll use "Alfa ? kun efter invitation" form.
3. ****site.footer.trust**** (low): "bærer et mærke" is slightly literal. Optional polish to "har et ...-mærke".

The remaining keys are clean and stay unchanged. I'll honor the keep-literal rules (brand/URLs, product names, place names, symbols, watermark verbatim, no jargon, no HTML).

3. user (2026-06-22T16:00:27.417Z)

Structured output provided successfully

4. assistant (2026-06-22T16:00:35.833Z)

I've applied the findings and returned all 20 Danish keys via the structured output.

Summary of changes from the draft:

- ****site.join.storageBucket**** (high/medium findings): Reworded the awkward calque "En cloud-lagerspand" to natural Danish ? "Cloud-lagring (en bucket) ? avanceret (f.eks. Amazon S3, Google Cloud)", keeping "bucket" as the recognized technical term and dropping the comical "spand" (household pail).
- ****site.footer.copyright**** (medium finding): Fixed the stiff word order "Alfa kun med invitation" ? "Alfa ? kun efter invitation" for more idiomatic phrasing.
- ****site.footer.trust**** (low finding): Polished "Reels bærer et ...-mærke" ? "Reels har et ...-mærke" for a plainer register.

All other keys were clean and left unchanged. Keep-literal rules honored: brand/URLs (KhelSutra, the verbatim "Generated by Khelsutra.guru" watermark, HTTPS), product names (Google Drive, OneDrive / Microsoft 365, Dropbox, Amazon S3, Google Cloud, SD), Bengaluru, and all symbols/emoji (· © ? ?, © 2026) preserved. Warm plain register kept with no re-introduced jargon and no HTML added.
