The upgrade failed because `claude.exe` is in use (this running Claude Code session has the file locked). To upgrade:

- Exit this Claude Code session, then re-run `winget upgrade Anthropic.ClaudeCode` from a fresh terminal, ****or****
- Open a new terminal as Administrator and run the same command (won't help if the file is locked by the running process ? exiting first is the reliable path).

The download + hash verification succeeded (2.1.195); only the file replacement was blocked.
