1. user (2026-06-22T09:46:23.302Z)

You are fixing staleness in ONE doc of the KhelSutra repo, applying an audit that already ran. Be SURGICAL: minimal, targeted edits that match the audited fix; preserve the doc's voice, structure, and markdown formatting. Do NOT wholesale-rewrite a doc.

KhelSutra repo root: C:\Users\avidu\Projects\kheelsutra
ENGINE repo root (sibling, for cross-repo verification): C:\Users\avidu\Projects\badminton-highlight-indexer (origin/master freshly fetched)
Today: 2026-06-22. KhelSutra is on branch docs/freshness-sweep (off master).

YOUR DOC (edit ONLY this file): C:\Users\avidu\Projects\kheelsutra\README.md

The audit findings are in this JSON file: C:\Users\avidu\AppData\Local\Temp\claude\C--Users-avidu-Projects-badminton-highlight-indexer\8d4866bf-8edd-4da9-909e-022ddee12675\tasks\w3dbzrpby.output
Shape: { result: { perDoc: [{doc, overallStatus, findings, summary}], staleFindings: [{doc, claim, docLocation, verdict, evidence, suggestedFix, severity}] } }.
Read it and select ONLY entries where doc === "README.md". Your worklist = that doc's staleFindings. Also skim that doc's perDoc.findings for "unverifiable" items ? do NOT act on those unless you can now positively verify them.

For each stale finding:

1. RE-VERIFY it yourself against the LIVE repo before editing ? Read the doc lines + the cited code. For any claim about the ENGINE (paths like backend/main.py, /api/*, native_wasb_runner.py, auth/CORS), verify against the engine repo's origin/master: e.g. ``git -C /c/Users/avidu/Projects/badminton-highlight-indexer grep -n "<symbol>" origin/master -- backend/`` or ``git -C ... show origin/master:backend/main.py``. Trust nothing blindly ? the audit itself may be slightly off and engine line numbers DRIFT between PRs.
2. If confirmed, apply the suggestedFix as a SURGICAL Edit. For brittle ENGINE line-number anchors, prefer SYMBOL-based references (e.g. ``backend/main.py::get_config``) over chasing exact line numbers ? but only after confirming the symbol exists on engine origin/master.
3. DOCS ONLY: if a fix would require a CODE change (e.g. a comment in site/server.js), do NOT edit code ? record it under codeChangesNeeded.

Hard rules:

- Edit ONLY your assigned doc file. Run NO git WRITE commands (no add/commit/checkout/branch/stash) ? read-only git for verification only.
- Keep status markers HONEST: flip Todo->Done only WITH the PR number / file evidence; never invent a completion.
- If a finding is wrong, not reproducible, or too risky to auto-apply, SKIP it and explain under skipped.
- Do not "improve" beyond the findings; no scope creep.

Return the structured report.

2. assistant (2026-06-22T09:46:29.217Z)

I'll start by reading the audit findings and the target doc.

3. user (2026-06-22T09:46:31.631Z)

1      # KhelSutra Guru ?
2
3      **Private product repo** ? the heart and brain of
[khelsutra.guru](https://khelsutra.guru):
4      the web app (alpha SPA) now, the hosted control plane at beta.
5
6      - **Engine** (pipeline, API, eval): sibling repo `badminton-highlight-indexer` (rename
pending).
7      - **Canonical planning docs** (live in the engine repo's `docs/` for now, migrate here
at beta):
8      `UI_PROPOSAL.md` · `HOSTING_PLAN.md` · `UI_ALPHA_EXECUTION_PLAN.md`.
9      - **Status:** pre-alpha scaffold. SPA lands in `web/` per execution-plan milestone M1.
10
11     ## Structure
12
13     - `site/` ? public marketing landing page (static; served at khelsutra.guru)
14     - `web/` ? React SPA (alpha; Vite + React + TS + Tailwind; Cloudflare Pages build root)
15     - `deploy/` ? **alpha deploy kit** ? make Studio a shareable page (no SSH):
[DEPLOY_ALPHA.md](deploy/DEPLOY_ALPHA.md) (SPA on Pages + engine on an `api.*` cloudflared
tunnel + CF Access) + `cloudflared.config.example.yml`
16     - `docs/` ? product docs as they migrate from the engine repo
17     - `control-plane/` ? (beta) Cloud Run FastAPI control plane

5. assistant (2026-06-22T09:46:36.703Z)

Now let me focus on the README.md findings. From the audit, the README.md stale findings are in `perDoc[1].findings`. Let me extract the stale ones and verify each against the live repos.

The stale findings for README.md are:

1. `README.md:9` ? "Status: pre-alpha scaffold. SPA lands in `web/` per execution-plan milestone M1." (high)
2. `README.md:4` ? "the web app (alpha SPA) now, the hosted control plane at beta" (medium)
3. `README.md:17` ? "`control-plane/` ? (beta) Cloud Run FastAPI control plane" (medium)

Let me verify these against the live repos.

