CONTEXT ? two sibling repos on a Windows machine:

- INDEXER: C:/Users/avidu/Projects/badminton-highlight-indexer ? local AI badminton(->racket-sports) highlight indexer + rally detector. FastAPI + SQLite + ffmpeg + GPU CV via WSL; Gemini = paid cloud AI. docs/ tree is rich. Current branch docs/next-steps-multisport (master = main branch).

- COLLECTOR: C:/Users/avidu/Projects/sports-data-collector ? golden-label acquisition/curation/ingestion CLI (system-of-record candidate for training corpus).

Project state (June 2026): scaffolding complete; owned-model roadmap agreed (docs/OWNED_MODEL_IMPLEMENTATION_PLAN.md) but NO platform/owned-model implementation started; next committed platform slice = async job model. Licensing guardrail: MIT/Apache-2.0/BSD only for code+data+weights; paid LLMs are inference-only, never training-data sources. ENVIRONMENT RULES: this dev environment has NO GPU/torch/cv2 ? do NOT attempt to run the video pipeline or import torch/cv2 modules. Test suites are offline/fully-mocked and SAFE to run. You are READ-ONLY: never edit/create/delete repo files; running tests and git read commands is allowed.

QUALITY BAR: cite file paths (and line numbers where possible) for every finding. Report what IS in the code/docs, not what you assume. Be skeptical and concrete. Your final structured output is consumed programmatically by an orchestrator ? return raw data, not prose for a human.

ROLE: adversarial verifier. An auditor ("testing") claimed the finding below. Try to REFUTE it against the actual files. Default to isReal=false if the evidence does not hold up, the behavior is documented/deliberate (e.g. listed in docs/CODE_MAP.md gotchas or DEFERRED_HARDENING_PLAN.md as a known deferral ? unless the auditor adds genuinely NEW consequence), or the severity is materially overstated.

FINDING: {"title":"Backend is broken RIGHT NOW: SyntaxError in compiler.py makes the FastAPI app unimportable, and the 254-green suite never noticed","severity":"critical","area":"stitcher/compiler + suite blind spot","file":"C:/Users/avidu/Projects/badminton-highlight-

indexer/backend/pipeline/stitcher/compiler.py:100","evidence":"Lines 100 and 104 are malformed f-strings missing quotes: `logger.warning({segment\_label}: start\_time is negative ({start:.2f}s). Clamping to 0.)` ? `python -m py\_compile backend/pipeline/stitcher/compiler.py` fails with `SyntaxError: invalid decimal literal`, and `python -c \"import backend.main\"` fails the same way (main.py:28 imports VideoCompiler at module level). `python -m compileall backend` shows this is the ONLY syntax error in the tree. git blame: introduced by commit 7fbb0 'feat(logging): standardize to logging in hot paths' on 2026-06-07 (a print->logger conversion that dropped the f-string quotes). Meanwhile `python run\_all\_tests.py` reports '254 passed in 19.90s ? PASS all tests green'.","why_it_matters":"The server cannot start and /api/compile cannot run; this fatal regression shipped 3 days ago and the fully-green suite gives false confidence because zero tests import backend.main or the compiler module. A 1-line smoke test (`import backend.main` or compileall) would have caught it."}

Steps: open the cited file(s) and any counter-evidence files; verify quotes/line claims; judge severity honestly. Cheap greps allowed; do NOT run the pipeline. Return isReal, confidence, and a 1-3 sentence verdict (with corrected detail if partially right).

```

3. user (2026-06-10T05:41:22.241Z)

Exit code 1

```
File "C:\Users\avidu\Projects\badminton-highlight-  
indexer\backend\pipeline\stitcher\compiler.py", line 100  
    logger.warning({segment_label}: start_time is negative ({start:.2f}s). Clamping to 0.)  
                                                                    ^  
SyntaxError: invalid decimal literal
```

4. assistant (2026-06-10T05:41:30.035Z)

The SyntaxError is confirmed. Now let me verify the import chain (main.py), the git blame claim, and whether the test suite really stays green.

One more check ? confirm nothing in the repo imports backend.main in tests, and that this isn't a documented/known deferral.
