This is a PRIVACY POLICY ? plain-language but legally meaningful. Translate faithfully; do NOT weaken, strengthen, or drop any commitment (the emphatic words matter: "never", "only", "explicit opt-in", "we do not sell").

KEEP THESE EXACTLY ? never translate or transliterate:

- Brand/contacts: KhelSutra, khelsutra.guru, hello@khelsutra.guru.
- Providers/tech, verbatim: Cloudflare, "Cloudflare Web Analytics", Google, "Gemini API", Gemini, HTTPS, TLS, GPU, API.
- Symbols: © 2026, emoji ?, the . separators.

- PROPER NOUNS must match the locale's ESTABLISHED spelling already shipped on the site ? see the

REFERENCE "site_footer_tagline": render "Bengaluru" and "India" exactly as they appear there for THIS locale

(e.g. kn uses ??????/????, hi ??????/????, da Indien; es/id keep Bengaluru/India in Latin). Be consistent across ALL keys.

- Reuse the locale's established terms from the REFERENCE for "footage", "minors", "publish", "improve the tool", "opt-in", "alpha".

Several values contain inline HTML ? preserve every tag EXACTLY (same tag, same attributes incl. the

mailto: and /privacy hrefs), translating only the human-readable text between tags. The keys with markup carry and/or

 (e.g. lead, *.li1?li3, *.note, rights.note, changes.body). All OTHER keys are PLAIN text ? add no HTML.
Return {"translations": { ... ALL 63 keys ... }}.

I'll review the findings and apply fixes to the flagged keys while leaving clean keys unchanged. Let me first check the reference for established proper-noun spellings.

Let me find the Hindi locale files in the repo to confirm established proper-noun spellings.

9. assistant (2026-06-22T17:11:12.416Z)

The established Hindi spellings are ???????? (Bengaluru) and ???? (India). The draft already uses ????????, ???? correctly in `site.privacy.lead`. Let me also check the established terms for "footage", "minors", "opt-in", "alpha", "publish", "improve the tool".

????????",

Structured output provided successfully

I applied all four findings and left every clean key unchanged.

1. ****site.privacy.video.intro**** (fluency) ? Reordered to verb-final and tightened the relative clause: "...????? ??? ??? ???? ?? ???? ???" became "...????? ?????????? ?? ??? ???? ??????????? ??????, ?????? ???? ??? ??? ??? ???? ??". (Also adopted "????? ?????????? ?? ???" over the looser "????????? ?????????? ?? ???".)

2. `**site.privacy.use.li3**` (fluency) ? Folded the dangling "???" inside the bolded clause: now "`<b>??? ?????? ??? ? ? ? ? ? ? ? ? ? ? ? ? ? ? ? ? ? ? ? ? ? ? </b>`" (???, ...)" ? the `<b>...</b>` markup is preserved, with the qualifier no longer stranded after the closing tag.

3. **site.privacy.security.body** (fluency) ? "????? ?????" became "????????? ?????" (idiomatic for defence-in-depth). The `<b>HTTPS</b>` tag and the literal ``TLS`` are preserved.

4. ****site.privacy.collect.li2**** (fluency) ? Tightened the doubled participle + relative clause to a single clause that keeps the "choose to" agency: "???? ???? ??? ??? ?????? ?? ?? ????? ?????" became "??? ?????? ?? ?? ????? ????? ?????? ?????".

Verification notes:

- Proper nouns match the established site spellings confirmed in `C:\Users\avidu\Projects\khelsutra\locales\hi\common.json`: ???????? (Bengaluru), ??? (India), and the reused glossary terms ????? (footage), ????? (minors), ????? (publish), ??? ?
- ????? (improve the tool), ???-? (opt-in), ????? (alpha).
- All keep-literal tokens left verbatim: KheISutra, hello@khelsutra.guru, Cloudflare, "Cloudflare Web Analytics", Google, "Gemini API", HTTPS, TLS, GPU, API, © 2026, ?, and the . separators.
- All inline HTML preserved exactly (same tags/attributes, including both `mailto:` hrefs); plain keys received no added markup.
- Legal force unchanged ? "never / only / explicit opt-in / we do not sell" rendered with full emphatic weight, including the bolded ??? / ?? ? negations.
- All 63 keys returned.