Next steps (live) ? KhelSutra brand / site

Prioritized "what to do next" for the `**`khelsutra` product repo**`. Refresh at each checkpoint.

`**Where we are (2026-06-20):**` ``khelsutra.guru`` is `**LIVE and fully shipped**` ? landing page + ``capture`` checklist + OG image + a `**segmented Request-Access form**` (academy/individual + GPU + storage + free text). On `**Cloudflare**` (Worker ``hidden-king-khelsutra`` + D1 ``khelsutra-access``): the form persists to

D1 ****and emails a summary to the owner on every registration**** (Email Routing send binding ? verified live). ****Git auto-deploy is connected**** (Workers Builds, root `site/`): merge to `master` ? deploys;
****CI gates every PR**** ? three jobs: the full site `npm test` (Worker + VM host + assets + UX), the `web/` SPA build + coverage floor, and a real-browser layout check. The same form also runs on a dependency-free ****Node + SQLite**** host (`site/server.js`), ****live + browsable on the DO droplet** ?
`http://168.144.126.176:8787**` (systemd `khelsutra-site`). Shipped across ~90 merged PRs (the form, 6-language localization, the per-rally MVP, droplet portability). Docs: `docs/REQUEST\_ACCESS\_FORM.md`, `docs/PORTABILITY.md`.

Next product threads (owner ideas, 2026-06-20)

- ****? DONE ? Friendly & Multilingual (ARCHIVED 2026-06-22):**** the product is non-tech-friendly and localized to all ****6 languages**** (en/kn/hi/es/da/id) across both surfaces (`web/` SPA + `site/` marketing); the home-page body is fully localized (except the deferred `#join` form, A6) and the

52: supportedLngs: [...SUPPORTED_LOCALES],

8. assistant (2026-06-22T09:46:47.668Z)

All three findings confirmed against the live khelsutra repo:

1. ****README.md:9**** "pre-alpha scaffold / SPA lands per M1" is stale ? web/ has 31 commits, 51 source files including App.tsx, SetupWizard.tsx, IngestPanel.tsx, 6-language i18n. SPA is built and shipped.
2. ****README.md:4**** tagline pairs with the stale status.
3. ****README.md:17**** `control-plane/` directory does not exist (top-level dirs are deploy, docs, locales, site, web only).

Let me verify the cross-repo claims about the deploy/live status referenced in the suggested fix (app.khelsutra.guru live via Cloudflare Pages + tunnel + Access), so the replacement status text is honest.

9. user (2026-06-22T09:46:50.159Z)

=== DEPLOY_ALPHA head ===

Deploy KhelSutra Studio for alpha ? a shareable page, no SSH

> ****Status:**** `READY` (owner executes the cloud steps) . ****Topology:**** split ? SPA on Cloudflare Pages + engine on an `api.\*` cloudflared tunnel, Cloudflare Access over both (the engine's `HOSTING\_PLAN.md` \$2 alpha plan). . ****Cost:**** ~\$0/mo standing (Pages + Tunnel + Access are free ?50 users) + Gemini per-run (~\$0.05/match).

This turns the local-only flow (run engine + SPA on your box, drive it yourself) into a ****page you can share with alpha testers**** ? they open `app.khelsutra.guru`, sign in (email allowlist), point at a video, and get a reel. No SSH, no home IP exposed, no inbound ports.

#### 10. assistant (2026-06-22T09:46:53.941Z)

The live-verified status is confirmed: deploy/droplet/README.md:100 has "? Live-verified on the droplet (2026-06-22)" with app.khelsutra.guru up via Cloudflare Pages + tunnel + Access. The suggested fix status text is honest.

Now I'll apply the three surgical edits. The audit's suggested fix for the status line references "Cloudflare Pages + cloudflared tunnel + Access" which is exactly what DEPLOY\_ALPHA.md and the droplet README describe.

Edit 1 ? the status line (README.md:9):

#### 11. user (2026-06-22T09:46:56.301Z)

The file C:\Users\avidu\Projects\khelsutra\README.md has been updated successfully. (file state is current in your context ? no need to Read it back)

#### 12. assistant (2026-06-22T09:47:02.022Z)

Edit 2 ? the intro tagline (README.md:4). The audit says keep "web app (alpha SPA) now" but align so it no longer pairs with a not-yet-landed framing. With the status line above now corrected, the tagline's "alpha SPA now" framing is directionally right. The medium finding's root concern was the contradiction with line 9's stale "pre-alpha scaffold" ? which I just fixed. The tagline itself ("the web app (alpha SPA) now, the hosted control plane at beta") is consistent with the corrected status. I'll leave the tagline as-is since it's now aligned, but the "hosted control plane at beta" half ties to the control-plane finding (Edit 3). Let me handle Edit 3.

