1. user (2026-06-21T19:12:53.048Z)

You are verifying ONE claim in khelsutra's deploy runbook (deploy/DEPLOY_ALPHA.md) against the REAL code the owner will deploy.

CRITICAL repo rules:

```
- Engine repo is at /c/Users/avidu/Projects/badminton-highlight-indexer. Its working tree is checked out on a STALE concurrent-session branch (12 commits behind master). DO NOT read the working tree for engine claims and DO NOT checkout/commit/modify anything there ? it is a shared checkout owned by another session.  
- To read what the owner actually deploys, read ENGINE origin/master ONLY, via:  
  git -C /c/Users/avidu/Projects/badminton-highlight-indexer grep -n "PATTERN" origin/master  
-- 'PATHGLOB'          (search master's tree)  
  git -C /c/Users/avidu/Projects/badminton-highlight-indexer show origin/master:PATH  
(read a master file)  
  git -C /c/Users/avidu/Projects/badminton-highlight-indexer log origin/master --oneline -i  
--grep="..."        (history)  
  (I already ran 'git fetch' so origin/master is current. Never fetch/checkout.)  
- khelsutra repo is at /c/Users/avidu/Projects/khelsutra, working tree is on clean master ? you MAY use Read/Grep/Glob directly there.
```

Be adversarial and literal: confirm the claim is TRUE for origin/master, with file:line evidence. If the doc says X but the code says Y, that is a 'discrepancy' ? capture it precisely. If something the owner must DO (beyond the doc's text) is implied, put it in owner_action_note. Verdict 'confirmed' only with concrete evidence; 'partial' if mostly true with a caveat; 'refuted' if wrong; 'unknown' if you genuinely could not determine it.

Check khelsutra doc/handoff FRESHNESS (this is the /c/Users/avidu/Projects/khelsutra repo, master). The session memory/handoff lists A3 and A6 as still-pending UX items, but git master shows A3 merged (#74, commit 1cd84af) and A6 merged (#75, commit aa8d5e9). Verify in /c/Users/avidu/Projects/khelsutra: (a) confirm A3 (#74) and A6 (#75) are indeed merged on master (git log); (b) read docs/FRIENDLY_AND_MULTILINGUAL.md §7 (the UX/l10n tracker) and report the CURRENT checkbox state of A3, A6, A7 (and any other A-items) ? which are ? vs ?; (c) specifically: is A7 (recording diagram) done or still open? (d) note any tracker line that is now stale vs merged reality. Keep evidence to file:line + commit hashes.

2. assistant (2026-06-21T19:12:55.440Z)

I'll verify the doc freshness claim. Let me start by checking the git history in khelsutra and reading the tracker doc.

