1. user (2026-06-22T03:49:17.551Z)

Adversarially verify this P2c review finding by reading the cited code in C:\\Users\\avidu\\Projects\\khelsutra-p2c yourself (run `cd C:\\Users\\avidu\\Projects\\khelsutra-p2c && git diff origin/master...HEAD`). Is it a REAL defect to fix, or a false alarm/nit? Default is_real=false if it doesn't hold up.

Lens: ally-ux
Severity(claimed): nit
Title: Copy honesty: claims are accurate and well-scoped (no fix needed)
File: locales/en/common.json:291-322
Detail: Verified the four honesty claims hold. (a) Offline motion needs no key: wizard.key.missing ? "that's fine. KhelSutra works offline with the built-in motion detector" and compute.noGpu ? "the offline motion detector runs on any computer" are truthful and reassuring. (b) Guided, not auto-save: wizard.key.how tells the user to add GEMINI_API_KEY=? to .env and restart, and the component (KeyStep) has NO save action / input ? matching the file-header note that the engine has no key-write endpoint. The link only opens aistudio. No false "saved"/"connected automatically" claim. (c) Local compute: compute.local ? "your videos never leave it" matches local-only processing. (d) gemini_key_present drives "Gemini is connected" only when the engine reports the bool true, and types.ts only ever exposes the presence bool, never the key value. No dishonest claim found ? listing as a nit for completeness, no change required.
Fix: No change needed.

2. assistant (2026-06-22T03:49:19.602Z)

I'll verify this finding by examining the actual code in the cited repository.

3. user (2026-06-22T03:49:21.108Z)

4. assistant (2026-06-22T03:49:23.461Z)

Let me read the actual cited code. I'll look at the locale file, the SetupWizard component, and the types.

5. user (2026-06-22T03:49:25.099Z)

10. assistant (2026-06-22T03:49:39.632Z)

All claims verified against the actual code. Let me confirm each of the four honesty claims the finding asserts:

****(a) Offline motion needs no key**** ? Verified at `locales/en/common.json:304` (`wizard.key.missing`) and `:315` (`compute.noGpu`). Truthful and reassuring.

****(b) Guided, not auto-save**** ? Verified. `wizard.key.how` (line 305) tells the user to add `GEMINI\_API\_KEY=?` to `.env` and restart. The `KeyStep` component (SetupWizard.tsx:24-48) has NO save action and NO input field ? it only renders a presence message and an external link to `https://aistudio.google.com/apikey`. No false "saved"/"connected automatically" claim. Matches the file-header note (lines 2-4) that the engine has no key-write endpoint.

****(c) Local compute**** ? Verified at `compute.local` (line 310): "Everything runs on this device ? your videos never leave it."

****(d) Presence bool only**** ? Verified. `gemini\_key\_present` drives the "connected" copy only when `caps?.gemini\_key\_present === true` (SetupWizard.tsx:26, 30). In `types.ts` (lines 56-57), the field is documented as "Whether a Gemini key is PRESENT (never its value)" and the interface only ever exposes the bool, never the key value.

The cited line range (291-322) exactly matches the `wizard` block in the diff. The finding itself explicitly states "No change needed" and lists it "as a nit for completeness." This is the reviewer documenting a *positive* observation (the copy is honest), not flagging a defect.

This is not a real defect to fix. The finding accurately verifies that the copy is honest ? there is no problem with the code, and the finding's own conclusion is that no change is required.

Structured output provided successfully

12. assistant (2026-06-22T03:49:52.284Z)

Verified. The finding does not hold up as a defect ? it is a positive verification note whose own conclusion is "No change needed."

I confirmed all four honesty claims against the actual code in
`C:\Users\avidu\Projects\khelsutra-p2c`:

- **(a)** Offline-needs-no-key copy is truthful (`locales/en/common.json:304` and `:315`), and the cited range 291-322 matches the added `wizard` block exactly.
- **(b)** The key step is guided setup, not auto-save: `KeyStep` (`SetupWizard.tsx:24-48`) has no input and no save action, only an external link ? matching the file-header note that the engine has no key-write endpoint.
- **(c)** Local-compute claim (`compute.local`, line 310) is accurate.
- **(d)** Only the presence bool drives the "connected" copy (`SetupWizard.tsx:26,30`); `types.ts:56-57` exposes `gemini\_key\_present` as a bool only, never the key value.

Returned via StructuredOutput: `is\_real=false`, `severity=nit`.