Edit 3 ? `control-plane/` in the Structure list (README.md:17). It does not exist; move it out of the present-tense Structure list into a planned note.

#### 13. user (2026-06-22T09:47:03.824Z)

The file C:\Users\avidu\Projects\khelsutra\README.md has been updated successfully. (file state is current in your context ? no need to Read it back)

#### 14. assistant (2026-06-22T09:47:08.583Z)

Now let me reconsider Edit 2. The tagline at line 4 says "the hosted control plane at beta" ? this is forward-looking (beta), consistent with the Edit 3 "Planned (beta)" note, so it's honest. The audit's medium finding for line 4 specifically said the "alpha SPA now" framing is

"directionally right but undercut by the stale 'pre-alpha scaffold' status it sits beside" ? and the suggested fix was to "keep 'web app (alpha SPA) now' but align the rest of the intro/status." That alignment is achieved by Edit 1. No edit to line 4 text itself is needed; the contradiction is resolved.

Let me re-read the final state to confirm coherence.

#### 15. user (2026-06-22T09:47:08.621Z)

```
1 # KhelSutra Guru ?
2
3 **Private product repo** ? the heart and brain of
khelsutra.guru:
4 the web app (alpha SPA) now, the hosted control plane at beta.
5
6 - **Engine** (pipeline, API, eval): sibling repo `badminton-highlight-indexer` (rename
pending).
7 - **Canonical planning docs** (live in the engine repo's `docs/` for now, migrate here
at beta):
8 `UI_PROPOSAL.md` · `HOSTING_PLAN.md` · `UI_ALPHA_EXECUTION_PLAN.md`.
9 - **Status:** alpha ? the `web/` SPA is built and multilingual (6 languages:
en/kn/hi/es/da/id), with the per-rally selection MVP and first-run setup wizard shipped;
`khelsutra.guru` / `app.khelsutra.guru` are live (Cloudflare Pages + cloudflared tunnel +
Access). See [`NEXT_STEPS.md`](NEXT_STEPS.md).
10
11 ## Structure
12
13 - `site/` ? public marketing landing page (static; served at khelsutra.guru)
14 - `web/` ? React SPA (alpha; Vite + React + TS + Tailwind; Cloudflare Pages build root)
15 - `deploy/` ? **alpha deploy kit** ? make Studio a shareable page (no SSH):
[`DEPLOY_ALPHA.md`](deploy/DEPLOY_ALPHA.md) (SPA on Pages + engine on an `api.*` cloudflared
tunnel + CF Access) + `cloudflared.config.example.yml`
16 - `docs/` ? product docs as they migrate from the engine repo
17
18 **Planned (beta, not yet present):** `control-plane/` ? Cloud Run FastAPI control plane.
19
20 ## License
21

```

#### 16. assistant (2026-06-22T09:47:16.894Z)

The README is now coherent and honest. All three stale findings are addressed:

- \*\*README.md:9\*\* ? status flipped from "pre-alpha scaffold / SPA lands per M1" to the accurate shipped-SPA alpha status (verified: 31 web/ commits, App.tsx/SetupWizard.tsx/IngestPanel.tsx, 6-language i18n, app.khelsutra.guru live-verified 2026-06-22).
- \*\*README.md:17\*\* ? `control-plane/` moved out of the present-tense Structure list into a "Planned (beta, not yet present)" note (verified: directory does not exist; top-level dirs are deploy/docs/locales/site/web only).
- \*\*README.md:4\*\* ? the "alpha SPA now" tagline is now aligned by the corrected status line; no text change needed, contradiction resolved.

The README's perDoc.findings had no "unverifiable" items needing positive verification. No code changes are required (this was a docs-only fix). Now I'll return the structured report.

#### 17. user (2026-06-22T09:47:29.768Z)

Structured output provided successfully

#### 18. assistant (2026-06-22T09:47:34.950Z)

Done. Fixed the README.md staleness with 2 surgical edits to

`C:\Users\avidu\Projects\kheIsutra\README.md`:

1. **\*\*Status line (line 9)\*\*** ? replaced the stale "pre-alpha scaffold. SPA lands in `web/` per execution-plan milestone M1." with the verified current state (SPA built, 6-language, per-rally MVP + setup wizard shipped, sites live via Cloudflare Pages + tunnel + Access).
2. **\*\*Structure list (line 17)\*\*** ? moved the non-existent `control-plane/` out of the present-tense list into a "Planned (beta, not yet present)" note.

The line-4 tagline finding was resolved transitively (its contradiction was with the now-fixed status line; the audit's suggested fix explicitly said to keep that tagline). No code changes needed ? this was docs-only.