3. user (2026-06-21T19:12:57.144Z)

```

5. assistant (2026-06-21T19:13:01.456Z)

Both A3 (#74, commit 1cd84af) and A6 (#75, commit aa8d5e9) are confirmed merged on master. Note A3's review commit (249007b) explicitly mentions "drift/coverage tests + tracker" ? meaning the tracker may have been updated in A3. Let me read the tracker doc §7.

 146
 147 **?? MILESTONE ? SPA fully trilingual (2026-06-21):** the `web/` Studio SPA now speaks **en + kn + hi** end to end (B1?B2?B4?B5?B6, all merged). A **Kannada-default browser auto-renders Kannada**, and the switcher walks **kn ? hi ? en ?** **proven by a Playwright screencast** with `locale: kn-IN` ('khelsutra-i18n-screencast.mp4'; frames captured per locale + `on the SPA surface. **B3** has since landed ? the `site/` marketing surface now carries the shared `t()/`data-i18n` shim, a persistent **en/kn/hi** switcher, and matching negotiation (client shim + `server.js`; \$6.5 **N8** green), with **en-only marketing content** for now (the shim/switcher/negotiation are the proof; **kn/hi marketing** translation rides **A3**). **A3** has since landed ? the `site/` recording-education (homepage gist + capture checklist) and the `site.` marketing copy now render in **kn + hi** (Noto bundled on the site), so a Kannada/Hindi browser auto-gets localized recording instructions. **Still open for the full \$9 DoD:** the remaining **non-tech UX A-items** (A2 WhatsApp share, A6 plain-language access form, A7 recording diagram), the **B5/B6 SPA-console** native-review pass (an adversarial audit during A3 surfaced fixable **kn/hi console-translation** bugs ? tracked separately), and a **native-speaker review** of all AI-drafted **kn/hi catalogs** before a wide public launch. Do **not** archive until both surfaces render **kn/hi content**. ? (both now do, pending native review).
 148
 149 **## 8. Open questions ? owner (blocking gates) `[design]`**
 150 **Status (2026-06-21):** 4 of 5 **LOCKED/ADOPTED** by the owner ? see \$2 (D6?D9). Only **D-BACKEND-DEPTH** remains open (and it's deferred, not a v1 blocker).
 151 1. **D-FONT ? ? LOCKED ?** (a) **OFL-for-media** carve-out, self-host Noto Sans Kannada/Devanagari (counsel may still confirm). An explicit exception to the MIT/Apache/BSD code guardrail (fonts = media). Unblocks B4/B5/A3 + the **kn/hi** reel watermark.
 152 2. **D-LOCALES ? ? LOCKED ?** `en` + `kn` for v1, `hi` next, always-fallback to `en` (both 2-form CLDR ? `hi` is catalog-only).
 153 3. **D-BACKEND-DEPTH ? ? OPEN (deferred, not a v1 blocker).** Recommend **customer verdict/report `customer\_` + validation-rejection reasons** first; technical/operator text stays English; phase two (engine repo, owner-gated ? tracker row B7).

10. assistant (2026-06-21T19:13:15.715Z)

I now have the complete picture. Let me note one detail in the milestone paragraph at line 147 ? it lists A6 as still open ("A6 plain-language access form") even though the A6 table row at line 135 is marked ? and #75 is merged. Let me confirm the milestone text precisely.

The milestone paragraph (line 147) says: "Still open for the full \$9 DoD: the remaining non-tech UX A-items (A2 WhatsApp share, A6 plain-language access form, A7 recording diagram)". This lists A6 as still open, but the A6 row (line 135) is ? Done with #75 merged. This is a stale line within the doc itself.

Let me also confirm the section heading is \$7 and verify there are no other A-items I missed.

11. user (2026-06-21T19:13:17.142Z)

[#68](https://github.com/avidullu/khelsutra/pull/68) |

12. assistant (2026-06-21T19:13:29.583Z)

I have all the evidence I need. Let me confirm the git merge state once more is unambiguous (the parenthetical "(#74)" / "(#75)" in commit subjects = squash-merge of those PRs onto master).

Findings:

(a) A3 and A6 merged on master: Confirmed. `git log master`:

- A3: commit `1cd84af` "feat(site): A3 ? localize recording-education + marketing to kn/hi, Noto on the site (#74)"
- A6: commit `aa8d5e9` "feat(site): A6 ? plain-language Request-Access GPU/storage questions (#75)"

(b) \$7 tracker checkbox state (`docs/FRIENDLY\_AND\_MULTILINGUAL.md`, section heading at line 124 "## 7. Deliverables & progress tracker"):

- A1 ? (#60), A2 ? (?), A3 ? (#74), A4 ? (#61), A5 ? (#62), A6 ? (#75), A7 ? (?), A8 ? (#63), A9 ? (#68). No A10+.

(c) A7 (recording diagram): Still OPEN ? line 136, A7 "Fix English-source recording gaps (add a placement diagram) before localizing" is ? Todo, PR cell "?". Also confirmed by git: no A7 commit exists on any branch.

(d) Stale line vs merged reality: The \$7 table rows are accurate. But the milestone paragraph at line 147 is internally stale: it lists **"A6"** plain-language access form" among the items "Still open for the full \$9 DoD" even though the A6 table row (line 135) is ? Done and #75 is merged. A7 is correctly listed as still open there; A6 should be dropped from that "still open" list.

The session-memory claim (the prompt's premise) that "memory/handoff lists A3 and A6 as still-pending" is itself stale vs git master ? both are merged. The doc tracker rows are already up to date; only the prose milestone at line 147 lags (lists A6 as still open).

13. user (2026-06-21T19:13:43.021Z)

<tool_use_error>InputValidationError: StructuredOutput was called with input that could not be parsed as JSON.

You sent (first 200 of 2577 bytes): {"claim": "Session memory/handoff lists A3 (#74) and A6 (#75) as still-pending UX items; verify they are merged on khelsutra master and report the \$7 tracker checkbox state for A3/A6/A7 and other A-it
Common causes: unescaped backslashes in file paths (use / or \\), unescaped control characters, or truncated output. Retry with valid JSON.</tool_use_error>

14. assistant (2026-06-21T19:13:46.354Z)

I malformed the JSON (used `evidence` as repeated keys instead of an array). Let me call it correctly.

15. user (2026-06-21T19:13:58.560Z)

Structured output provided successfully

16. assistant (2026-06-21T19:14:04.744Z)

Verification complete. Summary of findings:

(a) Both merged on khelsutra master ? A3 = commit `1cd84af` (#74), A6 = commit `aa8d5e9` (#75).

(b) \$7 tracker (`docs/FRIENDLY\_AND\_MULTILINGUAL.md`, heading at line 124) checkbox state: A1 ?(#60), A2 ?, A3 ?(#74), A4 ?(#61), A5 ?(#62), A6 ?(#75), A7 ?, A8 ?(#63), A9 ?(#68).

(c) A7 (recording placement diagram, line 136) is **still open** ? ? Todo, no PR, no commit on any branch.

(d) The \$7 tracker rows are accurate. The one stale line is the milestone prose at line 147, which still lists A6 among "Still open for the full \$9 DoD" despite A6/#75 being merged. The session-memory premise that A3/A6 are "still-pending" is itself stale ? both shipped; only A2 and A7 remain open A-items. Severity minor ? does not affect the deploy.
