Transcript

1. user (2026-07-02T03:16:59.069Z)

You are an adversarial verifier in a tech-debt audit of the multi-repo workspace at C:/Users/avidu/Projects/khelsutra-guru (repos: badminton-highlight-indexer, khelsutra, sports-data-collector, rally-annotator, sports-obsreport; non-git dirs 'Annotation Setup', khelsutra-screencast). Today is 2026-07-02. All repos are at origin head.
Default stance: REFUTE. A round-1 finder claimed (UNVERIFIED):
REPO: sports-data-collector
CLAIM: Collector pins obsreport as a plain PyPI requirement while the name is unclaimed on PyPI ? dependency-confusion window and install broken today
INVESTIGATION HINTS: Check requirements/pyproject in sports-data-collector for a bare "obsreport" pin; try pip index or check PyPI (WebFetch pypi.org/project/obsreport) to confirm unclaimed; contrast with the engine's git+ssh pin.
VERIFY against the CURRENT working tree: (1) reproduce the defect/debt from actual code at file:line; (2) check git log for a fix that already landed; (3) construct the concrete failure scenario or downgrade severity; (4) propose the correctly-scoped fix with effort S/M/L; (5) flag OWNER_GATED if it needs owner decisions (real cloud spend, product/strategy, counsel, Cloudflare dashboard).
HARD RULES: READ-ONLY ? no file modifications, no installs (pip download/index checks and WebFetch to pypi.org are OK), no test-suite runs. gh read-only OK. sqlite reads OK. CONFIRMED requires you personally observed the defect in current code/data; cite file:line for every claim.
